THIRD ANNUAL REPORT ILLINOIS STATE BOARD OF HEALTH.

· 1 18 8 / 1

GENERAL REPORT OF THE BOARD.

The State Board of Health has held, during the past year, its

regular quarterly meetings and two special meetings.

As in previous years, much of the time and attention of the Board have been necessarily given to the work required under the act for the regulation of medical practice. Examinations of candidates have been held at three quarterly meetings. Whole number of candidates examined during the year, 49; number passed and

licensed, 24.

A more careful examination has been made of medical schools accused of irregular practices, such as selling diplomas without study, or granting them after wholly insufficient periods of study. Six of the colleges thus under scrutiny have improved their course of instruction, and raised their requirements for graduation to meet the views of the Board. Thirteen colleges have been rejected as not in "good standing," and certificates refused to the holders of their diplomas. The Board has also taken steps to define with more precision, and in accordance with the standard of good and well accredited medical schools, the proper qualifications and conditions under which they may recognize a medical college as in good standing.

Certificates have been granted in due form to 480 practitioners, and 106 to midwives. Nine certificates formerly granted have been

revoked for cause, chiefly for unprofessional conduct.

The Board regrets that, by the 10 year exemption clause, their power under the law is limited to the recalling or annulling of the certificates given to those unprincipled and nefarious characters who, under the guise of physicians, prey upon the credulity and fears of the ignorant and unwary. Many of our newspapers are garnished with their false and flaming advertisements, often immoral and always delusive, and their victims by hundreds suffer in a silence which they dare not break. The attention of the public, and especially of the profession, is earnestly asked to the statements in the report of the Secretary of the operations of these harpies. Nothing but the vigorous coöperation of the medical profession can abate this evil.

Charges of unprofessional conduct have been received by the Board against nearly 100 of those holding certificates, and notifications have been served upon them, producing, in most cases, a stricter conformity with the medical law, and with professional standards.

The sanitary work of the Board has included inquiries into a marked form of fever which has prevailed in several parts of the

State, and also into the prevalence of "milk sickness." It has also embraced consultations with and advice to local health officers and boards of health as to means of arresting the spread of small-pox and other contagious and epidemic diseases which have prevailed in their several localities.

Analyses of drinking waters have also been made, and inquiries addressed to many parties in regard to this and other sanitary conlitions, the results of which may hereafter, when sufficiently matured, be published for the general good.

It is important that a thorough investigation shall be made into the causes prevalent in this State, of preventable diseases, and that the results of this investigation shall be published in a popular form and scattered among the people of the State. Ignorance of such matters often entails upon our citizens much suffering and becuniary loss.

This investigation, to be thorough and complete, should constitute inally a full sanitary survey of the State, and include all facts

pearing upon the health of the people.

HORACE WARDNER, John M. Gregory, W. M. CHAMBERS, Anson L. Clark, R. LUDLAM, NEWTON BATEMAN, John H. Rauch.

Abstract and Brief Account of the Proceedings of the Illinois State Board of Health.

DURING THE YEAR 1880.

REGULAR ANNUAL MEETING.

Springfield, January 8, 1880.

The State Board of Health held its annual meeting at Springfield, on the 8th day of January, 1880, at 2 P. M., and was called to order by Dr. Wardner, President.

Present—Drs. Chambers, Ludlam and Rauch.

The minutes of the last previous meetings were read and approved.

Dr. Ludlam introduced the following resolution, which was adopted:

Resolved, That after action has been taken revoking a certificate for cause, the Board cannot return the charges that have been made against the holder of said certificate.

The Board then proceeded to the consideration of the annual report to the Governor.

The Treasurer presented his quarterly report, with vouchers, which were examined and audited.

The charges made by Dr. Everett against Dr. Hardin were considered and discussed, and the Secretary was directed to inform Dr. Everett that unless the charges were regularly presented and sustained by affidavit, the Board would take no action concerning

Adjourned to evening.

SEVEN-THIRTY O'CLOCK P. M.

The Board reassembled at 7:30 P. M., when Dr. Gregory appeared and took his seat.

The following officers were elected for the ensuing year:

Dr. Horace Wardner, President. Dr. John H. Rauch, Secretary. Dr. Anson L. Clark, Treasurer.

Drs. Ludlam and Clark were appointed members of the Auditing Committee.

The Secretary presented his report on The Pollution of Streams, especially of the Illinois river by Chicago sewage, and was instructed to forward it to the city authorities of Chicago.

Adjourned to January 9, 1880.

State House, January 9, 1880.

The Board met, pursuant to adjournment, and was called to order by the President, Dr. Wardner.

Present—Drs. Chambers, Gregory, Ludlam, Rauch.

The Board was occupied nearly all day in transacting routine business, auditing accounts and considering charges against physicians.

Eight candidates for examination under the Medical Practice Act

presented themselves and were examined.

Certificates were issued to-

W. E. Buxton, of Samsville, Edwards county. M. W. Brubaker, of Waverly, Morgan county. G. J. Schaller, of Chicago, Cook county. Geo. W. Tucker, of Chicago, Cook county. On motion, adjourned.

Chicago, February 5, 1880.

A special meeting of the Illinois State Board of Health was held at Chicago, on the 5th day of February, 1880.

The President being absent, the Board was called to order by

Dr. Chambers, who was elected President pro tem.

Present—Drs. Bateman, Chambers, Clark, Gregory, Ludlam and Rauch.

The chairman announced that the special business before the Board was the investigation of charges of unprofessional and dishonorable conduct made against several physicians to whom the certificates of the Board had been issued.

The following memorial, from the Faculty of the Bennett Medical

College, of Chicago, was read:

To the Honorable the State Board of Health of the State of Itlinois:

To the Honorable the State Board of Health of the State of Illinois:

The relators, the officers and faculty of the Bennett Medical College of Chicago, respectfully represent that one John Bate, several years ago, applied for admission as a student to said College, and that such admission was at first denied to said Bate, for the reason that said Bate, for a long time prior thereto, had been practicing and advertising as a specialist in Chicago under the assumed and fictitious name of "A. G. Olin," or "Dr. Olin," That thereupon said John Bate solemnly professed to the faculty of said College that it was his intention and earnest desire to pursue a course of study in some medical school and graduate regularly, and, from thenceforth, to abandon the use of any fictitious name, and devote himself to the practice of medicine in his own name, and in an entiryly becoming manner do a reputable business; and said Bate promised to and agreed with said faculty that if he be allowed to pursue his course of study in said College, and if, upon passing the requisite examinations therefor, he be graduated from said College and granted a diploma, he, the said Bate, would conduct a reputable practice, in his own name, and wholly abandon his aforesaid former practices and conduct.

That said Bate was, on the strength of said promise and agreement, admitted as a student, and, after a due course, was graduated by said College in January, A. D. 1876, and a diploma granted him, in his true name, to-wit: John Bate; and that said Bate pretends

to have obtained a certificate from this Board upon said diploma; that said Bate has, ever since obtaining, totally disregarded his aforesaid promise and agreement, and has continued to use said fictitious name of "Olin" to coneeal his identity and protect his family, and has, under that name, advertised extensively in the newspapers of Chicago and elsewhere, by means of advertisements of the following general character and tenor:

"Dr. A. G. Olin's Private Hospital, 203 South Clark street, Chicago. Everybody from the Atlantic to Pacific has heard of Dr. Olin's skill in treating chronic and sexual diseases of men and women. Spermatorrhaea, Sexual Debility, Impotency, Nervousness, Seminal Emissions, Loss of Memory from self-abuse or other causes, cured permanently. Guide to Health, 64 pages, two 3-cent stamps. Large work, choice information of special interest to both sexes, 50 cents. Reliable female pills and rubber goods at office. Special care, with board, for ladies during confinement."

And has published, sold and distributed among the public, books and pamphlets of various sorts of an immoral, indecent and decidedly unprofessional and disreputable character, and has in the meantime conducted the business arising therefrom, and received the emoluments thereof, and is now so doing, and threatens to continue so to do. And these relators aver that said Bate has been and is guilty of bad faith toward said college, in obtaining said diploma, and has been and is guilty of unprofessional and dishonorable conduct, in the perpetration of the acts and doings aforesaid; that said Bate has an office at present at 203 South Clark street, in Chicago.

These relators at the said Bate has an office at present at 203 South Clark street, in Chicago.

conduct, in the perpetration of the acts and doings aforesaid; that said Bate has an office at present at 203 South Clark street, in Chicago.

These relators further show that one Edward Osborne, for a long time last past, has been and now is intimately associated with said Bate in the prosecution of said business advertised and conducted as aforesaid under the name of Olin; that for a long time last past, said Osborne has occupied the same office with said Bate, opens the correspondence elicited by said advertisements and otherwise, puts up and sends by mail or otherwise, to parties at a distance, the goods and various medicines mentioned in said advertisements and pamphlets, and attends to customers and patients who come to said office, and enjoys, directly or indirectly, a portion of the emoluments arising out of said business, and assists in the sustaining and extension of the aforesaid business; that said Osborne is also a graduate of said Bennett Medical College, but has, since his graduation, fallen into the practice and acts aforesaid, and persists in the continuation thereof, and is, equally with said Bate, guilty of unprofessional and dishonorable conduct by reason thereof. These relators aver that the acts and doings of said Bate and Osborne are directly detrimental to the reputation and good name of Bennett Medical College, from which they claim descent, and moreover that said acts and doings are a stain upon the record of medicine at large in the city of Chicago and State of Illinois, and these relators respectfully ask that said Bate and Osborne be deprived of their certificates, and otherwise dealt with in accordance with the statute in such case made and provided. wise dealt with in accordance with the statute in such case made and provided.

[Signed] A. L. CLARK. M.D.,

President Board Trustees, Bennett College Ecl. Med. and Surg. MILTON JAY, M. D.,

Secretary Board Trustees Bennett Med. College.

STATE OF ILLINOIS, ss.

Milton Jay, being first duly sworn, says that he has read the foregoing information by him subscribed, and he knows the contents thereof, and that the facts and statements therein contained are true.

[Signed]

Subscribed and sworn to before me this 5th day of February, A. D. 1880.

WILLIS SMITH,

Mr. Frederick W. Packard appeared as counsel for the Bennett Medical College.

Mr. Charles A. Gregory appeared as counsel for Edward Osborne. The accused having been previously notified to appear, the Board

proceeded to investigate the charges.

[Seal.]

Mr. Gregory, counsel for the accused, said that a revocation of Osborne's certificate would be an infringement of his rights as a citizen; and he claimed that the statute under which the Board was acting was unconstitutional.

Dr. Chambers said that the Board had power to revoke certificates for unprofessional and dishonorable conduct, and w s the judge of

what constitutes such conduct.

Dr. Gregory took the same view.

A long debate followed, with reference to the powers of the Board in the matter.

Mr. Packard called on Osborne to state whether or not they were

doing business under the names of Olin and Carlton.

He declined to reply, but Mr. Gregory, their counsel, replied for him in the negative.

Adjourned to afternoon.

TWO-THIRTY O'CLOCK P. M.

The Board reassembled at 2:30 P. M., the same members being

present as in the morning.

Dr. Henry Olin, of the Bennett Medical College, testified that Bate had practiced under the name of Olin, which was generally supposed to be his name, but that he (Bate) had told witness that it was not his (Bate's) name. Witness had offered Bate \$500 to take another name, but he had refused, saying that he had got out his "Marriage Guide" under the name of Olin; that Bate had left the city in September or October, but that his business was continued here. Witness also knew Osborne. He was a graduate of Bennett Medical College, and was a nephew of Bate; that his office was at the same place; that he had treated patients as Dr. Olin. Witness had offered him \$250 to change the name, but he had declined. Witness knew that Bate had sent out "Marriage Guides," but did not know that he had sent out rubber goods or female pills.

On cross-examination, witness stated that Osborne had graduated at the Eye and Ear College, of the Faculty of which he was a

member.

R. W. McAfee, though not an expert, testified that the hand-writing of a letter, signed "A. G. Olin," appeared to be the same as that in letters known to be written by Osborne.

Several letters, written in January, which passed between Olin and "Mary Ann Brown" of Springfield, and a sample of the goods and

pills were introduced.

Charles Probsting, deputy in the Cook County Clerk's office, testified that, to the best of his recollection, the man who signed the name "A. G. Olin" in the County Clerk's Register, which witness keeps, was the same who presented the certificate of Edward Osborne for record.

A number of returns of births and deaths made by Osborne were also introduced, from which it appeared that all the children were illegitimate, and that the most of the mothers came from the

country.

Mr. Gregory, counsel for Osborne, said there was nothing against his client, except the inference to be drawn from the correspondence.

Adjourned to evening.

SEVEN-THIRTY O'CLOCK P. M.

The Board reassembled at 7:30 P. M., with the same members

present.

Mr. Gregory addressed the Board in behalf of his client, saying that he wanted to abandon his present business and leave the State, and that he had never procured an abortion—that the pills sold ostensibly for that purpose, were made of brown bread. He asked that Osborne's certificate be not revoked, but only suspended.

Dr. Bateman said the Board must put a stop to the nefarious

business for which Osborne was being tried.

Dr. Chambers remarked that the Board had no power to suspend sentence.

On motion of Dr. Rauch, the matter was held in temporary abeyance.

The case of Dr. Lucas R. Williams was then taken up.

Dr. Rauch stated that the accused was conducting a so-called "Private Dispensary" at 132 Clark St,, Chicago; that he was advertising as a specialist, and that he claimed, in his advertisements, to have twenty years' experience, though he was not much older that. The accused had previously been before the Board, and had agreed then to discontinue his advertisement, but had not done so. In these advertisements the accused called himself Dr. W. R. Lucas. He held a certificate under his proper name.

Dr. Williams appeared before the Board, and stated that he had adopted the name "Lucas" because it took up less space in advertising than Williams. He had shown his circular to the Mayor and City Attorney of Chicago and the State's Attorney of Cook county, and they had found no fault with it. He explained that he had continued his advertisements because he had unexpired contracts with

the newspapers.

Dr. Bateman said he had never known an honorable practitioner who advertised in such a way. He suggested that, on Williams withdrawing these advertisements, he be allowed to retain his certificate.

Dr. Williams asked the Board to instruct him as to the form of

the advertisement.

Dr. Ludlam was opposed to countenancing any advertisements.

Action on the case was deferred.

The consideration of the cases of Bate and Osborne was then resumed, and Dr. Gregory introduced the following resolution, which was adopted:

Whereas, Dr. John Bate and Dr. Edward Osborne, now holding certificates from the State Board of Health, have been found guilty of gross professional misconduct in practicing medicine under the assumed and fictitious names of "Dr. A. G. Olin" and "Dr. J. S. Carlton," and in issuing grossly unprofessional circulars and advertisements, making false, immoral and pernicious offers of medicine and medical aid, involving the commission or concealment of criminal practice; therefore

Resolved, That the certificates heretofore granted to the said John Bate and Edward Osborne by the Board be, and the same are hereby, revoked and annulled.

Dr. Bateman introduced the following resolution, which was adopted:

Resolved. That the Board recommend to all the medical schools in this State that they make the necessary arrangements to furnish to their yearly classes a series of two or more lectures on Medical Ethics, setting forth the duties of the physician toward the public, and also toward the members of his own profession.

On motion, adjourned to February 6, 1880.

Chicago, February 6, 1880.

The Board met, pursuant to adjournment, and was called to order at 10:30 A. M.

The minutes of the last meeting were read and approved.

The Board proceeded to the consideration of charges made against physicians who have certificates from the Board.

The case of Dr. Generous L. Henderson, of Chicago, was taken up. The Secretary, Dr. Rauch, stated that Dr. Henderson had received a certificate from the Board under his proper name, but was issuing

advertisements under the name of "Dr. Stone," declaring himself to be the only regular graduate of medicine in Chicago who was acting as a specialist, and also the only one holding a certificate from the State Board; that he was advertising and selling a book for both sexes; that he had previously been before the Board, and had agreed to discontinue advertising his specialty, except by means of a business card, but had not kept that promise.

Several of the circulars sent out by Henderson were presented to the Board, in which he offered to sell the stuff usually offered by the vilest class of specialists; also, a correspondence between Henderson, under the name of "John Smith," and one Thomas Hargrave, in which Henderson offered to procure an abortion for \$5. Dr. Henderson was present, and made a statement, under oath, in which he denied that he had advertised under the name of "Stone," or offered for sale any of the medicines or implements since he had been before the Board, and stated that the advertisements had remained in the newspapers since that time without his consent. He also denied, under oath, that he had written the letter signed "John Smith." Mr. C. A. Gregory, his attorney, promised for him that he would not advertise in an offensive way any more.

The case was taken under advisement.

The case of Dr. Charles H. Peters, of Sandwich, was then taken up. It was shown that he was an itinerant, who was publishing advertisements in Indiana and Illinois of a grossly unprofessional character. He did not appear before the Board, and the case was taken under consideration.

The Board then proceeded to the consideration of charges made against physicians who had no certificates.

In the case of Dr. Forgay, alias John Dalton, of 589 Wabash avenue, Chicago, a correspondence was produced between him and one John Hummelton, in which Forgay offered to furnish medicine to produce an abortion for \$5. This case was laid over.

In the case of Dr. John Kean, of 173 South Clark street, Chicago, it was shown that he was practicing and advertising as a specialist in the same manner as the others, and that he was not a graduate of any medical school. This case was laid over.

In the case of Dr. Samuel Davison, it was shown that he was the keeper of a gallery of anatomy at 16; South Clark street, Chicago; that he was issuing a book and offering to treat private diseases; that he was a graduate of the New York Eclectic Medical College; and that the Board had declined to give him a certificate on account of the nature of his practice. This case was also laid over.

Adjourned to afternoon.

TWO O'CLOCK P. M.

The Board reassembled at 2 P. M.

The case of Dr. Nathan J. Aiken, to whom a certificate had been

issued, was taken up, and,

On motion of Dr. Ludlam, it was ordered by the Board that his certificate be revoked and annulled for unprofessional and dishonorable conduct.

The consideration of charges against physicians to whom no cer-

tificates had been issued was resumed.

In the case of Dr. Charles Bigelow, of Chicago, it was shown that he had offered to procure an abortion for \$200. His case was laid over.

In the case of Dr. James, of Lock Hospital, at Chicago, it was shown that he was practicing as a specialist of the same character as the others; that his real name was Smith Whittier, and that he was imposing upon the public by false representations; that the hospital was incorporated with a capital of five hundred dollars (\$500), of which Whittier, alias James, owns nine shares, amounting to four hundred and fifty dollars (\$450), and two other persons own the remainder, amounting to fifty dollars (\$50).

In the case of Dr. F. D. Clarke, of 186 South Clark street, Chicago, letters were produced in which he had urged his correspondent to

come to Chicago for treatment to procure an abortion.

These cases were laid over.

Attention was called by the Secretary to the following cases:

Dr. R. Greer, of Chicago.

Dr. Davis, of 406 N. Clark street, Chicago, pretends to be Dr. N. S. Davis. No certificate.

Dr. A. J. Shipp, of Chicago, advertises and sends out books on

venereal diseases. Not licensed.

Dr. F. L. Pond, of Aurora, runs a cancer-curing establishment without a diploma or license from the Board.

Dr. E. C. Dunn, an itinerant specialist, unlicensed; and Mrs. Dr.

Keck, of Davenport, Bloomington and Peoria.

The Secretary also called attention to the case of Dr. Hayes, of the Peabody Institute, Boston, who claimed to have a diploma from the Philadelphia University of Medicine and Surgery, and a gold medal from the National Medical Association of Philadelphia, and showed that both of said organizations had been in the habit of selling diplomas.

The following communication was received:

WESTERN SOCIETY FOR THE SUPPRESSION OF VICE, Office of Special Agent, CHICAGO, ILL., Feb. 6, 1880.

Dr. John H. Rauch, Secretary State Board of Health, Chicago:

DEAR SIR: Will you be kind enough to present the following question to the Honorable State Board of Health of Illinois, now in session at the Grand Pacific Hotel in this city, and request an answer in the form of a resolution:

Is it professional for a physician to advertise or promiseuously distribute or circulate "marriage guides," "secret monitors," pamphlets or circulars, describing or illustrating, by means of pictures, venereal diseases; or to advertise directly or indirectly, or even impliedly, nostrums or medicines for preventing conception or procuring abortion?

I am, sir, very respectfully,

R. W. McAFEE, Gen'l Agent W. S. S. V.

Mr. McAfee was present, and stated that in attempting to prosecute persons of the description mentioned, he had found that they all claimed that the practices mentioned were professional, and therefore could not be interfered with.

After consideration, Dr. Ludlam introduced the following resolution, which was adopted, and the Secretary was directed to transmit a

copy to Mr. McAfee:

Resolved, That in response to the following written enquiry made to the Board by R. W. McAfee, general agent of the Western Society for the Suppression of Vice. "Is it professional for a physician to advertise or promiseuously to distribute or circulate 'marriage

guides, 'secret monitors,' pamphlets or circulars, describing or illustrating, by means of pictures, venereal diseases; or to advertise directly or indirectly, or even impliedly, nostrums or medicines for preventing conception or for procuring abortion?" the Board decides that each and all of the above described acts are grossly unprofessional.

Dr. Bateman introduced a resolution, which was adopted, directing the Secretary to enquire of the Attorney General the proper manner of proceeding in bringing actions for violations of the Medical Practice Act, and the State Board of Health Act.*

Adjourned to evening.

SEVEN O'CLOCK P. M,

The Board re-assembled at 7 P. M.

Dr. Chambers moved that the certificates heretofore granted to Dr. Lucas R. Williams, Dr. Generous L. Henderson and Dr. Charles H. Peters be revoked and cancelled for "dishonorable and unprofessional conduct."

The motion was unanimously adopted.

Dr. Bateman remarked that this action disposed of all the cases against physicians who had certificates from the Board, but that there were persons assuming to practice medicine in Chicago and elsewhere in the State who had no certificates, against whom the Board should take action, among whom are the parties whose cases have been considered but no action taken. He therefore introduced the following resolution:

Resolved. That the Secretary be instructed to do what is necessary, in his judgment, to enforce the Medical Practice Act; also, to obtain such assistance as is necessary to get out the annual report, the expenditure for said purpose not to exceed the sum of six hundred dollars (\$600).

The resolution was adopted.

On motion, the Board adjourned.

Chicago, February 19, 1880.

A special meeting of the State Board of Health was held in Chicago on February 19, 1880.

The Board was called to order at 11 o'clock A. M., by the President, Dr. Wardner.

Present—Drs. Ludlam, Clark and Rauch.

The Secretary read a letter from Dr. Bate, alias "A. G. Olin," in which he stated that he had not received notice that the Board would act on his case in time to attend the meeting held on the fifth day of February, at which his certificate was annulled, and the Secretary's reply, in which Dr. Bate was informed that notice had been sent him by a registered letter which reached him in time to enable him to appear at Chicago on the date named; but that if he wished to be heard by the Board he should have an opportunity.

On motion of Dr. Ludlam, the vote by which Bate's certificate

was annulled was reconsidered.

Mr. M. F. Riggle appeared as counsel for Bate, and addressed the Board in behalf of his client, stating that he was not disposed to deny that he had advertised, but that if the Board proposed to revoke his certificate on account of unprofessional conduct other than

^{*}See post, section entitled "Enforcement of the Medical Practice Act."

advertising, he wanted to introduce witnesses to show that the pills referred to in the advertisement were not abortive, and further, that rubber articles had not been advertised by him for a year past. He also said that there was nothing immoral or vulgar in the "Marriage Guide."

Dr. Bate, who was present, was given an opportunity to make a

statement under oath, but refused to do so.

Dr. Ludlam said that he considered this refusal an indignity to the Board of which no honorable practitioner would be guilty. No professional man except a burglar needed an *alias* to practice under. Dr. Rauch said this was not a question of professional ethics, but

of fraud.

Dr. Ludlam said he saw no reason for reopening the case. respectable professional man had any reason to use an alias. moved that the action of the Board on the 5th inst. in regard to Dr. Bate be reaffirmed.

The motion was adopted.

Dr. Clark introduced the following resolutions, which were unanimously adopted:

Resolved, That any fraudulent or deceptive professional transaction shall be deemed in the sense of this Board unprofessional and dishonorable conduct.

Resolved, That any medical man who practices medicine under two names, or any other name than his true name, shall be considered guilty of unprofessional and dishonorable conduct.

Resolved, That any advertisement, hand bill or means of attracting public attention or securing patronage, which shall be deceptive or convey to the public any false or fraudulent information, shall be considered unprofessional and dishonorable.

The case of Dr. Fritz, who advertised himself as an Indian doc-

tor, was then taken up.

Mr. S. Thomas appeared as his counsel, and read a statement from Fritz, which was unsworn, in which he stated that he was exempt by the Medical Practice Act, as he had practiced in the State more than ten years, and that he had a diploma from a regular school.

Dr. Rauch stated, in reply, that the diploma in question was issued by the Philadelphia University of Medicine and Surgery, an institution that had been convicted of selling diplomas, and was no longer recognized as respectable. He also showed that Fritz had made false statements in his advertisements. Among other things, he claimed to be the greatest physician of modern times.

Dr. Ludlam showed that, from Fritz's statements, as read by his counsel, he had not been located at Chicago until 1869; that he removed West after the fire in 1871, and that he only returned in 1873, so that be could not have had more than six years continuous

practice in the State prior to 1877.

Mr. Thomas then attempted to show that Fritz had retained his residence when he removed West.

The case of Dr. (?) R. Greer was then taken up.

The Secretary introduced copies of advertisements published by Greer, in which he professed to cure all diseases, and to have had

30 years practice in Europe and America.

Dr. (?) Greer was present, and made a statement under oath, to the effect that he was not a graduate of any medical school; that he had had no hospital practice, and had attended no clinical lectures. He stated that he was not a dispenser of medicine, but a dispenser of vitality, and was a natural physician, having inherited his faculty from a long line of ancestors. He also stated that he never lost any patients. Instinct taught him when they were going to die, and then to turn them over to other doctors.

Adjourned to afternoon.

TWO O'CLOCK P. M.

The Board reassembled at 2 P. M.

The case of "Dr. J. H. Clark," whose real name is J. H. Jordan,

was taken up.

The accused stated, under oath, that he had assumed the name of Clark because he had bought out the practice of a physician of that name, with the right to use it; that he claimed the name as a trade-mark, and that he was an invalid, and compelled to confine himself to office business.

In reply to questions, he said he had sold rubber goods, and that, as they can be bought at any drug store, he saw no harm in so

doing.

Mr. Charles Gregory appeared as counsel for Dr. Samuel Davieson, and claimed that his client was not amenable to the Board, as he had a regular diploma from the New York Eclectic College, and had never received a certificate from the State Board, though he had applied for one; that no charge had been made against him except advertising, and that if the Board would grant him a certificate, he would hold himself amenable to the Board.

Mr. Thomas, attorney for Dr. Fritz, stated that his client could not appear, and that the statement of the morning was all that the Dr. could say in his behalf. He admitted having published advertisements. The Dr. did not invite public prosecution, and disliked the idea of being placed with that class of doctors known as abor-

tionists and malefactors.

Adjourned.

Grand Pacific Hotel, Chicago, April 8, 1880.

The Board met, pursuant to adjournment, at 10 A. M. In the absence of the President, on motion Dr. Chambers presided.

Present—Drs. Clark, Ludlam and Rauch.

The minutes of the preceding meeting were read and approved. The examinations in Anatomy, Surgery, Theory and Practice of Medicine, and Physiology, were conducted by Dr. Chambers.

Pathology and Diseases of Women, by Dr. Ludlam.

Chemistry and Obstetrics, by Dr. Clark.

Materia Medica and Therapeutics, Hygiene and Medical Jurisprudence, by Dr. Rauch.

The morning and evening were thus occupied, whilst at intervals routine business was transacted,

Friday, April 9, 1880.

The Board reassembled, with Dr. Chambers in the Chair, and Drs.

Ludlam, Gregory and Rauch, present.

The following candidates were found to have passed the examination, and, on motion, it was decided that certificates should be issued to them:

J. A. Fitzpatrick, Lockport, Will county, Illinois. H. B. Hemenway, Evanston, Cook county, Illinois. E. L. McKinney, Viola, Mercer county, Illinois. G. B. Whitacre, Shumway, Effingham county, Illinois.

John T. Brown, Chicago, Cook county, Illinois. T. E. LaBarriere, Chicago, Cook county, Illinois. F. M. Hovey, Chicago, Cook county, Illinois.
D. C. Tyler, Chicago, Cook county, Illinois.
F. L. Searles, Chicago, Cook county, Illinois. C. E. Winslow, Chicago, Cook county, Illinois. J. R. Bedford, Chicago, Cook county, Illinois. F. J. Taylor, Chicago, Cook county, Illinois.

The Secretary reported that since the last meeting thirty-nine physicians, so-called, were compelled to desist from practicing, and have left the State; eleven took down their signs, and nineteen midwives were also compelled to quit their calling. These were all living in Chicago. A number of others throughout the State had also left.

Dr. Rauch moved that the certificate of J. H. Jordan, alias J. H. Clark, be revoked for unprofessional and dishonorable conduct.

This case was investigated at a previous meeting.

The motion was agreed to.

The case of C. Pratt Sexton, an applicant for a certificate, was then considered. He was to be in the pay of John Bate, alias "A. G. Olin," and to take charge of his office in Chicago.

On motion of Dr. Gregory, the application was refused.

Dr. Clark and the Secretary were appointed to investigate the

small-pox epidemic at Monee.

The Secretary was instructed to call the next meeting of the Board so as to accommodate the members.

> Office of the State Board of Health, Springfield, Ill., June 24, 1880.

The Board met, pursuant to adjournment, and was called to order at 10 A. M.

Present—Dr. Wardner in the Chair, Drs. Chambers, Clark, Gregory, and J. H. Rauch, Secretary.

The minutes of the last meeting were read and approved.

The application for a certificate by Dr. Sexton was then consid-

Upon motion of Dr. Gregory, the Secretary was instructed to ascertain whether Sexton was now engaged in reputable practice.

In the case of Dr. Pond, of Aurora, the Secretary was instructed

to procure some of his circulars.

The complaint and affidavit of Dr. Wilson, of Olathe, Kansas, against the Physio-Medical Institute of Cincinnati, was then taken up.

Letters of Dr. Cook, the Dean of the Institute, were read also. On motion, further consideration of the case was postponed until eight o'clock in the evening.

Nine candidates presented themselves for examination.

TWO O'CLOCK P. M.

At 2 P. M., the Board was called to order by the President, Dr. Wardner, with the same members present as at the morning ses-

The case of Dr. Joseph Schmidt, of St. Clair county, who has a diploma from the American Medical College, of St. Louis, was

taken up.

Messrs. Hay & Underwood, attorneys, were given an opportunity to speak in his (Schmidt's) defense, upon charges of unprofessional conduct.

After considerable deliberation by the Board, it was

Resolved. That the Secretary be authorized to grant a certificate to practice medicine to Joseph A. Schmidt, of Belleville, as soon as he is convinced that there are no legal impediments.

The case of the St. Louis Eclectic Medical College was then brought before the Board, and,

On motion of Dr. Chambers, the communication of Dr. Field with

regard to the same was laid upon the table.

On motion of Dr. Chambers, the certificate of Dr. James C. Ozee was revoked, for unprofessional and dishonorable conduct, inasmuch as he had abandoned the practice of medicine and became a saloon-

This information was filed by Dr. J. W. Dora, of Mattoon, Ill., who had recommended him to the consideration of the Board.

Agreed to.

On motion, adjourned to evening.

EIGHT O'CLOCK P. M.

The Board met at 8 P. M., and was called to order by the President, Dr. Wardner.

Present—Drs. Chambers, Clark, Gregory and Rauch.

The Physio-Medical Institute question was taken up and thoroughly discussed.

On motion, no action was taken at present.

The Secretary then presented to the Board a report on canal and

river improvement, and on the subject of bogus diplomas.*

On motion, the Secretary was directed by the Board to again urge upon the Mayor and Common Council of the city of Chicago the speedy construction of pumping works at Bridgeport as a sanitary necessity.

^{*}See next page for text of report.

To the State Board of Health:

Gentlemen: I have the honor to state that a copy of my report upon the pollution of the Chicago river, the Illinois and Michigan canal, and the Illinois river, by Chicago sewage, which was laid before you in January last, was, in pursuance of your instructions, transmitted to the Mayor and Council of the city of Chicago, and that special attention was called to the recommendations contained therein. In pursuance of that recommendation, an appropriation of \$100,000 was made by the Common Council for the construction of

pumping works at the head of the canal.

Within the last week I have made a careful inspection of the Chicago river, and find it fouler and more offensive than it has been at any time since the deep cut was completed in 1871, and I only recollect of one other time (1869) when it was worse, and then only for a short time, as the pumping works were set in motion and soon improved its condition. In the main river the current was towards the lake, showing that but little change had taken place in the lake level. At Van Buren street the water was practically stagnant; at Eighteenth street there was no current, and at Halstead street, for the first time within my knowledge, I observed no current toward the canal. (This is unusual, except when a freshet occurs.) The South Fork of the South Branch was, comparatively speaking, in good condition, owing, no doubt, to the late There was a decided current at the mouth of the canal, and upon further examination I found that the canal was taxed to its capacity by the water of the West Branch and the South Fork, thus causing the condition at Halsted street, and as far south as Van Buren street. The North Branch at Kinzie street was also very foul, with a slight current toward the lake. In fact, at no time since the deep cut was completed was the water of the entire river so sluggish. About two months ago I called upon the Mayor of Chicago, and had an interview with reference to the construction of pumping works.

The effect of the Fullerton avenue pump has been just as predicted in my report written before the pumping commenced, and without the construction of the pumping works at Bridgeport it will only partially remedy the trouble. In view of all the facts, I think it is the duty of the Board to communicate with the Mayor and Common Council of Chicago, and again urge the speedy construc-

tion of the pumping works, as a sanitary necessity.

Since the last meeting, complaints have been filed against three medical colleges we have heretofore recognized, for irregularities in granting diplomas. In this connection, I take great pleasure in calling attention to the exposure and arrest of some of the parties concerned in the issue and sale of diplomas in Philadelphia, mainly through the instrumentality of Mr. John Norris, of the Philadelphia Record. It is peculiarly gratifying that the action of the Board is sustained, as we have never recognized the diplomas of the Philadelphia University of Medicine and Surgery, the American University of Philadelphia, the New England University of Manchester, N. H., the Livingston University of Haddenfield, N. J., nor the late issues of the Eclectic Medical College of Pennsylvania. The diplomas of the last four emanated mainly from Dr. John Buchanan, who was

arrested, and is now under bonds in the sum of \$11,000, to appear for trial. It may be that we have recognized diplomas of the Eclectic Medical College of Pennsylvania that we should not, as some of them may have been dated back, as in the case of Mr. Norris, who was accommodated with regard to date. You will probably recollect that, for nine months after the organization of the Board, we refused to recognize any of the diplomas issued by that college, and they were afterwards recognized only after the parties had given additional evidence that they had attended lectures and had graduated in good faith. The Philadelphia University of Medicine and Surgery, sometimes called the Paine School, has been managed mainly, since 1872, by the Rev. Messrs. Miller, Major, Orvis and Ingraham, all of whom have the degree of Doctor of Medicine from this school. Three of these belong to the Methodist Episcopal Church, and one to the Unitarian Church. After the exposures made by Mr. Norris, during the past winter, they were subjected to discipline by the authorities of their respective churches. and were deposed from the ministry. One of the most notorious charlatans and quacks in this State holds a diploma from this University, and has made much complaint because the Board will not grant him a certificate.

I am of the opinion that some of the diplomas signed by this school were obtained in good faith, but I have never felt warranted in recommending the issue of certificates based upon them, because of the uncertainty I have felt with regard to them. As nearly as I can ascertain, about two hundred and fifty diplomas from the schools named were held by persons practicing medicine in this State when the Medical Practice act went into effect. Of these, one hundred and fifty were presented for certificates. It having been known that these diplomas would not be recognized, they have not lately been presented. Many of the parties who hold them left the State, while others went to reputable medical colleges and graduated. As a rule, they were held by most ignorant quacks.

It will also be remembered, that in January last I called attention to the advertisement in the papers in this State under the caption "Know thyself," of the Peabody Medical Institute, managed by one calling himself Dr. W. H. Parker. He refers in his advertisement to the faculties of the Philadelphia University of Medicine and Surgery, and the American University of Philadelphia, and to the President of the National Medical Association. In reply to a letter written at my suggestion, he sent to the applicant a neatly engraved and illustrated pamphlet, containing what purports to be a copy of a laudatory resolution of thanks to Dr. A. H. Hays, of Boston, by the National Medical Association, conferring upon him a gold and jewelled medal for great discoveries in the treatment of nervous affections, said to have been made by him. This book contains, also, an advertisement of a book entitled "The Science of Life."

Since the seizure of the effects of Dr. John Buchanan, in Philadelphia, it has been found that he and his confreres were the chief manipulators of the National Medical Association, and issued the certificates and medals advertised by Dr. W. H. Parker, alias Peabody Institute.

After these disclosures were made, the references were omitted

from the advertisements.

Since the last meeting of the Board, my attention has also been called to a horrid case of malpractice by a pretending cancer curer. Upon calling this person to account, he stated that he only "used his remedy in the interests of humanity." weeks ago an overdose of Hamburg Drops, a patent medicine, was administered by an ignorant midwife to a patient who had been confined, causing peritonitis, and resulting in death.

On the 22d of this month (June, 1880,) a Dr. Schultz was convicted of malpractice at Burlington, Iowa, and sentenced to one year's confinement in the penitentiary for causing the death of a patient by the use of what is called the Exanthematic Method of Cure, or Baunscheidtism. Several months ago my attention was called to this method of treatment in the hands of a man who, upon being written to upon the subject, replied in a very illiterate letter.

On motion, Board adjourned to Friday morning.

Friday, June 25, 1880.

The Board met, as per adjournment, and was called to order by the President, Dr. Wardner.

Present—Drs. Chambers, Gregory and Rauch.

Dr. Gregory offered the following resolution, which was adopted:

Resolved, That the quarterly meetings of this Board shall hereafter be held on the third Wednesday of the months in which such meetings occur, and that the by-laws be hereby changed to agree with this order.

Dr. Gregory also offered the following resolution, which was adopted:

Whereas, It is the legal duty of this Board to issue certificates to persons presenting diplomas from medical colleges in good standing; and Whereas, It becomes the duty of the Board to determine as to the good standing of

WHEREAS, It becomes the duty of the Board to determine as to the good standing of such colleges; and
WHEREAS, Complaints are frequently made to this Board as to the practice and standing of certain colleges: therefore,
Resolved, That a committee of this Board be appointed to report at the next quarterly meeting the requirements and characteristics which shall, in the judgment of this Board, constitute good standing in a medical college, and also the conditions under which this Board will receive and hear complaints against the standing of any medical school or

The Chair appointed Drs. J. M. Gregory, W. M. Chambers and J. H. Rauch the committee.

Dr. Chambers offered the following resolution:

Resolved, That a committee be appointed, of which the President shall be chairman, to make suggestions to the coming State Legislature touching amendments to the present law, as it may deem necessary.

Dr. Rauch offered the following:

Resolved, That in compliance with the request of the National Board of Health, this Board recommend the appointment of Dr. W. R. Smith, of Cairo, as Inspector at Inspection Station No. 3, below Cairo, and the National Board of Health be requested to place said station in commission on the first of July; also that after said inspection station has been put in commission, the Secretary of this Board be directed to notify the authorities of all ports in this State not to allow boats to land, from points below Cairo, unless upon presentation of a clean certificate of inspection as to eargo, officers and crew.

Adopted.

A number of bills were audited by the Board, and the examination of candidates concluded.

The following passed the examination satisfactorily, out of a class

of eleven, and were given certificates, viz: Horace M. Hall, Charleston, Coles county.

A. H. Gideon, Walnut Prairie, Clark county. E. A. Million, Springfield, Sangamon county.

P. A. Pearson, Marshall, Clark county.

On motion, the Board adjourned, to meet on the third Wednesday in October.

Chicago, Illinois, October 21, 1880.

The Board met, pursuant to adjournment, at the Grand Pacific Hotel.

On motion of Dr. Gregory, Dr. Chambers presided, in the absence of the President.

Present—Drs. Chambers, Clark, Gregory, Ludlam, and Rauch, Secretary.

On motion, the minutes of the last meeting were read and ap-

proved.

Dr. Gregory, Chairman of Committee on Requirements and Characteristics of Good Standing of Medical Colleges, submitted the circular of the committee, which, after some discussion and changes, was approved.

On motion of Dr. Ludlam, 1,000 copies of the circular on Medical

Education and Colleges were ordered printed.

James C. Ozee appeared before the Board, and asked to have his certificate returned, presented affidavits with regard to his character professionally, and urged that the action of the Board be revoked.

Dr. Gregory offered the following resolution:

Resolved, That the Board of Health, alter a full hearing of his case, recommend J. C. Ozec to enter himself as a student in the office of some experienced physician, as his preceptor, and practice only under the advice and direction of such preceptor, until he has completed his medical studies, and obtains a diploma from some Medical College in good standing, when this Board will restore his certificate, unless new complaints of non-professional conduct shall be made.

Dr. Clark submitted a communication from Mr. Underwood, attorney for Dr. Joseph Schmidt, of West Belleville, urging the Board to grant him a certificate, as he (Schmidt) had complied with all the legal requirements.

The Secretary asked for further time in this case, which was

granted.

The remainder of the time was occupied in auditing accounts, and other routine business.

On motion, adjourned.

REPORT OF THE SECRETARY.

MEDICAL PRACTICE ACT.

Certificates Issued.	1880.	Total since or- ganizat'n of the Board,
Based on diplomas and licenses. Based on examination—practitioners. Based on years of practice. Based on examination—midwives. Based on diplomas and years practice—midwives	52	4, 815 196 1, 040 61 547
Total	610	6, 659 6, 051 608
Doctors prevented practicing in the State, who could not comply with the law. Midwives prevented practicing in the State, who could not comply with the law. Total.	127 22 149	
Practitioners in the State when the law regulating the practice of n effect, July 1, 1877:	nedicine	e went into
Graduates and licentiates—about. Non-graduates—about.		3, 600 3, 800
Total.		7,400
Graduates and licentiates in State December 31, 1880—about. Non-graduates in State December 31, 1880—about. Less number of practitioners in State than when law went into effect—a	1,100 about	6, 050 1, 350
Total.	• • • • • • • •	7,400
Less number of unqualified practitioners in State than when law we effect—about. Registered practitioners to whom no certificates have been issued		1,950 425

In the foregoing figures it must be recollected that they include the doctors from 42 counties in the adjoining States, Indiana, Kentucky, Missouri, Iowa and Wisconsin, whose practice extends into this State, and who numbered about 500 on July 1, 1877. At that time there was about one so-called physician to 450 of population, while, as near as can be ascertained, there is now only one to 560; and it is probable that within the next year the number will be reduced to one in 600. Of course in this estimate allowance is made proportionately for the population outside of the State. By July 1, 1881, the revision of the register will be finished, and more accurate data will then be obtained.

The diplomas of thirteen medical colleges are not recognized, and during the past year one of the diplomas of the College of Physicians and Surgeons of Iowa, three of the American Medical College of St. Louis, and three of the Missouri Homeopathic Medical College, were refused recognition, because they had been granted contrary to the regulations of this Board. Some of the diplomas of several other schools were suspected, but no evidence sufficient to warrant their rejection can be obtained. Public opinion and the general desire of the profession indicate that the day is not far distant when no diplomas will be recognized, and all who commence practice in the State from that time will be subjected to an examination before they obtain a license to practice. Although decided progress has been made by the medical colleges in elevating the standard of requirements within the last few years, still there is much room for improvement. An independent examining board in this State would bring about this result much sooner. From this cause, and our geographical position, at least fifteen medical colleges, whose diplomas we must now recognize, would become extinct. In other words, there are too many medical schools, and the rivalry and pecuniary needs incident to this great number result in the graduation of too many who are not quanfied. When it is borne in mind that Ohio has ten medical colleges, Indiana five, Illinois six, Kentucky four, Tennessee five, Missouri twelve, Michigan four and Iowa three, or forty-nine medical colleges for eight States, the foregoing remarks will be appreciated. The fifteen colleges alluded to are not, however, confined to the States enumerated, as there are several in the older States which would no doubt succumb. Decided progress has been made during the past year in ridding the State of "ignorant and pretentious specialists," and it is hoped that this class of charlatans and imposters will soon disappear.

During the past three months the Board received \$400 for itinerant licenses, in accordance with section 12 of the "Act to regulate the practice of medicine." Two of these presented diplomas of reputable institutions, and, instead of pursuing a general practice, were in reality the agents of a "patent medicine" manufacturer. In my opinion the granting of these licenses is in opposition to the spirit, although not to the letter, of the law. The itinerant is generally the worst of quacks, ready to do anything in the way of humbugging to make money. Flaming cards and circulars with regard to their wonderful healing powers are not enough, but temperance lectures and even prayer-meetings have been made the means of advertising and imposing upon a credulous public. In one instance where I objected with some warmth to granting a license, the party said that a writ of mandamus would compel the Board to grant it. To which I promptly replied that nothing would please me more, as an apportunity would then be afforded to thoroughly expose this class of

impostors.

Chartered by the State of Illinois.

Soon after the organization of the Board my attention was called to a number of so-called universities, medical institutes and private dispensaries, chartered under "An act concerning corporations," approved April 18, 1872. An examination of the records in the office of the Secretary of State satisfied me that many of these corporations were fraudulent, and that it was an imposition upon the people of the State to grant them. I protested against granting any more, but was informed that according to the law there was no remedy.

Two of these fraudulent institutions (?), situated in Chicago, could not be reached, because they were fathered by parties who took advantage of the ten-year exemption clause in the act under which we are working. They are the James Medical Institute and the

Chicago Medical and Surgical Institute.

Amid the multiplicity of other duties, no special attention was paid to this subject until the following letter was received:

J. H. Rauch, M. D., Secretary State Board of Health, Chicago, Illinois:

DEAR SIR: I received the enclosed circular to-day through the mail addressed to my daughter, a young girl, and upon inquiry at the postoffice I find that a large number of the same were received addressed to the young girls of this place, and are being held, at my request, at the office.

Now, I ask, in God's name, is there no way to reach this party? Must our girls be debauched by such devils in human form, and under a charter from the State?

Yours truly,

The following is the circular:

The following is the circular:

"James' Wine of Hops—The best known remedy in the world for nervous debility, lost energy, lost hopes, imprudence of youth, lost vigor and ambition. \$1.00 per quart bottle, six for \$5.00.

"Dr. James' Lock Hospital—204 Washington st., cor. Franklin. Chartered by the State of Illinois for the express purpose of giving immediate relief in all cases of private, chronic and urinary diseases in all their complicated forms. It is well known Dr. James has stood at the head of the profession for the past thirty years. Age and experience are all important. Seminal weakness, night losses by dreams, pimples on the face, lost manhood, can positively be cured. Ladies wanting the most delicate attention, call or write. Pleasant home for patients always ready.

"Nervine Pills—After 40 years' practice I am satisfied nine-tenths of the troubles and trials in life has grown out of a latent sexual feeling on the part of ladies and gentlemen. Thousands, without knowing the real cause, have made life a weary waste for the want of proper means to make it bright and happy. Nervine pills, compounded of roots and herbs, will make the weak and debilitated strong. That which you have lost or never had will come to make home happy. Life is too short to waste away in a dull, torpid home when \$1 box will please you and six will cure you for five dollars. Sent by mail on receipt of price. No marks on package to indicate the sender or its contents. Nervine pills a positive cure for lencorrhoa or whites, nervous headache, nervous debility, night sweats, melancholy feeling and general weakness.

"Book for the Million—Marriage Guide—Which tells you all about these diseases, who should marry, why not; 10 cents to pay postage, or large revised work 25 cents. Dr. James has 50 rooms and parlors. You see no one but the doctor. Office hours, 9 A. M. to 7 P. M. Sunday 10 to 12. Dr. James is 60 years of age.
"Gentlemen's rubber goods, 2 for \$1, or \$4 per dozen. Ladies', \$5 each. Ladies fountain syringe with silver points,

orentements rubber goods, 2 for \$1. or \$4 per dozen. Ladies, \$5 each. Ladies fountain syringe with silver points, \$2. Sent by mail, sealed. Female pills, \$1 per box, 6 for \$5. extra strength.

"To The Afflicted—Permit me to say to all parties receiving my book, that, when it is convenient, it would be far better to make me a personal visit. The human economy, with its intricate functions, is so complicated that a physician might, and in fact is, liable to make a mistake by correspondence. After forty years of my life spent among the afflicted, in all their varied and complicated forms, I am fully satisfied the more I know the better it will be for those placing themselves under my care and treatment. One visit is all that any patient need make for me to acquire a full knowledge of their requirements. Consequently avoid mistakes. Life and health are too valuable to trifle with, and age and experience are all-important in forming correct ideas. Of course many times it is not necessary to make me a personal visit. Those that do, and after looking over the case and I find it a curable one, I will in all such instances guarantee a cure, or no pay. If I am not able, or I do not see my way clear to make a permanent cure, I will so state, and give you the advantage of my vast experience for one dollar. To those who can't make it convenient to call personally, I will send a printed list of questions to answer before sending medicine.

"Three cents to pay postage,

"Chicago, Illinois."

This circular was prepared with a view to escape the U. S. postal laws, and is not as "broad" or vile as those that are forwarded by express, and is usually sent as an avant coureur. The party writing for the articles advertised, is informed that they cannot be sent by mail, but will reach them by express; also, the more flagrant publications, giving specific directions how and for what purpose they are intended.

In this connection attention is called to the United States law concerning the carrying of obscene and improper literature and

articles through the government mails:

articles through the government mails:

Section No. 3,893, U. S. Revised Statutes. No obscene, lewd or laseivious book, pamphlet, picture, paper, print, or other publication of an indecent character, or article or thing designed or intended for the prevention of conception or procuring of abortion, nor any article or thing intended or adapted for any indecent or immoral use or nature, nor any written or printed card, circular, book, pamphlet, advertisement or notice of any kind giving information, directly or indirectly, where, or how, or of whom, or by what means either of the things before mentioned may be obtained or made, nor any letter upon the envelope of which, or postal card upon which indecent or scurrilons epithets may be written or printed, shall be carried in the mail, and any person who shall knowingly deposit, or cause to be deposited, for mailing or delivering, any of the hereinbefore mentioned articles or things, or any article or paper containing any advertisement relating to the aforesaid articles or things, and any person who, in pursuance of any plan or scheme for disposing of any of the hereinbefore mentioned articles or things, shall take, or cause to be taken from the mail, any such letter or package, shall be deemed guilty of a misdemeanor, and shall for every offence be fined not less than \$100, nor more than \$500, or imprisonment at hard labor not less than one year, nor more than ten years.

Immediately, after the recention of the foregoing letter and circular,

Immediately after the reception of the foregoing letter and circular, I telegraphed and wrote the writer for more details, but upon reflection took the first train for the place. Found that between fifty and sixty of the circulars had been sent, nearly all of them to school girls, and to two of the female teachers of the public schools.

Upon my return to Chicago, I called the attention of the special agents of the post-office department to the fact, at the same time suggesting that they be on the watch for the circular, as I was satisfied they had been sent to other schools, and the probability was that more would be thus disposed of. I was aware of the fact that similar outrages had already been perpetrated upon the pupils of female seminaries, in fact to such an extent as to debar the publication of catalogues, but until now I had never heard that the public schools had been tampered with. With as little delay as possible, I submitted the facts in my possession to Hon. J. K. Edsall, Attorney-General, who promptly informed me that a case could be made, and should be, under the laws of the State, at the same time calling my attention to the following, from Hurd's Revised Statutes, pages 382-83:

vised Statutes, pages 382-83:

§ 223. Whoever brings, or causes to be brought, into this State, for sale or exhibition, or shall sell or offer to sell, or shall give away or offer to give away, or have in his possession, with or without intent to sell or give away, any obscene and indecent book, pamphlet, paper, drawing, lithograph, engraving, daguerreotype, photograph, stereoscopic picture, model, east, instrument or article of indecent or immoral use, or shall advertise the same for sale, or write or cause to be written, or print or cause to be printed, any circular, handbill, card, book, pamphlet, advertisement or notice of any kind, or shall give information orally, stating when, how or of whom, or by what means, any of the indecent and obscene articles and things hereinbefore mentioned can be purchased or otherwise obtained, or shall manufacture, draw and expose or draw, with intent to sell or to have sold, or print any such articles, shall be confined in the county jail not more than six months, or be fined not less than \$400 nor more than \$4,000 for each offense, one—half of said fine to be paid to the informer upon whose evidence the person so offending shall be convicted, and one—half to the school fund of the county in which the said conviction is obtained.

§ 224. If any person shall deposit or cause to be deposited in any postoffice within this State, or place in charge of any express company, or person connected therewith, or of any common carrier or other person, any of the obscene and indecent articles and things mentioned in the preceding section, or any circular, handbill, card, advertisement, book, pamphlet or notice of any kind, or shall give oral information stating where, how, and of whom such indecent and obscene articles or things can be purchased or otherwise obtained in any manner, with the intent of having the same conveyed by mail or express, or in any other manner, or if any person shall knowingly or wilfully receive the same with intent to

earry or convey the same by express or in any other manner (except in the United States mail), he shall be subject, for each offense, to the same fines and penalties as are prescribed in the preceding section, and said fine shall be divided and paid in the same manner as therein provided.

Upon my return to Springfield, a few days after, Prof. Slade, Superintendent of Public Instruction, called my attention to the following letter:

—, November 16, 1880.

State Superintendent of Schools, Springfield, Ill.:

DEAR SIR-The enclosed circular was sent through the mail to one of my daughters (who is a school teacher). There is a leak in your office or that of the superintendents of Peoria or Stark counties. My reason for believing the leak is at your office is that my daughter receives circulars, prospectuses and catalogues of the various educational institutions within the State.

I do not wish you to understand that I charge you with furnishing the names of teachers to this class of villains, but am inclined to believe some one having access to the books in your office is guilty of the theft.

Respectfully yours,

The circular was the same that has already been alluded to, thus confirming my suspicions with regard to other schools. A copy of the letter was made and sent to J. E. Stuart, Special Agent P. O. Department, Chicago. Superintendent Slade replied to the letter, of course denying that his office was responsible for the names of the teachers, at the same time requesting the writer to obtain all the information he could with regard to the circular, and to how many others it had been sent, to which he received the appended reply:

----, December 3, 1880.

James P. Slade, Springfield, Ill.:

DEAR SIR—Your letter received, and also one of former date.
Whether any other person received the circular sent out by the so-called or styled Dr.
James, I am unable to state, as I did not like to make specific inquiries of the families having daughters.

The envelope in which they were sent to my daughter, undoubtedly had been lost or destroyed before the nature of the contents was fully understood, as we are unable to

find it.
I will try and induce Dr. -I will try and induce Dr. — to look the matter up. He has no daughters of any age, and will not be suspicioned. Families are more free to communicate things of this character to their family physician than others. I will do the best that I can for the matter. I look upon men of this character as more deserving of hemp than the red-handed murderer.

Respectfully yours,

Accompanied by the Superintendent of Public Instruction, I called upon the Governor, to whom the case was stated, and who promptly replied that the party should be punished; that the nefarious practice must be stopped, and that, if necessary for the prosecution, he would draw on his contingent fund for the same.

Since that time much other evidence has been obtained, and Smith Whittier, alias Dr. James, is now under bonds in the sum of \$2,000 for violating the postal laws of the United States, and his mail matter has been refused transmission, it having been ascertained that thousands of these circulars (and other objectionable matter) have been sent to persons of both sexes from twelve years of age and upwards, throughout the country.

To a better understanding of the chartering business, I herewith

submit a copy from the Secretary of State's office:

This is to certify that the following named persons: Smith Whittier, John W. McLean and John F. McCormick, desire to form a corporation under the provisions of the Revised Statutes of Illinois providing for the formation of profitable corporations. Said above named persons ask to be appointed commissioners to open books for subscription to the capital stock of said corporation.

The name of said corporation shall be the "James Medical Institute."

The object of said corporation shall be to cure the chronic diseases which flesh is heir to.

The capital stock of said corporation shall be five hundred dollars. Said capital stock shall be divided into twenty shares of twenty-five dollars each. The principal office of said corporation shall be at Chicago, Illinois. The duration of said corporation shall be for ninety-nine years.

SMITH WHITTIER, JOHN F. McCORMICK, JOHN W. MCLEAN. (Seal.) (Seal.) (Seal.)

STATE OF ILLINOIS, | SS. Cook County.

I, D. Harry Hammer, a notary public in and for said county, in said State, do hereby certify that Smith Whittier, John W. McLean and John F. McCormick, personally known to me to be the same persons whose names are above subscribed, appeared before me this day in person and acknowledged the same to be for the uses and purposes therein set forth.

Witness my hand and notarial seal this twelfth day of February, A. D. 1876.

D. HARRY HAMMER.

(Seal.)

Notary Public.

To Hon, George H. Harlow, Secretary of State of the State of Illinois:

The commissioners duly authorized to open books of subscription to the capital stock of the James Medical Institute, pursuant to license heretofore issued bearing date the 17th day of February, A. D. 1876, do hereby report that they opened books of subscription to the capital stock of said company, and that the said stock was fully subscribed; that the following is a true copy of such subscription, viz: We, the undersigned, hereby severally subscribed for the number of shares set opposite our respective names to the capital stock of the James Medical Institute, and we severally agree to pay the said company, on each share, the sum of twenty-five dollars.

Names.	Shares.	Amount.
Smith Whittier.	18	\$450
John W. McLean	1	25
John F. McCormick	1	25

That on the 2d day of March. A. D. 1876, at 106 Franklin street, Chicago, Illinois, at the hour of 10 o'clock A. M., they convened a meeting of the subscribers aforesaid, pursuant to notice required by law, which said notice was deposited in the postoffice, properly addressed to each subscriber, ten days before the time fixed therein, a copy of which said notice is as follows, to-wit:

To John F, McCormick:

You are hereby notified that the capital stock of the James Medical Institute has been fully subscribed, and that a meeting of the subscribers of such stock will be held at 106 Franklin street, Chicago, Illinois, on the 2d day of March, A. D. 1876, at 10 o'clock A. M., for the purpose of electing a Board of Directors for said Company, and for the transaction of such other business as may be deemed necessary.

SMITH WHITTIER, J. W. McLEAN, JOHN F. McCORMICK,

Commissioners.

That said subscribers met at the time and place in said notice specified, and proceeded to elect Directors, and that the following persons were duly elected for the term of one year, as follows: Smith Whittier, J. W. McLean, John F. McCormick.

[Signed,]

SMITH WHITTIER, J. W. McLEAN, JOHN F. McCORMICK,

Commissioners.

STATE OF ILLINOIS, County of Cook.

On this 6th day of March, A. D. 1876, personally appeared before me, a notary public in and for said county, in said State, Smith Whittier, John W. McLean and John F. McCormick, and made oath that the foregoing report, by them subscribed, is true in substance and in fact. (Seal.)

D. HARRY HAMMER.

Notary Public.

The foregoing shows how easily the law with regard to corporations can be complied with, and the following statement shows how much it costs to form a corporation:

FEES FOR CORPORATIONS NOT FOR PECUNIARY PROFIT.

For filing papers . \$1 For certificate of organization . 1 For copy of papers . 1	00 00 00
Total	00
FOR PECUNIARY PROFIT.	
For filing articles of organization \$1 For issuing license 1 For certificate of organization 1 For filing commissioners' report 1 For copy of papers 1	00
Total	50

Smith Whittier, alias Dr. James, is in reality the James Medical Institute.

Attention is also called to the following, with regard to Dr. Lucas' Private Dispensary:

cas' Private Dispensary, 132 So. Clark St., Chicago, Ill. Chartered by the State of Illinois, for the special, scientific and speedy cure of private, nervous and chronic diseases. Office hours, 9 to 4 and 7 to 8. Sundays, 10 to 12 A.M. only. Dr. Lucas is a graduate of two regular (Allopathic and Eclectic) medical colleges, is well known on the Pacific coast as founder of the mammoth Bellevue Medical Institute, San Francisco, and it is a well known fact that for 15 years he has confined himself to the study and treatment of sexual and chronic diseases, thus giving him advantages that few possess. Dr. Lucas addresses himself particularly to those who have already placed themselves under the care of ignorant advertising charlatans, from whom they have received no benefits, and who, in fact, have done them more harm than good. Medicine, like all other sciences, is progressive, and every year shows proof of its advance. By a combination of remedies of great carative power, Dr. Lucas has so arranged his treatment that it will afford not only imme tiate relief, but permanent cure. Young men who are suffering from the damning effects of youthful indiscretions, seminal weakness among others, showing some of the following symptoms: Nervous and physical debility, impotence (sexual incapacity), lost manhood, abuses of the system, exhausted vitality, confusion of ideas, dull and loss of brilliancy to the eye, aversion to society, despondency, pimples on the face, loss of energy, and frequency of urinating. You may be in the first stage, but remember, you are fast approaching the last. Do not let false pride and sham modesty deter you from attending to your agonizing ailments. Many a bright and naturally gifted young man, endowed with genius, has permitted his case to run on and on, until remorse racked his intellect, and finally death claimed its victim. Remember that "procrastination is the thiet of time," so lay aside your so-called pride, and consult one who thoroughly nnderstands your ailment, and who alone will know yo for the present fill your station in society, the time is as inevitable as fate when your brillancy will like a flash depart, leaving you a stranded wreck on the shoals of pride, desolate, forgotten and lost; so embrace the opportunity, and procrastinate no longer. If you claim to be a man, act your part manly. Do not console yourself with the thought that nature will help itself, for in doing so you not only fan the flame, but insult nature and yourself. Remember, "large oaks from little acorns grow," "little ills germinate fata diseases." Middle-aged men, married or single, who are prematurely old as a result of excesses or youthful follies, and who are troubled by too frequent evacuations of the bladder, often accompanied by a slight smarting or burning sensation, and finding a deposit of ropy sediment in the urine, and sometimes small particles of albumen will appear, or the color will first be of a thin or milkish hue, and again changing to a dark and torpid appearance, causing nervous debility and loss of vitality. Remember, this is the second stage of seminal weakness. In all such cases a perfect cure is guaranteed, and a radical restoration of the genito-urinary organs. I will forfeit \$500 for every case of private disease that I fail to cure. All interviews and letters are sacredly confidential. Medicines packed so as not to excite curiosity, and sent by express, if full description of case is given, but one personal interview in all cases preferred. given, but one personal interview in all cases preferred.

STATE OF ILLINOIS, I SS. Cook County.

To George H. Harlow, Secretary of State:

We, the undersigned, Lucas R. Williams, Axel W. Boye and Henry Sheffel, propose to form a corporation under an act of the General Assembly of the State of Illinois, entitled "An act concerning corporations," approved April 18, 1872, and all acts amendatory thereof: and that for the purposes of such organization we hereby state as follows, to-wit:

1. The name of such corporation is Dr. Lucas' Private Dispensary.

2. The object for which it is formed is for the treatment of all private, nervous and through disperses.

chronic diseases.

The capital stock shall be five hundred dollars.

The amount of each share is one hundred dollars. The number of shares, five.

The location of the principal office is in the city of Chicago, in the county of Cook, State of Illinois.

The duration of the corporation shall be ninety-nine years.

LUCAS R. WILLIAMS, AXEL W. BOYE, HENRY SHEFFEL.

STATE OF ILLINOIS, SS. County of Cook.

I, George J. Williams, a notary public in and for the city of Chicago, county and State aforesaid, do hereby certify that on this 20th day of March, A. D. 1880, personally appeared before me Lucas R. Williams, Axel W. Boye, and Henry Sheffel, to me personally known to be the same persons who executed the foregoing statement, and severally acknowledged that they executed the same for the purposes therein set forth.

In witness whereof, I have hereunto set my hand and seal the day and year above weitten.

written.

GEORGE J. WILLIAMS, Notary Public.

(SEAL.)

To Hon. George H. Harlow, Secretary of the State of Illinois:

The commissioners duly authorized to open books of subscription to the capital stock The commissioners duly authorized to open books of subscription to the capital stock of Dr. Lucas' Private Dispensary, pursuant to license heretofore issued, bearing date the 22d day of March, A. D. 1886, do hereby report that they opened books of subscription to the capital stock of said company, and that the said stock was fully subscribed; that the following is a true copy of such subscription, viz: We, the undersigned, hereby severally subscribed for the number of shares set opposite our respective names to the capital stock of Dr. Lucas' Private Dispensary, and we severally agree to pay the said company, on each share, the sum of one hundred dollars.

Names.	Shares.	Amount.
Axel W. Boye	1	\$100 00
George J. Williams	1	100 00
Lucas R. Williams	3	300 00

That on the third day of April, A. D. 1880, at the office of Lucas R. Williams, in Chicago, State of Illinois, at the hour of three o'clock P. M., they convened a meeting of the subscribers aforesaid, pursuant to notice required by law, which said notice was deposited in the post office, properly addressed to each subscriber, ten days before the time fixed therein, a copy of which said notice is as follows, to-wit:

To each subscriber, namely: Axel W. Boye, George J. Williams and Lucas R. Williams, you are hereby notified that the capital stock of Dr. Lucas Priqate Dispensary has been fully subscribed, and that a meeting of the subscribers of such stock will be held at Dr. Lucas R. Williams' office on the third day of April, A. D. 1880, at 3 o'clock P. M., for the purpose of electing a board of directors for said company, and for the transaction of such other business as may be deemed necessary.

other business as may be deemed necessary.

[Signed.]

LUCAS R. WILLIAMS, AXEL W. BOYE, HENRY SHEFFEL, Commissioners.

That said subscribers met at the time and place in said notice specified, and proceeded to elect directors, and that the following persons; were duly elected for the term of years, as follows: George J. Williams, Alex W. Boye and Lucas R. Williams.

[Signed.]

LUCAS R. WILLIAMS, HENRY SHEFFEL, AXEL W. BOYE, Commissioners.

STATE OF ILLINOIS, SS.

On this 3d day of April, A. D. 1880, personally appeared before me, a Notary Public in and for said county, in said State, Lucas R. Williams, Axel W. Boye and Henry Sheffel, and made oath that the foregoing report by them subscribed is true in substance and in fact.

(Seal.)

GEORGE J. WILLIAMS Notary Public. On February 6, 1880, the Board revoked the certificate of Lucas R. Williams, *alias* Dr. Lucas, for "unprofessional and dishonorable conduct." Soon after his license was revoked, he formed the above corporation.

In view of the abuse of the law, I am of the opinion that it is the duty of this Board to recommend the revocation of the charters of the "James' Medical Institute" and "Dr. Lucas' Private Dispensary" by the Secretary of State; also, that the Board call the attention of the Legislature to the Law on Corporations. The first section of the act provides that corporations may be formed in the manner therein provided, "for any lawful purpose, except banking, insurance," etc. If this section was so amended as to expressly enumerate the purpose for which such corporations might be organized, the law could not be so easily perverted to the formation of corporations under the color of some "lawful purpose," but, in fact, for the most nefarious of uses. Or, an amendment might be made to the law, authorizing the Governor, Attorney-General and Secretary of State to annul the charters when the corporations for which they were granted are proven fraudulent. It would also do no harm to remind the express companies of their responsibility under the State law, at the same time calling their attention to the assistance they render these men in their disreputable work. I am not aware of a single prosecution under the State law, and I think the attention of the different State Attorneys should be called to the fact. No one more thoroughly appreciates the difficulty of successfully prosecuting cases of this character than myself—a difficulty largely due to the fact that, as a rule, those who receive these circulars, books, etc., say nothing about them. It is, therefore, important that there should be a concert of action, and I have no doubt that, with the coöperation of the United States and State authorities, and the Society for the Suppression of Vice, in a short time the State may be relieved from this menace to public morals and incentive to actual crime.

Besides the two fraudulent institutions just described, my attention was again called to a third, which had been compelled to leave the State, in consequence of the passage of the Medical Practice Act, by the following letter:

WAR DEPARTMENT, SURGEON-GENERAL'S OFFICE, WASHINGTON, D. C., January 6, 1881.

Dr. Jno. H. Rauch, State Board of Health, Springfield, Ill.:

DEAR DOCTOR—Can you obtain for me an official certificate with regard to the status of a medical school entitled the "Edinburg University, Chicago," which has been issuing diplomas, with the following names attached:

N. S. Dodge, M.A. M.D.. President. I. M. Roberts, LL.D., Secretary. Martin Milan, M.D. Samuel F. Solon, M.D. Wm. L. Ludington, M.D. Andrew Edwards, LL.D.

I wish to answer an inquiry which has come to me from New South Wales.

Very respectfully, your obedient servant,

J. S. BILLINGS, Surgeon U. S. A.

The Edinburg University of Chicago was incorporated under the general laws of the State, on the 23d day of September, A. D. 1870. The incorporators were Nathan S. Dodge, A. L. Edwards, James

Black, E. B. Tobin and H. H. Hitchcock, all said to be of Chicago. None of these parties could be found in Chicago in 1878. In one of the circulars issued from St. Louis, it is stated that, "This institution was chartered by act of the Legislature of Illinois in the year A. D. 1869-70," giving the impression that it was chartered by special act, and not under the general law. A certificate purporting to be signed by Edward Rummel, Secretary of State of Illinois, was appended to the circular, stating that, "The above institution was located on the corner of East Madison and State streets, and was destroyed by the great fire of A. D. 1871." Although Sanitary Superintendent of the city of Chicago, I knew nothing of the existence of this university. This certificate of Rummel's had the great seal of the State of Illinois attached, and is dated Aug. 23, 1873, and closes with an appeal "to a liberal public to aid in placing this institution again in its former state of usefulness."

Dodge, in the meantime, left Chicago, and went to St. Louis. He made an effort to secure a certificate from the Illinois State Board, but when required to make an affidavit, he could only swear to 17 years of practice, but, in the letter of transmittal, said that the Cleveland Medical College owed him a diploma. No certificate was granted him, and in a very short time after, he was arrested in Randolph county, for practicing without a license. He was itinerating. Upon his trial he proved that he had been practicing in this State over 10 years, and was acquitted. He made one more attempt to practice in the State about two months after, but then only remained at one place a day, fearing arrest. The trip was so unsatisfactory and unprofitable, that he has not been in the State since,

but has confined his operations to St. Louis.

Among the documents in the possession of the Board is what purports to be a "catalogue of the officers and students of the Edinburg University, March, 1878," and is published in St. Louis. In this it is stated that the Chicago Northwestern College was originally chartered in 1862, rechartered in 1864 and 1870, its name being changed to the Edinburg University. In the fall of 1871, it is stated "that the University, with its museum and library, was destroyed in the great conflagration of Oct. 10." "The charter was afterwards submitted to the Circuit Court of St. Louis, and passed with but slight changes. Its capital stock was \$200,000." In the catalogue, Dodge was advertised for duty in three different chairs. It will be observed how he alludes to the Northwestern College. This is no doubt intended to deceive, as the Northwestern University in an institution of repute at Evanston, under the control of the Methodist Church. Then again, in his list of incorporators, the names of Edwards and Hitchcock appear. Dodge claims that his letters on "Cardine Disease" were published in the Northern Christian Advocate and the Northwestern Christian Advocate of Chicago. I called upon Dr. Arthur Edwards in 1878, who for fourteen years was editor or assistant editor of the latter paper, who informed me that no such a paper as the first named was ever published in Chicago, and that Dodge has never been, to Dr. Edwards knowledge, a contributor to, or an advertiser in the latter named paper. Dodge's coupling with the statements just denied, the names of A. L. Edwards and H. H. Hitchcock as among his incorporators, appears to have been done

with the intent to deceive, as A. Edwards at that time was editor, and L. Hitchcock publisher of the paper in which he falsely said

his letters were printed.

In addition to the letter of enquiry of Dr. Billings, I also received one from Dr. H. B. Baker, Secretary of the State Board of Health of Michigan, asking about the Edinburg University of Chicago, as he had been written to from England.

GENERAL SANITATION.

Owing to a want of time and means, not as much attention has been paid to general sanitation as was desirable, although some progress has been made in the investigation of the pollution of streams, and the water supply of cities and towns. The latter is the most pressing work for the coming year, especially that of Springfield, Peoria, Quincy, Rock Island and Rockford. The diseases of our domestic animals, especially those of an infectious or contagious character, demand our attention from a sanitary, or directly from a commercial, standpoint. A growing interest in local sanitation is manifest throughout the State, and it is clearly the duty of the Board to encourage the same by the formation of local boards of health.

Within the last year repeated applications for the investigation of food adulterations have been made, but for the reasons already alluded to, nothing could be done. In many instances, no doubt, good can be accomplished, but there are others which have no sanitary bearing, and none strictly come under police supervision. It is important that the vital statistics of the State be collected and prepared for publication. In January and February the Board overhauled the record of vital statistics of Chicago, and by notification caused the return of about two thousand births that had been omitted. For the last three months, as time permitted, we have been examining the returns of Sangamon county, but have not finished the investigation. Both in Cook and Sangamon counties too little attention is paid to the returns of vital statistics.

SANITARY CONDITION OF THE STATE HOUSE.

For the last two years my attention has repeatedly been called to the sewer gas escaping from the water closets in the State House. This is most marked when the wind is from the Northwest, and certain atmospheric conditions obtain. No provision has been made for their ventilation, nor do I think they are properly trapped. It is surprising that so little attention should have been paid to so important a subject in a building so recently constructed. I endeavored to get the plans of the plumbing and sewerage of the building, but no one seemed to know where they were, and in their absence the only obvious remedy would seem to be to connect the sewer with the smoke stack of the heating apparatus.

A. L. CLARK, Treasurer Illinois State Board of Health.

STATE MEDICINE IN ILLINOIS.

By H. Wardner, M.D.

The subject of State medicine is, at the present time, attracting much attention from the medical profession and from the public.

For a long time the State has exercised certain functions that are now included in our definition of that term. In Illinois it has legislated against nuisances detrimental to health. It has conferred upon local health boards authority to establish and maintain quarantine, and in other ways it has done certain things which are included in our modern conception of the functions of State medicine.

These things, however, have been only the germs of a later They have been the temporary expedients of immediate necessity, resorted to with no fixed and permanent purpose, and abandoned as soon as the pressure of the immediate necessity has been removed. State medicine has, indeed, grown out of these germs, but it differs from them as the tree differs from the seed from which it sprang. The modern system, so far as it has taken form, is a systematic effort to work certain reforms, protect the public against certain evil practices, and to accomplish certain ameliorations of the harsher conditions of modern life; it is an organized, consistent and persistent effort; a permanent force, acting steadily toward the accomplishment of well defined ends. Upon the medical profession devolves, in a large measure, the duty of executing the will of the State in this matter. Upon the wisdom or the reverse, shown by physicians, will depend the efficiency of the work, and the escape of the system from public condemnation for failure to accomplish needed good upon the one hand, and unnecessary interference with the private rights of the citizen upon the other. If censure is incurred upon either hand, the system must suffer, and the beneficent work which it contemplates must be, in some measure at least, circumscribed. It is worth our while, therefore, while the system is still in its infancy, to consider with care its functions and limitations.

It should be borne in mind that the right of the State to interfere in this matter is derived from the duty of the State. The right is, therefore, sharply limited by the duty out of which it grows. In other words, the State cannot do more than it is in duty bound to do without transcending its right and trespassing upon the domain of private effort. Our whole American system of government, of life, of civilization, rests upon the principle of individuality. It is our wise custom to hold every man responsible for himself,

and to permit every man to use his powers and opportunities in whatever manner he may prefer, with the single condition that, in the exercise of his own individual right, he shall not trespass upon that of another. It is the wise practice of our governments to refrain from doing for the individual anything which he can as well do for himself.

The natural tendency to forget this principle creates the greatest danger which State medicine has to encounter. In our eagerness to do all that lies before us, in our keen appreciation of the great desirability of accomplishing certain ends, we are in danger of losing sight of the distinction between things proper for State medical authority to do, and things which are desirable in themselves but belong properly in the domain of individual effort.

I dwell upon these fundamental principles because the future of State medicine, especially in a country governed, as ours is, by public opinion, will be determined by the degree of conscientious care exercised by its executive agents in confining themselves

strictly within the limits of their proper functions.

It is inevitable that the enforcement of public right in these matters shall interfere somewhat with the interests and convenience of certain individuals, and the enmity of men thus interfered with, and that of their friends, must constitute a hostile agency, working constantly upon public opinion, alert to turn to account against the system whatever it can seize upon for such use. If the system is to be maintained, unembarrassed by effective criticism, it must be kept free from liability to just censure. It must look for justification to the public conviction that its work is not only beneficent, but necessary; that the functions conferred upon it are conferred in the public interests for a necessary public purpose, which could not be accomplished by private effort. It is important, therefore, that we shall, in the outset, draw the line very sharply between the respective domains of State and individual action; that we shall, in this inquiry, keep strictly to the broad principle that governs the matter in order that there may be no possibility of stumbling, no occasion for defense.

The broad principle may be formulated thus: State medicine is charged with the protection of the health of the people from dangers which are beyond the control of private effort; its just functions are derived from necessity, and the necessity constitutes their limit; in their exercise, every unnecessary invasion of private right, every unnecessary interference with the perfect freedom of personal action, is a usurpation of power, an unjustifiable trespass upon the

liberty of the citizen.

With the limits thus set, there is much for State medical officers to do, and brief as the history of the system has been, it has

already accomplished notable results.

Its work relates primarily and directly to three principal subjects. These are: first, medical education; second, sanitation; third, quarantine. Incidently and indirectly it has other functions not less important, namely, first, the education of the people in sanitary laws, and, second, the advancement of science. It is to the credit of the medical profession that, in invoking the authority of the

State in behalf of the public health, and in exercising the powers granted the State Board, the first efforts have been directed to reforming the medical corps of the State by seeking to cast out ignorance, pretension, incompetence, and all manner of quackery.

Through the work of the Board, the profession has deliberately said to the people: "Your greatest danger is from ignorance and the iniquity of pretending physicians, and we have sought, and are seeking, to protect the people at this point, by subjecting the qualification of all persons desiring to practice medicine to reasonable and satisfactory tests.'

The extent to which ignorance, incapacity and fraudulent pretense actually afflict the people is well illustrated by what has happened under the working of the "Act to regulate the practice of medicine

Briefly stated, its provisions with reference to physicians, required only that every physician should have his qualifications to treat disease subjected to a fair and reasonable scrutiny; that the result of such scrutiny should be officially recorded, and that men who should be insufficiently prepared for the proper discharge of their functions as physicians should fit themselves by further study, or should abandon practice in the State under penalty. In executing this law, the State Board of Health has taken pains to govern itself by the rule of great liberality in its tests. It has set up no arbitrary rule of exclusion. It has fully recognized not only the existence and the authority of what are called different schools of practice, but the right of private judgment and opinion also.

In the examinations held by the Board, respect has been paid to differences of opinion upon therapeutics, and theory and practice of

medicine.

Diplomas have received from the Board so much respect as they were entitled to, and no more. That is to say, diplomas of those schools which are known to graduate students only when reasonably well educated, have been accepted as proof of the fitness of their possessors to treat disease; while diplomas which properly create no such presumption, have been held to be insufficient evidence of qualification.

On the other hand, practitioners who have no diplomas at all have not been excluded. All who have not been in practice in the State ten years previous to the act taking effect, have been required simply to submit to a reasonable examination of their acquaintance with the science of medicine. In a few words, the Board of Health in its enforcement of the law, has sought simply to ascertain, in each case, whether or not the person undertaking to treat disease was properly qualified to discharge his functions intelligently and with skill. Nevertheless, even under so liberal a system as this, one thousand seven hundred and fifty men who had been practicing medicine in Illinois, have been compelled, by their discovered ignorance and unfitness, to abandon practice or quit the State.

When the law went into effect, there were about 7,400 persons practicing medicine in the State, of whom 3,800 were non-graduates. There were 423 practicing under the pretended authority of spurious or fraudulent diplomas, and 67 under assumed names. There were 73 itinerants and 23 "cancer doctors."

After the act had been in force three years—that is, in 1880—the number of non-graduates practicing in the State was reduced to about 1,500, the itinerants to 9, and the "cancer doctors" to 4.

The number of graduates from reputable medical schools had in-

creased from about 3,600 to 4,825.

The question arises at this point, how far and in what way State authority may properly provide further against ignorance and incapacity in the practice of medicine. There cannot be two opinions respecting the right and duty of the State to forbid men without medical education to practice medicine; but it is certain that even under the restrictions provided in Illinois, and some other States, there is room and opportunity for incompetence to work ill. It has been found necessary, therefore, to scrutinize very closely the claims of various medical colleges to respect as educational institutions. Graduation from many even of those which cannot properly be called fraudulent schools had been found to be much too easy; it has been found that the diplomas of some of the schools really testify to no adequate preparation. Some of them have so inferior a standing in the profession, and mean so little, that the Board has had to refuse to accept them as proof of their possessor's education in medicine.

In the case of others, the schools have been notified that their diplomas will command respect only after they shall have made certain improvements upon their present methods of teaching and examination, advancing the standard of acquirement necessary to graduation. The effect of these measures, especially when they shall become general in the States, will be to cure a very serious evil which is uncommonly difficult to deal with by other methods. Let me suggest some of the peculiar difficulties that have been encoun-

tered by the advocates of higher medical education.

"They make doctors very easily now," said a distinguished physician recently; and the fact is beyond dispute, even if we exclude all the fraudulent "colleges," and many of the less thorough, honest schools from the account. The truth, known to every physician, is, that it is possible and not difficult for men imperfectly fitted for the profession to secure diplomas from reputable medical colleges. There are two desirable standards which are in a few colleges only held high enough to make fitness certain in every case, namely: first, the standard of preparatory education and general intelligence, which ought to be reached before matriculation in a medical college; and, second, the standard of acquirement in medicine, required as the condition of graduation. There are thoughtful men whose opinions are worthy of respect, who regard indifference to the first of these requirements as a more serious evil than neglect of the other. Medicine is not so exact a science, and the practice requires so large and constant an exercise of trained judgment, acute discernment and broad, active intelligence, that the lack of that preliminary cultivation of the faculties upon which the soundness of judgment and alertness of perception depend may fairly be reckoned as even more fatal than insufficiency of technical training. The standard of the colleges is too low, however, in both respects. The most that can be truly said of any medical school in this country is that it affords an intelligent, properly prepared and conscientious

student all necessary means of acquiring a sound and sufficient medical education. In few of them are the conditions such that the student must actually get such an education; in but few of them is it made impossible for ill-trained men to secure diplomas; yet every diploma is the certificate of the college that its possessor is well and

properly trained in his profession.

The desirability of elevating both standards is felt by the authorities of every reputable medical school, but the obstacles which stand in the way of reform are great and peculiar. The difficulty grows out of the unfortunate fact that the medical schools are forced into rivalry with each other, for the patronage of students. Without endowments for their support, the schools must depend upon the fees of students for funds with which to maintain themselves.

In these circumstances, an advance of the standards of admission and graduation in any medical school or increased rigidity in the maintenance of existing standards practically involves the decay of

the school itself.

Students insufficiently prepared for the study of medicine, and students in haste to graduate with the smallest possible expenditure of effort in technical study, will naturally shun the school whose requirements are severe, because they may secure their diploma elsewhere more speedily and with smaller effort.

For the practical purposes of the student, the diploma of the easy-going school is as good as that of its stricter and more conscientiously conducted rival. The reforming school, therefore, simply reforms itself out of existence by driving away the students whose

fees are necessary for its support.

The right remedy for this evil would be judicious liberality on the part of the public in providing adequate endowments for those schools which are disposed to maintain high standards of qualification. If that was done such schools would lose students, perhaps, for a time, but they could afford to do so, and in time the difficulty of securing graduation at their hands would so enhance the value of their diplomas that a new incentive to attend such schools in preference to laxer ones would operate powerfully in their favor. In the absence of conditions so desirable, however, much good in this direction is sure to be accomplished by State requirements acting directly both on colleges and on students. When the States generally shall adopt a course similar to that taken by Illinois, the hands of the conscientious schools will be upheld by a powerful influence. Students will not attend a medical school whose diploma is denied recognition in any considerable number of the States, and thus the very end sought by the schools in lowering the standards and relaxing their rigidity of requirement, namely, the attracting of students to their lecture rooms, will be attainable only by reversing the rule, advancing the standard, and holding candidates for graduation strictly to their duty.

It is not the function of the State to train and educate physicians, or even to provide facilities for their education; that is a matter belonging strictly within the domain of individual effort. But in the way just pointed out, what we call State medicine can and must operate to advance the standards of the colleges and cure the defects of the existing system of medical education. If this is an in-

direct result, it is one far reaching and beneficent, and it should be

counted not the least among the good fruits of the system.

With respect to the two remaining points in which State medicine is a directly acting force, namely, quarantine and the enforcement of public sanitary regulations, the necessity for governmental interference is obvious. The dangers which are to be guarded against by quarantine and sanitary regulations uniformly have the test characteristics of things proper to be dealt with by public authority. There are grave dangers to the whole community which are wholly beyond the control of individual care. As an individual, I cannot protect myself against the danger of the yellow-fever infection which the reckless selfishness of a fugitive from some fever-stricken city prompts him to bring to my door in his baggage.

As an individual, I am powerless to compel my neighbor to keep his drains in proper condition; and the dangers from these sources which assail me equally threaten every individual in the community

in which I reside.

If the neglected drain of my neighbor endangered only himself, there would be neither occasion nor, strictly speaking, right for the interference of a health board. If the luggage of the fever fugitive contained disease-germs dangerous to himself alone, the State could not take possession of his goods without violating his private right. But these things, and things like them, threaten the health, the lives and the prosperty of whole communities, and are therefore distinct violations of public right, and it is with violations of public right that the State, through the law, deals.

The duty of government to establish and maintain quarantine and

sanitary restraints is therefore obvious and undisputed.

The only points that are open to discussion with respect to this branch of the subject are those which relate to conflicts of authority on the one hand, and those which concern methods on the other. Our peculiarly complex system of government and the utter failure of anything like coincidence between State lines of business and social communication, give rise to some vexing problems with respect to local, State and national health jurisdiction. How shall quarantines be maintained? By whose authority, and under what restraints? These are grave and perplexing questions sometimes, and they are made the more difficult of correct answer by two facts: First, that local jealousy and business greed frequently seek to turn the public anxiety to wrongful account; and, second, that the territorial limits of State or municipal jurisdiction sometimes forbid the efficient performance of the necessary duty.

It is frequently found that the gate which must be shut against infection lies beyond the territorial jurisdiction of the threatened community, or of the State of which it is a part. In like manner the inhabitants along a State's border are powerless to protect themselves, even with the aid of the law, against unsanitary conditions existing on the other side of the imaginary line that bounds the jurisdiction of the State in which they live. On the other hand, local health boards have been known to use their power of quarantine for the unjust injury of rival cities and towns in business, a form of abuse which needs to be guarded against with the utmost

vigilance.

These things give rise to many perplexing questions which must be solved before the subject of quarantine can be regarded as properly settled. The end to be sought, of course, is the exclusion of disease germs from uninfected regions with the least possible interruption of the ordinary freedom of intercourse between different parts of the country. The creation of a National Board of Health was an effort to solve this problem, and it has, without doubt, accomplished something in that direction. It has power to supply the defects of State jurisdiction where territorial boundaries create embarrassments. By undertaking to give timely warning in every case of danger it deprives local greed and jealousy of opportunities to pervert quarantine to trade purposes, and it also obviates another difficulty, namely, the concealment of the truth, frequently practiced in infected cities to prevent the injury to their trade which the knowledge of the existence of infection there would work. The capacity of the National Board of Health to accomplish much needed good in these ways is very great, and there is reason to hope for such an organization of the National Board's work as will make it a highly efficient supplemental agency. As yet, however, there exist occasions for conflicts of authority between the National and the local boards, which must be adjusted upon some mutually acceptable basis before the two systems, working together, will become capable of their highest usefulness.

The other matter—that which concerns methods of quarantine protection and sanitary improvement—is even more important as a subject of investigation and wise experiment. We know really so little respecting the laws that govern the propagation of disease by infection and contagion, that more than half of what we do by way of protection is done in the dark, and much of it, no doubt, done wrong. There can be little question that in our ignorance we sometimes impose burdensome restrictions upon the freedom of inter course, which might be dispensed with if our knowledge of the laws with which we deal were greater than it is, and, on the other hand, it is certain that, in spite of our best endeavors, the infection sometimes eludes our vigilance and finds entrance through some aperture which might easily have been closed if our knowledge of the subtle nature of the disease, and the occult method of its transmission were profounder than it is. We can and do restrict the area of epidemics by our existing methods; but we do this imperfectly for want of knowledge, and in doing it we are compelled, for want of exact information, to interfere with commercial and social inter-

course to a greater extent than need be.

It is not too much to say, therefore, that so far as quarantine and sanitary functions are concerned, one of the most important things that the men charged with the administration of State medicine have to do is to learn. Quarantine, more or less effective, could be maintained by municipal or even private effort. As a matter of fact, it has been more than once maintained by purely individual effort, plus a shot-gun. But a systematic sanitary organization, under State law, opens a field of investigation and improvement in quarantine methods which is wholly closed to local efforts. It systematizes the work over large areas; it collects together in a single body of facts all the results of personal and local observation; it frees

the body of facts thus gained from all uncertainty with respect to conditions fulfilled or neglected, and thus enables us to make inductions with precision and safety from a sufficiently broad foundation of accurately made and correctly recorded observations. In fine, a system of State medicine organizes the investigation of the laws of disease transmission, and gives that investigation its opportunity. Under this system, what has hitherto been an incoherent mass of loosely observed facts, lacking significance for want of analysis and comparison,—lacking even such value as individual observations, because the carefulness and skill of their making have been insufficiently attested,—this loose and nearly valueless mass of observations becomes a highly significant body of facts upon which we may rest conclusions with entire safety. Such a body of facts, studied in the collated form and interpreted authoritatively, must point the way to the rapid and certain improvement of our quarantine and sanitary methods. Under a system of this sort we have already gained much, and we shall gain greatly more. We shall learn how to exclude infection and to remove local causes of diseases with far greater precision and certainty than are now possible, and we shall learn also how to accomplish these ends at smaller cost and with less interference with travel and business than now.

With respect to the indirect functions of State medicine—namely, the advancement of science and the education of the public in sanitary laws—it may be said, briefly, that these things flow as the necessary results of the direct action of the system.

The exclusion of ignorant and fraudulent pretenders from the profession, the pressure brought to bear upon the colleges in behalf of better education, the systematic study of the principles of sanitation and quarantine—all these things must advance science, whether that end is contemplated or not. The other object referred to, namely, the education of the people in health laws, follows quite as inevitably from the direct operations of the work. The discovery of a source of typhus or typhoid in a badly-constructed drain, when made by constituted and recognized authority, sets everybody thinking on the subject of domestic drainage, and is in itself an effective lesson in the laws of health preservation.

These indirect benefits, though worthy ends to be sought, are rather results than purposes of the system.

In running thus rapidly over the field, I have mentioned only the chief objects to be kept in view. The minds of all physicians are awake already to these matters, and there is greater necessity just now to keep in mind the dangers that attend the development of the system, and to observe very strictly the limitations that should govern us, than to exalt the work to be done. It is in human nature to exceed bounds where the importance and desirability of the ends sought are keenly realized.

We need to remember, therefore, that we have enemies to confront and dangers to avoid upon every hand. Every quack whose profits are cut off by the interference of health officers is an active enemy of the system from which he suffers. Every selfish property owner who is compelled to make costly improvements in his houses and tenements in the interest of public health, becomes a hostile

influence. Still worse, perhaps still more difficult to combat, is the inertia of mere conservatism. How solidly this force can stand in resistance to anything which savors of change, merely because it is change, every one of us knows, and no one can adequately tell.

In the face of such obstacles, a strict adherence to principle—a rigid refusal to step beyond the assigned limits of function—is the necessary condition of success in the work.

MEDICAL EDUCATION.

Report of Committee of the Illinois State Board of Health.

Your undersigned committee, appointed to report requirements of "good standing" for medical colleges, respectfully submit that the committee addressed to many leading members of the medical profession, and to the medical colleges of the Union, a circular making the following

INQUIRIES:

I. In the present state of medical science and education in this country, what preparation is and ought to be required for admission to the lectures of a medical college, to entitle it to "good standing?"

II. On what branches of medical and cognate science ought courses of lectures to be provided, and what length of course on each to entitle the college to "good standing?"

What requirements as to full attendance, reading and quizzes, or other examinations, occasional or final, ought to be maintained in such colleges?

IV. What attendance on lectures, as to time, number of terms, or courses and intervals between courses, are and ought to be re-

quired by such colleges as conditions of graduations?

V. What other conditions of graduation, such as hospital practice, or practice under preceptors, attendance on clinics, and dissec-. tions, are and ought to be required for graduation?

To this circular eighty-seven replies were received from officials of medical colleges and medical societies, and from eminent physicians. The medical colleges also promptly sent their annual announcements or circulars, and many other documents were furnished the

committee touching the matters involved in their questions.

The letters, which are herewith presented to the Board, express much interest in the subject under discussion, and evince deep and general desire for improvement in medical education in this country. It is evident that the members of the medical profession are ready to welcome and sustain all wise efforts to advance the standards and increase the thoroughness of medical instruction. committee regret that the proper limits of their report will not permit them to quote at length from the letters received.

The annexed tabular statement, drawn from their annual announcements, will show the present usages of the medical colleges in the several respects involved in our inquiries. The letters accompanying the announcements often express a desire and purpose to introduce reforms as soon as the concurrence of other colleges will permit. This is especially true in regard to the preparatory studies to be required of candidates for admission to the lecture courses. The failure to require adequate preparation before entering upon professional studies is doubtless one of the most serious and even fatal defects in American medical education. As students usually begin their studies with private preceptors, the remedy lies first with those who consent to act as such preceptors. Let them strenuously advise all candidates to make a liberal and thorough scholastic preparation, and refuse to receive any who are destitute of such preparation, and the reform would be well begun. But the failure of private preceptors to perform this obvious duty cannot exonerate medical colleges from the responsibilities which, by implication, they voluntarily assume. The committee are glad to report that so many of the leading medical colleges have now announced preliminary examinations as conditions of admission, in accordance with the vote of the American Medical College Association, that we are justified in including such examinations in our requirements or marks of "good standing."

After a careful comparison of the usages of the colleges, and of the opinions of the profession, the committee offer the following scheme of requirements, and recommend its formal adoption by the Board as its definition of the colleges whose diploma shall be here-

after accepted by it:

MINIMUM REQUIREMENTS FOR A MEDICAL COLLEGE TO BE HELD IN "GOOD STANDING."

I. Conditions of Admission to Lecture Courses.

1. Credible certificates of good moral character.

2. Diploma of graduation from a good literary and scientific

college, or high school. Or, lacking this,

3. A thorough examination in the branches of a good English education, including mathematics, English composition, and elementary physics or natural philosophy. This provision will not be required before the close of the lecture sessions of 1882–1883.

II. Branches of Medical Science to be included in the Courses of Instruction.

1, Anatomy. 2, Physiology. 3, Chemistry. 4, Materia Medica and Therapeutics. 5, Theory and Practice of Medicine. 6, Surgery. 7, Obstetrics and Gynæcology. 8, Hygiene and Sanitation. 9, Medical Jurisprudence.

III. Length of Regular or Graduating Courses.

1. The time occupied in the regular courses or sessions from which students are graduated shall not be less than five months, or twenty weeks each.

2. Two full courses of lectures, not within one and the same year of time, shall be required for graduation with the degree of Doctor of Medicine.

IV. Attendance and Examinations or Quizzes.

- 1. Regular attendance during the entire lecture courses shall be required, allowance being made only for absences occasioned by the student's sickness, such absences not to exceed twenty per centum of the course.
- 2. Regular examinations or quizzes to be made by each lecturer or professor daily, or at least twice each week.
- 3. Final examinations on all branches, to be conducted, when practicable, by other competent examiners than the professors in each branch.

V. Dissections, Clinics and Hospital.

- 1. Each student shall have dissected during two courses.
- 2. Attendance during at least two terms of clinical and hospital instruction shall be required.

VI. Time of Professional Studies

Before graduation shall not be less than three full years, including the time spent with a preceptor, attendance upon lectures, or at clinics and hospital.

VII. Instruction.

The college must show that it has a sufficient and competent corps of instructors, and the necessary facilities for teaching, dissections, clinics, etc.

REMARKS ON REQUIREMENTS.

It is a matter of regret that the Board is not at liberty to adopt the practice of the best and most advanced institutions as its standard. It can only express its desire to see improvements made as rapidly as the conditions of the colleges and the public sentiment will permit.

The addition of Latin, botany and some other branches to the preliminary examinations, ought to be made as early as is practicable.

The committee also would be glad to see other important specialties of medical science and art added to the courses of required education.

CLOSING REMARKS.

While submitting the above as the committee's conclusions upon the matter referred to them, we cannot refuse to express our concurrence in the general desire held by so many members of the medical profession for an early and large advance in the standards and courses of medical education in this country. Among the improvements most frequently suggested, and evidently of high importance, the committee note the following:

IMPROVEMENTS.

I. The requirements of adequate preparatory studies for admis-

sion to the lecture courses of the medical colleges.

It is too shamefully true that at present many students are admitted to these lecture courses, whose illiteracy prohibits their profiting by the instruction given, excepting in the narrowest limits, and precludes the possibility of their attaining such knowledge as the duties of their profession positively demand.

It would be well for the profession, and for the people, if none were accepted as students of medicine who had not graduated from

a reputable college, or at least from a good high school.

Natural talent and aptitude may go far toward fitting a man for any calling, but no talent can take the place of thorough education in a profession where such large fields of knowledge are to be mastered, and so many and such important judgments are to be constantly and promptly formed.

Such a familiar knowledge of good English, and of professional language, as will enable the student to comprehend promptly and precisely the lectures to which he listens, seems too obvious a requirement to need argument, and such a knowledge cannot be

gained but by years of training, or extensive reading.

But it is not enough that the medical student shall merely comprehend what he hears. He must be able to weigh and judge for himself the importance of the facts, and the value of the theories which are offered.

There is a palpable absurdity in expecting to make skillful physicians of illiterate students by mere dint of reading them lectures,

even when accompanied by quizzes and examinations.

It is doubtful whether any examination of qualification such as can be made at the crowded opening of a session, can be relied upon to assure the requisite preparation for admission. The diploma of a high school, or better still, of a college, would be a far safer evidence of the candidate's fitness.

II. The committee heartily concur with the American Medical College Association, in its statement, that "an adequate medical education is such as gives to the student a fair practical knowledge of all the branches of medical science, and a mental discipline sufficient for the proper use of such knowledge in the practice of the medical art. A practical knowledge of these various branches necessitates demonstrative teaching and personal manipulation which can be provided in an adequate degree in medical colleges only."

We would add to this obvious statement that the study of theories can produce nothing but theoretical knowledge. Abstract study may discipline the mind, but skill in any art or profession can be gained only by an actual performance of the duties of that profession.

The laboratory, the dissecting room, the clinic, and the hospital practice know no substitutes. The student who does not gain skill here must win it at the bedside of his patients, and often at fearful cost.

III. The committee also concur in the claim of the American Medical Association that "not less than three full years should be devoted to a diligent study of medicine, before graduating, or com-

mencement of practice, and that at least one-half of these years be spent in a proper medical college." It should be added that a strict and regular attendance upon all the lectures should be required, and that the time professionally spent under a preceptor should be given honestly to a close and earnest study. Whoever will carefully consider the extent of the several branches of science to be mastered by the student of medicine, will easily conclude that three full years will afford but scanty time for the work to be done. Indeed, it is doubtful whether any true scholar would attempt to do this work in such time without great hesitation. How inadequately it must be done, or, rather, how shamefully it must be neglected by those who reduce their attendance on lectures by fully one-half, and waste in idleness their term of private study, is only too obvious.

idleness their term of private study, is only too obvious.

IV. Many of our medical colleges profess to require evidence of a good moral character in their candidates. The committee are of the opinion that no requirement should be more rigidly enforced. To let loose upon the community, and into the midst of its confiding families, under the sacred name of "physician," persons of vicious habits, and of immoral principles, is to send destruction where we would send healing. None but the purest and most upright can safely be trusted with the prerogative and opportunity of the family physician. The medical college offers insult and injury to mankind when it receives to its classes and arms with its diplomas, men whose worthiness is not established by the amplest testimony

whose worthiness is not established by the amplest testimony.

While the Board have no authority to prescribe changes or improvements in our system of medical education, the committee believe that we should be ready to recognize the efforts of the colleges themselves, and to advance our standard as fast and as far as the lead of these colleges will permit. No injustice is done to medical schools to require of them the highest attainable standard. Their honor and their true success will alike be promoted by it.

We shall only fulfill our duty as a State Board of Health by promoting to the utmost that largest and most potential force in sanitary science and in public hygiene—a well-trained and thoroughly

educated medical profession.

The committee ask further time to report on the other branch of inquiry referred to them: the regulations under which complaints will be received by the Board.

John M. Gregory, W. M. Chambers, John H. Rauch, Committee.

This report was unanimously adopted, and after the session of '82-'83 the recommendations of the committee will become the rule of the Board in the recognition of diplomas.

EXTRACTS FROM LETTERS CONCERNING THE GOOD STAND-ING OF MEDICAL COLLEGES.

[Received from representative Medical Men of this and other States, in response to a Circular of the Board.]

F. P. ANTLE, M.D., PETERSBURG, ILL.

In favor of a higher education, both State and medical; believes this can be best attained through the National and State medical societies.

PROF. W. B. ATKINSON, M.D., PHILADELPHIA, PA.

Regards as absolutely imperative that we have an advance. Men must either present a diploma or pass an examination in Latin, English composition and the ordinary branches of a high-school course. The course in medical colleges should not be less than four years. Until teaching and diploma-giving are separated, there can be no real progress. Young men seem to manifest a great lack of interest in higher education.

M. F. BASSETT, M.D., QUINCY, ILL,

Thinks more regard should be paid to the moral qualifications of a student and that the physical condition should be perfect. That the student should have a strong love for the profession and should not be permitted to enter because of a pecuniary interest or desire for social position. He should attend at least three full terms of lectures and dissect two courses.

PROF. JOHN BENNETT, M.D., CLEVELAND, OHIO.

Means should be used in medical colleges so that it may be definitely known that the student is giving full attention to all the instruction given. Recitations or quizzes ought to take up one-fourth or one-fifth of the time. Final examinations should be rigid, and clinical practice ample.

PROF. WM. H. BOLLING, M.D., LOUISVILLE, KY.

Good English education should be required for matriculation, Anatomy, Physiology, Materia Medica, Chemistry, Practice of Medicine, Clinical Medicine and Surgery, Surgery, Obstetrics and Gynæcology. Opthalmology, Otology, Laryngology, Hygiene, Microscopy and Analytical Chemistry, should be taught. Three full sessions of twenty weeks, three-years study. Quiz of every student by each professor twice a week. Regular attendance required.

PROF. WM. BRODIE, M.D., DETROIT, MICH.

Claims for the Michigan Medical College, the highest requirements of any college in the Union. Wishes that the requirements for preliminary education could be made uniform throughout the Union.

PROF. CHAS. CARY, M.D., BUFFALO, N. Y.

Thinks common-school education ought to be exacted, and classics recommended. Full course of three years, two courses of dissection.

E. F. CLEVELAND, M.D., DUNDEE, ILL.

Feels that none but college graduates who can speak and write one of the modern languages other than their native tongue should be permitted to enter the profession, and the course should extend over five years, with one year of hospital practice and one of practical pharmacy.

PROF. LEARTUS CONNOR. M.D., DETROIT, MICH.

Reters to the Michigan College of Medicine as requiring preliminary examination, three courses of lectures, and practical clinical work in the hospital and out-door clinics. Will increase these requirements as soon as the sentiment in the profession warrants it. The satisfaction to the students and teacher from the plan is very great. It would immensely help the revolution now going on if your Board would refuse to recognize colleges having a lower standard than the one sketched. The best men in the profession would support it, those only opposing who are interested in low grade schools. Hopes the Board will adopt a high standard, and the higher the better.

W. J. CHENOWETH, M.D., DECATUR, ILL.

Three years' graded course and one term of twenty weeks should be required.

LUCINDA M. CORR, M.D., CARLINVILLE, ILL.

For matriculation, students should be required to present first-grade certificates of county superintendents or pass an examination. Curriculum should embrace fifteen departments. Three courses of nine or ten months; 75 per cent. should be the established grade for passing. Two terms of dissection and one year of hospital practice should be required.

PROF. A. C. COWPERTHWAITE, M.D., IOWA CITY, IA.

Students should be required to pass a matriculation examination on the English Language, Grammar and Composition, Arithmetic, Natural Philosophy and Latin. Lectures should be given on Chemistry, Toxicology, Anatomy, Microscopy, Physiology, Materia Medica, Pharmacy, Therapeutics, Diagnosis, Pathology, Obstetrics, Gynæcology, Surgery, Opthalmology, Otology and Medical Jurisprudence. There should be three full courses, and the length of each not less than five months. Final examinations in writing should be required on all subjects, and 75 per cent, be necessary for graduation. Two courses of dissection should be required.

H. C. CUNNINGHAM, M.D., CHARLESTON, ILL.

Thinks three courses should be required, and hygiene and medical jurisprudence added to the usual seven chairs. A fair knowledge of Latin should be required for entrance.

J. W. DORA, M.D., MATTOON, ILL.

All students should be classified scholars for entrance. Favors a graded course of three years, and is in favor of the European plan of having all licentiates take two years' practice with a preceptor, or serving as an interne in a public hospital before taking the degree of M.D. There should be two full courses of dissection.

PROF. J. W. DOWLING, M.D., NEW YORK CITY.

In favor of a three years graded course: of a hoard of censors, who shall examine the candidates for graduation, and who shall have the power of rejecting over the vote of the faculty. Is in favor of preliminary examinations, which should be enforced by national law, and examiners appointed by general government.

L. B. EDWARDS. M.D., RICHMOND, VA.

Thinks a knowlege of Greek, Latin, German and French should be required. Chairs of Mygiene and Medical Jurisprudence should be added, and there should be fifteen months of lectures.

PROF. J. H. ETHERIDGE, M.D., CHICAGO, ILL.

Thinks means should be taken by all colleges to see that all matriculants are attending lectures regularly. Thinks all the requirements of the American Medical College Association should be carried out, and that they are sufficient.

A. B. FALLER, M.D., NEWTON, ILL.

Is decidedly in favor of requiring attendance on three terms of nine months each, with the summer devoted to practical work in the chemical and physiological laboratory; attendance on clinics and recitations. Is also in favor of public examinations, by the State Board of Health, regardless of diplomas.

H. V. FERRELL, M.D., CARTERVILLE, ILL.

Thinks the Board need only require a three-years' graded course and a preliminary examination to place the standard where it should be. Is gratified to see the excellent enforcement of the law, and other States copying after it.

PROF. C. P. FROST, M.D DARTMOUTH COLLEGE, HANOVER, N. H.

Thinks higher standards will only come with a greater demand for them. Is in favor of having regular recitations as in literary colleges, and lectures should supplement the recitations.

WM. H. FITCH, M.D., ROCKFORD, ILL.

Thinks satisfactory preliminary examination should be required. A three-years' graded course, nine months long, and embracing all the so-called specialties. A written examination at the end of each course. State should appoint examiners, who should examine candidates for graduation; faculty should have nothing to do with it. The general and medical education of American practicing physicians is a disgrace to the profession, and should be remedied now.

PROF. E. C. FRANKLIN, M,D., ANN ARBOR.

Thinks there should be a matriculation examination, which should *always* be enforced; a three-years' graded course, and each course to last at least six months; 75 per cent. of attendance. Quizzes once a week on every subject. Examination made every three months. One year clinical and hospital practice. Students should have attended one obstetrical case and dissected two terms.

W. E. GILLILAND, M.D., COATSBURG, ILL.

Thinks the final examination should be conducted by the State. Candidates should read one year before entering college, and then should attend three full courses of not less than five months each, no two of which should be in the same year.

B. M. GRIFFITH, M.D., SPRINGFIELD, ILL.

Thinks there should be a preliminary examination, which should include Latin, and a three-years' graded course should be required. Daily quizzes, and examinations at the end of each course. Clinical experience or hospital practice should be required.

JULIUS GUENTHER, M.D., QUINCY, ILL.

Thinks a diploma from a high school should be required for matriculation.

W. F. HALL, M.D., McLeansboro, Ill.

Thinks there should be an examining board, appointed by the State, not connected with the colleges at all. Students should also take hospital instruction.

F. B. HALLER, M.D., VANDALIA, ILL.

Would have five years' study required, and three courses of lectures of nine months each, with daily quizzes on the subjects taught. Every student should have thorough clinical experience. Let there be a high grade.

PROF. PLYM. S. HAYES, M.D., CHICAGO, ILL.

Would require three courses of lectures, and each student should dissect three parts. Hospital course and course in Chemical Laboratory. Each professor should quiz and be assisted in this by two other physicians, who should constitute an examining board.

PROF. W. B. HAZARD, M.D., ST. LOUIS, MO.

Believes in carrying out the requirements to which the St. Louis College of Physicial and Surgeons is pledged and will insist upon.

S. S. HERRICK, M.D., NEW ORLEANS, LA.

Thinks there should be a matriculation examination. Analytical Chemistry, Clinical Practice, Pathology, Medical Jurisprudence and Hygiene should be added to the usual number of lectures. Should be three courses of lectures in different years. It is desirable to elevate the standard as fast as may be practicable, both as prefatory to the study of medicine, and especially that belonging to the medical curriculum.

PROF. FLETCHER INGALS, M.D., CHICAGO, ILL.

A prelimin ry examination should be required by every college. The length of the course of lectures should not be less than eight months. Attendance on three of these courses and four years' medical study should be required for graduation.

W. H. JONES, M.D., HENRY, ILL.

Thinks an examination on common-school branches should be required for admission. His standing at such examination should be such that he would be entitled to at least a second-grade certificate in case he were going to teach those branches.

PROF. D. N. KINSMAN, M.D., COLUMBUS, OHIO.

Thinks the first thing necessary to secure the highest efficiency in medical colleges is to make the warrant for practice no longer the diploma of any institution, but the indorsement of qualification by a State Board of Examiners. There should be an admission examination. Three courses of lectures of twenty-six weeks each, and four years' study, including the time spent at lectures.

W. H. KANE KING, M.D., MT. STERLING, ILL.

Thinks there should be a preliminary examination for admission, and strict enough to entitle the candidate to a first-class teacher's certificate. More attention should be paid to the moral qualifications also. Faithful attendance on three courses of lectures of six months each. Quizzes held by each professor without extra cost. Chairs on Hygiene Pathology, Otology, Pathology and Histology, should be added to the usual chairs. Practical Anatomy should be made compulsory, and students taught that they can never safely give it up.

GEORGE KIRKPATRICK, M.D., LAHARPE, ILL.

Thinks that three courses and an average of 80 per cent, should be required. One term of five months in each year.

PROF. H. G. LANDIS, M.D., COLUMBUS, OHIO.

A college is in good standing when it conforms to the requirements of the American Medical College Association in all respects. If in addition it requires a preliminary examination for entrance, and has a longer session than the adopted standard, its standing is or ought to be thereby improved. Starling Medical College has done the latter, and has the former under advisement.

PROF. C. A. LINDSLEY, M.D., NEW HAVEN, CONN.

No college should be considered in good standing which does not take care to admit only such students to its classes as are able to understand and acquire a knowledge of medicine as it is taught in our best colleges. This should be determined by a preliminary examination, the lowest standard of which should be such attainments in general information. Latin, etc., as is required for admission to the Freshman class in our best colleges. Recitations from text books can be most profitably added to the lecture system. A six months' course ought to be the shortest, and the students ought to be required to attend fully the means of instruction provided for them. Not less than three years' pupilage should be required. The number of courses of lectures should depend on the methods of instruction.

W. MASSIE, M. D. PARIS, ILL.

Thinks that every young man wishing to enter upon the study of medicine, should be required to master a course of English studies, including, especially, natural sciences. Because of the facility of acquiring this education, there is no excuse for not obtaining it. Courses should be six months long. Faithful attendance on lectures, daily quizzes and frequent examinations should be required. Three full courses covering three years. Attendance on dissections and clinics during two years.

SAMUEL MILEHAM, M. D., CAMP POINT, ILL.

Thinks a good English education, natural sciences, Latin, etc., should be required for admission as well as a good moral character. Lectures should be given on fifteen subjects, including all the specialties. Attendance on all the lectures. Quizzes every day by all the professors. Three years' graded course and one session of six months each year should be required with a practical term of three months in the spring, during which Practical Chemistry and Anatomy can be better studied. Attendance on clinics during the whole time. Final examinations should be made by qualified disinterested men not connected with the school.

A. J. MILLER, M.D., PARIS, ILL.

Thinks a thorough education should be required for permission to study medicine, and that physicians should pay more attention to the attainments of persons they take as students. Lecture terms should not be less than five months. Three years should be devoted to the study. Close attendance and plenty of anatomy should also be required.

PROF. J. J. MULHERRON, M.D., DETROIT, MICH.

Thinks the time has come for action, and that a liberal preliminary education is imperative. Refers to the requirements of the Michigan College of Medicine. Three courses of lectures, extending through three years, with intervals of six months between each course. Chemical instruction one hour each day.

PROF. JNO. A. MURPHY, M.D., CINCINNATI, OHIO.

Thinks Illinois has done well and set a good example to other States. Says the Miam College wishes to be considered a friend to the advance movement, willing to do anything that it can to assist it.

G. W. NESBITT, M.D., SYCAMORE, ILL.

Thinks a student should be examined in ordinary common-school branches and Latin, before he is allowed to commence the study of medicine either in an office or college. Courses should be twenty weeks in length. Eight chairs should be required. Daily quizzes. Final examination by professors and board of censors outside of the college. 75 per cent. necessary for passing. Three full courses of lectures. Hopes the Board will succeed in its efforts to elevate the profession.

PROF. THOS. OPIE, M.D., BALTIMORE, MD.

Approves most heartily of the objects of the Board, and will do anything in his power to further the work. Before admission to a medical college, all students should pass an examination in English Composition, Mathematics and Latin. Lectures should be divided among twelve chairs, courses six months in length. Believes that lengthening the courses is a step in the right direction. Two courses of dissection and attendance on clinics imperative.

PROF. A. B. PALMER, M.D., ANN ARBOR, MICH.

Is in favor of a high standard, but is scarcely able to say what should be the requirements to entitle a medical college to good standing.

PROF. W. F. PECK, M.D., IOWA CITY, IOWA.

Thinks the requirements of the American Medical College Association should be carried out, and are sufficient to entitle a college to good standing.

PROF. W. A. PHILLIPS, M.D., CLEVELAND.

Thinks a diploma from a literary college or high school, or *actual* examination, should be required. There should be fourteen chairs, two courses of twenty weeks each, full attendance, daily quizzes and a rigid final examination; dissection each term, and three years' study.

DAVID PRINCE, M.D., JACKSONVILLE, ILL.

High school education should be required for admission. The whole line of medical science should be taught, and Physics, Chemistry, with Laboratory Practice and Comparative Anatomy insisted upon. An attendance on lectures, recitations and private reading six hours a day for three years. In favor of a progressive course, and recitations as well as lectures.

CHARLES T. REBER, M.D., SHELBYVILLE, ILL.

Thinks more attention should be paid to Anatomy. Requirement of attendance more strict. Quizzes frequent and thorough.

PROF. P. GERVAIS ROBINSON, M.D., St. Louis, Mo.

Advocates most heartily an established State Board of Examiners, which would be the best, shortest and most satisfactory mode of settling all questions of requirements and qualifications, leaving the various schools the simple duty of educating their students. Then schools would take their proper rank very soon in accordance with their ability to turn out men properly qualified.

A. B. SIMMONS, M.D., MORRISONVILLE, ILL.

Thinks a student should be required to attend lectures until he can pass a rigid examination, be it three or more courses. Clinics and dissections should be required during every course.

D. S. SMITH, M.D., CHICAGO, ILL.

Is in favor of examination by the State Board, and it should be of such a character as to disclose the applicant's general and particular attainments. Favors the State Board heartily in its work.

L. STOSKOPF, M.D., FREEPORT, ILL.

Thinks a thorough preliminary examination should be required in fact, and not nominally, as is generally the case. Hospital practice ought to be required, and practice under preceptors ought not to be taken in place of this.

JOS. M. TONER, M.D., WASHINGTON, D. C.

Thinks the requirements of medicine demand a three-years' graded course, and even that time is too short. Hygiene and Sanitation should be added to the present chairs.

PROF. JAS. TYSON, M.D., PHILADELPHIA, PA.

Thinks the requirements of the Medical Department of the University of Pennsylvania are the very least that should be exacted although it is a very delicate matter to prescribe conditions for other medical colleges. These requirements are literally carried out by the University. They include three courses of five months each, and the necessity of early further modification of the method adopted is felt.

H. D. VALIN, M.D., CHICAGO, ILL.

Thinks a high-school education should be required. Such final examination as will prove the full capacity of the graduate. Three years' study and three courses of five months each should be required.

J. A. WAGNER, M.D., QUINCY, ILL.

Students should be eighteen years of age, pass a preliminary examination, not given to dissipation of any kind. Should have a certificate of never having been charged with any criminal action. Two full courses of dissections: not simply paying fees, but work.

G. S. WALKER, M.D., St. Louis, Mo,

Good academic education should be required. Three courses of twenty weeks each, including holidays. Practice under preceptors should not be accepted as time at lectures. Three courses of dissection, two courses of clinics, and hospital practice. Examination each year.

WM. G. WILSON, M.D., SHELBYVILLE, ILL.

Thinks a high-school education should be required. Three courses of lectures, occupying twenty-five months, extending through three years. Ninety per cent. of attendance on lectures, and a final examination necessary for graduation.

H. J. B. WRIGHT, M.D., ODIN, ILL.

Thinks colleges situated in small cities cannot give clinical advantages nor dissecting privileges sufficient, and should not be recognized as in good standing. The colleges at Indianapolis and Kcokuk, to his knowledge, are deficient. The final examination should be something more than mere form.

S. M. WYLIE, M.D., PAXTON, ILL.

High-school education. Four courses of six months each. Lectures on all subjects' including specialties. Dissection of the whole body insisted on. Thorough course not insisted on, but required.

S. J. YOUNG, M.D., TERRE HAUTE, IND.

Regards a thorough English education as indispensable to the intelligent study of medicine, and no college in good standing which does not require it for admission. Good moral character should be required. Attendance on three courses of lectures, dissections, and clinical instruction during the entire time.

THE CENTENNIAL MEDICAL SOCIETY OF SOUTHERN ILLINOIS.

Through their committee, Drs. J.W. Hoyt, Jas. Picquet, and N. S. Marshall, reports that in its opinion a change from large quantity to better quality is imperative. Applicants for admission to lectures should present a diploma from some high school or department of science. A common-school education is not sufficient. Age twenty years. A full graded course, each session twenty weeks long, is necessary. Chemistry, Anatomy and Physiology taught practically through three courses. Daily quizzes. Examination at the end of each term. Attendance on clinics should be compulsory.

THE JASPER CO. MEDICAL ASSOCIATION

Recognizes the fact that medical colleges annually confer the degree on individuals not qualified to practice, and that the State Board is compelled to recognize them. The members pledge themselves to use all their influence in favor of having *all* persons examined by the Board before being admitted to practice.

ENFORCEMENT OF THE MEDICAL PRACTICE ACT.

Ninety-three suits have been brought throughout the State for violation of the Medical Practice Act. In nearly all cases the suits were withdrawn on condition the parties complained of should leave the State. Of those not adjusted nine resulted in the imprisonment of the offending parties. In all instances where appeals were taken to higher courts the decisions of the courts of original jurisdiction were affirmed. In one of the earliest cases which came up under the act, the following decision was rendered by Judge Williams:

Decision rendered by Hon. E. S. Williams, at the October term of Cook Circuit Court. 1878.

NATHAN J. AIKEN vs.
STATE BOARD OF HEALTH.

This bill is filed by complainant, alleging that he is a duly licensed practicing physician in the city of Chicago: that he was regularly educated as a physician, graduated at the Cincinnati College of Medicine and Surgery in 1865; and that in June last a certificate was also issued to him by the State Board of Health as such physician, under the laws of the State of Illinois; that his practice is of great value to him: that while holding said certificate he has received from the State Board of Health a notice that said Board threatened to revoke his license; that the alleged cause of revocation is the publication by complainant of divers professional notices in divers public newspapers, which notices are set out in full in complainant's bill; that the proposed action of the Board of Health originates from the fact of the publication of these printed notices by complainant, which conduct said Board alleges to be unprofessional and dishonorable, but which complainant claims is neither dishonorable nor unprofessional within the meaning of the Statute; and complainant denies the right of the State Board to revoke his license for any such cause, and prays for an injunction restraining such proposed action upon the part of the State Board of Health.

Unon the argument of the meaning for popularized that the

Upon the argument of the motion for injunction, complainant has insisted that the advertising to which he has resorted is neither dishonorable nor unprofessional conduct within the meaning of the Act of May 29, 1577; that that statute is unconstitutional for various reasons, but, principally, that it grants exclusive privileges to those physicians who have been in the State of Illinois ten years, and is not uniform in its operations upon he class of persons to whom it refers, and is therefore unreasonable, and that it deprives

the person upon whom it is sought to be enforced of his property without due process of law. That part of the law relating to the State Board of Health and physicians which is particularly brought to the attention of the court by the argument for this injunction, is to be found in sections 10 and 13 of the act of May 29, 1877, and is as follows:

"\$ 10. The State Board of Health May refuse certificates to individuals guilty of unprofessional cr dishonorable conduct, and they may revoke certificates for like causes."

Section 13 provides for the punishment of any person practicing medicine or surgery in this State without complying with the provisions of the Act, except that it exempts from the operation of the law all persons who "have been practicing medicine ten years within this State."

this State."

The State Board of Health is a corporation composed of seven persons, appointed by the Governor of the State, by and with the advice and consent of the Senate. It is constituted, among other things, to have charge of medical practice and medical practitioners in this State, and it is its right and duty to have surveillance of the professional conduct of physicians by the lamguage of the act of incorporation. Any persons guilty of unprofessional conduct may be by it refused certificates, and any persons having certificates who were guilty of unprofessional conduct, may have their certificates revoked by the Board. The object of the incorporation of the Board is, among other things, to secure a higher professional standar I in the medical profession. It is to exclude empirics and empiricism from the profession. The duties of the Board are various, and the interests intrusted to its keeping affect all classes of the community, and affect them in the most vital points. The character of its duties is in part set forth in the second section of the act creating the Board. "The State Board of Health shall have the general supervision of the interests of the health and life of the citizens of the State. They shall have charge of all matters pertaining to quarantine, and shall have authority to make such rules and regulations, and such sanitary investigations as they may from time to time deem necesof all matters pertaining to quarantine, and shall have authority to make such rules and regulations, and such sanitary investigations as they may from time to time deem necessary for the preservation or improvement of public health," and all police officers, sheriffs and other employes of the State are required to enforce its rules and regulations so far as the efficiency of the Board may depend on their cooperation. Such a Board must, from the necessity of the case, be vested with a large discretion. And, in the legitimate exercise of its discretion, it ought not to be, and cannot be, properly controlled by judicial tribunals. The duties of the Board, with reference to the sanitary condition of the people, bring it into such relations to the medical profession as fit it to determine the necessary qualifications of its members, and to judge of the propriety or impropriety of their professional deportment. The law has devolved this and similar duties upon the Board, and it has created no other corporation in the State for a like purpose, nor has it given to any State officer supervision over the Board in the discharge of its appropriate Board, and it has created no other corporation in the State for a like purpose, nor has it given to any State officer supervision over the Board in the discharge of its appropriate duties and the exercise of its legitimate discretions. A physician may be guilty of unprofessional and dishonorable conduct, and not of criminal conduct. It would have been a work of supererogation in the law-makers to have vested the Board of Health with the supervision of the unprofessional conduct of the medical practitioner, if unprofessional conduct and criminal conduct were synonymous. As a citizen, the physician is, with every other citizen, answerable to the criminal laws, and as an alleged criminal is liable to be arraigned before our courts. It is only as a physician that he is liable to have his professional conduct inquired into and brought before the State Board of Health. The term unprofessional is therefore far wider than criminal. Many acts would be unprofessional that were not criminal; some acts that were criminal might not be esteemed unprofessional. What is professional conduct can only be determined by bringing the act to the professional criterion, and who so well qualified to judge of the proper professional criterion for the medical profession as a Board constituted as the bill shows this Board to be, of seven gentlemen, five of whom are physicians, and a Board created this Board to be, of seven gentlemen, five of whom are physicians, and a Board created for sanitary purposes, and accustomed to sanitary investigation? The "unprofessional" conduct which authorizes the Board to exclude a physician from the profession does not. therefore, mean necessarily criminal or immoral acts, but such conduct as is inconsistent with the honorable practice of the profession; and in judging of such conduct, the Board of Health has a wide discretion, and in its exercise courts ought not to interfere with it. The general principle of law applicable to this, as to all other similar corporations, is laid down in High on Injunction, section 797, as follows:

"Equity will not interfere by injunction for the purpose of controlling the action of public officers constituting inferior quasi-judicial tribunals, such as Boards of Supervisors, Commissioners of Highways, and the like, on matters properly pertaining to their jurisdiction; nor will it review and correct errors in the proceedings of such officers, the proper remedy, if any, being at law by writ of certiorari." * * "And where they have exercised their discretion, and made their decision in good faith and without any intention of oppressing or injuring private persons, an injunction will not be allowed against their action."

Independent, however, of the exercise of discretion, it appears in this case as a matter of tact, that the advertisements of the complainant were unprofessional. He has set forth some nine different styles of advertisements in his bill, to which, within a short space of time, he admits himself to have resorted, and a large number of the most eminent medical practitioners in this city have made affidavits stating that such advertisements are unprofessional, and some of them have added that they were false. Even a layman would only need to read some of these advertisements to know that they ought to be unprofessional; but we have the oaths of a large number of physicians that they are unprofessional, and no affidavit to the contrary. But the complainant insists that this law creating the Board of Health is unconstitutional, because it grants exclusive privileges to certain physicians, and denies the same privileges to others; that it is not uniform, and therefore unreasonable, and that it deprives complainant of his property without due process of law. These objections are all to be determined in view of the answer to the question. What is a license to practice a profession? Is it a constitutional privilege's Is it a property? Is it a contract? The complainant's solicitor earnestly asserts the affirmative. All the learned professions, in this respect, are upon a par with each other, and many other occupations are upon a par with them. In a certain sense, it is true that every man has a natural right to follow out the bent of his inclination, and be a clergy-

man, a lawyer, a doctor, a seavenger, a pedler, an auctioneer, just as he may choose. But it is not true that a man can practice any of these professions or occupations except But it is not true that a man can practice any of these professions or occupations except he does it upon such terms as the law imposes, and the law can impose just such terms upon any of these professions or employments as the legislators, in their discretion, deem most for the interest of the community. The law has always sought to fill the learned professions with learned men, and upright and honorable men. However sally it may have failed, the attempt has been in the right direction. It therefore has hedged round the professions of law and medicine with licenses, as it has hedged in many other businesses in the same way. Men who have the property and lives of others especially intrusted to their keeping ought to be men of skill and learning in their several departments. More than that: it is of the utmost importance that all dishonor and dishonesty should be expelled from the learned professions, and the tendency of legislation has always been to effect this result. If then, a man has the natural right to be a lawyer or a doctor, he possesses that right subject to every restriction which the law may have created before, or which it may create subsequent to his entrance upon the given profession, and which restrictions shall tend to secure for it upright and honorable practitioners, and to elevate that profession and make it more beneficent in its influences upon and relations to society.

tioners, and to elevate that profession and make it more beneficent in its influences upon and relations to society.

In the case of Cohen vs. Wright, 22 California, 294, the court decided that the right to practice law was not a constitutional right, nor an absolute right derived from the law of nature, but a mere creation of the statute, and the license conferred only a statutory right subject to the control of the Legislature; that it was not property, and was not a contract between the Legislature and the attorney within the constitutional meaning of the words "property" and "contract." In no proper sense can these words "property" and "contract be applied to the right to practice medicine. The right is not descendible from its possessor to his heir, cannot be bought or sold, and may be lost by misconduct or immorality upon the part of the practitioner.

The State (12 Miscouri in the gase of Simpone vs. The State (12 Miscouri in the gase of Simpone vs. The State (12 Miscouri in the gase of Simpone vs. The State (12 Miscouri in the gase of Simpone vs. The State (12 Miscouri in the gase of Simpone vs. The State (12 Miscouri in the gase of Simpone vs.

The Supreme Court of Missouri, in the case of Simmons vs. The State (12 Miss., 271) said that it was beyond the power of the most refined sophistry to establish the proposition that a right to practice law was a contract, and held that it was a mere naked grant of a privilege without consideration, which grant the State might revoke, or impose such conditions upon its excercise as are deemed proper or demanded by the public good. To the same effect is the case of State vs. Gazlay, 5 Ohio, 22, and of Goldthwaite vs. City of Montgomery, 50 Alaba, 486, and not a case can be found reported which holds a different doctrine. doctrine.

Complainant insists that this law is not uniform, because it exempts from its operation all physicians who have been ten years in practice in the State of Illinois, and therefore is unreasonable and void. It is not necessary, in order to constitute uniformity in the operation of a law, that it should bear equally upon all citizens of the State who stand in the same relation to it, that is, upon all who are under substantially the same facts. (Smith vs. Judge of 12th District, 17 California, 555.) A physician who had the advantage of a professional practice of ten years in a State, would acquire by that very practice a knowledge of local diseases and their appropriate treatment which could not be possessed by a stranger to the region, however extensive may have been his reading. It would be apparent that the ten-years resident might have obtained by his residence and medical practice a knowledge which would place him in different relations to a sanitary law than parent that the ten-years resident might have obtained by his residence and medical practice a knowledge which would place him in different relations to a sanitary law than a resident of a few weeks. But it is said that a resident of nine years and eleven months would be in no different relations to the law from a resident of ten years. It is said that the rule of exemption is arbitrary. But so must every rule be. Graduation from a medical university establishes no fixed standard of professional knowledge. Different institutions have different standards, and the same institution does not apply the same standard to all its students. Dolts gain admission to all the professions through diplomas issued by famous colleges and universities. A court would hesitate to declare a law unreasonable because it applied to some, under one state of facts, and did not apply to others very dissimilarly situated. similarly situated.

And courts decline to set aside positive enactments of the Legislature merely on the ground that in their opinion the law is unreasonable. (Dillon on Municipal Corporations, Section 262.) Whether reasonable or unreasonable is one of the questions properly before the Legislature, and upon which it must be supposed to have passed in enacting the law.

But independent of this question last discussed, inasmuch, as the right to practice medicine is a mere statutory privilege subject to be changed at any time by the Legislature, and does not rise to the dignity of a contract or of property, there is no reason why such a privilege should not be denied to one man and extended to another in the discretion of the legislators. In this view, the objection to the law for want of uniformity in its application fails, and to this purport are the decisions of The People vs. Judge of 12th District, 17 California, 547, and Cohen vs. Wright, 22 California, 321, and other cases.

The prayer for the injunction will therefore be denied.

The foregoing decision was affirmed, on appeal, by the Appellate Court, whence it was carried up to the Supreme Court, but was abandoned by the party leaving the State.

Note—The affidavits above alluded to were presented by the attorneys of the State Board of Health, from representative members of each of the different schools of medical practice. Copies of the Code of the Medical Ethics of the different forms of medical practice were likewise offered in evidence.

To facilitate the enforcement of the act by defining its terms, and to correct an impression that it was the duty of the Board to prosecute for violations and infractions, the Attorney-General was appealed to for authoritative opinions on these points; and the following letters embrace the information thus elicited:

> STATE OF ILLINOIS, ATTORNEY-GENERAL'S OFFICE, SPRINGFIELD, July 23, 1880.

Dr. J. H. Rauch Secretary State Board of Health:

DEAR SIR-I am in receipt of your letter of the 6th inst., enclosing copy of a resolution adopted by the State Board of Health, as follows:

"That the Secretary of the Board be and is hereby directed to ask the official opinion of the Attorney-General whether the law furnishes any definition of the term 'practice of medicine,' or 'practicing medicine,' within the meaning of the medical practice act, and if so, what the same is; and whether the Board is not authorized by the said act to determine the meaning of the term for the regulation of physicians or the prosecutions of offenses under said act."

The eleventh section of the act to regulate the practice of medicine in the State of Illior the serventi section of the act to regulate the practice in medicine in the state of fill-nois, approved May 31, 1877, contains the following: Any person shall be regarded as practicing medicine within the meaning of this act who shall profess publicly to be a physician and to prescribe for the sick or who shall append to his name the letters "M.D."—[Laws of 1877, page 156, section 11.]

Independent of the statutory definition, the terms import and embrace the pursuit and vocation of one who holds himself out to the public as possessing the requisite skill to treat disease, and accordingly prescribes for or treats patients as a physician.

I do not think the Board has any authority to prescribe any definition of those terms in conflict with that given in the statute, but for all purposes connected with the discharge of the duties of the Board, it may ascertain for itself the true meaning of the statute upon this question. The ultimate authority to determine all questions as to the proper meaning or construction of the statute in reference to this question is vested in the courts.

I am, very respectfully,

J. K. EDSALL, Attorney-General.

STATE OF ILLINOIS, ATTORNEY-GENERAL'S OFFICE, SPRINGFIELD, July 23, 1880.

Dr. J. H. Rauch, Secretary State Board of Health:

DEAR SIR-Your letter of the 11th inst. was received, requesting, in behalf of the State Board of Health, my opinion upon the following questions:

Whose duty is it to prosecute under the act of May 25, 1877, known as the State Board of Health Act?

2. Who should file complaints under that act?

- Whose duty is it to prosecute under the act of May 29, 1877, known as the Medical Practice Act?
 - 4. What is the proper mode of procedure under the last-named act?

These questions will be answered in their order:

The only penalties provided for in the State Board of Health Act, so-called, approved 1. The only penalties provided for in the State Board of Health Act, so-called, approved May 25, 1877, are those specified in sections 2, 5 and 6, to the amount of \$16 each. [Laws of 1877, page 209.] The fourth section of the act requires the sum of ten dollars to be recovered in any court of competent jurisdiction in the State, at the suit of the county clerk. Justices of the peace have jurisdiction of such suits, and the same should be instituted in the name of the county clerk in his official capacity as plaintiff, "A B. County Clerk of county.

2. Inasmuch as the same are required to be "at the suit of the county clerk," it is his official duty to institute such suits in proper cases.

- 3. The act of May 29, 1877, known as the Medical Practice Act, provides that "any person practicing medicine or surgery in this State without complying with the provisions of this act shall be punished by a fine of not less than \$50 nor more than \$500, or by imprisonment in the county jail for a period of not less than thirty days nor more than three hundred and sixty-five days, or both such fine and imprisonment, for each and every offense." [Laws of 1877, page 15. section 13.] The fine and imprisonment therein provided for can only be enforced by indictment in the circuit court, or information filed by the State's Attorney in the county court, in like manner as other violators of the criminal laws are required to be prosecuted. It is the duty of the State's Attorneys in the several counties to conduct such prosecutions.
- 4. Any person who has a knowledge of the facts may make complaint before the grand jury, or furnish to the State's Attorneys the necessary facts, upon which he can file information in the county court.
- 5. The proper mode of proceeding in prosecutions under the Medical Practice Act I have already indicated—that is, such prosecutions are to be carried on either by indicatement or information, as in other cases. If it is desired to place a person charged with violating that act under recognizance, to appear at the proper court to answer any indictment that may be found against him for such offense; complaint may be made before justices of the

peace, upon which preliminary examination can be had; and in case probable cause is shown, such party may be required to enter into recognizance, with sufficient sureties, to appear at the next term of the court having jurisdiction of the offense, to answer such indictment, the same as in other criminal cases.

I am, very respectfully,

J. K. EDSALL, Attorney-General.

The following is the form of complaint above alluded to:

The following is the form of complaint above and ded to:
STATE OF ILLINOIS, SS. County, SS.
The complaint and information of, of in said county, made before
without then and there possessing the qualifications presembed in
the certain act of the General Assembly of the State of Illinois, entitled "An act to regulate the practice of medicine in the State of Illinois," approved May 29, 1877, and without then and there having complied with the provisions of that act, that is to say, the said
then and there so practiced medicine without then and there having an unrevoked certificate of the genuineness of his diploma as a graduate in medicine from the State Board of Health of the State of Illinois; and without then and there
having an unrevoked certificate from the said State Board of Health, authorizing him to practice medicine or surgery in the State of Illinois, and that he was not then and there a commissioned surgeon of the United States Army or Navy, and had not been practicing
ten years within the State of Illinois prior to the first day of July, 1877; contrary to the form of the statute in such cases made and provided. That this complainant has just and reasonable grounds to believe, and does believe,
that the said has committed said offense, and, therefore, prays that he may be arrested and dealt with according to law.
Subscribed and sworn to before me this, A. D. 188, Justice of the Peace.
Justice of the Peace.

OFFICIAL REGISTER

OF

PHYSICIANS AND MIDWIVES

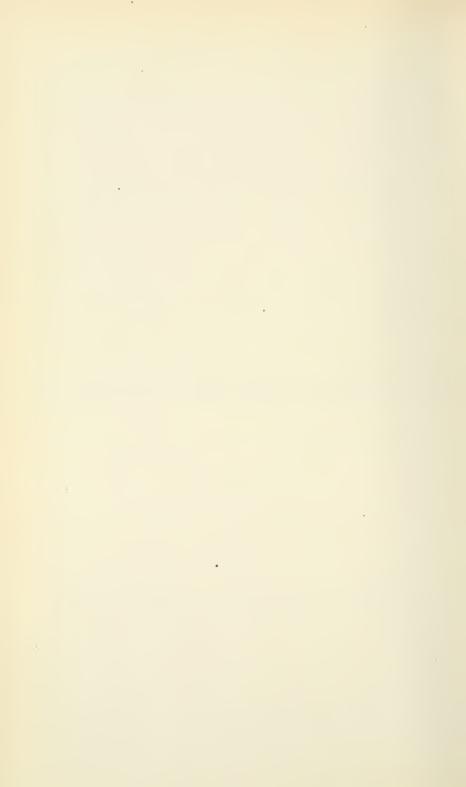

TO WHOM CERTIFICATES HAVE BEEN ISSUED BY

THE ILLINOIS STATE BOARD OF HEALTH,

UNDER THE

ACT TO REGULATE THE PRACTICE OF MEDICINE IN THE STATE OF ILLINOIS,

APPROVED MAY 29, 1877.

STATE BOARD OF HEALTH ACT.

An Act to create and establish a State Board of Health in the State of Illinois. Approved May 25, 1877; in force July 1, 1877.

Section 1. Be it enacted by the People of the State of Illinois, represented in the General Assembly. That the Governor, with the advice and consent of the Senate, shall appoint seven persons, who shall constitute the Board of Health. The persons so appointed shall hold their offices for seven years: Provided, that the terms of office of the seven first appointed shall be so arranged that the term of one shall expire on the thirtieth day of December of each year, and the vacancies occurring otherwise, shall be filled by the Governor, with the advice and consent of the Senate: And provided, also, that appointments made when the Senate is not in session may be confirmed at its next ensuing session.

Sec. 2. The State Board of Health shall have the general supervision of the interests of the health and life of the citizens of the State. They shall have charge of all matters pertaining to quarantine; and shall have authority to make such rules and regulations, and such sanitary investigations, as they may from time to time deem necessary for the preservation or improvement of public health; and it shall be the duty of all police officers, sheriffs, constables, and all other officers and employes of the State, to enforce such rules and regulations, so far as the efficiency and success of the Board may depend upon their official cooperation.

Scc. 3. The Board of Health shall have supervision of the State system of registration of births and deaths as hereinafter provided; they shall make up such forms and recommend such legislation as shall be deemed necessary for the thorough registration of vital and mortuary statistics throughout the State. The Secretary of the Board shall be the superintendent of such registration. The clerical duties and the safe-keeping of the bureau of vital statistics thus created shall be provided by the Secretary of State.

Sec. 4. It shall be the duty of all physicians and accoucheurs in this State to register their names and post-office address with the county clerk of the county where they reside; and said physicians and accoucheurs shall be required, under penalty of ten dollars, to be recovered in any court of competent jurisdiction in the State, at suit of the county clerk, to report to the county clerk, within thirty days from date of their occurrence, all births and deaths which may come under their supervision, with a certificate of the cause of death, and such correlative facts as the Board may require, in the blank forms furnished as hereinafter provided.

Sec. 5. When any birth or death shall take place, no physician or accoucheur being in attendance, the same shall be reported to the county clerk within thirty days from the date of their occurrence, with the supposed cause of death, by the parent, or if none, by the nearest of kin, not a minor, or if none, by the resident householder where the death shall occur, under penanty as provided in the preceding section of this act.

Sec. 6. The coroners of the several counties shall be required to report to the county clerk all cases of death which may come under their supervision, with the cause and mode of death, etc., as per forms furnished, under penalty as provided in section four (4) of this act.

Sec. 7. All amounts recovered under the penalties herein provided shall be appropriated to a special fund for the carrying out of the object of this law.

See. 8. The county clerks of the several counties in the State shall be required to keep separate books for the registration of the names and post-office address of physicians and accoucheurs, for births, for marriages, and for deaths; said books shall always be open to inspection without fee; and said county clerks shall be required to render a full and complete report of all births, marriages and deaths to the Secretary of the Board of Health, annually, and at such other times as the Board may direct.

Sec. 9. It shall be the duty of the Board of Health to prepare such forms for the record of births, marriages and deaths as they may deem proper; the said forms to be turnished by the Secretary of said Board to the county clerks of the several counties, whose duty it shall be to furnish them to such persons as are herein required to make such reports.

Sec. 10. The first meeting of the Board shall be within fifteen days after their appointment, and thereafter in January and June of each year, and at such other times as the Board shall deem expedient. The meeting in January of each year shall be in Springfield.

A majority shall constitute a quorum. They shall choose one of their number to be President, and they may adopt rules and by-laws for their government, subject to the provisions of this act.

See. II. They shall elect a Secretary, who shall perform the duties prescribed by the Board; and by this act he shall receive a salary which shall be fixed by the Board; he shall also receive his traveling and other expenses incurred in the performance of his official duties. The other members of the Board shall receive no compensation for their services, but their traveling and other expenses, while employed on business of the Board, shall be paid. The President of the Board shall quarterly certify the amount due the Secretary, and, on presentation of his certificate, the Auditor of State shall draw his warrant on the Treasurer for the amount. warrant on the Treasurer for the amount.

Sec. 12. It shall be the duty of the Board of Health to make an annual report, through their Secretary or otherwise, in writing, to the Governor of this State, on or before the first day of January of each year, and such report shall include so much of the proceedings of the Board, and such information concerning vital statistics; such knowledge respecting diseases, and such instruction on the subject of hygiene, as may be thought useful by the Board for dissemination among the people, with such suggestions as to legislative action as they may deem necessary.

Sec. 13. The sum of five thousand dollars (\$5,000), or so much thereof as may be necessary, is hereby appropriated to pay the salary of the Secretary, meet the contingent expenses of the office of the Secretary, and the expenses of the Board, and all costs for printing, which, together, shall not exceed the sum hereby appropriated; said expenses shall be certified and paid in the same manner as the salary of the Secretary.

Sec. 14. The Secretary of State shall provide rooms suitable for the meetings of the

Board, and office-room for the Secretary.

PRACTICE OF MEDICINE ACT.

An Act to Regulate the Practice of Medicine in the State of Illinois. Approved May 29, 1877; in force July 1, 1877.

Section 1. Be it enacted by the People of the State of Illinois, represented in the General Assembly. That every person practicing medicine, in any of its departments, shall possess the qualifications required by this act. If a graduate in medicine, he shall present his diploma to the State Board of Health, if such Board of Health shall be established by law, or Board of Examiners herein named, for verification as to its genuineness. If the diploma is found genuine, and if the person named therein be the person claiming and presenting the same, the State Board of Health, if such Board of Health be established by law, or the Board of Examiners, shall issue its certificate to that effect, signed by all of the members thereof, and such diploma and certificate shall be conclusive as to the right of the lawful holder of the same to practice medicine in this State. If not a graduate, the person practicing medicine in this State shall present himself before said Board, and submit himself to such examinations as the said Board shall require; and, if the examination be satisfactory to the examiners, the said Board shall issue its certificate in accordance with the facts, and the lawful holder of such certificate shall be entitled to all the rights and privileges herein mentioned.

Sec. 2. In case a State Board of Health shall not be established by law, then each State Medical Society incorporated and in active existence on the first day of July, eighteen hundred and seventy-seven, whose members are required to possess diplomas or license from some legally chartered medical institution in good standing, shall appoint, annually, a Board of Examiners, consisting of seven members, who shall hold their offices for one year, and until their successors shall be chosen. The examiners so appointed shall go before a county judge and make oath that they are regular graduates, or licentiates, and that they will faithfully perform the duties of their office. Vacancies occurring in a Board of Examiners shall be filled by the society appointing it by the selection of alternates or otherwise.

Sec. 3. The State Board of Health, if such Board of Health shall be established by law, or Board of Examiners, shall organize within three months after the passage of this act; they shall procure a seal, and shall receive through their secretary applications for certificates and examinations; the president of each board shall have authority to administer oaths, and the Board to take testimony in all matters relating to their duties; they shall issue certificates to all who furnish satisfactory proof of having received diplomas or licenses from legally chartered medical institutions in good standing; they shall prepare two forms of certificates, one for persons in possession of diplomas or licenses, the other for candidates examined by the Board; they shall furnish to the county clerks of the several counties a list of all persons receiving certificates. In selecting places to hold their meetings they shall, as far as is reasonable, accommodate applicants residing in different sections of the State, and due notice shall be published of all their meetings. Certificates shall be signed by all the members of the Board granting tnem, and shall indicate the medical society to which the Examining Board is attached.

Sec. 4. Said State Board of Health if such Board of Health shall be established by law

Sec. 4. Said State Board of Health, if such Board of Health shall be established by law, or Board of Examiners, shall examine diplomas as to their genuineness, and if the diploma shall be found genuine as represented, the secretary of the State Board of Health, if such Board of Health, if such Board of Health, shall be established by law, or Board of Examiners, shall receive a fee of one dollar from each graduate or licentiate, and no further charge shall be made to the applicants; but if it be found to be fraudulent, or not lawfully owned by the possessor, the Board shall be entitled to charge and collect twenty dollars of the applicant presenting such diploma. The verification of the diploma shall consist in the affidavit of the holder and applicant that he is the lawful possessor of the same, and that he is the person herein named. Such affidavit may be taken before any person authorized to administer oaths, and the same shall be attested under the hand and official seal of such officer, if he have a seal. Graduates may present their diplomas and affidavits as provided in this act, by letter or by proxy, and the State Board of Health, if such Board of Health shall be established by law, or Board of Examiners, shall issue its certificate the same as though the owner of the diploma was present.

Sec. 5. All examinations of persons not graduates or licentiates, shall be made directly by the Board, and the certificates given by the Boards shall authorize the possessor to practice medicine and surgery in the State of Illinois.

- Sec. 6. Every person holding a certificate from the State Board of Health, if such Board of Hoalth shall be established by law, or Board of Examiners, shall have it recorded in the office of the clerk of the county in which he resides, and the record shall be indorsed thereon. Any person removing to another county to practice, shall procure an endorsement to that effect on the certificate from the county clerk, and shall record the certificate, in like manner, in the county to which he removes, and the holder of the certificate shall pay to the county clerk the usual fees for making the record.
- Sec. 7. The county clerk shall keep, in a book provided for the purpose, a complete list of the certificates recorded by him, with the date of the issue and the name of the medical society represented by the State Board of Health, if such Board of Health shall be established by law, or Board of Examiners, issuing them. If the certificate be based on a diploma or license, he shall record the name of the medical institution conferring it, and the date when conferred. The register of the county clerk shall be open to public inspection during business hours.
- Sec. 8. Candidates for examination shall pay a fee of five dollars, in advance, which shall be returned to them if a certificate be refused. The fees received by the Board shall be paid into the treasury of the medical society by which the Board shall have been appointed, and the expenses and compensation of the Board shall be subject to arrangement with the society.
- Sec. 9. Examinations may be in whole or in part in writing, and shall be of an elementary and practical character, but sufficiently strict to test the qualifications of the candidate as a practitioner.
- Sec. 10. The State Board of Health, if such Board of Health shall be established by law, or Board of Examiners, may refuse certificates to individuals guilty of unprofessional or dishonorable conduct, and they may revoke certificates for like causes. In all cases of refusal or revocation, the applicant may appeal to the body appointing the Board.
- Sec. 11. Any person shall be regarded as practicing medicine within the meaning of this act, who shall profess publicly to be a physician, and to prescribe for the sick, or who shall append to his name the letters of "M.D." But nothing in this act shall be construed to prohibit students from prescribing under the supervision of preceptors, or to prohibit gratuitous services in cases of emergency. And this act shall not apply to commissioned surgeons of the United States army and navy.
- Sec. 12. Any itinerant vender of any drug, nostrum, ointment or appliance of any kind, intended for the treatment of disease or injury, or who shall, by writing or printing, or any other method, publicly profess to cure or treat diseases, injury or deformity by any drug, nostrum, manipulation or other expedient, shall pay a license of one hundred dollars a month, to be collected in the usual way.
- Sec. 13. Any person practicing medicine or surgery in this State without complying with the provisions of this act, shall be punished by a fine of not less than fifty dollars, nor more than five hundred dollars, or by imprisonment in the county jail for a period of not less than thirty days, nor more than three hundred and sixty-five days, or by both such fine and imprisonment, for each and every offense; and any person filing, or attempting to file, as his own, the diploma or certificate of another, or a forged affidavit of identification, shall be guilty of a felony, and upon conviction, shall be subject to such fine and imprisonment as are made and provided by the statutes of this State for the crime of forgery, but the penalties shall not be enforced till on and after the thirty-first day of December, eighteen hundred and seventy-seven: Provided, that the provisions of this act shall not apply to those that have been practicing medicine ten years within this State

- Perky, Samuel; Chicago, 393 S. Leavitt street; age, 39; nativity, Ohio; in practice, total years 16—in Illinois, 2; graduate, Medical Department University of Michigan, March 26, 1862; certificate issued January 26, 1878; registered, and certificate filed for record, January 26, 1878.
- Phillips, D. T.; Chicago, 81 South Clark street; age 30; nativity. New York; in practice, total years, 11—in Illinois, 1; graduate, Homeopathic Hospital College, Cleveland, February 14, 1871. Homeopathic Medical College, Detroit, June 27, 1872; certificate issued February 5, 1881; registered, and certificate filed for record, November 28, 1881.
- Phipps, Walter A.: Chicago, Wabash avenue and 22d street: age 27; nativity, Massachusetts; in practice 4 years; graduate, Harvard Medical College, June 26, 1878; certificate issued November 17, 1881.
- Pischezak, John: East St. Louis, St. Clair county; age 40; nativity, Austria: in practice, total years, 16—in Illinois, 11; certificate issued under the ten-year exemption clause, June 11, 1878. Removed from Chicago.
- Pye, William H.; Noble, Richland county; age, 42; nativity, Missouri: in practice, total years, 7; graduate, Eelectic Medical Institute, Cincinnati, May 9, 1876; certificate issued December 15, 1881.
- Robarts, Heber; Carbondale, Jackson county; certificate of examination April 24, 1878; graduate, Missouri Medical College, March 4, 1880; certificate issued December 19, 1881. See page 87.
- Sumrall, George; Jerseyville, Jersey county. Removed from Elsah, Jersey county. See page 92.
- Unland, W. G.; Beardstown, Cass county (formerly of Pekin, Tazewell county); age, 31; nativity, Illinois; in practice, total years 6—in Illinois 3; graduate, Hahnemann Medical College, Chicago, March 14, 1871; certificate issued October 20, 1877; registered, and certificate filed for record, January 22, 1878.
- Wilson, Wm. W.; Paris, Edgar county; age, 24; nativity, Illinois; graduate, Homœopathie Medical Department Iowa State University March 1, 1881; certificate issued December 6, 1881.
- Wright, H. J. B.; Olney, Richland county; graduate, Jefferson Medical College. Removed from Odin, Marion county. See page 119.

### GRADUATES AND NON-GRADUATES HOLDING CERTIFICATES IN EACH COUNTY.

Table, showing the total number of Practitioners in each County, who have received Certificates from the Board; the number of Graduates and Licentiates holding Certificates by virtue of Diploma, License or Certificate of Examination from Medical Institutions in good standing or from Examining Boards legally authorized to issue such; the number of non-Graduates holding certificates under the Ten-year Exemption elause; the Population of each county according to the census of 1880; and the Ratio of Population to certified Practitioners. These figures include the physicians in adjoining States who practice in Illinois under the law; but do not include about 300 resident physicians who have not received Certificates from the Board-not being legally required to have them. In counties distinguished by an asterisk (*) all the practitioners have received eertificates. Of the total number of physicians here given 381 are also registered as pharmacists.

Woodford	5,596	4,693	903	3,078,636	1550.9

^{*} All the practitioners in this county have received Certificates from the Board.

⁺Including 853 practitioners in the city of Chicago, of which number 31 are non-graduates.

Average population to each physician throughout the State, based on the census of 1880. This average is evidently too small; since, while the addition of physicians is brought up to December 20, 1881, the addition of population since June, 1880, has not been ascertained.

### NECROLOGICAL RECORD.

[Every effort has been made by the Serretary to secure completeness in the following record. Postal cards—printed with blanks for all necessary and authentic information—were distributed to county clerks throughout the State. Only about two-thirds of the total number of deaths here given were reported to these officials; of the remainder many were obtained from newspaper notices, or by writing personally to medical men or others in the localities of known decedents. The causes of deaths, and other data here given, are those elicited in response to these various efforts. Comment upon the manner in which returns of deaths are made to the county clerks is unnecessary, in the light of this result of a special attempt to secure correct mortality returns of medical men themselves.]

## ILLINOIS STATE BOARD OF HEALTH.

OFFICE OF THE SECRETARY, SPRINGFIELD, ILL., November, 1882.

To his Excellency, Shelby M. Cullom, Governor:

Sir: In conformity with the twelfth Section of the Act to Create and Establish a BOARD OF HEALTH in the State of Illinois, approved May 25, 1877, I have the honor to submit to you the accompanying Report for the year 1881.

Very respectfully,

JOHN H. RAUCH, M. D.,

Secretary.

#### SUMMARY REPORT OF THE BOARD.

Office of the Board of Health of the State of Illinois, Springfield, Ill., November, 1882.

To his Excellency, Shelby M. Cullom, Governor:

Sir: Pressure of important duties connected with the suppression of the small-pox epidemic during the latter months of 1881 and the major portion of the present year, has prevented an earlier completion of the Fourth Annual Report of the State Board of Health.

Such duties have embraced the preparation, printing and distribution of nearly one million copies of circulars, orders, certificates and returns, involved in the "stamping out" of small-pox in over one hundred and fifty different localities; in securing the vaccinal protection of upwards of half a million of public school children, and of over one and a half millions of adults; and in protecting the State from repeated importations of the contagion in a variety of ways.

The detailed history of this work and of its results belongs, necessarily, to the report for the year 1882; but the Board cannot neglect the present opportunity of a formal recognition of the wisdom and timeliness of the act of the Thirty-second General Assembly in placing at your disposal, through the agency of the Board, the appropriation (\$5,00) known as the contingent fund, "to be used in the case of the outbreak of any epidemic or malig-

nant disease."

At the date of this writing, November, 1882, the State is entirely free from any such outbreak outside of Chicago, in which city there still occurs an occasional case of small-pox.

THE functions of the STATE BOARD OF HEALTH OF ILLINOIS, as de-

fined by the statutes, are of a two-fold character:

I. By the act approved May 25, 1877, it is charged with "the general supervision of the interests of the health and life of the citizens of the State."

II. By the act approved May 29, 1877, it is made the executive

of the Medical Practice Act.

In a broad sense, the latter is included in the former; since it is true that "the interests of the health and life of the citizens of the State" may be as seriously endangered by the practice of ignorant and incompetent physicians and surgeons as by any other evil. In its recognition of this fact, and of the necessity for some supervision over the practice of medicine and surgery, the General Assembly has devolved duties upon the Board which have demanded

A VIII

its best energies to discharge; and which, with the limited means and clerical force at its disposal, have hitherto precluded as much attention being given to some forms of purely sanitary work as is deemed desirable

To a certain extent, however, this is compensated for by the admittedly higher average of qualifications in the medical profession of Illinois which now obtains, as a result of the operation of the Medical Practice Act. As is observed in the report of the Committee on Medical Education:* "By fostering a well-trained and thoroughly educated medical profession, the Board is also securing a most potential force in sanitary science and public hygiene, through which it may the more effectually exercise that supervision of the interests of the health and life of the citizens of the State with which it is charged by the constituting act."

With the aid of such a force, the future work of the BOARD may reasonably be expected to become less onerous and more effective

in the prevention of disease and the protection of human life.

During the year the Board has held four regular quarterly meetings, and one special meeting. At the meetings in January and June, examinations of non-graduate applicants for licenses to practice were held. The character of the examinations is fully shown in the schedule of questions in the various branches, given on pp.

v-ix, and pp. xvi-xx, of the appended Report.

The Board has now held twenty different sessions for examination, at which upward of 600 non-graduates, who were not exempt by reason of length of practice in the State, have been examined; and of this number 202, or about thirty per cent., have passed sufficiently satisfactory examinations to entitle them to certificates. Having thus afforded, during the past four years, ample opportunity for all non-qualified practitioners to comply with the law, examinations are now held only once annually, i.e., at the regular quarterly meeting in April of each year.

STATE medical practice certificates have been issued to 510 physicians during the year, of which number 481 were based upon diplomas of reputable medical colleges, 18 upon length of practice in the State prior to the passage of the Medical Practice Act, and 11 upon the result of examination by the Board. This makes a total of 6,561 certificates isued to practitioners since the organization of the BOARD.

Certificates have been issued to 66 midwives; 30 based upon diplomas or licenses (mainly foreign,) 22 on term of practice, and 14 after examination by the BOARD. In all there have been certifi-

cates issued to 674 midwives, since the passage of the act.

Between thirteen and fourteen hundred letters have been written and mailed during the year on subjects connected with this branch of the Board's work. This, in addition to the necessary printed matter prepared and distributed.

Charges of unprofessional and dishonorable conduct against physicians holding State certificates, have been formally investigated by

^{*} See Appendix to Report-Medical Colleges, p. 39.

the full Board in 39 cases, resulting in the revocation of the certificates in thirteen cases—five absolutely and eight conditionally.* Upward of 350 informal investigations of complaints have been made, the majority of which have been adjusted by letters of advice, instruction or warning.

This action of the Board, together with the refusal to issue certificates in a number of other cases, where the individuals could not comply with the law, has resulted in securing, on the one hand, the necessary reforms and improvements in the methods of a large number of practitioners; or, on the other, in excluding from the profession in this State many persons known to be unfit to en-

trust with the responsibilities of medical practice.

During the quarter ended September 30, 1881, for example, the Secretary reported 23 individual cases of such unfit persons being compelled to leave the State, directly as a result of the investigation of the Board into their professional acquirements and moral character. As there is still an average of one physician to about every 570 inhabitants, the State can well afford to spare all of this class.

In June, 1880, a committee of the Board was authorized to formulate a definition of the phrase "medical institutions in good standing," the diplomas of which the Board is required to recognize by the law. The report of this committee, originally adopted in 1880, has been reaffirmed by the Board in its present composition; and, after the session of 1882–83, only those medical institutions will be recognized as "in good standing," within the meaning and intent of the Medical Practice Act, which conform to the minimum requirements set forth in the report of said committee. (See pages 40–41 of Appendix).

These minimum requirements are based upon a careful comparison of the usages of colleges, and of the written opinions of many representative members of the medical profession furnished for this purpose. While not exacting the highest existing standard of medical education, as provided for by some institutions, it is believed that this action of the Board cannot fail to be profitable in improving the general average of medical instruction in this country.

What that general average now is may be gathered by an examination of the Directory of Institutions granting Medical Diplomas or Licenses in the United States and Canada—appended to the report

above mentioned, see page 44.

From this Directory it will be seen that there have been 175 medical educational institutions organized since 1755, of which number 110 are still in existence in the United States, and nine in Canada. Of the existing institutions in the United States the diplomas of 83 have been presented to the Board, which recognizes 68 of them as "in good standing," and rejects 15 either conditionally or absolutely.

In all the BOARD has rejected the diplomas of 18 institutions, of which number 11 are now extinct; and has accepted conditionally the diplomas of 10 others, two of which are now extinct. There

^{*}See list of Revoked Certificates on page 96 of Report.

A

still remain the diplomas of 45 institutions—25 existing, and 20 extinct—concerning which the Board has not yet been called upon to decide. Among these there is, probably, the same per cent. which would be accepted conditionally or rejected absolutely, as in

those already presented.

It is not to be assumed that the mere presentation of a diploma from a medical institution in good standing in all cases assures the issue of a State certificate. On the contrary, it not infrequently happens that investigation reveals the possession of such diploma under circumstances which warrant the Board in refusing a certificate to the possessor. But, as a rule, the diplomas of the institutions recognized by the Board are *prima facie* evidence of a fair average medical and surgical knowledge and skill, and of a reputable status morally, on the part of the possessors.

The effect of the Illinois Medical Practice Act, it will be seen, is by no means confined to the State itself. It has, no doubt, either directly or indirectly, resulted in improving the course of instruction and raising the standard of requirements for graduation; and a still further advance in this direction will, it is believed, follow the enforcement of the schedule of minimum requirements adopted by this Board as its standard for recognition of diplomas after the

session of 1882-3.*

The Summary of the *Directory* (page 95,) shows only 17 colleges absolutely requiring attendance on three courses of lectures before graduation; and of this number nine are in Canada and only eight (out of 110,) in the United States. There is also a wide disparity in the proportions of graduates to matriculates in the two countries. Thus, of the matriculates in attendance during the session of 1881-'82 (total number, 13,049,) there were graduated, in the United States, 4,299 out of a total of 12,451; in Canada, 81 out of 595—being in the ratio of 34.6 per cent. and 14.6 per cent., respectively. The total number of students graduated as doctors in medicine at the commencements in 1882, in both countries, was 4,380. The highest percentage of graduates to students in the United States was 83, and in Canada was 23; while the lowest was, in the United States, 9, and in Canada, 2.6.

Under the operation of the Medical Practice Act so many quacks and unqualified practitioners have been driven from Illinois into other States, that these latter have been still further aroused to the necessity for self-protection from this evil, and an increasing number are now moving to secure the necessary legislation. As a pioneer in this movement the Board is frequently applied to for information and advice on the subject. A section in the Appendix to this report—Rulings and Decisions and Mode of Procedure under the Medical Practice Act, pp. 97-115—contains this information in a compact form.

It may be noted, in passing, that, at this date, only fifteen States have enacted laws regulating the practice of medicine, viz., Alabama, California, Delaware, Georgia, Illinois, Kansas, Louisiana, Maine, Maryland, Mississippi, New York, Pennsylvania, West Vir-

ginia, Wisconsin, and Texas.

^{*}See Note on page xv.

XI A

An indication of the character and extent of the sanitary work of the Board will be found in the official orders, circulars, and extracts from the Secretary's correspondence, during the year. (See pp. 3-35 of Appendix.)

The most important part of this work was that with reference to small-pox, beginning with the circular on the prevention of that disease, first published in March, three subsequent editions, in English, German and Scandinavian, being issued during the year.

Early in the following June, the Secretary-convinced by past experience of the futility of independent preventive measures, confined to States and municipalities, while the disease was increasing in the chief European ports, and thousands of unprotected immigrants were pouring into the interior, and after consultation with leading sanitarians—issued a call for a conference of health authorities, National, State, and local, with a view to co-operative action by all interested, and especially with reference to the arrest of further introduction of the contagion from abroad. This Conference, which was held in Chicago, June 29-30, was attended by representatives of the National Board of Health, and of eighteen other health organizations in fourteen different States. After full deliberation the Conference recommended that Congress incorporate into the laws regulating immigration, a provision requiring protection from smallpox by successful vaccination of all immigrants; that the National Board of Health consider the propriety of requiring the inspection of immigrants at the port of departure, the vaccination of the unprotected, and the detention of the unprotected exposed until it was certain that they were not carrying the germs of the disease on shipboard for the infection of the vessel and the transportation of the disease into the United States; that measures be taken for the quarantine detention of steamships bringing immigrants not provided with proper evidence of vaccinal protection; that local health authorities inspect all immigrants arriving in their respective jurisdictions, and enforce proper protective and preventive measures when necessary; and that, "to meet present emergencies," the National Board of Health secure the inspection of all immigrants. and the vaccination of the unprotected, before landing at any port of the United States.

Without anticipating the detailed history of the measures finally enforced to secure the result recommended by the Chicago Small-Pox Conference, it may here be stated that hostility and opposition from various interested parties defeated the attempt to secure legislation by Congress, and postponed the adoption of the other measures until the following June, when the National Board of Health inaugurated its Immigrant-Inspection Service. Meanwhile, it had cost municipalities and citizens of Illinois, during the preceding twelve months, not less than \$100,000 to care for outbreaks of small-pox directly caused by these unprotected immigrants. This is the actual money cost, and does not include the constructive cost of injury to business, loss of time, money value of life, etc. Since the beginning of these inspections—of which the Secretary of this Board is Supervising Inspector for the Western District—there has not been a single outbreak in the State due to immigrants, and only one

A XII

case developed among the immigrants themselves after coming within the purview of the Service.

Among other strictly sanitary work may be mentioned the sanitary care and policing of railway stations; action with reference to the dangers of summer resorts; the sanitation of railway travel; the regulation of the transportation of corpses in the State; the vaccination of railway employés; the suppression of epidemic diseases; the promotion of local health organizations; remedies for river pollution; investigations into the causes of excessive deathrates in certain localities, with suggestions of relief, etc.; entailing a large office correspondence, as well as numerous personal visits to various localities. On the subject of small-pox alone there were written 951 letters of special advice and instruction.

Wille the future of the National Board of Health is yet in doubt, and its present usefulness is materially hampered by hostile legislation, it has been deemed prudent by this Board to continue its interest in the Sanitary Council of the Mississippi Valley, and to endeavor to preserve the existence of that organization in case of emergency. At the St. Louis session of the Council, April, 1880, the few delegates in attendance congratulated themselves that the potent influence and wise action of the National Board had so far restored public confidence in the Mississippi Valley, and harmonized the action of its various State and local boards as to give promise that such an organization as the Council would speedily be superfluous and unnecessary. The congratulations seem now to have been somewhat premature, and it is not at all unlikely that, in the near future, Illinois and her sister States may again, as in 1879, have to rely upon this voluntary association to save them from "the commercial paralysis of an inflexible quarantine." Such a contingency seems inevitable in the event of the discontinuance of the National Board—unless, indeed, that body be superseded by some other agency which shall at once command the confidence and inspire the respect which the National Board of Health now commands and inspires.

It will hardly do to trust implicitly to such an alternative. Therefore, the Board, with a view to the future of the Sanitary Council, has incorporated in this volume the essential features of the work at its last meetings, the records of which were in the hands of the Secretary of the Board—he being also Secretary of the Council and which, with the published proceedings of the Cairo meeting in 1832, now make the record complete.

In any event, whether a National organization or a voluntary association be the bond of union for the State and local boards of health in the Valley, such work as was done in the Council at New Orleans, Evansville and Cairo, has a permanent and direct bearing upon the sanitary interests of Illinois.

A special effort has been made to secure the returns of vital statistics required by law to be made to the Board by the county clerks. Forms for the record of births, marriages and deaths have been prepared and distributed, together with the necessary instructions XIII

and forms for the reports. Owing to causes beyond the control of the Board, this effort has so far failed that it is not deemed advisable to further delay the publication of this Report until all the returns are received.

By reference to the Financial Statement (p. xxxi,) it will be seen that the total expenditures of the Board for all purposes, during the fiscal year ended September 30, 1881, were \$5,754.25. The total amount available was \$9,124.79—but of this sum \$3,104.47 was the balance of the special appropriation to be expended in case of an epidemic. Of this balance only \$240.94 was used, the remainder, amounting to \$2,866.53, being covered back into the State Treasury at the close of the fiscal year. The whole amount of unexpended balances thus refunded to the Treasury was \$2,913.03. An itemized statement of expenditures accompanies the Financial Statement.

Acknowledging the continuous interest you have shown in the labors of the Board and the judicious counsel you have given whenever consulted on matters touching the sanitary welfare of the Commonwealth,

We are, Sir, very respectfully,

Members of the State Board of Health:

John M. Gregory, LL. D.
John McLean, M. D.
Newton Bateman, LL. D.
R. Ludlam, M. D.
A. L. Clark, M. D.
W. A. Haskell, M. D.
John H. Rauch, M. D.

A BOGUS MEDICAL COLLEGE-THE MASSACHUSETTS BELLEVUE.

[Note to page XII, ante.]

A TIMELY illustration of the influence of the Medical Practice Act in protecting not alone our own State but the public generally, against bogus medical colleges and diplomaselling establishments, is afforded in the exposure of the "Bellevue Medical College of Massachusetts," completed while these sheets are in the printers' hands. Briefly stated the facts are as follows: A "Dr." J. B. Thompson, of 125 South Clark street, Chicago. applied in October, 1882, for a State certificate entitling him to practice medicine and surgery in Illinois. He presented as the basis for such application, a "diploma" purporting to be issued by the Bellevue Medical College, of Boston, Mass.; and, upon request, made the usual affidavit that he was the lawful possessor of said diploma, "issued to him after due examination, on the 15th day of September, 1882." Suspicions were aroused by the similarity of the name to that of the well-known Bellevue Hospital Medical College of New York, and by the appearance of the diploma itself, which, though couched in unusually good Latin, was signed only by an alleged President, "Rufus King Noyes, M. D." and a female Secretary, "May R. Eastman," omitting entirely any names of faculty. Further, it was learned that although its Chicago alumnus, "Dr." J. B. Thompson, had attained the ripe age of 57 years, he had only been engaged in practice since 1878-9, when he graduated from a Boston earpet store, where he had acquired such skill in the treatment of chronic diseases as to secure his ready admission to the "New England Medical Society of Specialists."

A XIV

With a view to further investigation the "diploma" was photographed before returning it to Thompson, who was then informed that no certificate could be issued him on such credentials.

From correspondents in Boston it was learned that Dr. Rufus King Noyes, "President of the Bellevue Medical College," was an anti-vaccinationist of some local notoriety in Lynn, Mass.; that he claimed to be a physician, surgeon and oculist, referring, in his professional eard, to the Dartmouth Medical School, the Massachusetts Medical Society, and the Boston City Hospital; and that the "Bellevue Medical College of Massachusetts," received a certificate of incorporation, May 25, 1880, under the "Public Statutes relating to Manufacturing and other Corporations organized under General Laws."

Letters to Noyes, chiefly remarkable for their deflance of orthography, syntax, punetuation, and decent penmanship, and signed by a young journalist of Springfield, finally resulted in an agreement upon the part of Noyes to furnish tickets for two courses of lectures and a diploma to a man whom he had never seen; who had never been in Boston in his life; who only claimed to "hav bin Redin medesin about a year," but who, having "ben tending on Siek purty Near all [his] life," claimed to "hav a Purty Good Idee about the Bizness."

No pretence, even, of attending the lectures—"a month in anatomy, one in physiology, and three in therapeutics, doctoral conduct, ete"—was suggested; but solely on the above representation that he had been reading medicine about a year, and upon an essay on "Vacinnationn" which would put Josh Billings to the blush, the writer of the letters and the thesis was promptly advised to the following effect:

BELLEVUE MEDICAL COLLEGE, BOSTON, Nov. 2, 1882.

DEAR SIR—You, as a candidate for graduation, have been favorably considered by the Faculty; and your thesis has been examined by the Professors and found to be acceptable. In consideration that you cannot attend the college, you are required to purchase two tickets of matriculation. These tickets will show that you will have been under the instruction of the Bellevue Medical College for two years. These two years together with the one year you have studied by yourself, will make as much time spent in the study of medicine as is spent by any other medical student from any other college. We believe you are and will ever be competant [sic] in Diagnosis, Treatment and Doctoral conduct. Of course you know every doctor has to continue his studies after he has taken his diploma. You are correct on the Vaccination question, and I am confident you will meet with continued success.

Your diploma will be sent C. O. D. one week from the date of this letter. It will be securely packed in a pasteboard box. Your bill for diploma and two tickets, is \$150.00. The tickets and diploma go together. The one cannot go without the other.

President.

The last four lines of the above are written at the top of the sheet and run down to the line "Bellevue Medical College," at the beginning of the letter. This may account for the omission of any name. But the handwriting is identical with that of October 27, signed "Rufus King Noyes, M. D.," and the warm approval of Mr. ——'s position on the vaccination question hardly required his signature to identify Noyes as the writer. He quickly recognized the familiar style and arguments of the anti-vaccinationists of whom he is a leader, and was prompt to welcome such a typical representative of the cause—one who professed in his thesis to be ready to make "a Strong kick on the Part of our noble Proffession against the Inseartion into the Pure Blood and Vitle fluid of our Inosent offspring of that Diseas of the Animals cow-pox."

Tickets "for the course of lectures for 1882," and "for the course of lectures for 1883," signed "Chas. J. Eastman, M. D., Dean," together with a bill "for two matriculation tickets and diploma—one hundred and fifty dollars," were enclosed in the above letter. On the 18th of November, letters were received both from Noyes and Eastman, advising that the diploma had been shipped by the American Express Company, and urging that it be taken from the office promptly on its arrival in Springfield—Noyes adroitly suggesting that "it is generally best not to have too much delay about these matters of expressage. For the longer a thing lays in the express office, the more time there is for THOUGHT and GOSIP about it."

xv

Regardless' of the "thought and gosip" it might excite, the diploma was allowed to "lay" in the Springfield office until recalled by a telegram from Eastman on the 27th of November, moved thereto by the expose, published in the daily papers of the 26th.

Steps have been taken to prosecute these persons for illegal and faudulent use of the United States mails, and, whether successful or not in securing their punishment on this ground, the Boston Bellevue diploma manufactory has, probably, ceased to exist.

Among the minor incidents of this affair it may be mentioned that Eastman, the "Dean," told a Boston newspaper reporter, sent to interview him before the exposure was published, that if he began studying the last of November—he, the reporter, only claiming some knowledge of elementary physiology—a diploma would be issued to him in the following January, at the usual price, \$150,

COMMENT on the foregoing would be entirely superfluous, were it not that this travesty on much that goes for Medical Education in the United States is so ludicrous as to mask the satire it contains. It would not be difficult to parallel the tenor of the Third Year's Announcement of the Massachusetts Bellevue with announcements of older institutions not chartered as "manufacturing corporations." Nor is the mode of making out the necessary time "spent in the study of medicine." entirely unfamiliar to many colleges which claim to be in good standing, and which, unfortunately, are accepted as such. How many ignoramuses with not one whit more of education, either literary or medical, than is diplayed in the essay on "Vacinnation," are every year turned loose upon the public. each bearing a "diploma," reciting that some Rufus King Noyes and his colleagues have adjudged and decreed the bearer (in the sonorous Latin of the Bellevue sheepskin, price \$150, C. O. D..) hominem egregium studiis optimus deditum-a distinguished man devoted to the noblest pursuits-dignum atque idoneum qui honoretur altissimo dignitatus gradu-worthy and fit to be honored with the highest mark of distinction. And then, satis compertum exploratumque habemus-having sufficiently investigated (as to his scientific and scholarly attainments, as witness the thesis on "Vacinnation,") we, to-wit: Rufus King Noyes, with one consent-uno animo-have created and made-creavinus et fecimus eum Doctorem Medicinæ-literally "manufactured" him into a doctor!

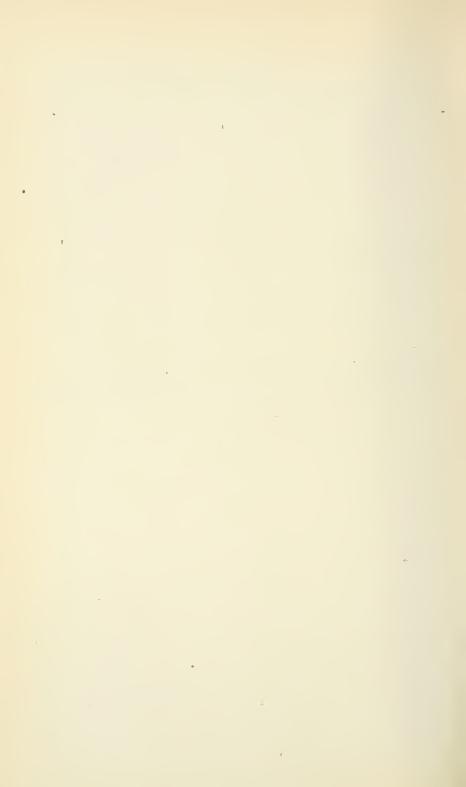

## ABSTRACT

OF THE

# PROCEEDINGS OF THE ILLINOIS STATE BOARD OF HEALTH.

AT ITS

MEETINGS DURING THE YEAR 1881.

## ABSTRACT

OF THE

# PROCEEDINGS OF THE ILLINOIS STATE BOARD OF HEALTH,

AT ITS

### MEETINGS DURING THE YEAR 1881.

At the regular annual meeting, held in Springfield, January 12-14, 1881, the following members were present, to-wit: Drs. Wardner, Chambers, Clark, Gregory, Ludlam and Rauch. On motion of Dr. Gregory, the Board decided to meet the Board of Agriculture, then in session, for consultation concerning the

#### DIMINISHED WATER SUPPLY

of the State. Dr. Gregory, in the same connection, offered the following resolution, which was adopted:

Resolved, That a committee of three members of this Board be appointed to confer with a committee from the State Board of Agriculture, in reference to the extent and cause of the present diminished water supply in certain sections of this State, and to inquire into and report upon the measures which may be resorted to against a recurrence of this evil.

The President designated Drs. Gregory, Rauch and Chambers as members of this committee.

Dr. Gregory also offered the following preamble and resolutions:

Whereas, There has arisen in certain sections of this State, a temporary, it is hoped, but still alarming, diminution in the water supply; and

WHEREAS, Much distress is threatened from this cause to the people, and to the domestic animals of the State, and serious dangers to the public health; and

Whereas, The remedy against the recurrence of this evil must be sought in a careful inquiry into the various sources of water supply, an inquiry in which the agricultural population is specially interested; therefore, be it

Resolved. That the State Board of Health, respectfully asks the concurrence and aid of the State Board of Agriculture in devising such means as may be necessary to ascertain remedies, and to provide against a repetition of the evil.

The committee appointed by the State Board of Agriculture, consisted of the following gentlemen: Hons. Emory Cobb, J. M. Washburn and J. W. Judy.

The joint committee met in the rooms of the State Board of Health, and after the discussion of the subject by the committee

A iv

and other gentlemen not members of the committee, it was decided that the secretaries of the respective Boards be instructed to prepare a list of questions to be submitted to citizens of the State interested in the subject. It was also decided to collect such data as could be procured from mining experts and civil engineers while boring for coal and water.

The following is the series of questions prepared and of which 750 copies were distributed by each Board:

- 1. Describe the topography of your neighborhood—is it hilly, rolling or flat?
- 2. What is its elevation above the sea?
- 3. What is the character of the soil and geological formation?
- 4. Have you any measurements of the rainfall, if so give them by months, no matter how long a period they cover?
  - 5. How much rain has fallen in your neighborhood since July, 1880?
- 6. Is there less rainfall in your neighborhood now, than when it was first settled and the soil cultivated?
- 7. From what source is the chief water supply of your county or locality derived, surface or subterranean?
  - 8. If from a river or stream what is its character and quantity at this time?
- 9. Has the water supply been offensive in taste or odor at any time, and if so, to what are these changes due?
- 10. Are there any springs in your vicinity, and what amount of water do they usually discharge, and what at this time?
- 11. What is the character of the water?
- 12. Are there any lakes or ponds in your neighborhood—if so, is there any difference in the quantity and quality of the water in them now?
- 13. Are there any swamps in your vicinity, and what is their condition now?
- 14. What is the usual depth of wells from surface to the bottom, and to the surface of the water, and what is the latter now?
- 15. What is the character of the well water for culinary or other purposes?
- 16. Have any borings been made for coal or water, and to what depth?
- 17. Has water been found, and at what depth?
- 18. Are there any artesian wells, and what is there diameter and depth, and what quantity of water do they furnish?
- 19. To what height is the water forced above the surface, or is it necessary to pump?
- 20. What is the character of the water?
- 21. Is it, in your opinion, of any use to attempt to bore artesian wells in your vicinity?
- 22. Are there any coal mines in your vicinity; if so, state what results have been developed in boring for coal, and the working of the mines with regard to water?
- 23. State at what depth water has been found in coal shafts, if any.
- 24. In giving the borings for coal and water give the number of feet of the different strata.
- 25. How long has the present drouth continued?
- 26. When did this condition obtain before?
- 27. What effect upon health, if any, has the diminished water supply had?
- 28. What effect, if any, has drainage, by tile or otherwise, made in the water supply or health of your neighborhood.
- 29. How has the present drouth affected the water supply for culinary purposes?
- 30. How has it affected manufacturing interests?

- 31. How has it affected the stock interests?
- 32. How has it affected the railroad interests?

A large number of replies were received in answer to the foregoing, from which it was made apparent that the diminished water supply was due solely to an unusually protracted period of dry weather, and not to any causes susceptible of control or modification by man.

#### EXAMINATION OF CANDIDATES.

Twelve non-graduate practitioners presented themselves as candidates for certificates authorizing them to practice medicine and surgery in the State of Illinois, in accordance with sections 1, 3, 5, 8 and 9 of the Medical Practice Act. The following are the schedules of questions submitted in the various branches, and to which eighty (80) per cent. of correct answers in writing were required to entitled the holder to the desired certificate:

## Examination in Anatomy.

#### By H. WARDNER, M. D.

- 1st. What structures are principally composed of white fibrous tissue?
- 2d. What structures are affected in synovitis?
- 3d. Name and describe the muscles of deglutition,
- 4th. Give specifically the names of the structures that are cut in amputating the leg at the middle third.
  - 5th. Describe the kidney, and state its function.
  - 6th. Name in succession the anatomical divisions of the alimentary canal.
  - 7th. Describe the pulmonary circulation.
  - 8th. Give in brief the anatomy of the ear.
  - 9th. State the number of deciduous and permanent teeth, and name them.
- 10th. Name all the bones in the upper extremity.

## Examination in Physiology.

#### By John M. Gregory, LL. D.

- 1st. Describe the pulmonary circulation of blood.
- 2d. Describe the hepatic circulation of blood.
- 3d. What is chyle, and by what vessel absorbed?
- 4th. Explain the lymphatic system and circulation.
- 5th. Describe the process of respiration and its uses.
- 6th. Describe the intestinal digestion of the food.
- 7th. Explain the digestion of starchy food.
- 8th. Explain the digestion of albuminoid food.
- 9th. Describe the functions of the nervous system.
- 10th. How does sleep recuperate the body?
- 11th. Give the origin of animal heat.

A vi

- 12th. What is the average temperature of the body in health?
- 13th. What is perspiration, and what are its uses?
- 14th. What are the effects of suddenly checked circulation?
- 15th. Why is physical exercise essential to health?

## Examination in Chemistry.

#### BY A. L. CLARK. M. D.

- 1st. What element forms the base of common clay?
- 2d. Give the chemical name of water?
- 3d. Is brass an element?
- 4th. What metals can you name that remain fluid at ordinary temperatures?
- 5th. Name the articles of food richest in carbon?
- 6th, Name the articles of food richest in nitrogen.
- 7th. What amount of Prussian blue, if added to one pound of tea as a coloring matter, would make the same dangerous to life and health?
- 8th. If conducted through lead pipes and used for drinking purposes, will hard or soft water be the most dangerous?
- 9th. If desired to test the purity of water, or its freedom from organic substances deleterious to health, how would you proceed?

## Examination in Materia Medica and Therapeutics.

#### BY JOHN H. RAUCH, M. D.

- 1st. What is a poison?
- 2d. Mention two or more classes of poisons, with examples of each.
- 3d. What class of remedies, if any, are incompatible with chloral hydrate?
- 4th. State very fully how you would give an hypodermic injection to an adult.
- 5th. What medicines are administered in this way, and give the average doses.
- 6th. If there are any dangers or possible accidents to be avoided in hypodermic injections, name them fully.
  - 7th. State the ingredients of the compound extract of colocynth.
  - 8th. What is the botanical name of May apple.
  - 9th. What is its active principle, and its dose?
- 10th. How much tartar emetic is there in a fluid drachm of the wine of antimony?
- 11th. How many kinds of rhubarb are brought to this country? and give their botanical names.
- 12th. From what is oleum tiglii obtained?
- 13th. What is its dose for an adult, and for what purposes may it be used?
- 14th. What anæsthetie would you use, and why?
- 15th. Name the ingredients and proportions of the seidlitz powders.
- 16th. Write the officinal name of brandy.
- 17th. Give the percentage of alcohol in sherry wine; in champagne; in brandy; in beer.
- 18th. What is the difference between a minim and a drop?
- 19th. What is the dose of the extract of nux vomica, and how much strychnia would there be in the dose you mention?
- 20th. For what purpose would you use the extract of nux vomica?
- 21st. What is an aperient? Name one.

- 22d. How is the compound eathartic pill prepared?
- 23d. What is an alterative? Name some of the most important, with dose.
- 24th. How would you prepare a domestic suppository?
- 25th. From what is assafætida derived?
- 26th. What are its medicinal properties?
- 27th. For what purpose, in what manner, dose, and at what time would you give kousso?
- 28th. How would you make a sponge tent?
- 29th. What is Donovan's solution? its dose for an adult?
- 30th. What are the medicinal properties of gallic acid?

## Examination in Pathology.

### BY R. LUDLAM, M. D.

- 1st. What is meant by crises in disease?
- 2d. What is a metastasis?
- 3d. By what means do we make a physical diagnosis?
- 4th. What diagnostic signs are derived from an inspection of the tongue?
- 5th. In what diseases has the saliva an acid reaction?
- 6th. In acute disease, what are the signs of convalescence?
- 7th. What are the signs of death?
- Sth. What diseases induce an expansion of the thorax?
- 9th. What is the cause of a sudden development of abdominal tympanitis?
- 10th. What are the lesions in paraplegia?

## Examination in the Theory and Practice of Medicine.

## BY W. M. CHAMBERS, M. D.

- 1st. Give the symptoms and treatment of angina pectoris.
- 2d. Is phthisis pulmonalis contagious to any extent?
- 3d. What is the most important sequence to guard against in the treatment of scar-latina?
  - 4th. Is asthma a nervous or tissue disease? Give the reason.
  - 5th. Can hooping cough be aborted by treatment?
  - 6th. Is there such a thing as idiopathic measles?
  - 7th. Give the treatment for tetanus.
  - 8th. Give the differential diagnosis in Bright's disease of the kidneys.
  - 9th. Give the symptoms and pathology of Addison's disease.
- 10th. Give the causes, symptoms, pathology and treatment of chorea.

## Examination in Surgery.

## BY H. WARDNER, M. D.

- 1st. Name the different dislocations of the humerus, and describe them. Give the methods of reduction.
  - 2d. Describe the dislocations of the clavicle, and give the treatment.
  - 3d. Give description and treatment of dislocation of lower jaw.

A viii

- 4th. Describe the different dislocations at the elbow joint, and the methods of reduction,
  - 5th. Give treatment of dislocation of thumb and fingers. Describe Levi's instrument.
- 6th. What is concussion of the brain? Give symptoms. State difference between concussion and compression.
- 7th. Describe minutely the process of trephining the skull. What parts are to be avoided?
  - 8th. Give the symptoms and treatment of wounds inflicted by poisonous reptiles.
  - 9th. Describe the process of repair or union of fractured bones.

10th. Describe the difference between dislocation of head of femur and fracture within the capsule.

## Examination in Obstetrics.

### BY A. L. CLARK, M. D.

- 1st. What is meant by gestation?
- 2d. What difference is there between the anterior and posterior fontanelles?
- 3d. Name the largest diameter of the fetal head, and give its length at birth.
- 4th. Give diagnosis between epileptic and apoplectic convulsions occurring during parturition.
  - 5th. Give the treatment for nævus materni.
  - 6th. State the difference between conception and impregnation.
  - 7th. What is usually the first positive sign that labor has commenced?
  - 8th. Is vomiting during the early part of a labor favorable or unfavorable, and why?
- 9th. What are hour-glass contractions of the uterus, and by what are they usually accompanied?

10th. Why does the os uteri usually look toward the left side of the pelvis during the first and second months of pregnancy?

## Examination in the Diseases of Women.

## By R. LUDLAM, M. D.

- 1st, What are the causes and symptoms of vulvitis?
- 2d. Give the differential signs between labial abscess and labial enterocele.
- 3d. Can a woman have a bubo?
- 4th. What are the uses of the speculum uteri?
- 5th. Give the symptoms of vaginal cystocele and the treatment for its radical cure.
- 6th. What is the most ready method of putting an end to the hysterical fit?
- 7th. What is the length of the female urethra, and for what purposes may it be dilated?
- 8th. In the puerperal state, what are the dangers from uterine phlebitis?
- 9th. What are the causes and symptoms of inflammation of the broad ligament in puerperal women?
- 10th. What is the condition of the liver during lactation?

## Examination in Hygiene.

## BY JOHN H. RAUCH, M. D.

- · 1st. What effect does impure airhave on disease?
  - 2d. What effect does humidity of the atmosphere have upon human life?
  - 3d. How would you ventilate a school room?
- 4th. Does the geological formation upon which a house or town is built, have any influence upon health? If so, how?
  - 5th. What sanitary conditions should obtain in every sick room?
  - 6th. What diseases are sometimes caused by drinking well water?
  - 7th. What diseases are sometimes caused by drinking cistern water, and how?
  - 8th. How would you disinfect a house, and why?
  - 9th. What effect would the drainage of the level prairies of this State have upon health?
- 10th. What is hygiene?

## Examination in Medical Jurisprudence.

## By John H. Rauch, M. D.

- 1st. How would you detect feigned insanity?
- 2d. How would you detect simulated epilepsy?
- 3d. How would you detect the emaciation of disease from that of starvation?

Of the twelve candidates the following named gentlemen were found to have attained the required percentage, and were furnished with the necessary certificates:

M. A. BACON, Canton, Fulton County.

WILLIAM T. BURNS, Newman, Douglas County.

F. M. Entrekin, Shoal Creek, Clinton County.

S. A. GRAHAM, Waynesville, Dewitt County.

WILLIAM F. MILLS, Peotone, Will County.

WILLIAM WELSH, Flat Rock, Crawford County.

A. P. WILLITS. Keithsburg, Mercer County.

Jos. A. Wilson, Burnt Prairie, White County.

## REVOCATION OF CERTIFICATES.

After due consideration the Board revoked the following certificates for cause:

No. 2884, issued January 15, 1878, to Dr. W. B. Cook, Verona, Grundy County.

No. 928, issued December 21, 1878, to Dr. J. Hinkle, Meredosia, Morgan County.

No. 3807, issued July 6, 1878, to Dr. E. B. RINGLAND, Hamilton, Hancock County.

Action on the case of Dr. J. H. Alpers, of Rantoul, Champaign county, was deferred.

Dr. R. L. Walston, of Decatur, Macon county, was notified to appear before the Board, at its next quarterly meeting, to show cause why his certificate should not be revoked for unprofessional conduct.

In the case of Dr. W. W. Knox, of Peoria, the Board refused to grant a license because of his unprofessional conduct and practice at Danville, in this State, notwithstanding the presentation of credentials from a respectable medical college.

#### MISCELLANEOUS.

Dr. Chambers was authorized to examine Dr. J. A. Rawlings, of Greenup, Cumberland county, applicant for a certificate, and the Secretary was instructed to notify him when to appear for such examination.

The Committee on Requirements of Medical Colleges presented a report, which was adopted, and the text of which is elsewhere given.

The Secretary was authorized to employ a clerk for two months at \$100 per month; also to purchase books and stationery to the amount of \$100.

Drs. Gregory and Wardner were appointed a committee to prepare a preliminary report of the transactions of the Board, for publication

The annual election of officers resulted in the election of Dr. John M. Gregory, President; Dr. John H. Rauch, Secretary; Dr. A. L. Clark, Treasurer; and Drs. Chambers and Ludlam were appointed the auditing committee.

## REMARKS OF THE PRESIDENT-ELECT.

On assuming the chair as President, Dr. Gregory made the following remarks to the members:

Gentlemen: In taking the seat to which your suffrages have raised me, you will allow me to express my sense of the importance of the work which the General Assembly of the State has intrusted to us. Aside from the enormous and difficult task which the Medical Practice act assigned the Board, and which has occupied necessarily so large a share of our attention up to this time, we are commissioned to watch over the public health of the State as far as this is liable to be invaded by epidemics and contagions from abroad, or endangered by preventable diseases at home.

Sanitary science is teaching us that much of the sickness which afflicts our race is the result of causes which may be avoided, or whose baleful effect may be lessened or destroyed. Out of our own ignorant carelessness, spring, too often, the frightful diseases which invade our homes, and fill them with sickness, sorrow, and death. No modern science is more needful or more beneficent than this which proposes to aid men to stay the ravages of preventable diseases and to lessen the death rate. Tried even by its commercial or money values, our work is second to no other in its large public benefits. To save life is to save working, wealth-producing power. To save population, is to preserve all those values which the very presence of population reflects on the soil itself, and on all the productions of human skill and toil. To lessen the amount of sickness in any community, is to relieve the laboring power of that community, by so much, of the extra burden of caring for the sick, and to give back the sick man to his place in the ranks of the workers. None but those who have computed the cost of rearing and training men from infancy to manhood, and who have taken account of the great expenditures and losses caused by disease and death, can tell the immense value of the services which sanitary science may render the country. We may almost question whether the famous applications of science in the great manufacturing and wealth producing arts can add more to the sum-total of wealth and well-being, than the health sciences are already doing in some communities, by their mitigation of the pain and fear of sickness, and the conservation of life and health.

It is doubtless the first duty of this Board, in its sanitary work, to aid in checking the

It is doubtless the first duty of this Board, in its sanitary work, to aid in checking the spread of infectious and contagious diseases, by suggesting the proper and necessary sanitation, and by enforcing proper and effective quarantine regulations. But there is a second and more important, because more radical work devolving upon us. It is to investigate, as far as our resources will permit, the common and public causes of preventable diseases existing among us, and to warn our people of the dangers to which they are ignorantly or thoughtlessly exposing themselves and their families. Whatever health officers and Boards of Health may do officially, much remains to be done by individuals to protect the public health. Let us seek, as far as possible, to instruct and inspire them for this work.

Let me enumerate some of the common causes of sickness, which, though quite familiar to sanitarians, are still unrecognized by thousands of our fellow citizens. The enumeration will serve a valuable purpose, and may help to warn the unwary.

#### POLLUTED AIR.

Fresh, pure air for breathing stands in the front rank of the conditions of life and health. And unfortunately this condition is the one most fatally violated by all classes of society. Food, drink and exercise are required only at intervals, and may, in case of need, be dispensed with for days together; but breathing must be constant, through every minute of life, by night and day. Loaded though it be with dust and dirt, with foul and deadly gases, with miasma and germs of disease, the air must be received into the lungs. Volumes have been written to prove and enforce the truth that pure air is life and health, and that foul air is disease and death; but still we sin, and suffer for our sin, against this truth.

Twice within the last few weeks, I have been, for an entire evening, confined to rooms where a crowded company of exceptionally intelligent people remained for hours, breathing over the same air, and suffered for days afterwards, from the poison inhaled. Only a few days since, I visited an assembly of scientific men, of national reputation, who sat for hours, in a closely packed room, where the atmosphere reeked with the hot breaths of the listening crowd. Go to any social gathering, and, as often in the mansion of wealth, as in the cottage of the poor, we shall find the same blind daring of the disease-gendering atmospheric poison. Days of headache and of lassitude follow, and disease is engendered; but the fashion and folly go on. Social clubs and coteries crowd small club rooms; meetings for business or for pleasure, for instruction or for prayer, are held daily in insufficient, and ill-ventilated apartments; and the failing health of those who attend these meetings, is attributed to any and all causes but the true one.

But worst of all, the schools provided for the education of our children, continue, in spite of all protests and all warnings, to be honsed in rooms too small for the number of pupils, and with a ventilation too often a mere mockery. Thus we plant the seeds of disease along with the seeds of knowledge, and fatally weaken the physical, while professing to cultivate the intellectual powers. Frequently the school house is the central and chief agency for the spread of epidemics and contagions.

Let it be known that no school-room, occupied, as is now the custom, by the whole school, during all the school hours, can be sufficiently rentilated to make it entirely healthful. Let any physiologist be asked to make the computation of the air needed and he must confirm this statement. From the moment the children are assembled the air of the school room begins to deteriorate; and, since no system of ventilation sweeps the whole body of impure air out at once, the best it can do is to keep the mixture from becoming as bad as possible,

The first rule should be to use the minimum of confinement for each pupil. The second should be to keep the fewest possible seated at their studies in the same room. Every pupil that can be trusted to study his lesson elsewhere, should be advised to visit the school room at lesson time only; and instead of the foolish ambition to keep every seat filled, let it be sought to have as many vacant seats as may be possible without remitting any of the teaching.

It is not, however, in crowded parlors, elub rooms, lecture halls and schools alone that impure air is to be feared. In all houses, bad air can be found. Dust and mouldy damp haunt the rooms reserved for special occasions, while those in daily use are saturated with the breath, smoke, steam and gases from all the household life and work. And frequently the source of corruption is found in the very soil which the house covers. This is especially the ease with those houses built in our prairie towns, where without removing a foot of the soil, or opening a foot of drainage, the house is set upon a few low posts, and then-boarded around to prevent the cold winds getting under the floor. In the winter, it is not uncommon to bank it with straw or even with barn yard litter. The half decayed mass beneath, in the dark and damp, unvisited by sun or wind, generates poisonous gases, which are sucked up through every crevice in the floor, and fill the house with their deathful influence. Such houses are death traps. I have known more than one family to pine, and even perish, in such a dwelling.

Half of the ill health of women over that of men must be charged to the in-door life which forbids them the life-giving influence of heaven's free, pure air and sunshine.

Our houses want more windows, larger chimneys, more transoms, more grate fires in winter, and less poisonous furnaces. It is to the stoves within our own bodies, fed by abundance of fresh air, that we must look for healthfulest heat, and not so much to the stoves whose porous iron plates offer so little resistance to the deadly earbonic acid gas. We make our houses comfortable at the expense of their healthfulness, when we shut out God's sunshine and pure air. Better, in this respect, the wind-searched hovel of the poor, than the padded homes of luxury and wealth.

Especially should our sleeping rooms be made larger, and be better ventilated. Better the open window and the night air, often so foolishly dreaded, than the slow poisoning which the bad air gives, and which leaves the sleeper to awake weak and unrefreshed by his slumbers. No more serious mistake is made in our house building than that of the small bed chambers. Sanitary science says that these apartments should be the largest, sunniest and airiest of all in the house. Let them never be on the ground floor, and let the bed be rolled at night into the middle of the room, so that the air may move freely around the sleepers.

27

### IMPURE DRINKING WATER.

The common drinking water of thousands of families is filled with foulness and the seeds of disease. In the country places the wells are frequently so shallow as to be supplied with the mere surface water filled with organic matter washed from the soil. As the summer heats and droughts diminish the supply, the family continue to use the dregs till summer nears and droughts diminish the supply, the family continue to use the dregs fill no more can be dipped from the muddy bottom, and often till some, to them, unaccountable disease sets upon several members of the family in quick succession. In the villages, the wells are commonly placed near the kitchen door, for convenience sake, and the slops and washings from the kitchen are thrown on the ground close by, to filter into the well with but little change in their condition. In many other ways the drinking water of the family is rendered in our and typical force or score other filth disease fallows as of the family is rendered impure, and typhoid fever, or some other filth disease, follows as naturally as harvest comes from seed sowing.

It ought to be urged with a tireless tongue that a plentiful supply of good, pure drinking water is one of the first and most important conditions of health, for man or beast. And whenever any member of a family is seized by any form of zymotic or filth disease, the water supply of that family ought to come immediately under suspicion, and the most thorough examination be instituted. Let them make sure that the well or eistern is free from all impurities. For a small sum a eneap filter may be constructed which will remove nearly every impurity, when the source of the water supply cannot be readily cleansed

or changed.

#### UNWHOLESOME FOOD.

I can only hint now at the ill effects of unwholesome, badly preserved and badly cooked food, as one of the common dangers to public health. It is an old saying that "many men dig their graves with their teeth;" but not so much by their gluttony as by the unwholesome viands which they force upon their stomachs.

Perhaps no department of hygienic science is so little understood as that which concerns food. No where, at least, do more radical differences of opinion prevail. Professional judgments are almost as much at variance as popular whims. Chemistry has, indeed, analyzed many of our foods, and patient observations, in hospitals or in camps, have settled the nutritive values of some of them; but the knowledge gained is, as yet, locked up in professional books and reports, and every man is left to be a law unto himself as to what he shall eat, how much, and when. And so the unwholesome feeding goes on. Tainted and disease-marked meats, immature or decayed vegetables, pernicious or adulterated groceries and condiments, and bad things made worse by bad cookery, are spread upon our tables and forced upon our stomachs, till failing appetites and disordered digestion tell of nature's recoil from the abuses which are destroying us.

Our schools of domestic science, cooking schools, food collections and popular lectures

digestion tell of nature's recoil from the abuses which are destroying us. Our schools of domestic science, cooking schools, food collections and popular lectures and books on food and dietetics may at length bring more light; but till then, let the people be warned that danger lurks in their feasts, and that only the most careful attention to themselves can tell them when their food is meat and not poison to them. All foods are no; alike healthful to all men. There is truth in the old saying. "One man's meat is another man's poison." Each for himself must learn by experience what food agrees with him, and what harms him. If, after eating, he feels headache or any pain or distress of stomach or bowels, let him suspect his food and seek to discover the offending dish. A few experiments, carefully made, will tell what to take, and what to avoid, and the instructed mind will soon control the destructive appetite for what has been found harmful. harmful.

## CONCLUSION.

I can not continue, much less complete, here and now, the list of foes we are to fight in this cause of public health. Sanitary science has but just begun its great work. Man, so strong, so scientific, so full of bravery and resource elsewhere, still cowers with the timidity of ignorance, and the craven fear of conscious weakness, in the presence of disease, the dread minister of death. We tame the lightnings, defy the ocean, pierce the mountains, and make nature's sublimest forces do our work; but we tremble and turn pale at the first approach of sickness. We can not, it is true, finally conquer the great destroyer, death, but we may drive him from fields usurped, and from scenes not meant to be invaded by his terrors. At least, we may refuse to make ourselves his executioners, and hasten by ignorant suicide his final stroke.

Sanitary science is the new hattle man is making for life and health. Having with a

Sanitary science is the new battle man is making for life and health. Having, with a mightier magic than that of the old-time wizards, mastered and made slaves of the most

santary science is the new battle man is making for file and neath. Having, with a mightier magic than that of the old-time wizards, mastered and made slaves of the most powerful forces in nature, he may now put to flight the demons of dirt and disease-breeding filth. At last he confronts hopefully the terrible contagions, the pestilences which walk in darkness, and the destruction which wasteth at noonday.

As a board of health, it is one of our highest duties to promote, as much as in us lies, sanitary science and its diffusion among the people. The sanitary battle must finally be fought by the people themselves. We may, by quarantine, fence back for some time the invading march of the epidemic; we may display our warning signals when the plague is in the houses; but it is for the people to face the enemy when he comes, and to favor his advance by their ignorant neglect and terrors, or to stay his progress by barricades of cleanliness, care and courage. The best quarantine is a thoroughly instructed people.

Let the people be assured that much of the sickness from which they suffer is of their own causing, or from their neglect of simple precautions. Let them be taught that certain conditions, like those named in this paper, are dangerous to health and life, and even their economy which dreads the loss of money, will lead them to guard against the needless sickness which so often ruins fortune as well as life. Tell it to them perpetually, that bad air, bad water and bad food are always slow poisons, and must ultimately cost loss of health and loss of life, and we may hope to see the remedy complete.

I would not lessen nor rewit the other important labors set by the laws for the State Board of Health, but I would most earnestly call your thoughtful heed to the great sanitary problems to be solved, and the sanitary reforms to be set in motion for our whole State.

whole State.

# Regular Quarterly Meeting, April, 1881.

The Board met at Springfield in quarterly meeting, April 28-29, 1881, with Drs. Gregory, Bateman, Chambers, McLean, Haskell and Rauch present. Drs. Haskell and McLean took their seats as members of the Board, appointed by the Governor to succeed Drs. Wardner and Chambers respectively.

Dr. Bateman offered, and the Board unanimously adopted, the

following preamble and resolutions, to-wit:

WHEREAS, The membership in this BOARD of Dr. H. Wardner and Dr. W. M. Chambers having terminated, be it

Resolved. That their wise and faithful services as members of this Board are held in the highest est mation; that we part from them with sincere regret, and that they bear with them our best wishes and most pleasant remembrances.

Resolved. That the Secretary be instructed to forward copies of these resolutions to Drs. Wardner and Chambers.

### SPECIAL COMMITTEES.

The chairmen of the special committees were selected as follows:

### Dr. John M. Gregory:

Committee on Sanitary Needs and Conditions of Cities, Large Towns and Villages.

#### Dr. W. A. HASKELL:

Committee on Sanitary Needs and Conditions of Country Homes, including Water Supply, Food and Habits of the People in their Hygienic Aspects.

## Dr. NEWTON BATEMAN:

Committee on Sanitary Needs and Conditions of Schools and School Houses.

#### Dr. John McLean:

Committee on Food Supplies, Adulterations of Foods, Alcoholic Erinks, etc., as affecting the Health of the People.

#### Dr. A. L. Clark:

Committee on Sanitary Needs and Conditions of Public Institutions,—penal, reformatory and charitable.

## Dr. R. LUDLAM:

Committee on Epidemic, Endemic and Contagious Diseases.

### Dr. John H. Rauch:

Committee on the Duty and Necessity of the State to exercise Supervision over the Practice of Medicine.

## SMALL-POX.

A communication from Astoria, Fulton county, was read by the Secretary, in which the Board was requested to take measures for the prevention of the spread of small-pox, as the citizens could not be adequately controlled by the local authorities.

A xi

The Secretary was instructed to inquire into the prevalence of the disease in this and other localities reported, and, if necessary, to visit the localities and take such measures as the law provides and in his judgment might be necessary, to prevent the spread of the disease.

In this connection the Secretary submitted the copy of a circular which he had prepared and distributed, Concerning the Prevention of Small-Pox, and in which were laid down certain plain rules and instructions for isolation, preventive treatment and disinfection.*

### YELLOW FEVER.

The Secretary reported that he had attended the meeting of the Sanitary Council of the Mississippi Valley, held in the city of Evansville, Ind., April 20-21, and made a verbal statement of the action had thereat, and submitted a Memorandum for a Quarantine Classification of Freight, with reference to Yellow Fever, recommended for adoption by local and State Boards of Health. The Memorandum was read and, on motion of Dr. Bateman, was adopted by the Board.

Dr. Haskell offered, and the Board adopted, the follow resolution,

Resolved. That the State Board of Health of Illinois regards, it as absolutely essential to the protection of the Valley of the Mississippi from the incursion of epidemic visitations of yellow fever, that there should be cordial cooperation between the National and State health authorities of the Valley States; and to this end we regard it as vitally important that the State Boards of Health in the Mississippi Valley should invite the National Board of Health to place its inspectors at such points within their jurisdiction as, in the judgment of the National Board, the sanitary interests of the public may require; and that these inspectors should be encouraged by the various State health authorities to make the most thorough investigation into all matters affecting the public health.

Resolved. That a copy of the above resolution be forwarded to the Secretary of the Mississippi Valley.

#### METEOROLOGY.

Dr. Bateman offered, and the Board adopted, the following preamble and resolution on the subject of obtaining meteorological data from different parts of the State, to-wit:

WHEREAS. The possession of meteorological data, particularly in respect to temperature and rainfall and their relations to the prevalence of epidemic and other diseases, is of vital importance for sanitary and other purposes; therefore be it

Resolved. That a committee of three members of this Board, including the Secretary, be appointed to devise and earry into effect, in the most available manner, suitable measures to progure such data for the use of this Board.

The President appointed Drs. McLean, Clark and Rauch members of the committee thus authorized.

## MEDICAL PRACTICE ACT.

The Secretary was instructed to notify the following named gentlemen that their circulars, advertisements, etc., were deemed to be unprofessional, and contrary to the regulations of the Board:

Dr. Charles A. Cooper, Altona. Knox county. Dr. L. E. Keeley, Dwight, Livingston county. Dr. James M. Brydon, Chicago.

^{*}The text of this circular, as subsequently revised, is given in the Appendix to this Report.

[†]This quarantine classification of freight, will be found in the proceedings of the Sanitary Council of the Mississippi Valley, 1881.—See Appendix.

xv A

He was also authorized to send notices of warning to all cases

of similar character without awaiting specific instructions.

Dr. Triplett made a statement with regard to Dr. W. B. Cook, of Verona, Grundy county, but the Board declined to take further action in the matter, having revoked Dr. Cook's certificate at a previous meeting.

The following action was taken in the case of Dr. E. B. Ring-

land, of Hamilton, Hancock county:

WHEREAS. In the case of E. B. Ringland it was voted at the January meeting that the certificate of said Ringland be revoked for causes shown; and

WHEREAS. It subsequently appeared that said Ringland had failed to receive sufficient notification of proposed action in his case; therefore, be it

Resolved. That the vote of revocation be reseinded, and the case of said Ringland be continued until further action of this BOARD.

Action upon the application of Dr. E. N. Fishblatt, of Chicago, for a certificate, was postponed pending the result of an investigation, which the Secretary was then engaged in, concerning his qualifications.

On motion the Board decided not to examine, hereafter, candidates for certificates unless they had studied medicine at least three years.

Dr. McLean, having been appointed to prepare resolutions on the status of students practicing under preceptors, offered the following resolutions, which were adopted:

Resolved. That the word "student" which occurs in section 11 of the law of 1877, regulating the practice of medicine, is construed by this BOARD to mean a person actually engaged in the study of medicine in the office of and under the instruction of a physician.

Resolved. That students so engaged in the study of medicine are not permitted, under said law, to prescribe for or treat patients without the daily and direct advice and supervision of their preceptors.

### OFFICE WORK.

The Secretary read a report of office work performed during the last quarter, to-wit:

* /	
	202
Certificates issued to physicians on length of practice.	8
Certificates issued to physicians after examination.	8
Certificates issued to midwives on diplomas.

## MISCELLANEOUS.

Dr. Haskell was made a member of the Auditing Committee.

The rent of the Chicago office was authorized.

The Secretary was allowed \$300 for clerk hire and \$150 for stationery, and \$50 was appropriated for printing the report of Dr. Gregory.

# Regular Quarterly Meeting, June-July, 1881.

At the regular meeting, held in Chicago, June 29-30, July 1, 1881, the following members were present: Drs. Gregory, Clark, Ludlam, Bateman, McLean and Rauch.

Fourteen candidates for the certificates of the Board were examined, and the following named gentlemen obtained the required percentage, to-wit:

WILLIAM M. WHITE, Bentley, Hancock county. WILLIAM F. O'BRIEN, Buffalo, Scott county. CARL H. E. CASSELL, Paxton, Ford county.

Appended are the schedules of questions propounded at this examination, and to which eighty (80) per cent. of correct answers were required:

# Examination in Anatomy.

BY W. A. HASKELL, M. D.

- 1. Name the principal fluids in the body.
- 2. Describe the circulation of the blood in the adult.
- 3. State the number of bones composing the human skeleton, and name those of the eranium, face and vertebral column.
  - 4. State number and names of the various muscles of the eye.
  - 5. What are the principal divisions of the human brain?
  - 6. Name and describe the membranes of the brain and spinal cord.
  - 7. State number and names of the cranial nerves.
  - 8. Describe the sympathetic nerve.
- 9. What structures are cut and what artery is endangered in the operation for strangulated hernia?
  - 10. Describe the regions of the abdomen, and state their contents.

# Examination in Physiology.

BY R. LUDLAM, M. D.

- I. What is the specific gravity of normal urine?
- 2. How is gastric juice produced?
- 3. How is the peristaltic motion of the bowels produced?

- 4th. How many sounds has the heart, and how do you distinguish them?
- 5th. Is bile a recrementitious or excrementitious product, or both?
- 6th. What are the functions of the pneumogastric nerve?
- 7th. Describe the difference between a serous and a mucous membrane.
- 8th. What organ of the body commences growing about the forty-fifth year?
- 9th. What function does the pancreatic juice perform?
- 10th. Why is venous blood darker than arterial blood?

## Materia Medica.*

## BY JOHN H. RAUCH, M. D.

- I. What are (1) infusions, (2) tinctures, (3) fluid extracts, (4) waters, (5) solutions?
- II. What are (1) ointments, (2) cerates, (3) suppositories, (4) spirits, (5) oleo-resins?
- III. Give full Latin officinal name, opium strength, and doses of (1) black drop. (2) Dover's powder, (3) laudanum, (4) extract of opium. (5) How does the deodorized tineture of opium differ from laudanum?
- IV. 1. Name and give the origin of three officinal kinds of aloes.
  2. What sort is best for medicinal use, and why?
  3. Name and give doses of three aloetic preparations.
  4. Give the composition of compound eathartic pills.
- Give the sources, active principles, three preparations, and doses of each of the following drugs:
  - V. Belladonna.
  - VI. Capsicum.
  - VII. Cinchona.
  - VIII. Senna.
  - IX. Cinnamon.
- X. Dose of (I) acidum hydrocyanicum dilutum, (2) camphor, (3) chloral, (4) elaterium, (5) extractum ergotæ fluidum, (6) extractum hyoscyami, (7) iodoform, (8) oleum ricini, (9) tincura aconiti radicis, (10) tinctura veratri viridis.

# Examination in Chemistry.

## BY A. L. CLARK, M. D.

- 1st. What is the number of the simple chemical elements?
- 2d. What is equivalent weight?
- 3d. Give the chemical symbol for antimony, and name an antimonial preparation sometimes used in medicine.
  - 4th. Explain the combustion and flame of a candle.
  - 5th. Under what circumstances will a galvanic current be formed?
  - 6th. What is the specific heat of a body?
- 7th. What takes place when any soluble salt of iron is mixed with most vegetable infusions or tinetures?
- 8th. Give the chemical symbol for the monoxide of nitrogen, and suggest the uses of the compound.
  - 9th. What is specific gravity?
- 10th. Name ten elementary substances.

^{*}These are the Harvard College questions, session of 1880.

A xviii

# Examination in General Pathology.

BY R. LUDLAM, M. D.

1st. What is anemia?

2d. Give the general pathology of fever.

3d. What is the difference between hypertrophy and atrophy?

4th. What do physicians understand by compensating hypertrophy? Give an illustration.

5th. Define the word diathesis, and name the most important diatheses.

6th. Describe the different stages of cerebral apoplexy.

7th. Is dropsy a symptom or disease, and why?

8th. What is the pathology of hemi-anesthesia?

9th. In the hepatization of pneumonia, if chloride of sodium is deficient in the urine where do we find it?

10th. In intermittent fever when would you apply the thermometer in order to get the highest range of temperature?

## Examination in the Practice of Medicine.

### BY JOHN MCLEAN, M. D.

1st. Is pneumonia a specific fever, or a local inflammation with fever as a result? Give reasons why.

2d. What are the varieties of pneumonia?

3d. How would you treat a typical case of catarrhal pneumonia?

4th. How would you diagnose bronchitis from pneumonia?

5th. How would you treat bronchitis?

6th. How would you diagnose pleuritis from bronchitis? From pneumonia?

7th. How would you treat acute pleuritis?

8th. What would be your treatment if effusion followed pleuritis?

9th. What is diphtheria? How would you treat a case?

10th. How would you diagnose measles from searlet fever?

11th. How would you treat measles?

12th. How would you treat scarlet fever?

13th. What are the symptoms of acute gastritis?

14th. How would you treat dysentery?

15th. How would you diagnose a case of morbus Brightii?

16th. How would you treat a case of acute, how a case of chronic morbus Brightii?

17th. What pathological condition is found in cerebro-spinal meningitis?

18th. How would you treat a case?

19th. What is the supposed cause of malarial fever?

20th. How would you treat remittent fever?

# Examination in Surgery.

BY W. A. HASKELL, M. D.

1st. Define malignant and benign tumors, and give examples of each.

2d. How would you diagnose dislocation of head of humerus from fracture?

3d. How reduce subglenoid dislocation of humerus?

4th. State how you would diagnose, dress and treat a simple fracture of the leg.

- 5th. When is a wound said to heal by first intention, and what conditions are necessary to such result?
  - 6th. What are the conditions for tracheotomy, and the dangers attending the operation?
  - 7th. What would you do in fracture of the skull without signs of depression?
  - 8th. What conditions and indications would demand the amoutation of an injured limb?
  - 9th. Give general directions for local and constitutional treatment after amputations.
- 10th. How would you administer the anesthetics, ether and chloroform, and what should be done in ease of suspended respiration during their administration?

## Examination in Obstetrics.

## BY A. L. CLARK, M. D.

- 1st. Give the mechanism of the occipito-sacral position.
- 2d. Define placenta previa, and give—a. Its diagnosis. b. Prognosis to mother and child. c. Treatment.
  - 3d. How will you diagnose pregnancy from ovarian tumor?
  - 4th. Give the contra-indications for the use of ergot.
  - 5th. How can you diagnose fibroid uterine tumor from flexion of the uterus?
  - 6th. What blood vessels are contained in the umbilical cord?
  - 7th. What are the sympathetic signs of pregnancy?
- 8th. Give pathology, diagnosis, prognosis and treatment for "hour-glass contractions" of the uterus.
- 9th. What stage of labor is attended with the greatest danger, and what is the danger?
- 10th. Give the dangers in—a. The first stage of labor. b. The second stage of labor. c. The third stage of labor.

# Examination in Gynecology.

## BY R. LUDLAM, M. D.

- 1st. What is the most frequent of all the uterine displacements?
- 2d. Give the diagnosis of hysteria from epilepsy.
- 3d. How would you know a case of ulceration of the uterine cervix from one of cervical endometritis?
  - 4th. What are the symptoms of laceration of the cervix?
  - 5th. What is the prognosis in pelvic cellulitis?
  - 6th. When, if ever, do fibroid tumors become malignant?
  - 7th. Is leucorrhea a symptom or a disease?
  - 8th. Give the symptoms and treatment of prolapse of the ovary.
  - 9th. What are the indications for the use of the sponge tent?
- 10th. Name the diseases in which menorrhagia is an almost invariable symptom-

# Examination in Hygiene.

## BY JOHN H. RAUCH, M. D.

- 1st. What kinds and what amount of food should be furnished those sick with acute diseases? When and how should it be given?
- 2d. What are disinfectants? Name the best. How do they act as such? How and when should they be used?
  - 3d. How would you prevent or limit the spread of typhoid fever, diphtheria, scarlatina?

- 4th. In a case of typhoid fever, where would you look for its probable source or origin?
- oth. What effect would the drainage of the level prairies of this State have upon health?
- 6th. How would you ventilate the school room? How much air space should each pupil have?
- 7th. How would you resuscitate from the asphyxia of drowning, coal gas, chloroform or ether?
  - 8th. What is trichinosis? How can it be prevented?
  - 9th. Which do you prefer, humanized or non-humanized vaccine virus, and why?
  - 10th. How would you diagnose small-pox from measles, scarlet fever, chicken-pox?
  - 11th. How would you prevent the spread of small-pox?
  - 12th. How would you render privies and water closets innocuous?
  - 13th. How do you account for the increased mortality of the past six months?
- 14th. What effect upon the public health will result from the recent overflows in this State?
  - 15th. Why should the registration of births, deaths and marriages be enforced?

## Examination in Medical Jurisprudence.

## By John H. Rauch, M. D.

- 1st. In a case involving legal questions, how would you conduct a post-mortem examination?
- 2d. How would you conduct the examination of an insane person for commitment to an asylum?
- 3d. State under what circumstances you would deem it necessary to hold a coroner's inquest.
  - 4th. How would you differentiate between drunkenness and apoplexy?
  - 5th. To what extent are physicians liable for the bad results of treatment of a fracture?

The following resolution regarding the examination of candidates was adopted, to-wit:

Resolved. That those desiring an examination for a State certificate before the STATE BOARD OF HEALTH in any other but the English language, may, at the discretion of the BOARD, have such an examination by furnishing, at their own expense, interpreters satisfactory to the BOARD.

## CHICAGO SCHOOL OF MIDWIFERY.

Application having been made for the recognition of the Chicago School of Midwifery, the question was referred to a committee, who reported the following preamble and resolutions, which were adopted:

Whereas, Parties in this State have frequently taken out charters, under the State law, for the establishment of schools of midwifery, the recognition of which schools by the Board becomes a question; and

Whereas, In many cases such parties have been without the necessary qualifications; therefore,

Resolved. That, while not desiring to discourage any reputable efforts to increase the knowledge and ability of those practicing obstetrics in this State, the BOARD finds it impossible, at this time, to recognize the certificates or diplomas of such institutions as a substitute for examinations by the BOARD, or as a sufficient basis upon which to grant a State certificate entitling the holder to practice midwifery.

## THE CASE OF CHARLES KOIER

was then considered. Koier was summoned to appear before the Board to show cause why his certificate should not be revoked, he

xxi A

having obtained it by making affidavit that he had practiced in this State sixteen years. A number of affidavits were read from persons who knew him, denying the truth of his affidavit. He was then sworn, and answered the interrogations put to him as follows:

He lived at 229 Noble street, Chicago; had resided in the city since June 3, 1861, to which place he came from Germany. He stated that he had been a doctor since 1866, giving homeopathic treatment; had studied medicine under Dr. Hulce, now deceased. Thinks he studied three or four medical, text-books off and on, for about six months before he commenced practicing. He was not a regular student, but took private instructions and read the books that Hulce recommended. He attended lectures at the Chicago Homeopathic Medical College in 1880—'81, and had dissected some. He learned the carpenter's trade in Germany; worked at his trade in this country, and studied medicine when not working. Commenced practicing in 1866, although he did not publicly announce himself as a physician. Did not charge anything for his services, and doctored especially the poor. Only gave out publicly that he was a physician when he obtained a certificate. His affidavit was endorsed by reputable medical men. In response to the questions of his attorney, Mr. White, he stated that he had practiced in several families ten years ago. From 1868 to 1872 he obtained a living by selling coal and wood. From 1872 to 1876 he was a missionary and pastor; he had also edited a newspaper and practiced medicine. Thinks he devoted one-fifth of his time to the practice of medicine, but kept attending to other business. Did not charge or receive pay. Kept no accounts from 1866 until last winter, 1880.

After due consideration it was decided that, in addition to affidavits made, his own statements showed that he was not entitled to his certificate of practice, and on motion it was accordingly revoked.

## THE CASE OF DR. LESLIE A. KEELEY

of Dwight, was next considered. The attention of the Secretary was called to Keeley's advertisement in the Pittsburg Commercial by Dr. Sutton of that city. This advertisement, as well as others in other papers, stated that the "great Gold Cure," i. e., chloride of gold and sodium, is a certain cure for drunkenness, the opium habit and all nervous diseases. The Secretary had called the attention of Dr. Keeley to the unprofessional card, and that letter, together with the subsequent correspondence, and a copy of the Pittsburg Commercial, was placed before the Board. After a thorough examination of the papers his certificate was ordered revoked.

## FURTHER ACTION UNDER THE MEDICAL PRACTICE ACT.

Charges of unprofessional and dishonorable conduct were made against four other physicians, and the certificates of two of these were ordered revoked, but no publicity was given to the same with the hope that the necessary amends would be made when the parties realized the position in which they were being placed.

The Secretary called attention to a bogus diploma issued by the "New England University of Arts and Sciences" to Chas. Augustus

A xxii

Scheening of Danville, Vermilion county. Application for a certificate was made by Scheening, based upon this diploma, but the applica-

tion was rejected.

The Secretary was instructed to notify Dr. George W. Wolgamoth, of Chicago, to appear at the next meeting of the Board and show cause why his certificate should not be revoked. Wolgamoth subsequently appeared during the meeting and promised to reform his methods of practicing.

The case of Dr. Robert D'Unger, cited to show cause why his certificate should not be revoked, was ordered continued on account

of his sickness and consequent absence from home.

It was also ordered that the license of Dr. W. H. Herrick, of Rochester, N. Y., an itinerant practitioner, be continued for one month on the payment of the required fee, but with the intimation that his advertisements in the future must be so worded as to

conform to the truth, even in implication.

The attention of the Board having been called to the fact that certain medical men who are regular graduates and whose professional skill is undoubted, resorted to itinerant practice to extend their business and reputation, the Question of Itinerancy was referred to a committee consisting of Drs. Rauch, Clark and Ludlam.

## SMALL-POX CONFERENCE.

During this meeting the members adjourned to attend the smallpox conference, the call for which, issued by the Secretary of the State Board of Health, is as follows:

SPRINGFIELD, June 13, 1881.

Dr. ----

You (or a representative of your board) are respectfully invited to attend a conference of State and local boards of health, on June 29th, at the Grand Pacific hotel in Chicago. The question of concert of action between local and State boards of health and the National Board of Health, will be considered, and a plan submitted to prevent the introduction of small-pox into this country, and to prevent the spread of the same.

It is unnecessary to say how much we are all interested in this subject.

The prevalence of small-pox at this time is a disgrace, and unless more energetic measures are taken, it will continue to increase so long as immigration is pouring into this country as at present.

Very respectfully yours, John H. Rauch, M. D., Secretary,

The action had at this conference will be found under its appropriate caption in a subsequent part of this report. The following resolutions with regard to the subject were adopted by the Board:

Resolved. That, in view of the occurrence of small-pox in this State, in epidemic form, through the dissemination of the contagion by immigrants arriving at the ports of the United States, the National Board of Health be and hereby is requested to secure the vaccination of all unprotected immigrants before they leave the ports of arrival in this country.

Resolved. That the Illinois State Board of Health cordially approves the action of the Sanitary Conference, held in Chicago on June 29th and 30th inst., for the prevention of the introduction of small-pox into this country by immigrants, and its spread from one State to another, and will co-operate to the full extent of its power and means in the proposal to unite all health authorities in an organized plan of concerted operations to prevent the extension of this disease, and to secure general vaccination.

Resolved. That, in accordance with the above, the State Board of Health respectfully and earnestly calls upon all health officers and local boards of health in this State to secure a careful inspection of all immigrants entering the State, and prompt vaccination or re-vaccination of all persons not thus protected against small-pox.

xxiii A

## CLEANLINESS OF RAILWAY STATIONS.

The attention of the Board having been called to the subject, the following action was taken with regard to railroad water closets:

Whereas; Complaints have been made to the STATE BOARD OF HEALTH of the neglected and polluted condition of the water closets and privies connected with many of the railroad depots in this State; therefore, be it

Resolved. That the superintendents of the several railroads be respectfully requested to give such instruction to their employés as shall secure the daily inspection and cleansing of the places named, and such use of disinfectants as will insure healthfulness.

Résolred. That the Secretary be instructed to communicate this preamble and resolutions to the proper officers of the several railroads.

## TRANSPORTATION OF CORPSES.

## The following rules for the transportation of corpses were adopted:

- RULE 1. The transportation of the bodies of persons who have died of small-pox, Asiatic cholera or yellow fever, is absolutely forbidden.
- RULE 2. From November 15th to March 15th, all dead bodies may be transported without restriction, excepting the bodies of those who have died of small-pox, Asiatic cholera, yellow fever, diphtheria, scarlet fever, typhus or typhoid fever.
- RULE 3. The bodies of those who have died of diphtheria, scarlet fever, typhus or typhoid fever, at all times, and all bodies presented for transportation, from March 15th to November 15th, must be closely wrapped in a disinfectant cerecloth, placed in a metallic or wooden coffin, and this enclosed by a tight wooden box.
- Rule 4. Every dead body must be accompanied either by a physician's certificate, showing cause of death, or a certificate of inquest from the coroner, or a permit for transportation from the clerk of the local board of health, if any; and by a written certificate from the shipping undertaker, setting forth that the corpse has been prepared for transportation in accordance with the rules of the Illinois State Board of Health.

# Regular Quarterly Meeting, September, 1881.

Held in Chicago, September 29–30, 1881. Present—Drs. Gregory, McLean, Bateman, Ludlam, Clark, Haskell and Rauch.

## MEDICAL PRACTICE ACT.

Dr. Jas. M. Brydon, having been previously notified that complaints had been lodged against him for advertising improperly and contrary to the rules of the Board, appeared in his own defense. He is a graduate of the College of Physicians and Surgeons of Indiana; has practiced in the city of Chicago, but is now practicing in Fond du Lac, Wis., and has been advertising in the papers of that city, calling himself "the Scotch Physician" and displaying a wood-cut of himself.

He admitted that he left the State because he thought his certificate would be revoked if he continued his advertisements.

Ordered. That on condition of his withdrawing from the papers all advertisements except the ordinary physician's card and without the wood-cut of his portrait being inserted, the prosecution of this case of Dr. Brydon shall be dropped.

The case of Dr. Julius L. Lins of Wallingford, Will county, was then considered. Lins made an affidavit in 1878 that he was a graduate of the University of Marburg, Germany, and that he had practiced medicine in Illinois ten years prior to July 1, 1877. Because of this ten years' practice he was not compelled to present his diploma for verification, at that time. The truth of this affidavit being questioned, the dean of the faculty of the University of Marburg was addressed and the fact that he had never graduated there was ascertained.

The Board ordered that his certificate be revoked and canceled. President Gregory laid before the Board a letter from Dr. G. H. Leach of Cairo. The letter complained that W. H. Marean of Cairo had a certificate of practice from the Board to which he was not entitled. Intimations were also made as to improper methods of issuing certificates by the Board.

Dr. Rauch offered the following, which was adopted.

WHEREAS: Dr. D. H. Leach of Cairo, in a communication to the Attorney General of this State, dated Aug. 23, 1881, made certain charges; in connection with the case of Dr. Marean, of Cairo; therefore, be it

xxv A

Ordered, That Drs. Leach and Marean be cited to appear before this BOARD at its next meeting to show cause why the certificates issued to each of them should not be revoked.

Dr. John T. Spence of Liberty, Adams county, having applied for a certificate of graduation, presented the diploma of the College of Physicians and Surgeons of Joplin, Mo. Upon motion of Dr. Clark the following order was adopted:

WHEREAS; It appears from the published announcement of the Joplin College of Physicians and Surgeons at Joplin, Mo., that the said medical college recognizes three years of practice as equivalent to one course of lectures; and that the general character of the announcement is such as to make it evident that it is not conducted in accordance with the practice of medical schools that are considered in "good standing" by this BOARD, therefore, be it

Resolved, That this Board declines to issue certificates to its graduates.

The professional conduct of three other practitioners was taken under advisement by the Board, and in one case discretionary power was given to the Secretary to revoke the license.

The case of Dr. M. H. Pasco, of Chicago, was referred to the Secretary with power to withdraw the Board's certificate at his discre-

tion, and report his action at the next meeting.

The following resolution, introduced by Dr. McLean, was adopted by the Board:

Resolved. That in all cases where information comes to the notice of the STATE BOARD OF HEALTH that persons holding certificates from said BOARD are advertising in an unprofessional manner, or are in any way guilty of unprofessional or dishonorable conduct, it shall be the duty of the Secretary to notify such persons at once to appear before the BOARD and show cause why their certificates should not be revoked.

In connection with the foregoing, Dr. Ludlam offered the following form of a

Notice to Appear before the Illinois State Board of Health:

WHEREAS; Complaint has been made at this office that, as a licentiate of this Board, you have been guilty of irregular and unprofessional conduct; and

WHEREAS: If such charge should prove to be true, it will be necessary, under the statute, for the BOARD to withdraw your certificate;

Therefore, you will please be notified, herewith, that an opportunity will be afforded you at the next meeting of the BOARD to present such papers and evidence in explanation and defence as you may have to offer in said case.

The next meeting of the Illinois State Board will be held at ———.

The following resolution was also adopted:

Whereas; Inseveral instances, recently, where suits have been brought against persons for the violation of the "Act to Regulate the Practice of Medicine," advantage has been taken of the ten-year clause by those who do not strictly come within its provisions; therefore, be it

Resolved. That it is decided by this BOARD that the ten-year exemption clause, as a qualification, means that the person who avails himself of the said exemption must have actually been engaged in the practice of medicine as a means of gaining a livelihood, and must have publicly announced himself to be a physiciaa for a period of ten or more years before July 1, 1877; further

Resolved, That persons who have only occasionally prescribed during that time are not by this BOARD considered as entitled to the benefits of the exemption.

The Secretary was instructed to issue a circular calling the attention of college authorities to the requirements of this Board in respect to the "good standing" of medical colleges as published in its report.

## OFFICE WORK.

The Secretary read his quarterly report, of which the following is a synopsis:

A xxvi

Since the last meeting 553 letters and 421 postal cards have been written; 5552 circulars and 1850 packages have been distributed, including 1820 Reports of the Board and Register of Physicians and Midwives. Certificates have been issued to 92 physicians on diplomas, to 5 on years of practice and to 3 upon examination; 8 to midwives on diplomas or certificates of examinations, nearly all from foreign institutions, to 3 on years' of practice, and to 5 after examination.

One diploma has been held for further consideration; one was withdrawn while being considered, and 23 doctors have been obliged to leave the State because of their inability to comply with the law.

An inquiry has been received from Portland, Oregon, where a diploma from the "Edinburg University of Chicago" was presented to the Medical Director of the A. O. U. W. He was at once informed of the fraudulent character of that institution and the action of the Board with regard to the same.

The distribution of the Official Register makes the work of the Board less onerous, although there is still considerable annoyance from itinerant quacks who claim the benefit of the ten-year exemption

clause.

In view of this fact the Secretary respectfully recommends that the Board take the necessary action, defining that section of the statute. (Vide supra.)

### SMALL POX.

Small-pox has appeared at five new points, and it will continue to occur while immigration is so heavy from Europe. Because of this probability the Board should urge the protection of all by vaccination and re-vaccination, and the Board is also urged to pass a rule making it obligatory upon the authorities of any township, town or city to report promptly to the Board the outbreak of any contagious or epidemic disease, as it is believed it would be of the greatest benefit to all parties concerned.

The experience of the last nine months, especially in connection

The experience of the last nine months, especially in connection with small-pox, had impressed the Secretary with the necessity of the preparation by the Board of a code of sanitary ordinances for

adoption by local authorities throughout the State.

### ILLINOIS RIVER POLLUTION.

Another important matter to which attention has been frequently called during the last three months, is the condition of the Illinois river. In view of the sanitary importance of improving its polluted condition, it is clearly the duty of the Board to do all it can to hasten the construction of the pumping works at Bridgeport.

## RAILROAD SANITATION.

Although a subject of the utmost importance, and one affecting a large majority of our population, this subject has not yet received the attention which it demands. The sanitary condition of immigrant trains is notoriously bad, but even the more elegant means

xxvii

of travel are far from faultless. During the past year travel on all lines has been exceedingly heavy, and this has tended largely to aggravate the already existing evils.

As bearing directly on this subject, the attention of the Board is called to the correspondence printed in the Second Annual Report.

(Vide, pp. 57—63.)

"Since the publication of that correspondence I have traveled at least 45,000 miles in sleeping cars. I have paid especial attention to this subject, and have reached the conclusions which follow:

"The condition of the car depends on (a) the handling of the car by the conductor and porter, (b) the number of passengers, (c) the

length of the run, (d) the season of the year.

"It is but just to state that the sanitary conditions of the Pullman cars are better than any other, and from correspondence and personal interviews I am satisfied that the company would cheerfully adopt the suggestions contained in the correspondence referred to, if the public demands the same.

My excuse for calling attention to the subject at this time is to educate the public to the dangers incident to traveling in through cars. In 1879 no cars were allowed to cross the Ohio at Cairo, transfers being daily made; and not only was there no complaint, but much commendation of the method.

"I would respectfully suggest that this Board take such action as may be deemed proper on the subject, feeling confident that the traveling public will cheerfully comply when the benefits are made known, and the companies will gladly make the change.

### DANGERS OF SUMMER RESORTS.

"I was at Beach Haven, on the New Jersey coast, when the Parry House was destroyed by fire. The fire was discovered at 3 a. m., and as the building was constructed of the lightest material, it was completely destroyed within an hour. It seems almost miraculous, with the limited means of egress, that no lives were lost. I have been in burning hotels before, but never were the inmates so completely at the mercy of the flames as in this instance. As it was, several of them have since died from the exposure and excitement incident to the fire.

"This hotel is a type of the scores to be found on the New England and New Jersey coasts, and unless steps are taken to require adequate means of escape and facilities for putting out fires, it is only a question of time when great loss of life will inevi-

tably occur.

"In view of the fact that during the season thousands from other States are guests at these houses, I think it would not be out of place to suggest that our BOARD call the attention of the New Jersey State Board of Health, and the boards of health in other States where such resorts exist, to the subject, and respectfully recommend that in case there are no laws concerning it, they make an inspection of these buildings covering these points, as well as of the sanitary conditions that obtain in and around these houses. The publication of such a report would go far towards remedying the evil."

A xxviii

During the session the following orders, resolutions, etc., were adopted:

## NOTIFICATION OF SMALL-POX OR OTHER EPIDEMIC DISEASE.

Under the authority conferred upon the Illinois State Board of Health by section 2, of the State Board of Health act, it is

Ordered. That on and after January 1, 1882, the first cases of small-pox occurring in any township, town or city in this State, and also the prevalence of any epidemic, shall be promptly reported to the Board by the local health authorities; it being borne in mind that in counties where township organization exists, the township board is the board of health, and in counties not under such organization, the county commissioners act in like capacity.

### PROFESSIONAL RELATIONS.

Resolved. That the Secretary of the BOARD be, and hereby is instructed to request the medical schools of the State to give one or more lectures each year on the relation of the profession to the public and to each other, believing the same to be in the interest of the people and of medical men.

## RAILWAY SANITATION.

Drs. Clark, McLean and Bateman, the committee to which had been referred a paper by the Secretary on the subject of "Railroad Sanitation," offered the following preamble and resolution, which were adopted:

Whereas; It is believed that the health interests of the public may be promoted by the assistance of this Board in certain measures connected with the sanitary administration of the railway service in Illinois, to which end an interchange of ideas and information is necessary; therefore, be it

Resolved. That the Secretary be instructed to communicate with the managing authorities of the various railroad lines in this State for the purpose of ascertaining the details of existing methods and agencies employed by such lines—first, in the conservation of the health and lives of passengers of different classes; second, in the prevention of the spread of contagious or infectious diseases; third, in the hygienic and sanitary supervision of employés; and fourth, in the care and policing of depots, offices, buildings and grounds—the information thus acquired to be made the basis of such action or recommendation by this Board as the facts may demonstrate to be necessary or advisable in the direction of co-operation with railroad authorities and the sanitary education of the traveling public.

Drs. Rauch, Gregory and McLean were appointed a committee to report to the Board at its next meeting as to what action, if any, was necessary on the subject of maritime quarantine, to the defects of which, and the consequent insufficient protection afforded the interior from small-pox and other contagious diseases, the Secretary had called the attention of the Board.

Dr. Bateman moved that the Secretary be authorized and instructed by this Board to prepare and issue, as soon as practicable, the necessary blanks, forms, circulars and instructions for the col-

lection and tabulation of returns of vital statistics.

# Special Meeting, November 22, 1881.

Pursuant to a call of the Secretary, a special meeting of the BOARD was held at the Grand Pacific Hotel, Chicago, November 22, 1881, to take further action in regard to the threatened increase of small-pox throughout the State.

The members present were Drs. Gregory, McLean, Ludlam, Clark, Haskell and Rauch.

President Gregory, on calling the meeting to order, congratulated the Board on the increasing recognition of the value of sanitary work, and in alluding to the special object of the meeting also took occasion to speak of the general sanitary condition of schools, and the necessity for reform in many important particulars.

The Secretary offered the following:

Resolved, That, by the authority vested in this BOARD, it is hereby ordered that on and after January 1, 1882, no pupil shall be admitted to any public school in this State without presenting satisfactory evidence of proper and successful vaccination.

The resolution was unanimously adopted, and the Secretary was instructed to communicate with the State Superintendent of Public Instruction, and ask his co-operation in carrying the above order

into effect.

The Secretary was also instructed to prepare a form for the official certificates of vaccination, and to issue a circular of inquiry to the school directors and school boards of the State asking information as to the size of school rooms, number of children in attendance, means of ventilation, number of out-houses and the general sanitary conditions that obtain in and around the buildings.

## MEDICAL PRACTICE ACT.

The case of Dr. C. A. Miner, of Chicago, who has been practicing as an itinerant, was taken up for consideration and his certificate revoked for unprofessional conduct.

The following preamble and resolution, were, after due investiga-

tion of the facts in the case of Dr. Warren, also adopted:

WHEREAS; It has transpired that Dr. A. R. Warren was licensed by this BOARD under a misapprehension of the construction of the ten-year exemption clause of the "Medical Practice Act," and

Whereas; Under the proper construction of the law, the said Dr. A. R. Warren was not justly entitled to this certificate; therefore,

Resolved. That his license be, and is hereby, revoked.

A xxx

In the case of Dr. E. S. McLeod, of Chicago, the Secretary stated that he had notified him to appear before the Board to show cause why his certificate should not be revoked on the ground of unprofessional and dishonorable conduct, in that he was conducting the "James Medical Institute," in Chicago. He had refused to appear, but the evidence being conclusive as to his connection with the above-named institution, Dr. Haskell moved the following resolution, which was adopted:

Resolved. That the license of Dr. E. S. McLeod is hereby revoked for unprofessional and dishonorable conduct.

Drs. Ludlam, Haskell, and Clark were appointed a committee to report at the next meeting upon what shall be considered unprofessional and dishonorable conduct within the meaning of the "Act to Regulate the Practice of Medicine" in the State of Illinois.

## METEOROLOGY.

It was stated that General Hazen, the Chief Signal Officer, had communicated with the Board and suggested that the Illinois State Board of Health should co-operate with his department in the establishment of meteorological stations throughout the State; the Signal Service Department to furnish a portion of the necessary paraphernalia of such stations. The suggestion was considered, and the offer accepted.

## HOW TO PREVENT THE SPREAD OF SMALL-POX.

Office of the State Board of Health, Springfield, Ill., March, 1881.

Although there is no contagion more powerful or certain, experience has taught that the spread of small-pox may be absolutely prevented by a strict observance of the following

## RULES.

- 1. On the first report of the existence of a case in a region, systematic vaccination or re-vaccination of every member of the exposed communities in such region should be at once resorted to.
- 2. Whenever it is known that any person is sick with small-pox or varioloid, isolation of the individual should be promptly and rigidly enforced. Every one in the house should be vaccmated or re-vaccinated, no matter how recently this may have been done, nor how mild the disease may appear. In towns or cities where there are small-pox hospitals, it is better that the patient should be removed to such at once. Where there is no such provision, the infected house should be strictly quarantined, and, if necessary, the police authority must be invoked to secure proper restrictions. An improvised hospital will be an absolute necessity if the case occurs in a crowded family or tenement-house, where proper isolation cannot be secured. In such case, a barn, outhouse or other building may be made sufficiently comfortable for the patient, at small expense; or, if the weather be mild enough, a tent may be used. A flag or placard, bearing the words "Small-Pox," should be prominently displayed upon the house, and not removed until permission is given by the health authorities. Isolation is a matter of the utmost importance.
- 3. The room selected for the sick should be large, easily ventilated, and as far from the living and sleeping-rooms of other members of the family as it is practicable to have it. All ornaments, carpets, drapery, and articles not absolutely needed in the room,

should be removed. A free circulation of air from without should be admitted, both by night and day—there is no better disinfectant than pure air. Care should, of course, be taken to keep the patient out of draughts.

- 4. All discharges from the nose and mouth of the patient should be received on rags and immediately burned, and the same precaution should be taken with the crusts as they fall off. Night-vessels should be kept supplied with a pint or two of solution of carbolic acid—one gill of crude carbolic acid to half a gallon of water; or of chloride of zinc—an ounce and a half of the chloride to half a gallon of water. The discharges from the kidneys and bowels, received in these vessels, should be buried at least one hundred feet from any well or spring. All spoons, dishes, etc., used or taken from the sick-room, should be put in boiling water at once. Cleanliness in everything must be scrupulously enforced.
- 5. Not more than two persons—one of them a skillful, professional nurse, if possible—should be employed in the sick-room, and their intercourse with other members of the family and with the public must be as much restricted as possible. In the event that it becomes necessary for an attendant to go out of the house, a complete change of clothing should be made, using such as has not been exposed to infection; the hands, face and hair should be washed in water, to each half gallon of which has been added a tablespoonful of spirits of thymol*, or two tablespoonsful of carbolic acid, or half a gill of a ten per cent. solution of permanganate of potassium. Following this, free exposure to the open air should be secured before approaching any one.
- 6. Physicians and other necessary visitors, before entering the sick-room, should put on an outer garment, closely buttoned up, and a handkerchief or wrap about the throat and neck. Such outer garment may be a linen duster or rubber overcoat; and this, together with the neck-wrap, should be taken off in the open air immediately after leaving the sick-room, and either be dipped in the disinfecting fluid hereafter described, or hung up out of doors until the next visit. Safety consists in exposing to the open air every article of clothing that has been in any way subject to the contagion. Whenever practicable the precautions above prescribed (Rule 5,) for an attendant leaving the sick-room, should be observed by the physician or visitor. Doctors and clergymen may convey contagion as readily as the laity under similar conditions; they should, therefore, take the same precautions.
- 7. No inmate of the house, during the continuance of the disease, should venture into any public conveyance, or assemblage, or crowded building, such as a church or school; nor, after its termination, until permission is given by the attending physician. Letters should not be sent from the patient, and all mail matter from the house should first be subjected to a dry beat of 250-260 deg. F. Domestic animals, dogs, cats, etc., should not be allowed to enter the room of the patient, or, better still, should be excluded from the house.

^{*}Spirits of thymol, for this purpose, may be made by adding one ounce of thymol to three ounces of alcohol, 85 per cent. This disinfectant is free from the disagreeable odor of carbolic acid, and is quite as efficient.

- 8. After recovery has taken place the patient should be bathed daily, for three or four days, in a weak disinfectant—the thymol water above described, or a solution of the chloride of zinc (two drachms of the salt to half a gallon of water.) The head should be thoroughly shampooed during each bath, and the convalescent be then clothed in fresh, clean garments that have been in no way exposed to the infected air. Some time must elapse—ten to fourteen days, according to the severity of the case—before the danger of communicating the disease is past, and patients should be kept in the house at least two weeks after the crusts have all disappeared.
- 9. In the event of death, the clothing in which the body is attired should be sprinkled with strong carbolic acid, and the body wrapped in a disinfectant cerecloth* and placed in an air-tight coffin, which should remain in the sick-room until removed for burial. No public funeral should be allowed, either at the house or church, and no more persons should be permitted to go to the cemetery than are necessary to inter the corpse.
- 10. After recovery or death, all articles worn by, or that have come in contact with, the patient, together with the room and all its contents, should be thoroughly disinfected by the burning of sulphur or the pouring of crude carbolic acid on chloride of lime. do this, have all windows, fire-places, flues, key-holes, doors, and other openings securely closed by strips or sheets of paper pasted over them. Then place on the hearth or stove, or on bricks set in a wash-tub containing an inch or so of water, an iron vessel of live coals, upon which throw three or four pounds of sulphur; or place a number of plates of chloride of lime (say six feet apart), in different parts of the room, and pour on them crude carbolic acid. All articles in the room, and others of every description that have been exposed to infection, and are too valuable to be burned, yet cannot be washed nor subjected to dry heat, must be spread out on chairs or racks—mattresses or spring beds set up so as to have both surfaces exposed; window-shades and curtains laid out at full length, and every effort made to secure thorough exposure to the sulphur or chlorine fumes. This room should then be kept tightly closed for twenty-four hours. After this fumigation—which it will do no harm to repeat—the floor and woodwork should be washed with hot water, the walls and ceiling whitewashed, or, if papered, the paper should be removed. The articles which have been subjected to fumigation should be exposed for several days to sunshine and fresh air. If the carpet has unavoidably been allowed to remain on the floor during the illness, it should not be removed until after the fumigation, but must then be taken up, beaten and shaken in the open air, and allowed to remain out of doors for a week or more. If not too valuable, it should be destroyed; but, whenever practicable, it should be removed from the room at the beginning of the illness. After the above treatment has been thoroughly enforced, the doors and windows of the room should be kept open as much as possible Where houses are to some extent isolated, for a week or two.

^{*}This may be a sheet thoroughly soaked in the disinfectant fluid described in Rule II—only of double strength; that is eight ounces sulphate of zine and four ounces common salt to one gallon of water.

A

judgment can be used in exposing articles out of doors. The entire contents of the house should be subjected to the greatest care, and when there is any doubt as to the safety of an article it should be destroyed. The privy should be thoroughly disinfected, during the entire illness, with copperas solution—prepared by dissolving about sixty pounds of copperas (suspended in a basket) in a barrel of water; three to five gallons of this solution, to which may be added a pint of crude carbolic acid, should be thrown into the vault every three or four days. Water closets should be disinfected by pouring a quart or so of this solution into the receiver after each use.

11. Such articles of clothing, bedding, etc., as can be washed, should first be treated by dipping in the following disinfecting

fluid:

A pail or tub of this fluid should be kept in the sick-room, and into this all clothing, blankets, sheets, towels, etc., used about the patient or in the room, should be dropped immediately after use, and before being removed from the room. They should then be immediately and thoroughly boiled. The ticking of beds and pillows used by the patient should be treated in the same manner; and the contents, if hair or feathers, should be thoroughly baked in an oven. If this cannot be done, they should be destroyed by fire, as should, in any event, all straw, husk, moss, or "excelsior" filling. The clothing of nurses should be thoroughly fumigated and cleansed before it is taken from the house, and better still, burned, if circumstances will admit.

12. If, from neglect or delay in enforcing precautionary measures, the disease shows a tendency to become epidemic, the public and private schools should be closed, church services suspended, and public assemblages of people, as at shows, circuses, theatres, fairs,

or other gatherings, should be prohibited.

Finally, the above precautions, if faithfully carried out, may be confidently relied upon to prevent the spread of the disease, and the intelligent confidence thus secured will prevent panic and the inhuman treatment of the afflicted, which so often arises from

ignorance and unreasoning fear.

A copy of this circular should be left in every house where there is a case of small-pox; and the local health authorities are charged with a strict enforcement of the rules. In view of the prevalence of the disease at the present time, and the recognized difficulty of a positive diagnosis in every case, any reasonable doubt should be resolved in favor of wise precaution. It is by no means necessary that a case should present all the typical symptoms in order to initiate a malignant epidemic—even a mild case, with little or no eruption, may do this. Local health authorities cannot too strongly insist upon this point.

By order of the Board:

John H. Rauch, M. D., Secretary

[Third edition—revised, November, 1881. German and Scandinavian copies furnished on application to the Secretary.]

7 · A

The distribution of the foregoing circular was largely facilitated by sending copies of the annexed letter to health officials, school authorities, town and county boards, and others interested, and by securing its publication in the daily and weekly press. Through this a large number of applications for the circular were received, and its aggregate distribution during the year amounted to over 60,000 copies in English, German, and Scandinavian:

ILLINOIS STATE BOARD OF HEALTH, SECRETARY'S OFFICE, SPRINGFIELD, March 15, 1881.

Dear Sir: Owing to the fact that there are now five points in the State from which small-pox may be disseminated, in addition to its general prevalence in other States, the State Board of Health deems it its duty to warn the people that prompt and decisive action must be taken to prevent its spread. The history of the recent outbreak in Fulton county is a practical illustration of what can be done in the way of prevention. All the deaths that occurred at Cuba were among individuals who had never been vaccinated. In others, who were exposed and promptly vaccinated, the vaccine disease and the variolous disease ran their course together without fatal consequences or serious sickness, and often with decidedly modifying effect upon the course of the graver disease; while some who had been previously vaccinated suffered only from mild varioloid, the greater number escaping. In this connection the Board would remind the medical profession that in case a doubt exists with regard to diagnosis, it is their duty to throw the doubt in favor of precaution. This will be appreciated when it is stated that the first cases in Fulton and Pike counties were called chickenpox. The Board fully recognizes the difficulty of positively deciding in some cases during the early stages of the disease; but at this time it is safe to treat all suspicious cases as if they were small-pox.

All should be vaccinated or re-vaccinated. Great responsibility rests upon school boards and local Boards of Health. None should be allowed to attend school who have not recently been vaccinated. The proprietors of manufacturing establishments and railway managers should insist upon the same precaution being taken by their employés.

The STATE BOARD OF HEALTH will co-operate with local boards to the full extent of its power.

Circulars containing instructions for the management of the disease will be sent to any address upon application to the Secretary.

Very respectfully, John H. Rauch, M. D.

## TRANSPORTATION OF CORPSES.

RULES FOR THE TRANSPORTATION OF CORPSES BY RAILROADS AND STEAM-BOATS IN THE STATE OF ILLINOIS.

> Illinois State Board of Health, Springfield, Ill., July 15, 1881.

Rule 1. The transportation of the bodies of persons who have died of Small Pox, Asiatic Cholera or Yellow Fever, is absolutely forbidden.

Rule 2. From November 15th to March 15th, all other dead bodies may be transported without restriction, excepting the bodies of those who have died of Diphtheria, Scarlet Fever, Typhus or Typhoid Fever.

RULE 3. The bodies of those who have died of Diphtheria, Scarlet Fever, Typhus or Typhoid Fever, at all times, and all other bodies presented for transportation from March 15th to November 15th, must be closely wrapped in a disinfectant cerecloth,* placed in a metallic or wooden coffin, and this enclosed in a tight wooden box.

Rule 4. Every dead body must be accompanied by a physician's certificate, showing cause of death, a certificate of inquest from the Coroner, or a permit for transportation from the Clerk of the Local Board of Health, if any; and a written certificate from the shipping undertaker, setting forth that the corpse has been prepared for transportation in accordance with the rules of the Illinois State Board of Health.

By order of the Board:

John H. Rauch, M. D., Secretary.

^{*}The "disinfectant cerecloth" (or winding-sheet) consists of a stout cotton cloth thoroughly soaked in a solution of one and a half pounds of sulphate of zinc or white vitriol, and three-quarters of a pound of common salt, in three gallons of water.

9

## SANITARY POLICING OF RAILWAY STATIONS.

TO GENERAL MANAGERS AND SUPERINTENDENTS OF RAILROADS.

ILLINOIS STATE BOARD OF HEALTH, Springfield, Ill., July 15, 1881.

At a meeting of the Illinois State Board of Health, held in Chicago, on June 29, the attention of the Board having been called to the subject, the following action was taken with regard to the sanitary policing of Railroad Water Closets:

WHEREAS; Complaints have been made to the STATE BOARD OF HEALTH of the neglected and polluted condition of the water closets and privies connected with many of the railroad depots in this State;

Resolved. That the superintendents of the several railroads be respectfully requested to give such instructions to their employes as shall secure the daily inspection and cleansing of the places named, and such use of disinfectants as will insure healthfulness.

Resolved, That the Secretary be instructed to communicate this preamble and resolutions to the proper officers of the several railroads.

In compliance with the above instructions, I herewith forward the same to you, and request your immediate attention to the same.

John H. Rauch, M. D., Secretary.

## LOCAL HEALTH AUTHORITIES DEFINED.

10

STATE OF ILLINOIS, ATTORNEY GENERAL'S OFFICE, Springfield, October 18, 1881.

John H. Rauch, M. D., Secretary State Board of Health,

Dear Sir: Your communication of this date received, in which you ask what persons constitute the local Boards of Health in this State, and what powers, if any, the State Board has to make rules and regulations affecting such local boards.

In cities, towns and villages incorporated under the general law, the Boards of Health are appointed by the city, town or village council, by virtue of Section 62, item 76, Chapter 24, Revised Statutes. In cities, towns or villages incorporated under special acts, the charters creating them ordinarily provide who shall constitute the Board of Health, or how they be appointed.

In counties under township organization, the supervisor, assessor and town clerk constitute the Board of Health for their respective townships, by virtue of Section 127, Chapter 139, Revised Statutes. In counties not under township organization, the county commissioners constitute the Board of Health for their respective counties, by virtue of their general powers to control and regulate the affairs and interests of the county.

The State Board of Health has power to make such rules and regulations as they may deem necessary for the preservation and improvement of the public health, by virtue of Section 2 of the act of 1877, creating the Board, and under such authority may make a rule requiring the local boards to report to it when contagious diseases occur within their respective jurisdictions.

Very respectfully,

James McCartney, Attorney General.

#### SUPPRESSION OF EPIDEMIC DISEASES.

ILLINOIS STATE BOARD OF HEALTH, Springfield, October 20, 1881.

To the President Board of Health, ——— County:

DEAR SIR: Concert of action on the part of health authorities of the State is necessary to prevent, control, and stamp out contagious and epidemic diseases during the coming winter.

Small-pox now prevails to an alarming extent in some of our large commercial centres, and will, in all probability, be rapidly distributed from them as the temperature becomes lower. Vaccination and re-vaccination are extremely important, and may prevent not only loss of life, but the serious interference to business, which always accompanies such an outbreak.

Should an outbreak of small-pox occur, I respectfully call your attention to the following regulation adopted by the Illinois State Board of Health, at its last meeting, on the 30th of September, ult.:

Under the authority conferred upon the State Board of Health, by section 2 of the State Board of Health Act, it is ordered that, on and after January 1, 1882, the first cases of small-pox occurring in any county, township, town or city in this State, be promptly reported to the Board, as also, the prevalence of any epidemic; it being borne in mind that in counties where township organizations exists, the township board is the board of health, and in counties not under such organization, the county commissioners act in like capacity.

Reports should be promptly sent to the Secretary of the Illinois

STATE BOARD OF HEALTH,

By order of the Board.

John H. Rauch, M. D., Secretary.

#### DANGERS OF SUMMER RESORTS.

ILLINOIS STATE BOARD OF HEALTH,
OFFICE OF THE SECRETARY,
SPRINGFIELD, November, 11, 1881.

To the Secretary, State Board of Health:

My Dear Sir: At the last quarterly meeting of this Board the Secretary submitted a paper on the Dangers of Summer Resorts, prompted, in part, by his personal experience in August last at Beach Haven, N. J., when the Parry House was destroyed by fire. The rapidity of the combustion—the entire building being completely destroyed within an hour—the limited means of egress, and the time of occurrence of the fire, 3 A. M., rendered the escape of the inmates, without loss of life, little less than miraculous. The Parry House was in no essential respect different from the average hotel as found at many popular summer resorts, the most cursory examination of which would reveal the same insufficient provision for exit and for extinguishing fire, and a like flimsy and combustible character of structure.

After discussion by the Board, it was

"Ordered, That the Secretary be instructed to address a communication to the New Jersey State Board of Health, and to the boards of health of other States in which there are summer resorts, inviting attention to the subject; and respectfully recommending that, in case there are no adequate laws governing the construction of such buildings with reference to danger from fire, inspections should be made of these resorts, covering this point as well as the general sanitary conditions which obtain in and about such places, this recommendation being based upon the belief that the publication of reports of such inspections would go far toward securing a correction of the evils disclosed."

This Board will be glad to co-operate with you in any manner indicated, to the extent of its ability, either in this or any other direction in the common labor of promoting the public safety.

Very respectfully,

John H. Rauch, M. D., Secretary.

Copies of the above were sent to the Secretaries of the State Boards of Health of New Hampshire, Massachusetts, Connecticut,

Rhode Island, New York, New Jersey, Virginia, West Virginia, Michigan, Wisconsin, and others; to the National Board of Health,

and individuals—34 in all.

During the thirty days immediately following the distribution of this circular, reports were received of the destruction by fire of no less than six summer resorts, fortunately not attended by loss of life, owing to the lateness of the season. In every instance the combustion was rapid, and in nowise checked by any appliances at hand for the purpose.*

^{*}There have also been destroyed, during the season of 1882, two large summer hotels in Maine, two in Massachusetts, one in New Hampshire, and one in Rhode Island—making a total of twelve since the circular was issued. The escape of the inmates without loss of life can only be considered a piece of accidental good fortune, for in nearly every instance there were the same flimsy construction, want of adequate exits, and insufficient provision of extinguishing appliances. The sanitary conditions of these resorts have still further claimed attention, from the occurrence of typhoid fever in more than one instance.

#### VACCINATION OF RAILWAY EMPLOYES.

Illinois State Board of Health, Secretary's Office, Springfield, November 12, 1882.

To * * Esq.,

General Manager * * Railroad:

Dear Sir: Attention having been attracted to the fact that, in several instances during the past year, the only cases of small-pox in certain localities have been among railroad employés, the State Board of Health earnestly urges upon you the necessity for prompt vaccination—or re-vaccination, as the case may be—of the entire personnel of your road. Train officers and crews are especially liable to contract the disease, from their necessary exposure to contact with passengers; and during the present heavy immigration movement, the danger of infection is greatly increased.

The cordial co-operation in all measures looking to the protection of the public health, and consequent avoidance of interruption to travel and traffic, which the road has, whenever occasion required, found you ready to accord, prompts the belief that you will adopt this recommendation forthwith, and push its efficient enforcement.

Copies of the accompanying circular—"How to Prevent the Spread of Small Pox"—will be furnished you for distribution if desired.

By order of the Board:

John H. Rauch, M. D., Secretary.

In response to the foregoing, replies were received from the managements of all the roads operating in Illinois, and eventually orders were issued which, it is believed, secured a very general vaccination of railway employés of all classes. The only noteworthy exception to this was among construction hands, who, as a rule, are not directly employed by the companies, but by contractors. These latter, not possessing the same interest as the railways in the permanent and future welfare of the localities in which they temporarily operate, it was found difficult to enlist them in the active enforcement of the measure.

The following extracts from the Secretary's correspondence on this subject, sufficiently indicate the gratifying reception of this effort of

the Board by the railway interests:

CHICAGO, ROCK ISLAND AND PACIFIC RAILROAD COMPANY.

Office of Surgeon-in-Chief, Davenport, Ia., Nov. 21, 1881.

John H. Rauch, M. D., Secretary State Board of Health, Springfield, Ill.:

Dear Sir: Your communications addressed to General Manager R. R. Cable are in this office for answer.

While the company is in full sympathy with your efforts to arrest and prevent, if possible, the spreading of contagious diseases—small-pox in particular—they do not wish to act without a fuller understanding of your circular letter of Sept. 12th, 1881.

You state that the "Board of Health earnestly urges upon you the necessity for prompt vaccination, or re-vaccination, as the case may be, of the entire *personnel* of your road. Train officers and crews are especially liable to contract the disease, from their necessary exposure, etc., etc."

Is it to be understood that you ask the company to vaccinate all of the employés, or only those who, by reason of their peculiar positions on the road, are liable to come in contact with immigrants and infection-bearing materials?

For example, is it not enough to have all passenger train men subjected to your recommendation? It seems that those who have local and stationary employment are within the jurisdiction of local boards of health, as well as of municipal corporations.

Yours respectfully,

W. F. Peck, Surgeon-in-Chief.

[Reply.]

ILLINOIS STATE BOARD OF HEALTH,
OFFICE OF THE SECRETARY,
SPRINGFIELD, December 20, 1881.

MY DEAR DOCTOR:

Your letter of the 21st November, concerning the vaccination of railway employés, was duly received and filed with others on the same subject, with the intention of publishing a circular covering all the points raised. The fulfillment of this intention has been delayed by the pressure upon my time and attention, caused by the numerous outbreaks (of small-pox) in this State, to many of which I have been obliged to attend in person.

I will now say that, while some railway employés are undoubtedly more exposed than others, and so are in more pressing need of the protective measure, I see no good reason why the companies should

not use their influence to secure the vaccination of their entire personnel, beginning with the President and going down to the day laborer. The companies possess ample power to secure this, and many of the roads have already issued orders to such effect.

Very respectfully,

John H. Rauch.

W. F. Peck, M. D., Surgeon-in-Chief, C., R. I. & P. R. R.

CHICAGO, ROCK ISLAND AND PACIFIC RAILWAY.

OFFICE OF SURGEON-IN-CHIEF, DAVENPORT, IA., December 30, 1880.

#### TO ALL EMPLOYES.

Since the Boards of Health of the different States, in which the lines of this road are located, believe that small-pox is interrupting travel, and otherwise prejudicing the health and lives of the citizens, and that immunity from the disease may be enjoyed, it is deemed best for all railway employés to be vaccinated.

You will therefore, within thirty days from the date of this order,

be vaccinated.

In those cases where vaccination has been performed, but not within a year, re-vaccination is required.

All officers in charge of men will see that this requirement is strictly enforced, and any refusal to comply with its provisions must at once be reported to the General Superintendent.

A. KIMBALL, General Sup't. R. H. CHAMBERLAIN, Division Sup't.

W. F. Peck, Surgeon-in Chief.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY.

CLEVELAND, O., November 29, 1881.

John H. Rauch, M. D., Secretary Illinois State Board of Health, Springfield, Illinois:

My Dear Sir: Please find enclosed circular to all employes of this railway, in regard to the necessity of vaccination, which was issued in accordance with suggestions contained in your communi-Yours truly, cation of November 12th.

P. P. WRIGHT, General Sup't. (Circular.)

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY.

CLEVELAND, November 26, 1881.

To all Employés:

The Illinois State Board of Health communicates the fact that in several instances during the past year, the only cases of small-pox in certain localities have been among railroad employés, and as train men are especially liable to contract the disease, from their necessary exposure and contact with passengers, which, during the present heavy immigration movement, is greatly increased, the management earnestly recommends and urges upon you the desirability of prompt vaccination or re-vaccination, as the case may be, as a measure of protection for yourselves, families and those with whom you are associated.

P. P. Wright, General Superintendent.

CHICAGO AND ALTON RAILBOAD COMPANY.

Office of the President, Chicago, November 19, 1881.

John H. Rauch, M. D., Secretary State Board of Health, Springfield, Illinois:

Dear Sir: I have received your letters of the 12th and 14th inst. We have no authority to compel "vaccination or re-vaccination of the entire *personnel*" of our road, as requested. We can do little more than to advise the men in our employ.

The passengers on our trains are nearly all first-class, and so far as I can learn there never has been a case of small-pox among men employed on our trains.

While the officers of the company fully recognize the importance of complying with your request, long exemption from the disease will probably make it difficult to convince our men of the necessity for doing so.

This company has but few passenger coaches which are run continuously more than twelve or thirteen hours, those run between Chicago and Kansas City, only; and, as you are doubtless well aware, the public always indicate a decided preference for through cars.

I fear it will be difficult to induce the traveling public to accept a change. This company is doing all in its power to ventilate and keep its passenger cars clean, and desires to co-operate with your Board in all sanitary measures on its line.

Yours truly,

T. B. Blackstone,

President.

St. Louis, Alton and Terre Haute Railroad Company.

GENERAL OFFICE, No. 104 NORTH FOURTH ST., St. Louis, 29th Nov., 1881.

John H. Rauch, M. D., Secretary, Springfield, Ill.:

DEAR SIR: Referring to your circulars of the 12th and 14th, will state that this company will cheerfully co-operate in any measures adopted or suggested by your Board to promote the public health, but, as there is very little foreign immigration passing over our line, we are not subject to the dangers incident to East and West lines. Yours truly, Geo. W. Barker, General Manager.

CHICAGO AND EASTERN ILLINOIS RAILROAD COMPANY.

OFFICE OF THE SUPERINTENDENT, CHICAGO, ILL., Nov. 25, 1881.

John H. Rauch, M. D., Secretary Illinois State Board of Health, Springfield, Ill.:

Dear Sir: Your communication of the 12th inst., addressed to F. W. Huidekoper, our President, has been referred to me, and I have issued a circular to all our employés, directing their immediate attention to vaccination, on account of the prevalence of small-pox. Although there were some cases on our line last year, I do not know of a single case now, except in Chicago, but I will cheerfully co-operate in all measures to prevent its spread in our vicinity. Yours respectfully,

O. S. Lyford, Superintendent.

#### RAILWAY SANITATION.

ILLINOIS STATE BOARD OF HEALTH, OFFICE OF THE SECRETARY, SPRINGFIELD, ILL., November 15, 1881.

DEAR SIR:

At the last quarterly meeting of the Illinois State Board of Health, the enclosed preamble and resolution were unanimously adopted. Since that time, the increasing spread of small-pox has

emphasized the necessity for the action therein indicated.

It is admitted that railroad authorities do, in their own interest, exert such effort as to them may seem necessary and practicable to prevent avoidable sickness and loss of life. The question remains: Can such effort be made more efficient and less onerous by concert of action—by a well-considered code of sanitary rules and regulations by the assistance of State and local health authorities?

In the present emergency the answer must, undoubtedly, be in the affirmative. There is abundant proof of the agency of railway communication in spreading small-pox; 1, by the transportation of infected passengers, mainly immigrant, and their baggage; and 2, through unprotected railway employés. With the first, of course, the companies cannot deal unassisted, but the second evil is largely, if not entirely, under their control.

As an illustration of other evils which it is sought to remedy may be cited the long through runs of passenger coaches without change.

From a sanitary standpoint, no car—whether immigrant, passenger, parlor or sleeping coach—should be occupied continuously more than a given number of hours, depending upon the character of the car, its occupants and the season of the year. At the end of, say twelve hours in winter, a crowded immigrant car is often simply a hot-bed for the rapid propagation and diffusion of any contagious or infectious disease which may exist among its occupants. To a certain extent, differing mainly in degree, this is also true of the best appointed first-class passenger car, parlor or sleeping car.

While this is true, the difficulty of inducing the traveling public to accept the change indicated is fully recognized. And yet sanitary authorities are agreed as to its importance on the score of health. Whether short runs are more or less desirable, on economic grounds,

is a question for the railway expert to answer.

It is believed that a study of the information you can furnish on these and kindred points may be productive of benefit both to the railways and to the public.

Very respectfully,

John H. Rauch, M. D.,

Secretary.

To * * * * * * Esq., General Manager, * * * Railway,

#### [Enclosure.]

EXTRACT FROM THE MINUTES OF THE REGULAR QUARTERLY MELTING OF THE ILLINOIS STATE BOARD OF HEALTH, SEPTEMBER 29-30, 1881.

Drs. Clark, McLean and Bateman, the committee to which had been referred a paper by the Secretary on the subject of Railroad Sanitation, offered the following preamble and resolution, which were adopted:

WHEREAS, It is believed that the health interests of the public may be promoted by the assistance of the Board in certain measures connected with the sanitary administration of the railway service in Illinois, to which end an interchange of ideas and information is necessary; therefore, be it

Resolved. That the Secretary be instructed to communicate with the managing authorities of the various railroad lines in this State for the purpose of ascertaining the details of existing methods and agencies employed by such lines; (1.) in the conservation of the health and lives of passengers of different classes; (2.) in the prevention of the spread of contagious or infectious diseases; (3) in the hygienic and sanitary supervision of employes; and (4) in the care and policing of depots, offices, buildings and grounds—the information thus acquired to be made the basis of such action or recommendation by this Board as the facts may demonstrate to be necessary or advisable in the direction of co-operation with railroad authorities and the sanitary education of the traveling public.

#### [Replies to the Foregoing.]

CHICAGO, BURLINGTON AND QUINCY RAILROAD COMPANY.

Chicago, Ill., November 28, 1881.

John H. Rauch, M. D., Secretary Illinois Board of Health, Springfield, Illinois:

Dear Sir: Yours of November 12th and 14th to C. E. Perkins, President, were referred to this office, and have been carefully considered. The suggestions made are regarded as in a good direction, and we have taken steps to have all employés upon passenger trains vaccinated.

Regarding change of passenger coaches upon any continuous trip, there are undoubted arguments against such practice, aside from the delay, inconvenience and expense attending it.

During the summer season train-men can and should see that the air in cars is kept constantly changing and pure. With the present construction of most passenger cars, by care this can also be done to a reasonable extent in cold weather. A transfer of passengers is necessarily attended with some exposure to the weather, and, with the class of passengers in question, creates considerable bustle and excitement.

At such inclement season as renders complete ventilation difficult the greatest care on the part of the company's employés will not prevent exposure to children especially, that will be very trying to them in their tired and excited condition, undoubtedly rendering them more liable to the attack of disease, than while quietly continuing their journey. Such passengers, too, as a rule, secure their several locations in the car, and retain them to the journey's end. In case of transfer to other cars, they would probably be thrown in close proximity with entirely other passengers, somewhat increasing the facilities for spreading contagious diseases.

The above remarks were called forth from a discussion of yours of the 14th, with our several departments, and are presented, not in a spirit of disputation, but rather as opinions bearing upon the question. In our own case, the longest passenger run is about twenty-four hours; mainly from 12 o'clock noon, until the next morning at a desirable hour for transfer. Our coaches are carefully arranged with a view to ventilation, and under such conditions, your Board would not probably think the change advisable or even desirable.

I should be pleased to receive some of your circulars—"How to Prevent the Spread of Small Pox," kindly offered for distribution.

- Yours truly,

J. S. Cameron, Assistant to G. M.

WABASH, ST. LOUIS AND PACIFIC RAILWAY COMPANY.

Office of General Manager, Saint Louis, November 19th, 1881.

John H. Rauch, M. D., Secretary Illinois State Board of Health, Springfield, Ill.:

Dear Sir: I have yours of November 14th, and I desire to say that for my part I think railroad companies would not hesitate to adopt any reasonable rules which, after a full consideration, might be considered necessary to prevent, so far as they can, the spread of infectious diseases.

In regard to changing cars, after a run of twelve hours, I must say I have grave doubts about such an arrangement being beneficial to the traveling public. The run from here to New York is thirtyseven hours, and the public appreciate the convenience of having a through sleeper so that they know where their place is and know that they are not going to be interrupted at any time during the whole passage. Now I submit the question, whether it would be for the comfort and the health of the people who ride in sleeping cars, to make two changes between here and New York, many times running the risk of taking cold—to a greater extent than they otherwise would? On our own road we have no runs which are longer than fourteen hours in the same train, it being our custom to change cars at the Mississippi river, and put passengers into cars which have been cleaned. I know that in the transportation of emigrants, (which is a small part of our business) it would be fair to suppose that our brakemen and baggagemen, especially the latter, would be liable to take diseases and would also spread them abroad; but after an experience of over twenty years on railroads in the West, I must say that I do not remember a single instance where any of our baggagemen or passenger train-men have ever had the small-pox. It is a singular fact, but still I find in conversation with other railroad managers that such is the result of their recollection, also,

Yours truly,
John C. Gault,
General Manager.

CHICAGO, ROCK ISLAND AND PACIFIC RAILWAY COMPANY.

Office of Surgeon-in-Chief, Davenport, Ia., November 21, 1881.

John H. Rauch, M. D., Secretary Illinois State Board of Health, Springfield, Illinois:

Dear Sir: Your circular letter of November 14th, addressed to R. R. Cable, General Manager, has been referred to this department for answer.

In replying to (1) of a committee of your Board, I will state that in 1875, President Riddle inaugurated a surgical department for the purpose of furnishing the best of care to those, who, by reason of injuries sustained, might require surgical attention. This department is efficiently organized and exercises a humane influence, and is highly appreciated by the employés. All matters having a medical bearing are referred to and taken charge of by the surgical department. (2) No special means are in force respecting sanitation, except in the case of the transportation of dead bodies. The excellent system now enforced by your Board had an early advocate in this department. (3) No rules are in operation looking to the hygenic and sanitary supervision of employés. (4) Buildings and grounds are cared for in accordance with general principles only, cleanliness, ventilation and suitable sewerage are considered essential in the care of the company's property.

Respecting the care of cars, all passenger cars on the through trains are thoroughly swept and aired at the end of each trip, which usually requires from eighteen to twenty-one hours. So long as the traveling public demand long rides without change it will be almost impracticable to renovate and purify cars until they are emptied from having reached their terminal points. While it is perhaps true that the ventilation of cars is defective, it is nevertheless true that the circulation of air in moving trains furnishes better means for removing noxious materials that is to be found in the majority of the living houses of the country. It is admitted that this is a subject of vast importance, and should future experience develop better and more practicable methods than those now in use, this company will not be found wanting in supplying that which will make travel

more comfortable and more healthful to the public.

Yours respectfully, W. F. Peck, Surgeon-in-Chief.

MICHIGAN CENTRAL RAILROAD COMPANY.

General Manager's Office, Detroit, Mich., Nov. 15, 1881.

John H. Rauch, M. D., Secretary Illinois State Board of Health, Chicago, Ill.:

Dear Sir: Referring to your recent circular as to the vaccination of conductors and trainmen on our through passenger trains, I have referred the same to Dr. D. Farrand, our surgeon-in-chief, who will, in a few days, write you in the premises, showing what precautions this company has taken in the matter.

I am glad to see that the Illinois State Board of Health is giving attention to the question of the railroads uniting in taking proper sanitary measures. Have you, as yet, given any attention to the subject of privies for way-stations or small towns, where there is no proper drainage? As a rule, these privies are unsightly, and are necessarily left in a more or less offensive condition. This company has tried earth-closets without any good effect. It seems to us that here is a matter which, while it seems of but little importance, is of great importance to the traveling public.

Yours truly.

W. B. Ledyard,

General Manager.

Mr. Ledyard's suggestion had been anticipated, to some extent, by the action of the Board at its June meeting, and the issue of the circular of July 15. (See ante). Much improvement has been made in this respect, but the conditions are not yet all that could be desired. In the absence of properly-flushed water-closets, neither earth-closets nor any other device yet suggested can be relied upon without constant care and attention. The only way to secure cleanliness and freedom from offense in such necessary evils, is by unremitting vigilance and continuous effort.

#### VACCINATION ORDER.

Circular No. 50.

ILLINOIS STATE BOARD OF HEALTH,
OFFICE OF THE SECRETARY,
SPRINGFIELD, December 1, 1881.

At a special meeting of the STATE BOARD OF HEALTH, held in the city of Chicago, on Tuesday, November 22, 1881, the following resolution was unanimously adopted:

Resolved, That by the authority vested in this Board, it is hereby ordered, that on and after January 1, 1882, no pupil shall be admitted to any public school in this State without presenting satisfactory evidence of proper and successful vaccination.

Official: John H. Rauch, M. D.,

Secretary.

The State Board of Health is charged by law with "the general supervision of the interests of the health and lives of the citizens of the State," and has authority to "make such rules and regulations * * as it may deem necessary for the preservation or improvement of the public health; and it shall be the duty of all police officers, sheriffs, constables, and all other officers and employés of the State to enforce such rules and regulations." * * * [Session Laws, 1877. Act approved May 25, 1877.

In the discharge of this duty and in the exercise of this authority, the above order is issued, in the belief that it is entirely feasible to make small-pox of "as little effect as any extinct epidemic of the middle ages;" and that the first, and absolutely necessary, step to this end is to secure the general vaccination of children, so as to prevent the accumulation of unprotected people as they grow up.

During the past fifteen years, 1867 to 1881, both inclusive, out of an aggregate of 227,113 individual scholars attending the public schools at Chicago, there have occurred only fifteen cases of smallpox and varioloid. This immunity is the direct result of a requirement of the Health Department of that city, the enforcement of which was begun in 1867, and by which evidence of a successful vaccination is made a condition precedent to admission to any Chicago public school.

It is, probably, unnecessary to add anything to the testimony of these figures. They are in themselves an unanswerable argument for the value of vaccination.

What has been done in Chicago may be done the more readily in smaller towns and villages, in proportion as these latter are less exposed to frequent importation of the disease or to large accessions of unprotected immigrants.

Small-pox is now widespread through all the Northern States from the Atlantic to the Pacific, and is causing profound anxiety at the manifestations of its epidemic tendency. To some extent this is due to the recent enormous immigration; but it is undoubtedly true that the neglect of vaccination among our own people has also much to do with the present alarming disposition to a spread of the disease. This emergency, therefore, seems to offer a favorable opportunity for inaugurating in the State at large a measure which has proved so signally successful in its chief city.

In making vaccination to this extent obligatory, however, the BOARD has duly considered not only the rights but the prejudices of the public on the subject, and the following suggestions and instructions are intended to secure its just rights and to remove existing grounds for honestly-entertained prejudices.

#### TO PHYSICIANS.

It is taken for granted that all vaccinations should be performed by competent medical men, or, if by a non-professional person of sufficient skill and experience, that the result shall be examined and certified by a physician. A valid opposition to vaccination—a so-called "prejudice"—undoubtedly has its source in the failures and untoward results following the unskillful, careless manipulation of amateurs inexperienced in qualities of virus, in traumatic complications, in conditions of the system forbidding the operation, and in the danger of transmitting or causing other diseases by unclean instruments, incautious scarification, etc., etc. The operation is so simple in itself that almost every one feels qualified to perform it; and although there can be little or no objection, for example, to the mother vaccinating her child, under the supervision of the family physician, and with virus furnished or approved by him, yet when we find one medical man succeeding in 95 per cent. of his vaccinations, and, ceteris paribus, another in only 70 per cent., it must be admitted that there is an art even in what is popularly supposed to be so simple a matter as scratching the skin.

Another "prejudice" in the public mind has been fostered by those opposed to the use of long-humanized virus. Such virus, it is claimed, is open to two objections: First, and most important, the deterioration in vigor caused by the transmission of virus through numerous human beings—hence, alleged imperfect protection and occurrence of small-pox among those so vaccinated; and, second the danger (real or supposed) of conveying other diseases by such virus. Both these objections may be met by the use of bovine virus from approved propagators.

With the view of ultimately tabulating the results obtained, the Scholar's Certificate of Vaccination (Form 51, S. B. H.,) has been

so arranged as to secure certain data with little labor to the certifying physician. The following explanations will facilitate the making out of the *Certificate*, and, it is hoped, secure uniformity in the returns.

1. In all cases the blanks in entries 1, 2 and 3 are to be filled up. Where the Christian name is not distinctively masculine or fem-

inine, indicate the sex by the small letter m or f.

In cases of primary vaccinations fill up, also, entries 4, 6 and 7, and complete No. 5 by drawing the pen through the unnecessary word "bovine" or "humanized," as the case may be. In No. 7 ("Result"), enter the word Typical, if the resulting scar is well-marked, characteristic, of normal size, and perfect in outline, depression and pitting; or Modified, if, while well-marked and characteristic, the scar is less than normal size and of irregular contour; or Bad, if the scar be less than one-fourth of an inch in diameter, or simply a large, smooth, flat, shiny mark.

- 3. In case of previous vaccination: If of a girl under twelve or a boy under fourteen years of age, revaccination is not indispensable—provided, the scar be a "typical" one. Should there be any doubt on this point, it must be decided in favor of revaccination, in which case all the entries require to be filled out. If the evidence of successful vaccination within the years mentioned be satisfactory beyond a peradventure, then the entries 4, 5 and 7 will be omitted. Girls over twelve, and boys over fourteen, must in every case be revaccinated, no matter how satisfactory the scar may be, unless the evidence is conclusive that a successful primary vaccination has been effected subsequent to those ages and within the past five years.
- 4. If the vaccination be a failure, the child will be furnished a Certificate duly filled out as to entries 1, 2, 3, 4, 5 and 6, and the word Failure written in No. 7. In such a case, the operation must be repeated at intervals of a fortnight, until successful, or until at least five essays have been made. A "Failure" Certificate must be given for each unsuccessful attempt.

If more than one in five primary vaccinations are failures, the physician should suspect the value of his virus, and obtain a supply from a new source.

Physicians may, at first, obtain the Scholar's Certificate blanks from teachers, school directors or other officers of public instruction, for which purpose a supply has been forwarded to each County Superintendent to meet the present emergency and prevent delay in carrying out the requirement. Additional copies of the Certificate must be otherwise provided.

#### TO SCHOOL AUTHORITIES.

County Superintendents are respectfully referred to the accompanying circular of the State Superintendent of Public Instruction, issued in his official capacity as adviser, and whose advice and in-

struction it is made the duty of County Superintendents to "faithfully carry out."—[See *Illinois School Law*, Sec. 20, in force July 1, 1879.

Much of the success of this effort to protect the children from a loathsome pestilence, will depend upon the wisdom, firmness and intelligent action of the school authorities. Timely notification and explanation will save much unnecessary friction; and exact information and instruction will soon dispel ignorant opposition. It only needs that the public be rightly informed to secure cheerful co-operation. All inquiries will be promptly answered from this office, and every available facility will be afforded for meeting emergencies. It is not desired, except as a last resort, to arbitrarily enforce this measure; at the same time it should be clearly understood that the requirement will be enforced.

It is suggested that the County Superintendent, as the "official adviser of the school officers and teachers of his county," explain to the directors and teachers the scope of the order, and advise as to the methods of its enforcement. Teachers should be required to familiarize themselves with the form of the Scholar's Certificate; to see that it is properly filled out when presented; to make a record of its data on the blank return (Form 52, S. B. H.); and to forward said return, in its accompanying envelope, to the Secretary's office, in Springfield, as herein directed.

Returns for the current school year (ending June 30, 1882), will be made on the first day of February, prox., for the month of January, and must account for every child whose name appears on the school schedule for that month. A supplemental return will be made at the close of the last term of the school year, to include all scholars admitted on and after February 1, 1882. Thereafter, returns will be made at the end of the first month of the first term of each school year, and supplemental returns at the close of each term.

"Failure" certificates will be taken up on presentation, and forwarded with the returns; but certificates of successful vaccination, after the data have been entered on Form 52, will be returned to the children, and shall be valid, as entitling to admission, until otherwise ordered,

A certificate issued by a reputable physician, to meet the contingency described in paragraph 4, "To Physicians," (vide supra) shall be received as a substantial compliance with the order, entitling the child to admission, pending the result of the repeated operation. Watchfulness on the part of the teacher will often be necessary to secure the required repetition, and authority must be given to exclude the child until satisfactory evidence is adduced that the operation has been repeated.

An edition of 300,000 certificates has been printed, and these are divided pro rata among the County Superintendents, on the basis of the total number of school children in each county. These will be sufficient to begin with; but an additional supply should be forthwith provided by every county or school district for itself, so as to avoid any delay, or the exclusion of any child for want of a proper certificate on the first day of January next.

It is not intended, nor is it necessary, in the enforcement of this order, that a single child should be debarred from regular school attendance; but it is earnestly hoped to secure, through its agency, to the rising generation at least, the benefits of a protective measure against small-pox, concerning which "it has been shown to diminish the epidemic influence; it has been shown to preserve the good looks of the people; it has been shown that it tends to make small-pox a mild disease, compared with the same disease in the unprotected; it confers an almost absolute security against death from small-pox; and, lastly, it has been shown to exercise a protective influence over the health of the community generally."—Aitken.

John H. Rauch, M. D., Secretary.

Office of Superintendent of Public Instruction, Springfifld, Ill., December 1, 1881.

To County Superintendents of Schools, School Boards and Teachers:

The State Board of Health, for the purpose of restricting the spread of small-pox and of depriving the disease of its most serious effects, has, in the exercise of authority given by the act creating the Board passed the order recited above, relative to the vaccination of the pupils of the public schools; and County Superintendents are asked by the Board to assist in distributing to the districts the circulars and blanks sent them; school boards are instructed to enforce the order in the schools in their charge, and teachers to inspect certificates of vaccination presented by their pupils, to make a record of them for their own use, and a return of the same to the Secretary of the Board in this city, in the way and at the times indicated.

I need not say that the Board has in view, in making this order, an end, whose accomplishment is of great concern to the whole community. Neither need I say to you, who have so often known of schools discontinued for several weeks, or broken up for a term, by the presence of small-pox in the vicinity, that the purpose of the Board has an intimate connection with the welfare of our schools.

I bespeak, therefore, for the Board your cordial and faithful co-operation in carrying out its plans according to the instructions given.

James P. Slade, State Superintendent of Public Instruction.

## ILLINOIS STATE BOARD OF HEALTH.—NO. 51. SCHOLAR'S CERTIFICATE OF VACCINATION.

1.	Scholar's   Name: \	2.	Αg	;e : }	1 rs.	Mos.
	Residence: 4. Date of Vaccination:					
5.	Virus: { Bovine. 6. Date of Examination: }	3	7.	Resi	alt :	
8.	Previously Yaccinated: In the year 18		9.	Res	ult :	
th	I hereby certify that the foregoing statements are true, hat the child named has been vaccinated, with the result ab	of i	my set	own fortl	knowled	ge, and
Т	The certifying physician should read Circular No. 50, (S.B. H., for full information concerning this Certificate.					М.

[Circular Letter, S. B. H. No. 906.]

Illinois State Board of Health, Office of the Secretary, Springfield, Ill₂, December 31, 1881.

Dear Sir: It having been learned that in some instances scholars' certificates of vaccination other than those prepared by the State Board (Form No. 51), had been used prior to the receipt of these latter, notice is hereby given that such certificates may be accepted as in compliance with the Vaccination Order of the Board.

It is earnestly desired, however, that the Board's official form be used in preference to any other; and school authorities are respectfully requested to give notice that no other will be received after the distribution of those furnished by the Board has been made.

By order of the Board:

John H. Rauch, M. D., Secretary.

#### ILLINOIS STATE BOARD OF HEALTH,-FORM NO. 02.

#### RETURN OF VACCINATION CERTIFICATES.

- I.—From the Principal of the common school at ....., in district number ....., town-ship number ....., range number ....., of the ..... principal meridian, in the county of ....., in the State of Illinois.
- 2.-From the Principal of the ..... school, in the city of ....., county of ....., State of Illinois.

#### EXPLANATIONS.

- In the country schools use the first heading; in city schools use the second heading. The principal of a graded school may make out the Return for the whole school. Use the common designations of the schools in towns or cities, as Dearborn, Third Ward, ing. Front Street, etc.
- 2. Where the Christian name of the scholar is not distinctively masculine or feminine use the small letter m or f to denote the sex.
- 3. Names of months may be indicated by figures. thus: December 31, 1881, may be written 12 | 31 | '81; January 1, 1882, may be written 1 | 1 | '82.
- Designate the kind of Virus used by a check (i) in the proper column—"B." for bovine, "H." for humanized.
   Designate the character of the sear, in the columns "Result." by a check (i) under the appropriate initial—T for "typical," M. for "modified," B. for "bad." Write the word Failure across these three columns where that is the result.
- 6. This Return should be completed and mailed to the Secretary's office promptly on the first of February, 1882.
- 7. Additional blanks of this Form may be obtained by addressing the Secretary State Board of Health, Springfield, Ill.

Name.	Years.	Mon's.	DATE OF VACCINAT'N.	VIII В.	H.	DATE OF EXAMINATION.	T.	M.	В.	Previous Vaccina'n	T.	M.	В.
[Spaces for 50 names.]													

I certify that the foregoing is a correct abstract of the data contained in the Certificates of Vaccination presented by the scholars in attendance at this school during the month of January. ISS2: that the names given correspond with those on the Register and Schedule of this school for the past month; and that no scholar has been admitted, or is now in attendance, who has not complied with the current order of the Illinois State Board of Health relative to the vaccination of school children.

..... Principal. P. O. Address,.....

These blanks can be used for Supplemental Returns, by striking out inappropriate words referring to the period covered, and writing in the necessary changes.

#### CIRCULAR LETTER CONCERNING SMALL-POX.

Illinois State Board of Health,
Office of the Secretary,
Springfield, Ill., December 10, 1881.

Sir: In view of the imminent danger of small-pox becoming still more widely spread as the weather grows colder, it is the duty of those charged by law with the care of the public health to exercise the utmost vigilance, first, against the introduction of the disease from without; second, in securing such a condition of individuals as will render them less liable to receive contagion if it should be introduced into a community; and, lastly, in enforcing such measures in the care of those who may unfortunately become afflicted as will prevent any spread of the disease.

Your special attention is asked to the enclosed circular from the State Board of Health and to the letter of the Attorney General

concerning local health authorities.*

It is absolutely necessary that the Rules in the circular, "How to Prevent the Spread of Small-pox," should be enforced to the letter. The disease can be confined to the first cases by so doing. If it spreads beyond these it is because of gross neglect of these Rules, for which those who are responsible should be held accountable. All needed authority for the enforcement of these precautions is provided by the law, and should be unhesitatingly employed.

Please keep this office fully and promptly advised of any small-pox indications or developments in your vicinity.

Very respectfully.

John H. Rauch, M. D., Secretary.

^{*}See ante, page 10.

#### EXTRACTS FROM THE SECRETARY'S CORRESPONDENCE.

The appended extracts from the Secretary's correspondence, during the year, show, to some extent, the character of the work done in connection with the suppression of small-pox. These are fairly illustrative of the 921 letters written on this subject, exclusive of nearly one million copies of circulars, pamphlets, postal cards, and other publications, prepared and distributed during the same period.

With reference to questions arising under the Medical Practice Act there were written and mailed 1,360 letters, exclusive of printed matter. Many of these were in the nature of privileged communications, the publication of which could subserve no useful purpose.

* * * In response to your letter of the 2d inst., approunding a case of small-pox in your town, a package of circulars—"How to Prevent the Spread of Small-Pox"—is herewith sent you.

It is hoped you will use every effort to secure prompt and thorough compliance with the advice therein contained. With the advent of colder weather there is every reason to apprehend the same epidemic spread of the disease which has already obtained in Minnesota and elsewhere whenever the temperature has fallen below the freezing point.

It is not too much to say that a vigorous enforcement of the rules given in the circular will secure any community from an epidemic, even though there may be scattering or sporadic cases.

Please keep this office fully and promptly advised of the situation, and indicate in what manner the Board may be of service to you * * * *

* * Your letter of the 12th inst., is received, asking information concerning the duties and power of your newly-formed Board of Health.

In the present emergency a prompt and rigid enforcement of the rules in the circular, "How to Prevent the Spread of Small-Pox," and of the Vaccination Order No. 50, will probably be all that you can accomplish, and for this work you have ample authority and power under the law. A supply of the circular and a copy of the order are sent you by this mail.

Your attention is asked to the enclosed regulation of this Board requiring reports from local Boards. * * *

* * * In answer to your request for vaccine virus, received this morning, you will find enclosed fifty points of fresh bovine virus, with directions for use. This will enable you to begin the work at once, while you order an additional supply.

The State does not furnish virus gratis, and this is sent you to meet an emergency.

—'s regular price is one dollar for ten points, but for the quantity herewith sent you the charge will be its actual cost to the State—that is \$3.75, which amount please remit.

Enclosed is also a copy of the Vaccination Order of the BOARD, a full supply of which, together with certificates and other blanks, will be sent your county superintendent for distribution. * * *

* * Yours of the 17th inst., this morning received, and in reply would state that it is clearly the duty of medical men to protect the public, and when they attend small-pox patients to take every possible precaution lest they be the means of carrying the contagion to others. Of course it would be better they should not attend other patients. Refer to marked copy of small-pox regulations. * * *

* * * Yours of the 16th iust., forwarded from Chicago. is just received.

The thing to do is to raccinate and re-vaccinate with the utmost thoroughness. The authorities should make provision for a small-pox hospital, or, at least, such arrangement as that one can be improvised in a short time if necessary.

At what point is the disease? Can you profitably use more of the accompanying circular? * * *

* * * It is reported that there are some cases of varioloid in ———, and that it is not generally understood that such, cases, while not so dangerous to the patients themselves, are fully capable of causing severe small-pox in others, and, therefore should be as rigidly guarded as though pronounced variola.

It is not necessary to create a small-pox scare in using necessary precautions with varioloid cases; but I must insist on the rules laid down in the BOARD's circular being fully carried out, if the facts are as stated. Nothing can be gained by concealment, while there is everything to dread from indifference or neglect.

Please advise me as to the foundation for the report. * * *

* * * In reply to your inquiry of the 19th inst., I have to say, first, the STATE BOARD OF HEALTH has nothing to do with the question of compensation; and, second, that in my opinion a medical man who vaccinates a child and receives the usual fee, is morally, equitably and legally bound to give a certificate setting forth the result of the operation if requested so to do, and without making an additional charge therefor.

It is to be hoped that no color—such as an attempt to exact fees for certificates would afford—may be given to the charge, which has already been made, that the Vaccination Order of this BOARD is in the interest of the medical profession rather than of the public welfare. * * *

* * * Before the Board took action concerning the vaccination of school children the question of authority and power was carefully considered, and trustworthy legal opinion—including that of the Governor and Attorney General—was duly obtained. Such opinion was conclusive, not only as to the authority and power, but as to the duty of the Board in the premises.

School boards have been "notified of the passage of the resolution," but owing to unavoidable delay in the public printing office, all of the printed matter connected with the order has not been distributed as promptly as was intended.

In this mail I send you copies of the documents thus far distributed, so that you may judge of the thoroughness with which the work was projected in this office. The failure of the printer doubles our work, in many respects, and causes no end of trouble and annoyance. * * *

* * * I regret to be compelled to say that the State does not furnish vaccination virus—desirable as such a measure would be on many accounts.

In cases of emergency, as an outbreak of small-pox in an unprotected locality, the Board has furnished a limited supply, until a sufficient quantity could be obtained from other sources. * * * *

* * I wired you from Chicago yesterday, in reference to your telegram concerning the violation of your board of health order by one of the churches. I do not hesitate to characterize the violation as a disgrace to those concerned in it, and I trust you have acted upon my advice and used whatever force was necessary to execute an order which experience has shown to be essential, under such an infliction as your community now suffers.

---5

I send you an additional supply of the small-pox circular by this morning's mail. It should be made clear to your people that these rules—contained in the circular—have the weight of law, and are to be enforced by whatever power and authority may be necessary. The statute says: "It shall be the duty of all police officers, sheriffs, constables, and all other officers and employes of the State to enforce the rules and regulations of the State Board of Health."

Please see that these circulars are thoroughly distributed in your town, and let me know if you need more. * * *

* * * In view of the recent small-pox development in your city your attention is invited to the inclosed printed matter.

The circular, "How to Prevent the Spread of Small-pox," contains such rules and regulations as experience has shown to be absolutely necessary to control and stamp out the disease. These rules have the force and authority of law, being issued under the proper statute; and you are empowered to use such necessary authority—by police officers, sheriffs, constables, etc.,—as will secure their faithful and vigorous enforcement

Too much stress can not be laid upon the protective value of vaccination, and it is hoped you will use all your influence, both personal and official, in having this essential measure generally and properly resorted to.

Please see that the circulars are brought to the public notice, by their publication, for instance, in your daily papers. * * *

* * * Thanks for yours of yesterday, with its reassuring intelligence about-

Your fears as to the effect of the great immigration into the West and Northwest are being daily realized, and I apprehend a further spread of the disease, from this and other causes, whenever the temperature falls. Believing thus, I am very solicitous that vaccination or revaccination be made as general and thorough as possible, even in communities which may fancy themselves secure.

Whatever can be done to this end, either by personal influence or official action, is, in my judgment, of great importance and value. I hope you will give me such counsel and suggestion touching this, among other matters, as you can spare time for.

Prof. H——, of your place, was in the office yesterday, and the vaccination order was thoroughly explained to him, and a full supply of the certificates furnished. * * *

* * * Allow me to congratulate you most heartily on your success. The ordinance is strong, clear and judicious. I especially approve section 5. This will remove a great stumbling block in the way of its thorough enforcement.

By the way the data called for in that section, as voucher for the physician's payment, may all be obtained, and something more, by a slight modification of the scholar's certificate enclosed.

As you invite suggestions, I offer one concerning the period (seven years) prescribed in sec. 1. Doubtless there is wisdom in appealing to the popular prejudice or tradition concerning the mystic number; but I know you agree with me that the constitutional changes at the age of puberty, and the epidemic tendency as manifested in '67, '73 and this year, are the only scientific bases for determining when to vaccinate. On this point see marked passages in enclosed order. * *

* * * In reply to yours of the 27th, asking instructions as to the proper treatment of the infected house and clothing, you are respectfully referred to the enclosed circular, in which you will find full instructions—see sections 10 and 12. A supply of the circular was mailed to you November 29.

I was much relieved on receipt of your denial of the charge of shipping small-pox cases to Chicago. I judge from your two letters—November 27 and 29—that you have acted wisely and conscientiously in the premises, and thank you for your action, on behalf of the BOARD. * * *

* * Thanks for the interest shown, and the information contained in yours of the 28th. I send you 150 copies English, 100 do. Scandinavian, and 25 do. German, of the Small-Pox Order of the BOARD. This is not merely an advisory circular of instruction, but

is a mandatory order, which it is the duty of the local authorities to carry out. Who constitute these authorities is defined in the published opinion of the Attorney General a copy of which is also included in the package.

The school authorities have already been notified of the Vaccination Order of the BOARD, and the necessary blanks forwarded the county superintendents for distribution. You can do much to facilitate the work by explaining matters to the county superintendent, the school boards, and to the county and town authorities generally, and you may state, if you choose, that you do so by request of this BOARD. * * *

* * * In view of the situation at Keokuk, prompt and vigorous precautionary measures should be instituted throughout — county, in order to prevent the introduction and spread of small-pox from that place.

I send you, by express prepaid, a package containing the Small-Pox Order of the BOARD—150 copies English, 50 each Scandinavian and German—which please see distributed to the proper persons. This is not a merely advisory circular, but is a mandatory order, having the weight and authority of law, and all police officers, sheriffs, constables and State officers and employes may be called upon, under the statute, to enforce the rules and regulations.

There is also included 1,000 vaccination certificates, (in addition to a supply previously sent to your county superintendent of schools), which you will please inform physicians and others may be obtained at your office.

Advise this office promptly if any trouble or difficulty is met with, in which we may be of assistance.

#### ILLINOIS STATE BOARD OF HEALTH, OFFICE OF THE SECRETARY. SPRINGFIELD, December 31, 1881.

DEAR SIR—I congratulate you upon the success of your wise and timely effort to secure the reception and care of your small-pox patients in the St. Louis small-pox hospital. You are not alone protecting the health of East St. Louis by every measure which looks to suppressing the disease—and among which proper hospital facilities are not the least important—but such measures are valuable in restoring and preserving confidence, by which interruption of trade and of general intercourse will be prevented, and your commercial and municipal welfare promoted.

The relations of East St. Louis to a large portion of Southern Illinois, as well as to adjacent territory in Missouri, are such as to demand every effort to secure the prompt stamping out of a contagion so virulent and mischievous as that of small-pox; and the work you are now doing, if faithfully and energetically persisted in, will rapidly attain the desired end. There will be all the more need for this as the winter wears on, since it is reasonably certain that, with the low temperature we are yet likely to have, the disease where it already exists. This consideration should have due weight throughout the southern portion of the State, where there is danger that present immunity may lead to the neglect or postponement of necessary precautions. Do not hesitate to call upon the State Board for any assistance in its power, and insist upon a rigorous enforcement of its published rules upon the subject of small-pox.

Very truly and respectfully yours,

JOHN H. RAUCH, M. D., Secretary.

To Hon. J. J. McLean, Mayor, East St. Louis, Ill.

#### ILLINOIS STATE BOARD OF HEALTH, OFFICE OF THE SECRETARY, SPRINGFIELD, December 31, 1881.

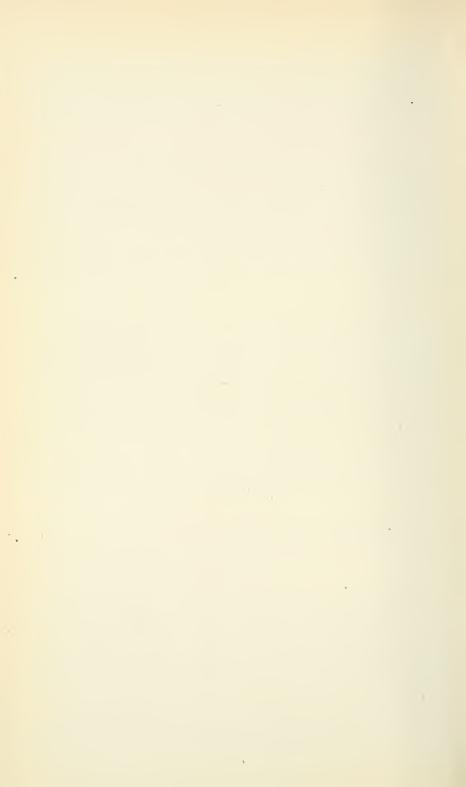

My Dear Sir: Allow me to thank you, on behalf of the Illinois State Board of Health, for your agency in securing the reception and care of the small-pox patients of East St. Louis in your own small-pox hospital. Such action is something more than a mere exhibition of inter-civic comity. It is also a sound preventive measure in the interests of St. Louis, of which city East St. Louis is practically a suburb, for purposes of sanitary administration in dealing with such a disease as small-pox.

The arrangement, so ably advocated in your letter of the 20th inst., to his Honor, Mayor, Ewing, and sanctioned by him in his communication of the 20th inst., will go far toward enabling the municipal and health authorities of East St. Louis to arrest the further progress of the disease in their midst, and so to lessen a threatened danger to a large area of neighboring territory on both sides of the Mississippi. Small-pox is no respecter of State boundaries, and the interests of Missouri and Illinois are largely mutual in regard to measures for its suppression.

Again thanking you, and with best wishes for the coming year, I am,

ng year, 1 am, Very truly yours, John H. Rauch, M. D., Secretary.

Hon, Charles W. Francis, Health Commissioner, St. Louis, Mo.

# MEDICAL COLLEGES.

#### MEDICAL COLLEGES IN GOOD STANDING.

MINIMUM REQUIREMENTS OF THE ILLINOIS STATE BOARD OF HEALTH FOR THE RECOGNITION OF DIPLOMAS AFTER THE SESSION OF 1882-3.

AT a meeting of the STATE BOARD OF HEALTH, held in Springfield, June 25, 1880, the following preamble and resolution were adopted:

Whereas, It is the legal duty of this Board to issue certificates to persons presenting diplomas from medical colleges in good standing; and

WHEREAS. It becomes the duty of the BOARD to determine as to the good standing of such colleges; and

WHEREAS, Complaints are frequently made to this BOARD as to the practice and standing of certain colleges; therefore,

Resolved. That a committee of the Board be appointed to report at the next quarterly meeting the requirements and characteristics which shall, in the judgment of the Board, constitute good standing in a medical college, and also the conditions under which this Board will receive and hear complaints against the standing of any medical school or college.

The committee, appointed in accordance with the foregoing, subsequently submitted the following report, which was adopted, and the Minimum Requirements for a Medical College to be held in "Good Standing," as set forth herein (vide pp. 40-41,) become the rule of the Board in the recognition of diplomas issued after the session of 1882-3.

Report of a Committee of the Illinois State Board of Health on the "Good Standing" of Medical Colleges.

Your committee, appointed to report requirements of "good standing" for medical colleges, respectfully submits that the committee addressed to many leading members of the medical profession, and to the medical colleges of the Union, a circular making the following

#### INQUIRIES.

- I. In the present state of medical science and education in this country, what preparation is and ought to be required for admission to the lectures of a medical college, to entitle it to "good standing?"
- II. On what branches of medical and cognate science ought courses of lectures to be provided, and what length of course in each to entitle the college to "good standing?"
- III. What requirements as to full attendance, reading and quizzes, or other examinations, occasional or final, ought to be maintained in such colleges?
- IV. What attendance on lectures, as to time, number of terms or courses, and intervals between courses, are and ought to be required by such colleges as conditions of graduation?
- V. What other conditions of graduation, such as hospital practice, or practice under preceptors, attendance on clinics, and dissections, are and ought to be required for graduation?

To this circular eighty-seven replies were received from officials of medical colleges and medical societies, and from eminent physicians.

The medical colleges also promptly sent their annual announcements or circulars, and many other documents were furnished the

committee touching the matters involved in the questions.

The letters, which are herewith presented to the Board, express much interest in the subject under discussion, and evince deep and general desire for improvement in medical education in this country. It is evident that the members of the medical profession are ready to welcome and sustain all wise efforts to advance the standards and increase the thoroughness of medical instruction. The committee regrets that the proper limits of its report will not permit it to quote at length from the letters received.

The annexed tabular statement, drawn from their annual announcements, will show the present usages of the medical colleges in the several respects involved in the inquiries.* The letters accompanying the announcements often express a desire and purpose to introduce reforms as soon as the concurrence of other colleges will permit. This is especially true in regard to the preparatory studies to be required of candidates for admission to the lecture The failure to acquire adequate preparation before entering upon professional studies is doubtless one of the most serious and even fatal defects in American medical education. As students usually begin their studies with private preceptors, the remedy lies first with those who consent to act as such preceptors. Let them strenuously advise all candidates to make a liberal and thorough scholastic preparation, and refuse to receive any who are destitute of such preparation, and the reform would be well begun. But the failure of private preceptors to perform this obvious duty cannot exonerate medical colleges from the responsibilities which, by The committee is glad to implication, they voluntarily assume. report that so many of the leading medical colleges have announced preliminary examinations as conditions of admission, in accordance with the vote of the American Medical College Association, as to justify including such examinations in the requirements or marks of "good standing."

After a careful comparison of the usages of the colleges, and of the opinions of the profession, the committee offers the following scheme of requirements, and recommends its formal adoption as defining the colleges whose diplomas shall be hereafter accepted by

the Board:

### MINIMUM REQUIREMENTS FOR A MEDICAL COLLEGE TO BE HELD IN "GOOD STANDING."

#### I. CONDITIONS OF ADMISSION TO LECTURE COURSES.

- 1. Credible certificates of good moral standing.
- 2. Diploma of graduation from a good literary and scientific college, or high school. Or, lacking this,
- 3. A thorough examination in the branches of a good English education, including mathematics, English composition, and elementary physics or natural philosophy. This provision will not be required before the close of the lecture sessions of 1882-3.
- II. BRANCHES OF MEDICAL SCIENCE TO BE INCLUDED IN THE COURSES OF INSTRUCTION.
- 1, Anatomy. 2, Physiology. 3, Chemistry. 4, Materia Medica and Therapeutics. 5, Theory and Practice of Medicine. 6, Pathology. 7, Surgery. 8, Obstetrics and Gynecology. 9, Hygiene. 10, Medical Jurisprudence.

^{*}See "insert," pp. 46-47, Third Annual Report. Also cf. Directory of Medical Colleges, appended hereto.

#### III. LENGTH OF REGULAR OR GRADUATING COURSES.

- 1. The time occupied in the regular courses or sessions from which students are graduated shall not be less than five months, or twenty weeks each.
- 2. Two full courses of lectures, not within one and the same year of time, shall be required for graduation with the degree of Doctor of Medicine.

#### IV. ATTENDANCE AND EXAMINATIONS OR QUIZZES.

- 1. Regular attendance during the entire lecture courses shall be required, allowance being made only for absences occasioned by the student's sickness, such absences not to exceed twenty per centum of the course.
- 2. Regular examinations or quizzes to be made by each lecturer or professor daily, or at least twice each week.
- 3. Final examinations on all branches, to be conducted, when practicable, by other competent examiners than the professors in each branch.

#### V. DISSECTIONS, CLINICS AND HOSPITAL ATTENDANCE.

- 1. Each student shall have dissected during two courses.
- 2. Attendance during at least two terms of clinical and hespital instruction shall be required.

#### VI, TIME OF PROFESSIONAL STUDIES

before graduation shall not be less than three full years, including the time spent with a preceptor, attendance upon lectures, or at clinics and hospital.

#### VII, INSTRUCTION,

The college must show that it has a sufficient and competent corps of instructors, and the necessary facilities for teaching, dissections, clinics, etc.

#### REMARKS ON REQUIREMENTS.

It is a matter of regret that the Board is not at liberty to adopt the practice of the best and most advanced institutions as its standard. It can only express its desire to see improvements made as rapidly as the conditions of the colleges and the public sentiment will permit.

The addition of Latin, botany and some other branches to the preliminary examinations, ought to be made as early as is practicable.

The committee also would be glad to see other important specialties of medical science and art added to the courses of required education.

#### CLOSING REMARKS.

While submitting the above as the committee's conclusions, it cannot refuse to express its concurrence in the general desire, held by many members of the medical profession, for an early and large advance in the standards and courses of medical education in this country. Among the improvements most frequently suggested, and evidently of high importance, the committee notes the following:

#### IMPROVEMENTS.

I. The requirement of adequate preparatory studies for admission to the lecture courses of the medical colleges.

It is too true that at present many students are admitted to these lecture courses whose illiteracy prohibits their profiting by the instruction given, excepting in the narrowest limits, and precludes the possibility of their attaining such knowledge as the duties of their profession positively demand.

It would be well for the profession, and for the people, if none were accepted as students of medicine who had not graduated from a reputable college, or at least from a good high school.

Natural talent and aptitude may go far toward fitting a man for any calling, but no talent can take the place of thorough education and training in a profession where such large fields of knowledge are to be mastered, and so many and such important judgments are to be constantly and promptly formed.

Such a familiar knowledge of good English, and of professional language, as will enable the student to comprehend promptly and precisely the lectures to which he listens, seems too obvious a requirement to need argument, and such a knowledge cannot be gained but by years of study, or extensive reading.

But it is not enough that the medical student shall merely comprehend what he hears. He should be able to weigh and judge for himself the importance of the facts, and the value of the theories which are offered.

It is doubtful whether any examination of qualifications such as can be made at the crowded opening of a session, can be relied upon to assure the requisite preparation for admission. The diploma of a high school, or better still, of a college, would be a far safer evidence of the candidate's fitness.

II. The committee heartily concurs with the American Medical College Association, in its statement, that "an adequate medical education is such as gives to the student a fair practical knowledge of all the branches of medical science, and a mental discipline sufficient for the proper use of such knowledge in the practice of medical art. A practical knowledge of these various branches necessitates demonstrative teaching and personal manipulation which can not be provided in an adequate degree in medical colleges only."

Your committee would add to this obvious statement that the study of theories can produce nothing but theoretical knowledge. Abstract study may discipline the mind, but skill in any art or profession can be gained only by an actual performance of the duties of that profession.

The laboratory, the dissecting room, the clinic, and the hospital practice know no substitutes. The student who does not gain skill here must win it at the bedside of his patients, and often at fearful cost.

III. The committee also concurs in the claim of the American Medical College Association that "not less than three years should be devoted to a diligent study of medicine, before graduating or commencement of practice, and that at least one-half of these years be spent in a proper medical college." It should be added that a strict and regular attendance upon all the lectures should be re-

quired, and that the time professionally spent under a preceptor should be given honestly to close and earnest study. Whoever will carefully consider the scope of the several branches of science to be mastered by the student of medicine, will easily conclude that three full years will afford but scanty time for the work to be done.

IV. Nearly all medical colleges require evidence of good moral character in their candidates. The committee is of the opinion that no requirement should be more rigidly enforced. To let loose upon the community, and into the midst of its confiding families, under the sacred name of "physician," persons of vicious habits, and of immoral principles, is to send destruction where we would send healing. None but the purest and most upright should be trusted with the prerogative and opportunity of the family physician.

In thus advancing the standard of requirements, which shall entitle diplomas to recognition in this State, the BOARD is not merely discharging an obligation devolved upon it by the Act to regulate the Practice of Medicine; but by fostering a well-trained and thoroughly educated medical profession, it is also securing a most potential force in sanitary science and public hygiene, through which it may the more efficiently exercise that "supervision of the interests of the health and life of the citizens of the State" with which it is charged by the constituting act.

The foregoing report, unanimously adopted in 1880, is reaffirmed by the Board in its present composition:

John M. Gregory, LL. D., President.

John McLean, M.D.
Newton Bateman, LL. D.
R. Ludlam, M.D.
A. L. Clark, M.D.
W. A. Haskell, M.D.
John H. Rauch, M.D.

Secretary.

December, 1881.

#### DIRECTORY

OF THE

Institutions Granting Medical Diplomas or Licenses in the United States and Canada.

This Directory embraces a list of the institutions described in the caption from the year 1765 up to the present date. The details of information concerning requirements, course of instruction, faculty, fees, matriculates and graduates of existing colleges, have been compiled from the published announcements last received and from other available sources.

Colleges are arranged by States in the chronological order of

their organization.

Emeritus professors are not included in the faculties here given.

but only those actually filling chairs of instruction.

All recognized colleges require that candidates for graduation attend their last course of lectures at the institution conferring the

The number of students is that given in the announcement last

received.

The time of study required by colleges of the regular school of practice must be spent with regular and reputable practitioners as

Of the 175 institutions here listed 119 are still in existence, including two new colleges in this State—one at Chicago, and one at Quincy. Diplomas from 123 of them have been presented to the Board, of which number 99 have been recognized as "legallychartered medical institutions in good standing"; five are accepted conditionally; and the following eighteen are rejected:

#### DIRECTORY.

#### ALABAMA.

MEDICAL COLLEGE OF ALABAMA, MOBILE.

[Diplomas have not been presented to the Illinois State Board of Health.] Organized 1859. Closed during the war, re-opened 1867.—Faculty embraces nine chairs, lectures on pharmacy and demonstrator of anatomy.

One annual session for students.

Course of Instruction: Two annual lecture terms of twenty weeks each.—Graded course of three years recommended but not required. Studies embrace anatomy physiology, chemistry, materia medica and general therapeutics, theory and practice of medicine, surgery, obstetrics and diseases of women and children, physical diagnosis and diseases of the chest, ophthalmology and otology, histology and microscopic examination of urine, hospital and out-door clinics, practical anatomy one course.—Weekly quizzes on anatomy and chemistry.

REQUIREMENTS: For admission, none.—For graduation: (1) age; twenty-one years, (2) good moral character, (3) three years study, (4) attendance on two full courses of lectures, (5) pass before the members of the faculty a satisfactory examination, (6) a thesis on some medical subject.

FEES: Matriculation. \$5.00. Lectures, including hospital, \$75.00. Dissecting, \$10.00. Graduation, \$25.00.

STUDENTS: Matriculates, -; graduates, 21.

Graduates in Illinois, 0,

MEDICAL DEPARTMENT SOUTHERN UNIVERSITY, GREENSBORO.

[Diplomas have not been presented to the Illinois State Board of Health.] Organized 1872. Extinct. Last session, 1880.

#### ARKANSAS.

MEDICAL DEPARTMENT, ARKANSAS INDUSTRIAL UNIVERSITY, LITTLE ROCK,

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1879.—Faculty embraces fourteen chairs, lecturer on meteorology, and demonstrator of anatomy. One annual session for students.

Course of Instruction: Two annual lecture terms of twenty weeks each. Graded course recommended, but not required.—Studies embrace practice of medicine, institutes and practice of surgery, obstetries and diseases of women and children, general, descriptive and surgical anatomy, materia medica, therapeutics, hygiene, botany, institutes of medicine, clinical surgery, dermatology, medical chemistry, toxicology, ophthalmology, otology, genito-urinary diseases, physical diagnosis, oral surgery, hospital and dispensive diseases. sary clinics.

REQUIREMENTS: For admission, none.—For graduation: (1) age, twenty-one years; (2) good moral character; (3) three years; study; (4) attendance on two full courses of lectures; (5) satisfactory examination; (6) thesis on some medical subject, or report of clinic.

FEES: Matriculation (paid once only,) \$5.00. Annual fee, \$50.00. Demonstrator, \$5.00. Hospital, \$5.00. Graduation, \$25.00.

STUDENTS: Matriculates, 36; graduates, 5. Percentage of graduates to students, 14 Graduates in Illinois, 0.

#### CALIFORNIA.

MEDICAL COLLEGE OF THE PACIFIC (Medical Department, University City College), SAN FRANCISCO. Formerly Medical Department, University of Pacific,

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1858. Transferred to its present connection, 1870.—Faculty embraces eleven chairs, lecturer on, and demonstrator of anatomy. One intermediate (recitation) course, and one regular (graduating) course, annually.

Course of Instruction: Graded, comprising three regular courses of lectures of twenty weeks each.—First year: The student directs his attention mainly to descriptive anatomy with dissections, physiology, chemistry, microscopy and histology and surgery, upon which subjects an examination is held at the close of the course.—Second year: To the studies above enumerated will be added materia medica and therapeutics, theory and practice of medicine, obstetrics and gynecology, ophthalmology, otology and pathology, with clinics on various branches.—At the close of this year final examinations are had in descriptive anatomy, physiology and chemistry.—Third year: Surgical anatomy, surgery, materia medica and therapeutics, theory and practice of medicine, obstetrics, gynecology, ophthalmology, otology, microscopy and histology and pathology. Clinics.—Final examination on all subjects in the third year.—Examination both oral and written.

REQUIREMENTS: For admission, evidence of at least a fair English education.—For graduation: (1) good moral character; (2) twenty-one years of age; (3) three regular courses of lectures; (4) two courses of clinical instruction; (5) one course of practical anatomy, dissecting the entire subject; (6) satisfactory thesis; (7) successful passing of all examinations.

FEES: Matriculation, \$5; lectures (three courses), \$260; demonstrator, \$10; graduation \$40.

STUDENTS: Matriculates, ---; graduates, 9.

Graduates in Illinois, 1,

University of California Medical College (Toland Medical College), San Francisco

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1864. Became connected with the University of California in 1872.—Faculty embraces twelve professors, a lecturer on obstetrics, and a demonstrator of anatomy. One regular term of twenty weeks' duration and one preliminary reading term of twelve weeks' duration, annually.

Course of Instruction: Graded, extending over three years. Students are expected to attend clinics regularly. Examinations are held daily and at the beginning of each session to determine the progress of the student, his advancement depending on the result of such examination. These examinations are not final, as the examination for graduation includes all the subjects of the three years' course.—Studies: First year.—Descriptive unatomy, general chemistry, physiology and materia medica. Second year.—Theory and practice of medicine, theory and practice of surgery, principles of obstetrics, general and surgical anatomy, medical and physiological chemistry, physiology of the nervous system and reproduction, therapeutics, and pathology. Third year.—Clinical medicine, clinical surgery, obstetrics, diseases of women, diseases of children, diseases of eye and ear, medical jurisprudence, hygiene, and mental diseases.

Requirements: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three full years' study; (4) three regular courses of lectures; (5) successful passage on all subjects by written and oral examination; (6) practical anatomy dur ng two sessions; (7) thesis.

FEES: Matriculation, \$5; demonstrator, \$10; first and second course of lectures, \$130 each; third course, free; graduation, \$40.

STUDENTS: Matriculates, 61; graduates, 16; per cent. of graduates to matriculates, 26.

REMARKS: Students who have attended one course of lectures at another medical college are required to pass an examination on the branches of the first year before being admitted as students of the second course. A similar requirement is made of students having attended two courses elsewhere before admittance to the third course.

#### CALIFORNIA MEDICAL COLLEGE (Eclectic), OAKLAND,

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1879.—Faculty embraces ten professors, one adjunct professor, and a demonstrator.

Course of Instruction: One intermediate of twelve weeks' duration, and one regular course of twenty-four weeks' duration. Clinics at hospital and dispensary. Three years' graded course recommended but not required.—Lectures embrace principles and practice of medicine, obstetries, surgery, anatomy, surgical anatomy, physiology, materia medica, chemistry, clinical and operative surgery, clinical medicine, therapeutics, pathology, gynecology, medicat jurisprudence, clinical midwifery, diseases of children, clinical diseases of children, mental diseases and hygiene, ophthalmology, otology, clinical diseases of the eye and ear, toxicology, physical diagnosis, laryngoscopy, diseases of the heart and lungs, and nervous diseases.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) "such education as shall give him proper standing with the public and profession;" (4) three regular courses or two intermediate and two regular courses; (5) practical anatomy at least two sessions; (6) "satisfactory examination upon the essential points in the general practice of medicine;" (7) thesis.

FEES: Matriculation, \$5; lectures, \$120; demonstrator, \$10; graduation, \$30. STUDENTS: Matriculates, -; graduates, 10. Graduates in Illinois, none,

# CANADA.

# MEDICAL DEPARTMENT OF MCGILL UNIVERSITY, MONTREAL.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1832.-Faculty embraces thirteen professors, lecturer on ophthalmology and otology, and demonstrator of anatomy.

Course of Instruction: One annual session of twenty-four weeks' duration, compulsory, and one summer course, optional, annually.—The complete course of study extends over four sessions of graded instruction with weekly quizzes.—At the end of the first year sessional examinations must be passed on anatomy, physiology, chemistry, materia medica, botany, practical anatomy.—At the end of the second; year pass examinations on anatomy, practical anatomy, physiology, chemistry, practical chemistry, materia medica.—Third year, sessional examinations on medical jurisprudence with toxicology, hygiene, medicine, surgery, midwifery, clinical medicine, surgery, midwifery, clinical medicine, clinical surgery, medical anatomy, surgical anatomy, Requirements: For admission, (a) preliminary examination by the Provincial Boards;

(b) college diploma, or (c) the University matriculation examination, as follows: (1) English language, including composition; (2) English history; (3) modern geography; (4) Latin, including translation; (5) elements of arithmetic, algebra, and geometry; (6) elementary physics; (7) Greek, or any modern language.—For graduation, (1) study of medicine for four years; (2) attendance on at least three six-months' sessions; (3) certificate of attendance on all branches taught; (4) eighteen months' hospital attendance; (5) attendance for the properties of the properties six months at lying in hospital, and at least six eases of accouchement; (6) twenty-one years of age; (7) good moral character.

FEES: For four years, collegiate and hospital, \$375; matriculation, \$5.

STUDENTS: Matriculates, 167; graduates, 38; per cent. of graduates to matriculates, 23. Graduates in Illinois, 15.

REMARKS: "McGill University is considered one of the best medical schools in America." -Hardwicke.

- I. TORONTO SCHOOL OF MEDICINE, TORONTO,—(Also Med, Dep. Univ. of Toronto,)
- II. ECOLE DE MEDECINE ET DE CHIRURGIE, MONTREAL.

(Medical Departments of Victoria College, Cobourg.)

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1843.—Faculty embraces ten professors in each school, and adjuncts on chemistry, botany, zoology, anatomy, and microscopy.—One session of twenty-four weeks annually.

Course of Instruction: Course, graded, extending over four years; but graduates in arts may receive the degree after three years' study. The requirements for graduation explain the branches taught.

REQUIREMENTS: For admission, (a) college diploma, or (b) certificate of having passed provincial examination, or (c) matriculation examination on (l) English grammar and composition; (2) arithmetic; (3) algebra; (4) geometry; (5) Latin, with translation and grammar; (6) Greek, physics or modern language.—For graduation, (l) attendance and examination on lectures, as follows:—Two courses of descriptive anatomy, practical anatomy, physiology, theoretical chemistry, materia medica and therapeutics, principles and practice of surgery, principles and practice of medicine, midwifery and diseases of women and children, clinical medicine, clinical surgery; one course of medical jurisprudence, practical chemistry and botany; (2) four years' study, six months in practitioner's office, (3) eighteen months' general hospital practice; (4) six cases of midwifery; (5) twenty-one years of age. one years of age.

FEES: Toronto School of Medicine \$143; Ecole de Médecine et de Chirúrgie, \$144; graduation, \$20.

STUDENTS: At Toronto, 33; graduates, —. At Mograduates to students, 5.—Graduates in Illinois, 14. At Montreal, 111; graduates, 6. Per cent. of

# TRINITY MEDICAL SCHOOL, TORONTO.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1850.—Faculty embraces nine professors, lecturers on practical chemistry, ophthamology, otology and laryngology, and demonstrator of anatomy.

Course of Instruction: One annual session of twenty-four weeks.—At the close of the first year examinations must be passed on anatomy, physiology, chemistry and physics; second year, anatomy, physiology, microscopy, chemistry, botany, materia medica and toxicology; third year, descriptive and surgical anatomy, therapeutics, principles of medicine and surgery; fourth year, theory and practice of medicine, medical pathology, principles and practice; of surgery, midwifery and diseases of women and children, medical jurisprudence and sanitary science.

REQUIREMENTS: For admission, (a) matriculation examination on (1) English language, grammar and composition, (2) mathematics, (3) Latin translation and grammar, (4) Greek, modern language or physics; or (b) college diploma; or (c) certificates of having passed the matriculation of Provincial Boards for the degree of M. D.—For graduation: (1) four and one half years of study, (2) at least three courses of lectures of twenty-four weeks' duration; (3) twenty-one years of age; (4) good moral character, (5) six months' practice at lying-in-hospital and six cases of labor, (6) satisfactory examination on all required branches, (7) satisfactory thesis,

FEES: Lectures, \$153; full fee, including examinations, for graduation, \$24.

STUDENTS: Matriculates, -. Graduates in Illinois, none,

REMARKS: This school simply gives instruction. Its students receive diplomas from Trinity College, University of Toronto, University of Halifax, and College of Physicians and Surgeons of Ontario. The requirement of these bodies differ somewhat, but those given above are believed to fairly represent them all.

# MEDICAL DEPARTMENTS OF LAVAL UNIVERSITY, QUEBEC AND MONTREAL.

[Diplomas recognized by the Illinois State Board of Health.]

Organized, 1852.—Faculty embraces twenty-six chairs, thirteen in each school.

Course of Instruction: One annual session for students; course extends over four years, graded; twenty-four weeks annually.

Lectures: Are divided into two sections, primary and final. Primary—descriptive anatomy 240 lectures, practical anatomy 180 lectures, of two hours each, microscopical anatomy and histology 180 lectures, physiology 150 lectures, general pathology 80 lectures, hygiene 60 lectures, chemistry 240 lectures, botany 60 lectures; examinations at the end of this course. Final section includes materia medica and general therapeutics 240 lectures, surgical pathology and theoretical surgery 240 lectures, medical pathology and special therapeutics 240 lectures, toxicology 240 lectures, medical jurisprudence 60 lectures, toxicology 60 lectures, diseases of the eye and ear 60 lectures, practical operative surgery, 40 lectures, clinical surgery 180 lectures, clinical medicine 180 lectures, clinical studies of the diseases of the eye and ear 60 lectures, clinical midwifery not less than six cases, clinical study of diseases of women and children; examinations at the end of this course.

REQUIRENERTS: For admission, none stated, although probably examination on higher branches in common with other Canadian schools.—For graduation: (1) examination on primary and final sections, which, to obtain the degree of M. D., must be excellent ("bien"), co very excellent ("bres bien"); (2) certificates of having undergone all the prescribed studies; (3) good moral character; (4) twenty-one years of age.

FEES: Annual fee, \$20; diploma, \$20.

STUDENTS: Matriculates 103, graduates 12; per cent. of graduates to students, 10; graduates in Illinois, 3.

REMARKS: The small percentage of graduates to students is worthy of note.

#### ROYAL COLLEGE OF PHYSICIANS AND SURGEONS, KINGSTON.

Medical Department of Queen's University.

[Diplomas recognized by the Illinois State Board of Health.]

Organized, 1858.—Faculty embraces ten professors and two demonstrators of anatomy.

Course of Instruction: One course of lectures, annually, of twenty-four weeks' duration. The course is graded, and extends over three or four years, and includes principles and practice of surgery, theory and practice of medicine, obstetrics and diseases of women and children, physiology, anatomy, chemistry, materia medica, therapeutics and pharmacy, two full courses; microscopic anatomy twenty-five lectures, clinical surgery, clinical medicine, medical jurisprudence, one-half course; sanitary science, practical chemistry, botany, three months' course; hospital, eighteen months.

REQUIREMENTS: For admission, (a) college diploma, or (b) evidence of having passed the Provincial Board's matriculation examination, or (c) matriculation examination on (l) English language, including grammar and composition, arithmetic, algebra, geometry,

49 Α

Latin, Greek, French, German or physics.—For graduation: (1) twenty-one years of age, (2) good moral character, (3) thesis. (4) successful passing of all examinations, (5) certificate of having attended not fewer than six cases of midwifery.

FEES: Lectures, \$114; diplomas, \$30.

STUDENTS: Matriculates, 68; graduates, 15; per cent. of graduates to students, 22. Graduates in Illinois, 2.

Halifax Medical College (University of Halifax, Medical Department,) Halifax, N. S.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1867 as Medical Department of Dalhousie College; attained its present relation in 1876.—Faculty embraces eight professors, one adjunct professor, seven lecturers and instructors, and two demonstrators of anatomy.

Course of Instruction: Three years' graded course required, four years' course recommended; daily examinations by the professors; a roll of students attending each class is called from time to time.—Lectures embrace principles and practice of medicine, clinical medicine, obstetrics, gynecology, principles and practice of surgery, clinical surgery, physiology, anatomy, medical jurisprudence, dermatology, botany, diseases of children, practical chemistry, materia medica, therapeutics, microscopy, pharmacy.

ehildren, practical chemistry, materia medica, therapeuties, microscopy, pharmacy.

REQUIREMENTS: For admission: (a) diploma of recognized university in arts: or, (b) matriculation examination on the following compulsory subjects:

English Language—including grammar, composition and writing from dictation. Arithmetic—including vulgar and decimal fractions, and the extraction of the square root. Algebra—to the end of simple equations. Geometry—first three books of Euclid. Latin—one book, translation and grammar. Elementary Mechanics of Solids and Fluids, and one of the following optional subjects, viz: history of England, with questions in modern geography. French translation. German translation. One Greek book. History of Nova Scotia. History of the Dominion of Canada.—For graduation: (1) four years' study; (2) three full courses of lectures, (3) one three-months' course in practical pharmacy, and chemistry, and botany, and medical jurisprudence; (4) two six-months' courses in other branches; (5) twelve months' attendance at a hospital; (6) three months' practice in dispensing drugs; (7) at least six cases of accouchement; (8) a certificate from a registered medical practitioner, of "proficiency in the practice of vaccination," one course of practical anatomy; (10) thesis; (11) twenty-one years of age; (12) a general written and oral examination on all the branches of medical and surgical science; (13) a clinical examination in medicine and surgery conducted at the bedside, cases being submitted for diagnosis and treatment in the wards of the hospital. In estimating the standing of candidates and the number of marks to be awarded, professors shall take into account the regularity of their attendance, and the diligence and care they have evinced in reporting cases. evinced in reporting cases.

FEES: Lectures, about \$100; practical anatomy, \$8; graduation, \$21.

STUDENTS: Matriculates, 38; graduates, 1; per cent. of graduates to matriculates, 2.6. Graduates in Illinois, none.

BISHOP'S COLLEGE UNIVERSITY, FACULTY OF MEDICINE, MONTREAL,

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1871.—Faculty embraces ten professors, two lecturers, and a demonstrator of anatomy and assistant.

COURSE OF INSTRUCTION: One regular course of twenty-four weeks' duration annually, and preliminary course of four weeks' duration; course graded and extending over three and four years; longer course recommended but not required; daily examinations and calling of the roll,

Lectures embrace, first session, botany, anatomy, physiology, materia medica, obstetries, surgery, dissections, hospital practice. Second session, anatomy, physiology, themistry, materia medica, medicine, gynecology, ophthalmology, otology, hygiene, practical chemistry, practical histology, dissections, hospital practice, clinical lectures. Third session, medicine, surgery, pathology, obstetrics, medical jurisprudence, hospital practice and clinical lectures.

Practice and clinical lectures.

REQUIREMENTS: For admission, (a) college diploma; or (b) Provincial Board's matriculation examination, or (c) matriculation examination on the following subjects: Compulsory: English, French, Latin, arithmetic, algebra, geometry, history, geography, belles-lettres. Optional: Greek, natural and moral philosophy.—For graduation: (l) twenty-one years of age; (2) lour years' study; (3) two six-months' courses of practical anatomy; (4) two six-months' courses of lectures on each of the following departments of medical science—general or descriptive anatomy, principles and practice of surgery, theory and practice of medicine, midwifery and the diseases of women and children, chemistry, materia medica and general therapeutics, and the institutes of medicine, or physiology and general pathology; one six-months' course or two three-months' courses of medical jurisprudence, one six-months' course of pathology, one three-months' course each of botany, of hygiene and of practical chemistry and also a course of not less than twenty-five demonstrations upon microscopic anatomy, physiology and pathology; (5) attended for at least eighteen months, or three periods of six months each, the medical and surgical practice of a hospital in which are contained not less than fifty beds under the charge of not less than two physicians and surgeous, and been engaged for at least six months in compounding medicines at a hospital, a dispensary, or with a duly licensed——6

-6

practitioner; attended at least six cases of midwifery, either in a lying-in-hospital, or in private practice under the supervision of a regular medical practitioner; (6) not less than two six-months' courses of clinical medicine and clinical surgery; (7) satisfactory examination on all branches.

FEES: Matriculation. \$2; lectures, including elinical lectures, \$136; chemistry, \$12; anatomy, \$6; histology, \$16; hospital, \$12; graduation and registration, \$21,

STUDENTS: Matriculates, 55; graduates. 6; per cent. of graduates to matriculates, 11. Graduates in Illinois, none.

#### COLORADO.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF DENVER, DENVER.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized, 1881.—Faculty embraces thirteen professors, lecturers on medical jurisprudence, and ophthalmology, and demonstrator of anatomy.

Course of Instruction: Extends over two courses of twenty-four weeks each; graded course recommended, but not required. Lectures embrace principles and practice of surgery and clinical surgery, surgical pathology, principles and practice of medicine and clinical medicine, diseases of women, obstetrics, diseases of chest and climatology, physiology, anatomy, genito-urinary diseases, materia medica and therapeutics, chemistry, diseases of the mind and nervous system, medical jurisprudence, ophthalmology, practical chemistry, microscopy, and anatomy.

REQUIREMENTS: For admission,(a) high school or college diploma, or (b) certificate of proficiency from a reputable teacher. or (c) matriculation examination in English composition, writing, grammar, arithmetic, natural philosphy, rudiments of Latin. For graduation, (l) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two full courses of lectures; (5) practical anatomy and chemistry for two sessions; (6) thesis; (7) satisfactory examination on seven different branches.

FEES: Annual, \$85; graduation, \$30.

STUDENTS: Matriculates, 15; graduates, 5; per cent. of graduates to students, 63. Graduates in Illinois, none.

#### CONNECTICUT.

MEDICAL DEPARTMENT OF YALE COLLEGE, NEW HAVEN,

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1813.—Faculty embraces eight professors, and lecturers on nervous diseases, insanity, diseases of the throat, gynecology, surgery, and foods and poisons, and demonstrators of anatomy and osteology.

The system of instruction is arranged in a graded course extending over three years, thirty-four weeks in each year.—Lectures embraced in the first course: general and medical chemistry, qualitative analysis and toxicology, anatomy, dissections, histology, materia medica, and therapeutics. Second year: Anatomy, dissection, physiology, pathology, materia medica, therapeutics, theory and practice of medicine, clinical medicine, obstetrics, surgery, clinical surgery. Third year: Pathology, theory and practice of medicine, physical diagnosis, clinical medicine, clinical surgery, obstetrics, diseases of children, diseases of women, ophthalmology, medical jurisprudence, insanity, diseases of the throat, dietetics and toxicology. Students who have studied elsewhere, either in any recognized medical school or under private preceptor of good standing, may enter an advanced class, upon passing the examinations required of equal grade.

REQUIREMENTS: For admission, (a) a degree in letters or science; or, (b) passage of examination for admission to some college; or (c) examination in (1) mathematics, including algebra, geometry, and metric system of weights and measures; (2) Latin; (3) physics. Students not fully prepared will be admitted on condition that the deficiency be made up within a reasonable time.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) pass the required examinations in all the studies of the three years' course satisfactory to the Board of Examiners.

FEES: Matriculation (paid once only), \$5; tuition, annual, \$200; for third year, \$100; graduation, \$30.

STUDENTS: Matriculates, -Graduates in Illinois, 6.

REMARKS: The Board of Examiners consists of the faculty and an equal number of the members of the Connecticut State Medical Society.

### DISTRICT OF COLUMBIA.

NATIONAL MEDICAL COLLEGE OF COLUMBIA UNIVERSITY, WASHINGTON.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1825. Operations suspended from 1834 to 1838 and for two years (1862-63) during the war.—Faculty embraces six professors, lecturer on anatomy, demonstrator of physiology and histology, demonstrator of chemistry, and demonstrator of anatomy.

Course of Instruction: One graduating course of twenty weeks' duration and a spring course each year. "The plan of instruction comprises a complete course of scholastic lectures on the essential branches of medicine. Lectures embracing anatomy, physiology, materia medica, chemistry, surgery, obstetries, and theory and practice of medicine, with ample opportunities for bed-side instruction. The spring course comprehends lectures and practical instruction on diseases of the genito-urinary organs, eye and ear, turoat and larynx, physical diagnosis, histology, toxicology, and chemical analysis."

REQUIREMENTS: For admission, none.—For graduation: (1) "candidates must have attended three courses of lectures" and have passed examinations at the end of the second and third years: (2) three years' study; (3) good moral character; (4) twenty-one years of age; (5) dissected at least two sessions; (6) have attended two courses of clinical instruction. Examinations are both oral and written.

FEES: Matriculation (paid once only), \$5; lectures, \$100; demonstrator, \$10; graduating, \$10.

STUDENTS: Matriculates, 44; graduates, 5; percentage of graduates to matriculates, 11. Graduates in Illinois, 8.

# MEDICAL DEPARTMENT OF THE UNIVERSITY OF GEORGETOWN, WASHINGTON,

[Diplomas recognized by the Illinois Stale Board of Health.]

Organized 1850.—The faculty embraces six professors and a lecturer on chemistry, clinical lecturers on ophthalmology, otology, laryngology, venereal diseases, diseases of children, and a demonstrator of anatomy.

Course of Instruction; One annual course of thirty weeks' duration, graded course extending over three years.—Lectures embrace, first year, anatomy, physiology, materia medica, and chemistry; second year, anatomy, physiology, materia medica, chemistry, pathology and diagnosis—medical, surgical and obstetrical, ophthalmology, laryngology, otology, diseases of children, hygiene and medical jurisprudence; third year same as second. Examination at the close of each year. Daily quizzes by the faculty, Hospital and dispensary clinics.

REQUIREMENTS: For admission, none.—For graduation: (1) good moral character; (2) twenty-one years of age; (3) not less than three years' study; (4) three full courses of instruction; (5) two courses of practical anatomy, (6) two courses of clinical instruction, (7) pass all examinations with required (65) percentage.

FEES: Matriculation, (paid but once.) \$5; full course of lectures \$100; demonstrator, \$10. STUDENTS: Matriculates, 30; graduates, 7; per cent. of graduates to matriculates, 23. Graduates in Illinois, 12.

REMARKS: Attendance on recitations is obligatory, a record is kept and each student credited at the end of each course.

#### MEDICAL DEPARTMENT OF HOWARD UNIVERSITY, WASHINGTON.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1867. Faculty embraces eight professors and a demonstrator of anatomy.

Course of Instruction: One annual graduating course of twenty weeks' duration, and one summer course of eight weeks' duration.—The course is graded, extending over three sessions in different years.—Lectures embrace anatomy, physiology, chemistry, materia medica, therapeutics, obstetrics, hygiene, practice of medicine, surgery, diseases of women and children and medical jurisprudence. The instruction comprises lectures recitations, clinics and practical exercises.

REQUIREMENTS: For matriculation (a) good moral character; (b) preceptor's certificate; (c) pass an examination in ordinary English branches; sufficient knowledge of Latin language to read and write prescriptions and understand medical terms.—For graduation; (l) twenty-one years of age; (2) three years' study, including three courses of lectures; (3) attended clinical lectures and dissections; (4) written and oral examination on required branches; (5) thesis on original observation.

FEES: Matriculation, \$10; demonstrator. \$5: incidental expenses, \$15; graduating, \$30.

STUDENTS: Matriculates, 91; graduates, 15; per cent. of graduates to matriculates, 16. Graduates in Illinois, 1.

REMARKS: "This coilege is free to all, without regard to sex or race, who are desirous of pursuing the study of medicine and are qualified therefor by good moral character, proper age and suitable education."

#### GEORGIA.

Medical College of Georgia (Medical Department, University of Georgia,) Augusta.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1832.—No reply received to repeated requests for information. College probably extinct. Graduates in Illinois, 5.

#### THOMPSONIAN COLLEGE, BARBOURVILLE,

[Diplomas have not been presented to the Illinois State Board of Health.]

The College was organized about 1850.—No definite information concerning it has been received. Graduates in Illinois, none.

#### SOUTHERN BOTANICO-MEDICAL COLLEGE, MACON.

[Diplomas have not been presented to the Illinois State Board of Health.]
Organized 1839.—No definite information has been received concerning it.

## SAVANNAH MEDICAL COLLEGE. SAVANNAH.

[Diplomas have not been presented to the Illinois State Board of Health.]
Organized 1853.—Closed during the rebellion 1861-66. Extinct since 1880. Graduates in Illinois, none.

#### OGLETHORPE MEDICAL COLLEGE, SAVANNAH.

[Diplomas have not been presented to the Illinois Scate Board of Health.] Organized 1855, and continued sessions until the commencement of the war, 1861. College now extinct. Graduates in Illinois, none.

#### ATLANTA MEDICAL COLLEGE, ATLANTA.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1855. Closed during the rebellion, 1861-65; re-organized 1865.—Faculty embraces eight professors, lecturers on venereal diseases, and on minor surgery and a demonstrator of anatomy.

COURSE OF INSTRUCTION: One annual course of twenty weeks. Lectures embrace anatomy, physiology, chemistry, materia medica, practice, and general pathology, obstetrics and diseases of women and children, diseases of the eye and ear, and surgery. Instruction is also given on venereal diseases, diseases of the throat and minor surgery. Medical clinics are held and "quizzes are given from time to time by the professors to those who desire to enter their names on the lists."

REQUIREMENTS: For admission, none. -For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two full courses of lectures; (5) thesis or a report of any of the clinics; (6) satisfactory examination on subjects mentioned above.

FEES; Matriculation, \$5; demonstrator, \$10; full course, \$75; graduation, \$30.

STUDENTS: Matriculates, 135; graduates, 56; per cent. of graduates to matriculates, 40. Graduates in Illinois, none.

# REFORM MEDICAL COLLEGE (Eclectic), MACON.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized about 1856.—Lectures delivered until 1862, when it became extinct. Graduates in Illinois, none.

#### College of American Medicine and Surgery (Eclectic), Macon.

[Diplomas have not been presented to the Illinois State Board of Health.] Organized 1872 (?).—Terminated its labors about 1879. Graduates in Illinois, none.

## SOUTHERN MEDICAL COLLEGE, ATLANTA.

[Diplomas have not been presented to the Illinois State Board of Health.]
Organized 1879.—Faculty embraces nine professors, with two auxiliaries and lecturers on venereal diseases, dermatology and dental surgery.

Course of Instruction: One annual course of twenty weeks' duration.—Lectures embrace the principles and practice of medicine, obstetrics and diseases of women and children, physiology and hygiene, surgery, anatomy, materia medica, therapeutics, toxicology, diseases of the eye, ear and throat, chemistry, venereal diseases, dermatology, and dental surgery.—Hospital and dispensary clinics are given, and quizzes by the professors to such students as desire them.—A graded course of three years recommended, but not required.

REQUIREMENTS: For admission, none.—For graduation; (1) twenty-one years of age; (2) good moral character; (3) two full courses of lectures; (4) "must have attended the dissections;" (5) "must undergo a personal and satisfactory examination before the faculty—examination must occur at close of session, except in cases of pressing necessity, and then only by unanimous consent of the faculty;" (6) thesis, or report of clinic.

FEES: Matriculation (paid once) \$5; tickets, full course, \$75; demonstrator, \$10; diploma, \$30.

STUDENTS: Matriculates, 123; graduates, 37; per cent, of graduates to matriculates, 30. Graduates in Illinois, none.

REMARKS: The ad eundem degree was conferred at the last commencement on nine gentlemen possessing the degree of M. D., and on one non-graduate.

# ILLINOIS.

#### RUSH MEDICAL COLLEGE, CHICAGO,

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1842.—Faculty embraces fourteen professors, three adjunct professors, eleven lecturers and assistants, demonstrators of anatomy, physiology and chemistry.

Course of Instruction: "Instruction is given in this institution by lectures, clinics, practical work in the dissecting room and laboratories, and by repeated oral examinations." One regular course of twenty weeks, one spring or reading course of fourteen weeks, and one practitioners' course of four weeks, are held annually. Graded course of three years is recommended but not required.—Lectures embrace the principles and practice of medicine, obstetrics and diseases of children, surgery, diseases of the chest, eye and ear, gynecology, physiology, diseases of the nervous system, materia medica, medical jurisprudence, anatomy, chemistry, pharmacy, toxicology, dermatology, venereal diseases of children, physical diagnosis, microscopy, histology.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study. (4) two full courses of lectures; (5) clinical instruction for one term; (6) dissection of each region of the body; (7) one course in practical chemistry; (8) "full and satisfactory written or oral examination on each branch taught in the college."

FEES: Matriculation, \$5; lectures, \$75; demonstrator, \$5; chemistry, \$5; final examination, \$25.

STUDENTS: Matriculates, 583; graduates, 185; per cent. of graduates to matriculates, 32. Graduates in Illinois, 775.

REMARKS: Dental instruction is given, but diplomas (D. D. S.) are not conferred,

MEDICAL DEPARTMENT OF ILLINOIS COLLEGE, JACKSONVILLE.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1843,-Suspended lectures, 1848. Graduates in Illinois, 10.

Organized 1843.—Suspended fectures, 1848. Graduates in fillnois, 10.

Remarks: The faculty as given in the catalogues and announcements still extant, embraced six professors, three of whom resided at Jacksonville, one at Springfield, one at Alton, and one at Geneva, Kane county; and who lectured on chemistry, physical "ætiology," obstetrics, diseases of women and children, surgical and pathological anatomy, surgery, principles and practice of medicine, materia medica, therapeutics, anatomy and physiology. The course of lectures was of sixteen weeks duration. The fees were: Lectures, 80; dissection, \$5; matriculation, \$3; graduation, \$20. The requirements for graduation were, (1) thorough course of study with some practitioner, (this course, according to the last catalogue, must extend over three years.) (2) two full courses of lectures, provided, however, that several years of reputable experience in the practice of medicine may be accepted in the place of one course of lectures, (3) full and satisfactory examination in all the branches of medical study, (4) thesis, Students applying for graduation were expected to possess a competent English and classical education, Dissection was optional. During its existence instruction was given to about seventy-five students, and thirty-seven were graduated.

## MEDICAL DEPARTMENT UNIVERSITY OF ST. CHARLES.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1847.—Annual courses of lectures were delivered until 1848, when the institution was transferred to Rock Island, and subsequently, in 1850, to Keckuk, Iowa, when it became the medical department of the University of Iowa, now the Keckuk College of Physicians and Surgeons.

# ROCK ISLAND MEDICAL COLLEGE, ROCK ISLAND.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1849. Lectures were delivered during the years 1849-50. College extinct Graduates in Illinois, one.

Chicago Medical College (Medical Department, Northwestern University,) Chicago.
(Formerly Medical Department Lind University.)

# [Diplomas recognized by the Illinois State Board of Health.]

Organized 1859.—Faculty embraces nineteen chairs; lecturer on dematology, and demonstrator of anatomy. One annual session for students. One practitioners' course annually.

Course of Instruction: Graded, comprising three annual consecutive terms of twenty-four weeks each.—Accredited certificates of one year's study entitle holders to enter as second-course students after satisfactory examination in studies of first-year course.—Certificates of two years' study and of attendance on one full course of lectures entitle to entry as third-course students after examination in studies of first and second years.—Studies: First-year course, descriptive anatomy, physiology, histology, practical microscopy, materia medica, general chemistry,—Second-year course, surgical anatomy, operations in surgery, general pathology, pathological anatomy, general therapeutics, state medicine, public hygiene, nervous and mental diseases, medical chemistry, medical jurisprudence, dermatology, hospital and dispensary clinics.—Third-year course, theory and practice of medicine, clinical medicine, principles and practice of surgery, clinical surgery, gynecology, obstetrics, diseases of children, ophthalmology, otology, hospital and dispensary clinics.—Daily examinations or "quizzes," by each professor.

REQUIREMENTS: For admission, a certificate of graduation from a literary college academy or scientific school; or satisfactory evidence through matriculation examination of a good English education.—For graduation: evidence of (1) good moral character; (2) three years' study; (3) required age, twenty-one years; (4) attendance upon three courses or two courses of lectures, and sustaining satisfactory examination in studies embraced in first-year course of lectures; (5) dissection of three parts of the human body; (6) two years of hospital attendance; (7) passed all examinations; (8) satisfactory thesis,

FEES: For the college year, \$75; final examination, \$30; matriculation, \$5; demonstrator. \$5; laboratory, \$5; hospital, \$6; or for first-year course, \$90; second-year course, \$91; graduation course, \$111.

STUDENTS: Total number of matriculates, 1881-2, 155; of graduates, 39; percentage of graduates to matriculates, 25. Graduates in Illinois, 301.

REMARKS: The establishment of this school was the first attempt in this country to place medical college education upon a full graded and systematic plan, in accordance with the same principles that govern in all other branches of education. It also made actual attendance upon hospital clinical instruction during at least one college term, one of the regular requirements for graduation. The plan thus adopted in the beginning has been continued to the present time, making such changes only as would render the system more complete in its practical working.—(Contributions to the History of Medical Education and Medical Instruction in the United States, 1776-1876. By N. S. Davis, A. M., M. D. P. 40]

"During the last twelve years between eighty and ninety per cent. of the students of this college have passed through the regular three courses of instruction.

# HAHNEMANN MEDICAL COLLEGE AND HOSPITAL (Homeopathic), CHICAGO.

#### [Diplomas recognized by the Illinois State Board of Health.]

Organized 1859.—Faculty embraces thirteen professors, one adjunct professor, and one lecturer on pharmacology.

Course of Instruction: One regular course of lectures of twenty weeks' duration annually. Quizzes are held at certain hours by the professor in charge; clinics at hospital and dispensary. A practitioners' course of four weeks' duration is held annually.—Lectures embrace principles and practice of medicine, obstetries, medical and surgical diseases of women, principles and practice of surgery, materia medica, therapeutics, ophthalmology, otology, chemistry, toxicology, descriptive and practical anatomy, physiology, histology, minor surgery, medical jurisprudence, sanitary science, pharmacology, dermatology, venereal diseases,

REQUIREMENTS: For admission, none.—For graduation: (1) good moral character; (2) twenty-one years of age; (3) two full courses of lectures; (4) satisfactory examination in (a) obstetrics and diseases of women, (b) surgery, (c) principles and practice of medicine, (d) materia medica and therapeutics, (e) physiology, (f) chemistry, (g) anatomy, (h) diseases of the eye and ear.

FEES: Matriculation, \$5; lectures, \$50; graduation, \$25; hospital ticket free to matriculates. Practitioners' course, \$30.

Α

STUDENTS: Matriculates, 264; graduates, 108; per cent. of graduates to matriculates, 41. Graduates in Illinois, 250.

REMARKS: "Should any candidate for graduation fail in the final examination, he will be entitled to demand a re-examination at any subsequent session, without the necessity of further attendance upon lectures."

# BENNETT COLLEGE OF ECLECTIC MEDICINE AND SURGERY, CHICAGO.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1868.—Faculty embraces fourteen professors and two assistants, and a demonstrator of anatomy.

Course of Inatomy.

Course of Inatomy.

Course of Instruction: One course of lectures of twenty-six weeks' duration, annually, and a spring (reading) course of eight weeks' duration. "Tuition at this college is by didactic lectures, with de nonstrations, clinical teaching. laboratory iestructions with experiments, recitations and personal teaching in cases demanding physical manipulation." Three years' graded course recommended, but not required.—Lectures embrace principles and practice of surgery, clinical surgery, obstetrics, gynecology, materia medica, therapeutics, clinical medicine, surgical anatomy, orthopedy, chemistry, pharmacy, toxicology, principles and practice of medicine, physiology, diseases of children, general and descriptive anatomy, ophthalmology, otology, diseases of the respiratory and circulatory organs and of the nervous system, electro-therapeutics, dermatology, venereal diseases, medical jurisprudence, dental pathology.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two full courses of lectures; (5) must have completed the prescribed course in analytical chemistry and practical anatomy; (6) satisfactory and honorable examination in every department.

FEES: Matriculation, \$5; lectures, \$50; demonstrator, \$10; analytical chemistry, \$10; graduating, \$25.

STUDENTS: Matriculates, 112; graduates, 38; per cent. of graduates to matriculates, 34. Graduates in Illinois, 160.

## WOMENS' MEDICAL COLLEGE OF CHICAGO, CHICAGO,

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1870.—Faculty embraces fifteen professors, four lecturers, demonstrator and assistant demonstrator of anatomy, and assistant to the chair of physiology.

Course of Instruction: One regular course of lectures of twenty-one weeks' duration, and one spring course of twelve weeks' duration, annually. Instruction is given by didactic lectures and recitations, clinical lectures and practical work, and attendance on hospitals. Graded course of three years recommended but not required.

hospitals. Graded course of three years recommended but not required.

Lectures embrace gynecology, theory and practice of medicine, diseases of children, pathology, venereal diseases, surgery, medical jurisprudence, diseases of the nervous system, obstetries, anatomy, chemistry, toxicology, dermatology, ophthalmology, otology, diseases of chest and throat, physiology, materia medica, therapeutics, hygiene.

REQUIREMENTS: For admission, (a) certificate of graduation from high school, or like institution, (b) teacher's certificate from county superintendent of schools, or (c) matriculation examination sufficient to prove a good English education; good moral character.—For graduation: (l) three full years study; (2) two full courses of lectures; (3) one full course of dissection; (4) one course in practical chemistry; (5) twenty-one years of age; (6) satisfactory oral and written examination.

FEES: Matriculation, \$5; lectures, \$50; laboratory, \$5; demonstrator, \$5; graduation, \$25.

STUDENTS: Matriculates, 83; graduates, 23; per cent. of graduates to matriculates, 27. Graduates in Illinois, 30.

## CHICAGO HOMEOPATHIC MEDICAL COLLEGE, CHICAGO.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1876.—Faculty embraces sixteen professors, two demonstrators and two lecturers.

Course of Instruction: A regular session of twenty-one weeks' duration, and a spring session of six weeks' duration, annually. Three years' graded course recommended but not required. A junior and a senior course (two separate and distinct courses) are delivered during each college term. Clinics, bosnital and dispensary.

livered during each college term. Clinics, hospital and dispensary,
Lectures embrace: Junior year, anatomy, physiology, histology, microscopy, materia
medica, chemistry, toxicology, pharmacology, minor surgery, odontology, sanitary
science and clinics. Senior year, institutes and practice of medicine and surgery, gynecology, pedology, materia medica, obstetries, ophthalmology and otology, mental and
nervous diseases, medical jurisprudence and clinics.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) "such primary education as is necessary for a proper standing in the profession;" (4) three years' study; (5) two full courses of lectures; (6) "practical anatomy to the extent of dissecting every region of the body;" (7) one course of practical chemistry.

FEES: Matriculation, \$5; lectures, \$50; demonstrator, \$5; hospital, \$5; graduation, \$25.

STUDENTS: Matriculates, 128; graduates, 38; per cent. of graduates to matriculates, 30. Graduates in Illinois, 48.

REMARKS: The ad eundem degree was conferred on four graduates, and the honorary degree on two graduates at the last commencement.

# Illinois State Board of Health.

Organized July, 1877.—First examination was held November 1, 1877. Examinations are now held in Chicago or Springfield once annually.

This BOARD, in accordance with the Medical Practice Act of Illinois, grants licenses to practice medicine and surgery within the State.

The following are extracts from the act conferring this power:

The State Board of Health * * * shall receive through its Secretary applications for certificates and examinations. * * * * If not a graduate, the person practicing medicine in this State shall present himself before said Board, and submit himself to such examination as the said Board shall require; and, if the examination be satisfactory to the examiners, the said Board shall issue its certificate in accordance with the facts, and the lawful holder of such certificate shall be entitled to all the rights and privileges herein mentioned.

It shall prepare two forms of certificates, one for persons in possession of diplomas or licenses, the other for candidates examined by the BOARD; and shall furnish to the county clerks of the several counties a list of all persons receiving certificates.

The STATE BOARD OF HEALTH may refuse certificates to individuals guilty of unprofessional or dishonorable conduct, and may revoke certificates for like causes. In all cases of refusal or revocation the applicant may appeal to the body appointing the BOARD. In all eases

. 8. Candidates for examination shall pay a fee of five dollars, in advance, which shall be returned to them if a certificate be refused.

SEC. 9. Examinations may be made wholly or in part in writing, and shall be of an elementary and practical character, but sufficiently strict to test the qualifications of the eandidate as a practitioner.

All examinations of persons not graduates or licentiates, shall be made directly by the BOARD and the certificates given by the BOARD shall authorize the possessor to practice medicine and surgery in the State of Illinois.

Where the candidates have any special views of theory and practice of medicine or of therapeutics, respect is paid to such views, and they are allowed, upon request, to appear before individual members of the Board for especial examination in such branches. Examinations are conducted in the English language. If made in another language interpreters must be furnished at the expense of the applicant.

All eandidates must fill out the following

Application for Examination before the Illinois State Board of Health, under the Act to Regulate the Practice of Medicine in the State of Illinois.

- Name in full.
  Nativity and age—(Must be at least twenty-one years of age). Residence and postoffice
  Time spent in professional studies—(Must be at least three years)....
- Physician or preceptor under whom the studies were pursued, with postoffice address—(Must be licentiate of the Board or reputable practitioner).

  Courses of medical lectures attended.

  Name of medical school attended—(Time spent at schools not recognized by the
- BOARD, will not be counted)..... Time spent in hospital, if any Time of practice, if any
- 9. 10.

President of the BOARD.

#### SUBJECTS OF EXAMINATION.

[For the character and scope of these examinations refer to schedules of questions. pp. v-ix. and pp. xvi-xx., ante.]

# Eighty per cent. of Correct Answers Required.

1, anatomy; 2, materia medica; 3, theory and practice; 4, gynecology; 5, physiology; 6, pathology; 7, obstetries; 8, chemistry; 9, surgery; 10, hygiene; 11, medical jurisprudence.

We have examined this applicant and find him to stand as above.

Signed by the members of the BOARD.

Number of candidates examined, 620. Number of candidates licensed, 196. Number of licentiates now practicing in the State, 85—the discrepancy being accounted for by Number removals or by having subsequently graduated.

College of Physicians and Surgeons of Chicago, Chicago.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1882.—Faculty will embrace twenty-one professors, seven lecturers, and a demonstrator of anatomy.

Course of Instruction: One regular course of twenty-three weeks' duration, a spring or reading course, and a practitioners' course of four weeks' duration. Graded course of three years recommended, but not required. "Instruction will be given by didactic and clinical lectures, practical work in the dissecting room, clinical and physiological laboratories and by oral and written examinations."—Lectures embrace descriptive and practical anatomy, physiology, chemistry, materia medica, therapeutics, laryngology, state medicine and public hygiene, medical jurisprudence, principles and practice of medicine, principles and practice of surgery, operative surgery and surgical pathology, surgical auatomy, obstetrics, ophthalmology, demonstrations of surgery, otogy, diseases of children, gynecology, dermatology, orthopedic surgery, medical chemistry, diseases of children, diseases of the genito-urinary organs, dental surgery, mental and nervous diseases.

REQUIREMENTS: For admission, "no previous reading or study of medicine is required before entering college;" (a) eighteen years of age; (b) good moral character; (c) a graduate or matriculate of a university or college, or a graduate of a high school, or holding certificate from any school boari or superintendent of schools as qualified as teacher, or having certificate from a recognized medical society as being fitted to study medicin; (d) if not in the class (c) must pass such an examination as will show his education sufficient to enable him to engage in the study of medicine.—For graduation: (1) twenty-one years of age; (2) three full years' study; (3) attendance on two courses of lectures; (4) a complete dissection; (5) attendance during two courses in hospital; (6) satisfactory examination in all branches taught in the college.

FEES: Matriculation, \$5; lectures, \$40; demonstrator, \$10; examination, \$30; hospital, \$5.

Quincy College of Medicine, (Med. Dep., Chaddock College), Quincy.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1882.—Faculty will embrace twelve professors and a demonstrator of anatomy.

Course of Instruction: One annual course of twenty-two weeks' duration. Graded course recommended but not required.

Lectures embrace principles and practice of medicine, principles and practice of surgery, obstetrics and diseases of women, clinical surgery, chemistry, electro-therapeutics, general pathology, clinical medicine, anatomy, laryngology, otology, rhinoscopy, medical jurisprudence, materia medica, pharmacy, dental surgery (chair of physiology not yet filled.)

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) three years' study: (3) two full courses of lectures, four years of well attested reputable practice may be taken for a course of lectures at the option of the faculty; (4) good moral character.

FEES: Matriculation, \$5; lectures, \$40; demonstrator \$10; examination, \$25.

REMARKS: On being advised that the BOARD in all cases requires two full courses of lectures before graduation, the faculty has decided not to accept four years of well attested practice in lieu of one course of lectures. This action has been taken since the publication of the announcement from which the above was extracted.

#### INDIANA.

#### INDIANA MEDICAL COLLEGE, LA PORTE.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1844.—Lectures were continued at this college until 1848, when the institution was removed to St. Charles, Ill., from thence to Rock Island, Ill., 1849, and finally to Keokuk, Iowa, where it remains as the College of Physicians and Surgeons of Keokuk.

Graduates in Illinois, 6.

# EVANSVILLE MEDICAL COLLEGE, EVANSVILLE,

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1849.—Graduates during the years '50, '51, '52, '53 and '54 numbered 44. Suspended from '54 to '71; reorganized 1871. Classes have been graduated since 1873.—Faculty embraces eleven professors, lecturers on minor surgery and anatomy, and demonstrator of anatomy.

Course of Instruction: One nineteen-weeks' course annually. "Examinations will be held at each lecture on the instructions of the previous day and the standing and improvement of each student carefully noted." Dispensary and hospital clinics are

afforded.—Lectures on principles and practice of medicine, principles and practice of surgery, obstetrics, chemistry, toxicology, anatomy, diseases of nervous system, gynecology, ophthalmology, materia medica, therapeutics, venereal diseases, clinical surgery, physiology, diseases of children, minor surgery, dentistry, practical anatomy, practical chemistry.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) unexceptionable moral character; (3) three years' study; (4) two full courses of lectures; (5) practical anatomy during two courses; (6) practical chemistry, one course; (7) satisfactory examination on various branches taught in the institution.

FEES: Matriculation, \$5; lectures, \$50; demonstrator, \$5; graduation, \$25.

Students: Matriculates, 17; graduates, 11; per cent. of graduates to matriculates, 63. Graduates in Illinois. 21.

#### Physio-Medical College of Indiana, Indianapolis.

[Diplomas recognized conditionally by the Illinois State Board of Health.]
Organized 1873.—Faculty embraces eight professors and three lecturers.

Course of Instruction.—One course of twenty-three weeks annually; hospital clinics.—Lectures embrace principles and practice of medicine, clinical medicine, principles and practice of surgery, obstetrics and diseases of women and children, botany, materia medica, therapeutics, histology, physiology, general descriptive and surgical anatomy, microscopy, pathological histology, chemistry, toxicology, medical jurisprudence, sanitary science, ophthalmology, otology, electro-therapeutics.

REQUIREMENTS: For admission, none.—For graduation: "a competent knowledge of all the branches taught in this college, qualifications sufficient to rightly apply the principles inculcated in every-day practice, is the only basis upon which degrees are conferred. This competency and qualification can only be attained by study and attendance upon medical lectures. It matters not whether it takes three or thirty years' reading, two or ten courses of lectures, the standard must be attained. An attendance on two full courses of lectures, the last of which must be in this college, attendance at hospital clinies, two courses of dissection under the supervision of the demonstrator, are regarded as requisites to an examination which must be satisfactory to each professor in his own department. This is absolutely and positively demanded before a diploma is granted."

FEES: Matriculation, (paid but once) \$5; hospital, \$3; lectures, \$75; demonstrator, \$5. graduation, \$25.

STUDENTS: No names of matriculates or graduates are given. Graduates in Illinois, 2.

#### MEDICAL COLLEGE OF FORT WAYNE, FORT WAYNE.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1876.—Faculty embraces eleven professors, lecturer on medical jurisprudence and practice of medicine, and demonstrator of anatomy.

Course of Instruction: One regular term of lectures of nineteen weeks' duration, annually; three years' graded course recommended but not required; clinical instruction given at hospitals and dispensary.—Lectures embrace pathology, surgery, gynecology, theory and practice of medicine, anatomy—descriptive and surgical, clinical medicine, materia medica, ophthalmology, otology, obstetrics, physiology, chemistry, toxicology, diseases of children, medical jurisprudence.

REQUIREMENTS:—For admittance, none.—For graduation: (I) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two full courses, not in the same twelve-month; (4) at least two dissections; (5) have followed hospital practice; (6) examination on all didactic branches taught in the college; (7) practical clinical examination by clinical professors.

FEES: Matriculation, \$5; lectures, \$40; demonstrator, \$5; hospital, \$5; graduation, \$25.

STUDENTS: Matriculates, 29; graduates, 14; per cent. of graduates to matriculates, 48. Graduates in Illinois, 1.

# MEDICAL COLLEGE OF INDIANA (Med. Dep., Butler University,) Indianapolis.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1878, when the Indiana Medical College (organized 1868), and the College of Physiciaus and Surgeons of Indiana (organized 1873) were united to form this college.— Faculty embraces eleven professors, assistant demonstrator of anatomy, and assistant to the chair of chemistry.

Course of Instruction: One annual regular term of lectures of twenty-two weeks' duration. Course of instruction covers two years; daily quizzes, clinies, and practical instruction are given.—Lectures embrace principles and practice of surgery, clinical surgery, theory and practice of medicine, gynecology, mental and nervous diseases, physiology, hygiene, obstetrics, diseases of children, anatomy, materia medica, therapeutics, ophthalmology, chemistry, toxicology,

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two full courses; (5) "examination by the faculty on all the branches of medicine."

FEES: Matriculation, \$5; laboratory, \$5; lectures, \$40; demonstrator, \$10; hospital, \$6; graduation, \$25.

STUDENTS: Matriculates, 164; graduates, 58; per cent. of graduates to matriculates, 35. Graduates in Illinois, 25.

#### CENTRAL COLLEGE OF PHYSICIANS AND SURGEONS, INDIANAPOLIS.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1879.—Faculty embraces eleven professors, three lecturers, and demonstrators of anatomy and chemistry.

Course of Instruction: One preliminary, of short duration, and one regular session of twenty weeks' duration are given annually; three years' graded course recommended but not required; clinical teaching is given at hospitals, city and college dispensary.—Lectures embrace anatomy, physiology, microscopy, histology, chemistry, materia medica, therapeutics, obstetrics, medical and surgical diseases of women, surgery, surgical pathology, ophthalmology, otology, laryngoscopy, principles and practice of medicine, mental and nervous diseases.

REQUIREMENTS: For admission, none.—For graduation: (1) good moral character; (2) twenty-one years' of age; (3) three years' study; (4) two full courses of lectures; (5) must pass satisfactory examination in anatomy, including dissections, physiology, chemistry, materia medica, therapeutics, obstetrics, surgery, principles and practice of medicine, clinical medicine.

FEES: Matriculation, \$5; lectures, \$40; laboratory, \$5; demonstrator, \$5; hospital, \$6; graduation, \$25.

STUDENTS: Matriculates, 45; graduates, 8; per cent. of graduates to matriculates, 18. Graduates in Illinois, 2.

#### FORT WAYNE COLLEGE OF MEDICINE, FORT WAYNE.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1879.—Faculty embraces thirteen professors, two lecturers, demonstrator of anatomy, and assistant in chemical laboratory.

Course of Instruction: Graded course of three years recommended but not required; one course of twenty-two weeks duration annually; clinical instruction given at hospital and dispensary.—Lectures embrace anatomy (with dissections.) chemistry, practical chemistry with urinalysis and physiology, surgical anatomy, materia medica and therapeutics pathology, histology, microscopy, clinical medicine and surgery and physical diagnosis, practice of medicine and surgery, obstetrics, gynecology, diseases of children.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two full courses of lectures, not within the same twelvemonth: (5) dissection for one session; (6) instruction in chemistry during one session; (7) must have followed the practice of a hospital; (8) must pass monthly and terminal examinations; premature examination will be granted if good and sufficient reasons are given for requesting it.

FEES: Matriculation, \$5; lectures, \$40; demonstrator, \$5; laboratory, \$5; hospital, \$5; graduation, \$25.

STUDENTS: Matriculates, 27; graduates, 16; per cent. of graduates to matriculates, 59. Graduates in Illinois, none.

REMARKS: Honorary degree was conferred on a matriculate (session '81-82) of the college at last commencement, ('82).

#### INDIANA ECLECTIC MEDICAL COLLEGE, INDIANAPOLIS.

[Diplomas recognized conditionally by the Illinois State Board of Health.]

Organized 1880.-Faculty embraces nine professors and a demonstrator of anatomy.

COURSE OF INSTRUCTION: One course of lectures of twenty weeks' duration annually. Will embrace in addition to didactic lectures, as far as practicable, clinical instruction.—Lectures embrace diseases of women and children, physiology, anatomy, clinical medicine, ophthalmology, chemistry, toxicology, medical jurisprudence, hygiene, surgery, surgical pathology, principles and practice of medicine, obstetrics, materia medica, therapeutics, gynecology.

REQUIREMENTS: For admission, none.—For graduation; (1) twenty-one years of age; (2) "must have read medicine"; (3) two full courses of lectures; (4) "must produce evidence of attendance on lectures on practical anatomy"; (5) must appear before the faculty for examination on the regular and essential branches of medicine; (6) thesis or clinical report.

FEES: Matriculation, \$5; demonstrator, \$5; lectures, \$40; graduation, \$25.

STUDENTS: Matriculates, 36; graduates, 30; per cent. of graduates to matriculates, 83. Graduates in Illinois, 1.

#### IOWA.

Α

# COLLEGE OF PHYSICIANS AND SURGEONS, KEOKUK.

60

(Formerly Med. Dep., University of Iowa.)

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1850.—Faculty embraces six professors, lecturers on ophthalmology and otology, and on medical jurisprudence.

COURSE OF INSTRUCTION: One course of lectures of nineteen weeks' duration, annually; three years' graded course recommended, but not required. Clinics given at the college infirmary; practical anatomy and practical chemistry.—Lectures embrace institutes and practice of surgery, chemistry, toxicology, materia medica, institutes and practice of medicine, obstetrics, diseases of women, anatomy, pathology, physiology, therapeutics, ophthalmology, otology, medical jurisprudence, metric system.

REQUIREMENTS: For admission, none.—For graduation: (I) twenty-one years of age; (2) good moral character; (3) two full courses of lectures; (4) three years' study; (5) nothesis required, but must present satisfactory evidence of literary qualifications; (6) satisfactory examination, either oral or written, at the discretion of the faculty, in anatomy, physiology and pathology, chemistry, materia medica, therapeutics, practice of medicine and surgery.

FEES: Matriculation, \$5; demonstrator, \$5; lectures, \$20; graduation, \$30.

STUDENTS: Matriculates, 273; graduates, 126. This includes two matriculates of the session 1881-82, upon whom the ad endem degree, and two students of the same session upon whom the honorary degree, was conferred. Per cent. of graduates to matriculates, 46. Graduates in Illinois, 235.

# MEDICAL DEPARTMENT OF THE STATE UNIVERSITY OF IOWA, AT IOWA CITY.

[Diplomas recognized by the Illinois State Board of Health.)

Organized 1870.—Faculty embraces eight professors, two assistants and a lecturer on ophthalmology and otology, and demonstrator of anatomy.

Course of Instruction: One course of twenty weeks' duration annually; graded course recommended but not required; clinics at hospital; practical chemistry. Daily examinations are made and a record kept for future reference.—Lectures embrace anatomy, physiology, microscopic anatomy, chemistry, toxicology, materia medica, practice of medicine, surgery, obstetrics, gynecology, ophthalmology, otology, medical jurisprudence.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) unexceptionable moral character; (3) three years' study; (4) two courses of lectures; (5) satisfactory examination in all the branches taught. In cases where the three-term course is adopted, a certificate of time of study is not an absolute requirement.

FEES: Matriculation, \$5; lectures, \$20; demonstrator, \$10; laboratory, \$5; graduation, \$25.

STUDENTS: Matriculates, 151; graduates, 46; per cent. of graduates to matriculates, 30. Graduates in Illinois, 22.

REMARKS: Thirty per cent. of the matriculates pursue the three years' graded course.

#### HOMEOPATHIC MEDICAL DEPARTMENT OF THE STATE UNIVERSITY IOWA, IOWA CITY,

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1877.—Faculty embraces two professors, five lecturers, and an assistant to the chair of materia medica. The teaching of this department is supplementary, the peculiar views of the school only being taught. The lectures on subjects common to both schools are delivered by the professors in the regular department.

Course of Instruction: One course of nineteen weeks' duration annually.—Lectures embrace theory and practice, materia medica, diseases of women and children, and obstetrical and surgical therapeutics, dermatol gy, pharmacy, physical diagnosis, minor surgery, dentistry, anatomy, physiology, obstetrics, surgery, chemistry and medical jurisprudence.

REQUIREMENTS: For admission, none,—Forgraduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two full courses of lectures; (5) "must have been engaged in the study of practical anatomy and practical chemistry;" (6) satisfactory examination in all the branches taught in the department. "The final examinations will be conducted in writing, by the faculty of the department, subject to approval or rejection by a board of examiners, selected for that purpose from the homeopathic physicians of Iowa. The adeandem degree in this department may be conferred under the following circumstances: The candidate must be in possession of an accredited diploma, and must present letters from two respectable physicians in regard to his moral character and professional standing. An attendance upon lectures, from time to time during the session, and a satisfactory examination must be passed on all subjects taught in the department."

FEES: Matriculation, \$5; lectures, \$20; demonstrator, \$10; laboratory course, \$5; graduation, \$25.

STUDENTS: Matriculates, 46, (13 graded, 33 non-graded); graduates, 15, (3 graded, 12 non-graded); per cent. of graduates to matriculates, 33. Graduates in Illinois, 2.

Iowa Eclectic Medical College, (Medical Department of Drake University,) Des MOINES.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1881.—Faculty embraces seven professors and eight lecturers.

Course of Instruction: Two sessions of twenty weeks each held each year. Lectures embrace chemistry, toxicology, physiology, descriptive and surgical anatomy, obstetrics, materia medica, therapeutics, principles and practice of medicine, gynecology, principles and practice of surgery, mental and nervous diseases, diseases of the heart, of the respiratory organs, of the genito-urinary organs, of the eye and ear, dental pathology, medical jurisprudence.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) have read medicine three years and attended two full courses of lectures, not in the same year, or have read two years and attended three courses of lectures or have attended four courses of lectures without previous reading; (4) dissection for one term; (5) satisfactory examination in anatomy, chemistry, materia medica and therapeutics, obstetrics, physiology, practice of medicine and surgery, either written or oral at discretion of the faculty. ten or oral, at discretion of the faculty.

FEES: Matriculation, (paid but once) \$5; lectures, \$40; demonstrator, \$5; graduation,

STUD NTS: Matriculates, 25; graduates, 7; per cent. of graduates to matriculates, 28 Graduates in Illinois, none.

COLLEGE OF PHYSICIANS AND SURGEONS OF IOWA, DES MOINES.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1882.—Faculty will embrace thirteen professors and a demonstrator of an atomy.

Course of Instruction: One course of lectures of twenty weeks' duration annually; three years' graded course recommended but not required. "Instruction will be given by didactic and clinical lectures and by practical work in the laboratory and dissecting room, and systematic examination."—Lectures embrace principles and practice of medicine, principles and practice of surgery, clinical surgery, obstetrics, gynecology, diseases of children, anatomy, physiology, materia medica, therapeutics, chemistry, toxicology, pathology, histology, microscopy, ophthalmology, othorwy, larryngology medical jurisprudence. otology, laryngology, medical jurisprudence.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years; (2) good moral character; (3) three years' study; (4) two full courses of lectures; (5) satisfactory examination in the several branches taught in the college, "and present satisfactory evidence of a preliminary examination in the higher English branches as taught in the high school, academy or college, or be subject to an examination in the same at the discretion of the faculty."

FEES: Matriculation, \$5; lectures, \$40; demonstrator, \$5; graduation, \$25; laboratory, \$5.

# KENTUCKY.

MEDICAL DEPARTMENT OF TRANSYLVANIA UNIVERSITY, LEXINGTON.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1817. Lectures were delivered at Lexington until 1859, when the institution became extinct.—From 1850 to 1859 lectures were delivered during the summer only, the winter sessions being intermitted to establish the Kentucky School of Medicine, at Louisville. Graduates in Illinois, 18.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF LOUISVILLE, LOUISVILLE,

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1837. No lectures were delivered from June, 1862, to June, 1863, and no class graduated in 1863, because of the rebellion.—Faculty embraces nine professors, two lecturers and five demonstrators.

Course of Instruction: One regular course of twenty weeks', one spring course of twelve weeks' duration, and one post-graduate (practitioners') course of six weeks' duration, annually. Clinics given at dispensary and hospitals. Frequent "quizzes" (examinations) are conducted by the faculty.—Lectures embrace anatomy, ophthalmology, otology, principles and practice of, and clinical medicine, physiology, diseases of the chest, state medicine and sanitary science, pathology, nervous diseases, surgery—clinical and operative, surgical pathology, obstetrics, gynecology, materia medica, therapeutics chemistry. materia medica, therapeutics, chemistry.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study, (4) two complete courses of lectures, (5) one course of practical anatomy; (6) one course of clinical instruction; (7) examination on all the branches taught in the college.

FEES: Matriculation, \$5; lectures, \$75; demonstrator, \$10; hospital, \$5; graduation, \$30.

STUDENTS: Matriculates, 181; graduates, 96; per cent. of graduates to matriculates, 53. Graduates in Illinois, 86.

#### KENTUCKY SCHOOL OF MEDICINE, LOUISVILLE.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1856.—Faculty embraces nine professors, two lecturers, two adjuncts, and a demonstrator of anatomy.

Course o Instruction: One course of lectures of twenty weeks' duration annually, commencing February 10, after the close of lectures in the winter schools. Quizzes are held each day by the members of the faculty. Clinics a hospital and collego. Three years' graded course recommended, but not required.—Lectures embrace anatomy, physiology and general chemistry, materia medica, surgical pathology, medical chemistry and microscopy, therapeutics, obstetrics and diseases of women, surgery and clinical surgery, practice of medicine, clinical medicine, and nervous diseases.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) two full courses of lectures, the interval between the beginning of the first and the close of the second course must be at least fifteen months; (4) dissection for one session; (5) one course of hospital clinics; (6) examination on all branches taught in the college. "If, after examination for the degree, he be found to have received three negative votes, he shall be entitled to another examination. Should he decline this, he may withdraw, and will not be considered as rejected. The degree will not be conferred upon any candidate who is often absent from the regular lectures of the college, or who absents himself from the public commencement without special permission of the faculty."

FEES: Matriculation, \$5; demonstrator, \$5; hospital, \$5; lectures, \$75; graduation, \$30.

STUDENTS: Matriculates, 132; graduates, 55; per cent. of graduates to matriculates. 41. Graduates in Illinois, 39.

REMARKS: Two professors in this school are professors in the Hospital College of Medical. Five of the professors and adjuncts in this school are connected with the Louisville Medical College.

#### LOUISVILLE MEDICAL COLLEGE, LOUISVILLE.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1869.—Faculty embraces seven professors, two assistants and a demonstrator of anatomy.

Course of Instruction: One preliminary course of four weeks' duration, and a regular session of nineteen weeks' duration, annually. Daily quizzes held by members of the faculty. The plan of instruction includes lectures, clinics, quizzes, and practical demonstrations.—Lectures embrace theory and practice of medicine, anatomy, materia medica, obstetrics, gynecology, chemistry, physiology, histology, surgery, ophthalmology, otology, nervous diseases, therapeutics.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character: (3) three years' study; (4) two full courses of lectures (not in the same twelvemonth); (5) one course of dissection; (6) one course of hospital clinics; (7) satisfactory examination.

FEES: Matriculation, \$5; demonstrator, \$10; lectures, \$75; hospital, \$5; graduating, \$30,

STUDENTS: Matriculates, 121; graduates, 54; per cent. of graduates to matriculates, 45, Graduates in Illinois, 57.

HOSPITAL COLLEGE OF MEDICINE (Medical Department, Central University, Louisville.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1873.—Faculty embraces nine professors, one assistant, and one lecturer on gynecology.

Course of Instruction: One preliminary course of three weeks' duration, one regular (graduating) course of nineteen weeks' duration, one spring (reading) course of twelve weeks' and one practitioners' course are given annually. All students are urged to adopt the three years' graded course, but it is not required. Daily quizzes are conducted by the faculty. Clinics are given at hospitals and dispensary.—Lectures embrace obstetrics, gynecology, physiology, hygiene, mental diseases, surgery, principles and practice of, and clinical medicine, descriptive, comparative and surgical anatomy, materia medica, therapeutics, diseases of children, ophthalmology, otology, chemistry, toxicology, microscopy, practical chemistry, practical physiology, minor surgery.

REQUIREMENTS: For admission, none.—For graduation: (I) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two complete courses of lectures; (5) practical anatomy for one session; (6) clinical instruction at hospital during one session; (7) examination on all branches taught in the college.

FEES: Matriculation, \$5; lectures, \$75; demonstrator, \$10; hospital, \$5; practical chemistry, \$5; graduation, \$30.

STUDENTS: Matriculates, 62; graduates, —; per cent. of graduates to matriculates, —. Graduates in Illinois, II.

## JEFFERSON SCHOOL OF MEDICINE, LOUISVILLE,

Organized 1882. This school graduated one class (in 1882) and then suspended operations. One diploma was presented to the Illinois State Board of Health and was recognized, and the certificate of the Board was granted thereon.

# LOUISIANA.

MEDICAL DEPARTMENT OF UNIVERSITY OF LOUISIANA, NEW ORLEANS.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1831, as the Medical College of Louisiana. Transferred to its present connection in 1847. The war caused suspension during the years 1863, '64 and '65; reorganized 1865.—Faculty embraces seven professors, a lecturer on diseases of the eye, and a demonstrator of anatomy.

Course of Instruction: One annual course of nineteen weeks' duration, three years' graded course recommended but not required; daily rounds of hospitals made by students with professors and chiefs of clinics.—Lectures embrace general and clinical surgery, theory and practice of medicine, and clinical medicine, physiology, pathological anatomy, chemistry, anatomy, obstetrics, diseases of women and children, materia medica, therapeutics, hygiene, ophthalmology.

REQUIREMENTS: For admission, none.—For graduation: (1) good moral character; (2) twenty-one years of age; (3) three years' study; (4) two complete courses of lectures; (5) two complete courses of dissection; (6) thesis; (7) pass satisfactory examination.

FEES: Matriculation, \$5; lectures, \$140; demonstrator, \$10; graduation, \$30.

STUDENTS: Matriculates (including pharmacy students). 204; graduates, (including pharmacy graduates), 49; per cent. of graduates to matriculates, 24. Graduates in Illinois. 2.

REMARKS: The faculty of this school having charge of the Charity (city) hospital, good clinical advantages are afforded.

NEW ORLEANS SCHOOL OF MEDICINE, NEW ORLEANS.

[Diplomas recognized by the Illinois State Board of Health.] Organized 1856. Extinct April, 1870. Graduates in Illinois, 3.

CHARITY HOSPITAL MEDICAL COLLEGE, NEW ORLEANS.

[Diplomas recognized by the ILLINOIS STATE BOARD OF HEALTH.]
Organized 1873. Extinct 1877. Graduates in Illinois. 2.

MEDICAL DEPARTMENT NEW ORLEANS UNIVERSITY, NEW ORLEANS.

MEDICAL DEPARTMENT STRAIGHT UNIVERSITY, NEW ORLEANS.

Both are for colored students, and open to males and females. I do not know that any medical diplomas have actually been issued from either. If so, we could not recognize them here, for they certainly have not given such courses of instruction as to qualify men or women to practice medicine. (Official letter, Louisiana State Board of Health.)

#### MAINE.

MEDICAL SCHOOL OF MAINE, AT BOWDOIN COLLEGE, BRUNSWICK.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1820.—Faculty embraces eight professors and a demonstrator of anatomy,

Course of Instruction: One annual course of lectures of sixteen weeks' duration, commencing in February. Course embraces two sessions. Clinics are given once a week. Daily examinations are made by the faculty.—Lectures embrace pathology, practice of medicine, obstetries, diseases of women and children, medical jurisprudence, anatomy, chemistry, physiology, surgery, clinical surgery, materia medica, therapeutics.

A 64 ·

REQUIREMENTS: For admission, (a) diploma from college, high school or normal school; (b) tickets showing passage of entrance examination to any recognized college); or (c) examination necessary to prove good English education.—For graduation. (l) twenty-one years of age; (2) good moral character; (3) two full courses of lectures; (4) satisfactory written and oral examination on subjects of the lectures; (5) thesis; (6) dissection of two "parts."

FEES. Matriculation, \$5; lectures, \$75; graduation, \$20.

STUDENTS: Matriculates, 104; graduates, 28; per cent of graduates to matriculates, 27. Graduates in Illinois, 11.

#### MARYLAND.

SCHOOL OF MEDICINE OF THE UNIVERSITY OF MARYLAND, BALTIMORE,

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1807.—Faculty embraces eleven professors, a demonstrator of anatomy, an assistant, and two prosectors.

Curse of Instruction: Fifteen lecturers and chiefs of clinics give lectures in the spring course and instruction. The faculty strongly recommends students to attend a three years' graded course, but it is not required. One regular course of twenty-two weeks' duration, and one spring course of twelve weeks' duration, are given annually. Clinics at hospital and dispensary.—Lectures embrace chemistry and pharmacy, obstetries, practice of medicine, surgery, materia medica and therapeutics, diseases of women and children, diseases of the eye and ear, physiology, anatomy and pathology, diseases of throat and chest, diseases of the skin.

REQUIREMENTS: For admission, none.—For graduation, (1) twenty-one years of age; (2) two full courses of lectures; (3) thesis; (4) evidence of attendance on clinical lectures on medicine and surgery; (4) practical anatomy course; (6) good moral character, and faithful and regular attendance on lectures and clinics.

FEES: Matriculation. \$5; lectures, \$120, or \$50 to poor students; demonstrator, \$10; graduation, \$30.

STUDENTS: Matriculates, 194; graduates, 73; per cent. of graduates to matriculates, 38. Graduates in Illinois, 19.

REMARKS: Practical courses are given on obstetrics, eye and ear, and throat and chest diseases, for which a fee of \$12 per course is charged.

# College of Physicians and Surgeons, Baltimore.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1872. In 1877, the Washington University School of Medicine, organized 1828, (dollo mas recognized) was united with it.—Faculty embraces ten professors, three demonstrators and a prosector.

Course of Instruction: Three years' graded course recommended, but not required; one regular course of twenty weeks' duration, and one spring course of twelve weeks' duration, are given annually; clinics in hospitals and dispensary.—Lectures embrace anatomy, physiology, mater a medica, therapeutics, chemistry, gynecology, diseases of eye and ear, diseases of the nervous system, diseases of the skin, medical jurisprudence, principles and practice of surgery, obstetries, clinical medicine, diseases of children, diseases of the chest and throat, hygiene.

REQUIREMENTS: For admission, none.—For graduation: (4) twenty-one years of age, (2) good moral character; (3) good English education; (4) three years' study; (5) satisfactory examination.

FEES: Lectures, \$120, or \$55 to poor students; graduation, \$30.

STUDENTS; Matriculates 349; graduates, 153; per cent. of graduates to matriculates, Graduates in Illinois, 2.

REMARKS: Graduates are earnestly advised to take a post-graduate course of instruction in the Johns Hopkins biological laboratory, or reside one year in a well-organized hospital.

## BALTIMORE MEDICAL COLLEGR, BALTIMORE.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1881.—Faculty embraces eight professors, two lecturers, and three demonstrators.

Course of Instruction: One course of lectures of thirty weeks' duration, annually; clinical instruction at college dispensary.—Lectures embrace anatomy, chemistry, physiology, materia medica and therapeutics, obstetrics, diseases of women and children, principles and practice of medicine, hygiene, dermatology, principles and practice of surgery, diseases of the eye and car.

65 · A

REQUIREMENTS: For admission, "must possess good moral characters and studious habits, and unless matriculates of some literary institution or medical college, will be required to write a brief essay, not exceeding a page of foolscap, as a test of their qualifications in orthography and grammar, and to undergo a short oral examination in the elementary branches of a good English education."—For graduation: Must be of age, and have attended two full courses of lectures. The fitness of a candidate for graduation will be based upon good behavior and the result of a final examination in the seven primary branches of medicine.

STUDENTS: Matriculates, 46; graduates, 17; per cent. of graduates to matriculates, 37. Graduates in Illinois, none.

REMARKS: "Christianity being the basis upon which this college was founded, its charter requires that every professor shall declare his belief in the Christian religion to become eligible to fill his position."

# MASSACHUSETTS.

MEDICAL DEPARTMENT OF HARVARD UNIVERSITY, BOSTON.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1782.—Faculty embraces twelve professors, seven instructors and a demonstrator of anatomy. There are also fifteen lecturers and assistants and fourteen clinical instructors.

Course of Instruction: Instruction is given by lectures, clinical teaching, and practical exercises uniformly distributed throughout the academic year, one course annually of thirty-four weeks duration, divided into two terms. Course graded, extending over three or four years. In the shorter course lectures embrace: First year,—anatomy, physiology, and general chemistry. Second year,—practical and topographical anatomy, edical chemistry materia medica, pathological anatomy, clinical medicine, and clinical surgery. Third year,—therapeutics, obstetries, theory and practice of medicine, clinical medicine, surgery, clinical surgery, ophthalmology, dermatology, syphilis, otology, laryngology, mental diseases, diseases of the nervous system, diseases of women, diseases of children, hygiene, forensic medicine.

eases of women, diseases of children, hygiene, forensic medicine.

REQUIREMENTS: For admission, all candidates, excepting those who have passed an examination for admission to Harvard University, must present a degree in letters or science from a recognized college or scientific school, or pass an examination in the following subjects:—(a) Every candidate shall be required to write, legibly and correctly, an English composition of not less than two hundred words, and also to write English prose from dictation. (b) The translation of easy Latin prose. (c) A competent knowledge of physics. (d) Each candidate shall pass an approved examination in such one of the following branches as he may elect: French, German, the elements of algebra or plane geometry, botany.—For graduation: Every candidate must be (l) twenty-one years of age; (2) of good moral character; (3) must give evidence of having studied medicine three or four full years; (4) have spent at least one continuous year at this school; (5) have presented a satisfactory thesis, and have passed the required examinations; (6) dissection of all "parts." Examinations mainly in writing.

FEES: Matriculation, \$5; lectures, full year, \$200; half year, \$120; no diploma or matriculation fees.

STUDENTS: Matriculates, in regular course, 233; in post-graduates' course, 9. Graduates in Illinois 32.

REMARKS: Students who began their professional studies elsewhere may be admitted to advanced standing; but all persons who apply for admission to the advanced classes must pass an examination in the branches already pursued by the class to which they seek admission, and furnish a satisfactory certificate of time spent in medical studies. No student shall advance with his class, or be admitted to advanced standing, until he has passed the required examination in the studies of the previous year, or a majority of them; nor shall he become a member of the third class until he has passed all the examinations of the first, in addition to a majority of those of the second year.

BERKSHIRE MEDICAL COLLEGE (Medical Department, Williams College,) PITTSFIELD.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1843. Lectures were delivered until 1867, when the college became extinct. During its existence 1138 students were graduated. Graduates in Illinois, 28.

WORCESTER MEDICAL COLLEGE, WORCESTER.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1848. Lectures were delivered until 1858 (?) when the college became extinct, Graduates in Illinois, 2.

----7

BOSTON UNIVERSITY SCHOOL OF MEDICINE (Homeopathic,) BOSTON.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1873. The New England Female Medical College, organized 1848, was carried on as a regular school until it was united with this school in 1874.—Faculty embraces eleven professors, eleven lecturers, and six assistants.

Course of Instruction: One course of thirty weeks' duration, annually, divided into two terms. Three years' graded course required. Four years' graded course recommended. Daily examinations by the professors. Clinics at hospital and dispensary. To each term and each year certain studies are assigned, in which the student is required to become proficient before entering upon more advanced studies, and he is required to complete the studies in one year and be examined in them before entering the next.—Lectures embrace.—First year: Anatomy, general, descriptive and comparative, with dissections; histology and microscopy, physiology, human and comparative; general and medical chemistry; history and methodology of medicine.—Necond year: Materia medica and clinical medicine, pathological anatomy, minor surgery, surgery and surgical pathology, obstetries, auscultation and percussion, laryngoscopy.—Third year: Materia medica and clinical medicine continued, pathology and diagnosis continued, clinical and operative surgery, diseases of women, diseases of children, ophthalmology, medical jurisprudence, ethics and esthetics.

Bequirements: For admission, (a) a degree in arts, philosophy or science: (b) all

REQUIREMENTS: For admission, (a) a degree in arts, philosophy or science; (b) all others are examined in the following branches: (I) In orthography, English composition, and penmanship, by means of a page written at the time and place of examination:—(2) In arithmetic, geography, and English grammar, if there be doubt whether the candidate has sufficient attainment therein:—(3) In elementary physics, by an examination in Stewart's Primer of Physics.—(4) In Latin, by requiring a translation from Harkness's Latin reader at sight.—Students passing a satisfactory examination in other respects will be allowed till the following May to complete their requirements in Latin and physics, but will not be allowed to enter upon the examinations of the first year till such conditions are removed. Candidates must be at least eighteen years old.—For graduation: (I) twentyone years of age; (2) good moral character; (3) three years' study; (4) thesis. Seventy per cent, required to pass for graduation.

FEES: Matriculation, \$5; demonstrator, \$10; lectures, \$125; graduation, \$30.

STUDENTS: Matriculates, 109; graduates, 29; per cent. of graduates to matriculates, 26. Graduates in Illinois. 5.

# COLLEGE OF PHYSICIANS AND SURGEONS, BOSTON.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1880.—Faculty embraces nine professors, six lecturers and two instructors on special subjects and a demonstrator of anatomy.

Course of Instruction: One course of thirty-four weeks, annually, divided into two terms. "The instruction at this college consists of didactic lectures, with demonstrations, clinical teaching, daily recitations, and practical teaching on subjects involving manipulation." Course graded, extending over three years; not absolutely required, but recommended.—Lectures embrace general and descriptive anatomy, physiology, general chemistry and histology, hygiene, materis medica, therapeutics, medical chemistry, toxicology, surgical anatomy and pathology, dermatology, laryngoscopy, obstetries, surgery, practical medicine, clinical medicine, medical jurisprudence and gynecology, nervous diseases, ophthalmology.

REQUIREMENTS: For admission, at least a thorough English education.—For graduation: (1) twenty-one years of age; (2) thesis; (3) three years' study; (4) at least two courses of lectures; (5) oral and written examinations.—Persons who have never studied medicine are required to pursue a three years' course at this College before graduation. Those who have studied medicine for one or more years with a regular physician, and pass a satisfactory examination in all branches of the first course. may be admitted as students of the second course.

FEES: Matriculation, \$5; lectures, \$85; demonstrator, \$5; graduation, \$30.

STUDENTS: Matriculates, 24. Graduates in Illinois, none.

## MICHIGAN.

DEPARTMENT OF MEDICINE AND SURGERY OF THE UNIVERSITY OF MICHIGAN, ANN ARBOR.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1850.—Faculty embraces seven professors, three assistant professors, six assistants to the professors, and two examiners.

COURSE OF INSTRUCTION: One annual course of lectures of thirty-four weeks' duration, divided into two semesters. Frequent examinations are held by the professors or their assistants, and examinations (written) at the close of each semester. The course

is graded, extending over three years, but two full courses and examination on the first year will be sufficient for graduation.—Lectures embrace first year, anatomy, histology, physiology, chemistry, materia medica and therapeutics.—Second year: Continuation in review of anatomy, histology, physiology, chemistry, materia medica and therapeutics; with pathology and practice of medicine, surgery and obstetrics.—Third year: Practice of medicine, surgery and obstetrics,—Third year: Practice of medicine, surgery, and clinical gynecology,—The above list will be understood to include all the special studies that appertain to, and form an essential part of the general subjects enumerated. Such are histology, physiological and pathological; laboratory work in medical chemistry, in microscopy, and in electro-therapeutics; qualitative, physiological and pathological analyses; toxicology; physical diagnosis.

REQUIREMENTS: For admission, (1) eighteen years of age, (2) good moral character; (3) no previous study of medicine required for admission, but candidates will be examined as to their elementary education and their fitness to pursue properly and profitably the technical study of medicine. The examination will be in writing. The candidate will be asked to give an account of his previous educational advantages, and to answer such questions in arithmetic, geography and history, and on forms of government and current events, as shall show his general intelligence; and particularly will he be required to correct imperfeet English, and to show his ability to express ideas correctly in writing. Graduates or matriculates of a university or college, graduates or advanced members of any academy or high school, persons holding certificates from any public school board as being properly qualified as teachers, and persons having certificates, based upon an examination by some recognized medical society, of being properly qualified to engage in the study of medicine, will not be required to pass the above examination.—For graduation: To be admitted to the degree of doctor of medicine, a student must be twenty-one years of age and possess a good moral character; he must have successfully pursued the study of practical anatomy and practical chemistry, and unless the full course of study has been taken in this college, he must have been engaged in the study of medicine for the period of three years, including the time spent in attendance upon lectures. He must also have passed satisfactory examinations on all the studies included in the full course of instruction; or, if admitted to advanced standing, he must have attended at least two passed the required examinations.

FEES: Matriculation, for residents of Michigan, \$10; for non-residents, \$25, to be paid but once. Lectures, for residents of Michigan, \$20; for non-residents, \$25. Graduation for all alike, \$10.

STUDENTS: Matriculates, 383; graduates, 99; per cent. of graduates to matriculates, 26. Graduates in Illinois, 114.

#### DETROIT MEDICAL COLLEGE, DETROIT,

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1868.—Faculty embraces twelve professors, ten lecturers and instructors, and a demonstrator of anatomy.

Course of Instruction: One regular term of twenty-three weeks and a spring (recitation) term of twelve weeks. Three years' graded course recommended, but not required. Clinics at hospitals and dispensaries.—Lectures embrace general chemistry, physiology, histology, materia medica and pharmacy, practical anatomy, practical chemistry, descriptive and regional anatomy, therapeutics, medical and physiological chemistry, pathology and pathological anatomy, practical pharmacy, practical physiology and microscopy, practice of medicine, surgery, obstetrics, diseases of women and children, diseases of eye, diseases of ear, diseases of larynx, diseases of nervous system, diseases of skin, and genito-urinary diseases.

REQUIREMENTS: For admission, (a) literary degree; (b) certificate of having passed the entrance examination of any incorporated literary college, or any recognized medical college in which an examination is required for admission; also certificate of having graduated at any high school or academy; (c) preliminary examination sufficient to show satisfactory knowledge of the English branches.—For graduation: (1) twenty-one years of age; (2) good moral character, (3) three years' study, (4) two full courses of lectures, not within the same twelvemonth; (5) examination on all branches taught in the college; (6) full course of dissection; (7) satisfactory course in chemical and physiological laboratory; (8) practical clinical work for one term in hospital and out-door clinics; (9) thesis.

FEES: Matriculation, \$5; lectures, \$50; hospital, \$5; laboratory, \$5; graduation, \$25.

STUDENTS: Matriculates, 48; graduates, 11; per cent. of graduates to matriculates, 23. Graduates in Illinois, 11.

#### DETROIT HOMEOPATHIC MEDICAL COLLEGE, DETROIT. .

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1871. Lectures were delivered in this college until 1876, when the institution became extinct.

Graduates in Illinois, 2.

HOMEOPATHIC MEDICAL COLLEGE OF THE UNIVERSITY OF MICHIGAN, ANN ARBOR.

68

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1875.—Faculty embraces two professors, one lecturer, one instructor, six assistants to chairs. Four professors, two assistant professors, one lecturer and a demonstrator of the Department of Medicine and Surgery (regular school) give instruction to homeopathic students.

homeopathic students.

Course of Instruction: One course of thirty-four weeks' duration, annually; course graded, extending over three years. One course each year, although two courses may suffice under certain conditions, (see requirements for graduation.) Daily quizzes by the assistants of the several chairs.—Lectures as follows: The first year of the course will include anatomy, histology, general chemistry, minor surgery, materia medica, principles of medicine, preparation of medicines, and their action, descriptive and analytical botany, clinics, physical diagnosis, with ten necessary practical work in the chemical and physiological laboratories. This year's work in materia medica will be devoted to teaching the source, nature, origin, and method of preparing remedies, with their physiological action, and a general survey of their pathogeneses.—In the second year the above studies, excepting histology and minor surgery, will be reviewed, and the student will take up general therapeutics, in connection with materia medica, diseases of w-men and children, obstetrics and their clinical work, materia medica, qualitative chemistry and analysis of urine, pathological anatomy, principles and practice of medicine (including hygiene or preventive medicine), principles of surgery, and ophthalmology and otology. The materia medica work of this year will consist of special analyses and syntheses of drug-provings. In addition, the student will attend attend such didacactic and clinical lectures on the practical branches as his progress shall render advisable.—In the third year the student will enter upon the study of operative surgery, electrotherapeutics, spinal diseases and curvatures, and review advanced studies, with practical instruction in diagnosis and treatment.

REQUIREMENTS: For admission, (a) good moral character; (b) unless already a matriculate of the University, or a graduate of some respectable college, academy, or high school, every candidate will be examined as to his previous education and his fitness to enter upon and appreciate the technical study of medicine. The diploma or certificate of graduation from such institutions must be presented to the dean of the faculty in order to secure exemption from examination. The examination will be in writing, and will cover the ordinary branches of an English education.—For graduation: (1) twenty-one years of age, (2) good moral character, (3) three years' study. (4) must have attended at least seventy-five per cent. of the regular lectures, (5) have spent the required time in practical anatomy, chemical analysis, etc., in the various laboratories and hospitals, (6) have attended the usual quizzes and drills by the assistants of the several chairs. (7) must also have passed satisfactory examinations on all the studies included in the curriculum; or, if admitted to advanced standing, he must attend at least two full courses of medical lectures in this college and pass the required examinations. Students who have completed full college courses for the first and second years in an accredited medical college will be permitted, upon examination, to enter the third year and complete the studies of that year in this department, and to present themselves for examination for the degree at the end of the year. Students who have attended one full course of lectures in an accredited medical college previous to 1880 will be admitted to advanced standing in the course required in this department, and may be graduated on the conditions in force prior to that date. Students who have studied medicine elsewhere at least one college year, and who possess superior qualifications, may be admitted, on examination, to advanced standing.

FEES: Matriculation, for residents of Michigan, \$10; for non-residents, \$25, (paid but once.) Lectures, for residents of Michigan, \$20; for non-residents, \$25. Graduation, for all alike, \$10. Course in chemical laboratory, \$15; in physiological laboratory, \$1; in electro-therapeutics, \$1.

STUDENTS: Matriculates, 88. Graduates in Illinois, 4.

# MICHIGAN COLLEGE OF MEDICINE, DETROIT.

[Diplomas recognized by the Illinois State Board of Health.]

Organized, 1880.—Faculty embraces fourteen professors, one adjunct professor, one lecturer, one instructor, two assistants and a demonstrator of anatomy.

Course of Instruction: One regular course of twenty-three weeks' duration annually. Three years' graded course recommended, but not required. Clinics at hospital and dispensary.—Lectures embrace physiology, chemical physics, institutes of medicine, therapeutics, gynecology, practice of medicine, clinical medicine, surgery and clinical surgery, clinical gynecology, obstetries (clinical and didactic), and pnerperal diseases, diseases of children, medical chemistry, otology, ophthalmology, laryngology, medical jurisprudence, dermatology, genito-urinary diseases, topographical anatomy, materia medica, histology, general and surgical anatomy, principles of surgery, principles of medicine, and pathology.

REQUIREMENTS: For admission, students entering the college, who are not in possession of the degree of a college or university, or of a certificate from a high school or other recognized educational institution, will be required to pass a satisfactory examination in the following subjects: (1) English grammar, (2) English composition (a short composition upon any subject); (3) elementary mechanics of solids and fluids; (4) arithmetic to, and including, common and decimal fractions; (5) algebra to, and including, simple equations; (6) geometry, first two books; (7) general geography and history of the United

States; (3) Latin Zramm ir and translation of easy Latin prose; (9) optional studies (one of which will be accepted in lieu of any one of above studies, except English grammar, composition and Latin), Greek, French, German, botany, zoology.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two full courses of lectures; (5) satisfactory examination in all subjects taught.

FEES: Matriculation, \$5.00; lectures, \$50; graduation, \$20.

STUDENTS: Matriculates, 72; graduates, 20; per cent. of graduates to matriculates, 28. Graduates in Illinois, 4.

#### MINNESOTA.

#### MINNESOTA COLLEGE HOSPITAL, MINNEAPOLIS.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1881. Successor to the St. Paul Medical College, organized 1880.—Faculty embraces twenty-one professors, two adjunct professors and two lecturers on dentistry.

Course of Instruction: One regular course of nineteen weeks' duration, and one spring course of eight weeks' duration, annually—Graded course recommended, but not required.—Lectures embrace anatomy, physiology, chemistry, materia medica, pathological anatomy, clinical surgery, therapeutics, obstetrics, surgery, theory and practice of medicine, clinical medicine and surgery, dermatology, ophthalmology, otology, toxicology, histology, hygiene, nervous diseases, medical jurisprudence, dentistry, orthonedic surgery orthopedic surgery.

REQUIREMENTS: For admission, eighteen years of age; thorough preliminary education. For graduation: (1) twenty-one years of age; (2) satisfactory evidence of a good moral character; (3) he must have pursued the study of medicine three full years; and (4) have attended three full courses of lectures; or, having attended one full course of lectures in a recognized school of medicine, and having passed the examination in the studies of the first and second years of this institution, together with attendance during the course of the third year, he will be admitted to the examination.

FEES: Entire course, \$50.

STUDENTS: Matriculates, 25; graduates, 5; per cent. of graduates, to matriculates, 20. Graduates in Illinois, none.

#### MISSOURI.

#### MISSOURI MEDICAL COLLEGE, ST. LOUIS.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1849, as the Medical Department of Kemper College. In 1847 it became the Medical Department of the University of Missouri. In 1857 it assumed its present name. It was suspended during the war, and no students graduated in 1862, '63, '64 or '65. It is sometimes called after its founder, The McDowell Medical College.—Faculty embraces twelve professors, four adjunct professors and two demonstrators of anatomy.

Course of Instruction: One regular course of nineteen weeks' duration; one spring course of eleven weeks' duration and a practitioners' course of four weeks' duration, annually. Three years' graded course recommended, but not required. Clinics at hospitals and dispensary.—Lectures embrace general and descriptive anatomy, physiology, histology, chemistry, materia medica, hygiene, medical jurisprudence, theory and practice of medicine, practice of surgery, obstetries, pathological anatomy, gynecology, ophthalmology, therapeutics, clinical medicine, mental and nervous diseases, pharmacy, otology, laryngology, diseases of children, physical diagnosis, dermatology. otology, laryngology, diseases of children, physical diagnosis, dermatology.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age, (2) good moral character, (3) attendance on clinics and dissections for one term, (4) satisfactory examination.

Fees: Matriculation, \$5; lectures, \$80; graduation, \$25.

STUDENTS: Matriculates, 25; graduates, 125; per cent. of graduates to matriculates, 53. Graduates in Illinois, 210.

#### St. Louis Medical College, St. Louis.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1841.—Faculty embraces eight professors, ten lecturers, two assistant demonstrators of anatomy and a demonstrator of chemistry.

Course of Instruction: One regular course of twenty weeks' duration; one spring course of eleven weeks' duration and a practitioners' course of four weeks' duration, annually. Course graded, extending over three years, divided as follows:—Lectures embrace—First term, chemistry, chemical laboratory practice, anatomy, dissections, histology, histological demonstrations, physiology, materia medica.—Second term, chemistry,

auatomy, dissections, physiology, materia medica and therapeutics, pathological anatomy, principles and practice of medicine, medical clinics, clinics for diseases of children, surgical clinics. Third term, dissections, principles and practice of medicine, principles and practice of surgery, ophthalmology, obstetrics, diseases of women, diseases of children, medical clinics, children's clinics, surgical clinics, ophthalmic clinics, gynecological clinics, clinics for diseases of the genito-urinary organs, obstetrical out-clinics.

REQUIREMENTS: For admission, (a) diploma of college or high school: or (b) satisfactory examination in the branches of a good English education, including grammar, orthography, composition, physics.—For graduation: (1) twenty-one years of ago, (2) good moral character: (3) three years study; (1) must have attended three regular courses of lectures; (5) examination in chemistry, anatomy, physiology, materia medica, therapeutics, principles and practice of medicine, clinical medicine, surgery and obstetries.

FEES: Matriculation (paid but once.) \$5; lectures, for each regular term, \$90; this includes demonstraors' and laboratory fees. Graduation fee included in third term,

STUDENTS: Matriculates, 165; graduates, 31; per cent. of graduates to matriculates, 18. Graduates in Illinois, 226.

MEDICAL SCHOOL OF THE UNIVERSITY OF THE STATE OF MISSOURI, COLUMBIA.

[Diplomas recognized by the Illinois State Board of Health.]

Organized, 1845.—From 1847 to 1857 the medical department was situated at St. Louis. See *Missouri Medical College*. No degrees were conferred during the war, 1861-65.—Faculty embraces eight professors, three lecturers, and four examiners for medical degrees, appointed from as many district medical societies.

Course of Instruction: One junior course of thirty weeks' duration, and one senior course of lectures of thirty-four weeks' duration. Course graded, but requiring only two years for completion. Daily examinations and recitations in clinics at dispensary.—Lectures embrace—Junior class; anatomy, physiology, chemistry, materia medica, medical botany, surgery, physics, metric system of weights and measures, laboratory work, dissecting and medical jurisprudence.—Senior class; anatomy, toxicology, surgery, obstetries, practice of medicine, lectures by special professors, laboratory work (optional.) dissecting and medical jurisprudence.

REQUIREMENTS: For admission, none. Before entering the senior class must pass a satisfactory examination upon: (1) English grammar (Harvey) and orthography; (2) rhetoric (Hart); (3) history of the United States (Swinton) and its geography; (4) arithmetic (the four fundamental rules, denominate numbers and common fractions.)—For graduation: (1) twenty-one years of age; (2) good moral character; (3) last course in this school; (4) satisfactory examination upon the prescribed course; (5) regular attendance on clinics and lectures; (6) practical anatomy and chemistry, one course; (7) thesis. Per centages required at final examination are, anatomy and physiology, 85; chemistry, toxicology, pharmacy, (6); all others, 75.

FEES: Lectures, \$40; demonstrator, \$10; graduation, \$5.

STUDENTS: Matriculates, 35; graduates, 5; per cent. of graduates to matriculates, 14. Graduates in Illinois, 28.

REMARKS: No student is allowed to attend both courses the same year. Before he is permitted to present himself before the board of examiners, appointed as noted, he must either have attended two (2) courses of eight or nine months in this institution, or present tickets showing that he has attended at least one course in some regular reputable medical college; and in any event, must pass a satisfactory examination in the subjects embraced in the junior course, previous to his entering the senior class.

#### HUMBOLDT MEDICAL COLLEGE, ST. LOUIS.

[Diplomas recognized by the Illinois State Board of Health.]

Organized, 185—. Extinct since 186—. Graduates in Illinois, 1.

HOMEOPATHIC MEDICAL COLLEGE OF MISSOURI, ST. LOUIS.

[Diplomas of this college, as reorganized, have not been presented to the Illinois State Board of Health.]

Organized, originally, in 1859; reorganized in 1882. Between the years 1869 and 1881, the following homeopathic colleges were organized in St. Louis, viz: The St. Louis College of Homeopathic Physicians and Surgeons, organized 1869; held two sessions and suspended after session of 1870-71. The Homeopathic Medical College of St. Louis, organized 1873. The Hering Medical College, organized 1880. In 1880 a portion of the faculty of the Homeopathic Medical College of Missouri seconded and revived The St. Louis College of Homeopathic Physicians and Surgeons, which again held two sessions; but after the session of 1881-2 this college and the Hering were consolidated with the Homeopathic Medical College of Missouri.—The faculty of this college embraces thirteen professors, and a demonstrator of anatomy.

COURSE OF INSTRUCTION: One regular course of nineteen weeks' duration, annually. Clinics at hospital and dispensary. To secure attendance to the end of the course, the roll of the class is called during the last week of the course of lectures.—Lectures em-

71

brace physiology, histology, diseases of children, operative and clinical surgery, obstetrics, gynecology, nervous and mental diseases, ophthalmology, otology, theory and practice of medicine, materia medica, therapeutics, clinical medicine, hygiene, sanitation, medical jurisprudence, principles and practice of surgery, anatomy, chemistry, toxicology.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study; (4) three full courses of lectures; (5) satisfactory examination on all branches taught in the college.

FEES: Matriculation, \$5; lectures, \$50; graduation, \$25.

REMARKS: Honorary degrees may be conferred on distinguished practitioners on the recommendation of the faculty.—Special examinations for the degree may be held in particular cases.

#### KANSAS CITY MEDICAL COLLEGE, KANSAS CITY.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1864, as the College of Physicians and Surgeons of Kansas City. Assumed its present name 1880.—Faculty embraces twelve professors, one adjunct professor, one lecturer, and two demonstrators of anatomy

Course of Instruction: A preliminary course of two weeks' duration, and a regular course of twenty weeks' duration, annually. Hospital and dispensary clinies.—Graded course recommended but not required.—Lectures embrace anatomy, physiology, chemistry, diseases of children, diseases of genito-urinary organs, materia medica and therapeutics, surgery, principles and practice of medicine, obstetries and diseases of women, ophthalmology and otology, histology and urinary chemistry, attendance on surgical and medical clinics, dissection and laboratory work.

REQUIREMENTS: For admission, none,—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years study; (4) two full courses of instruction; (5) personal examination on the seven principal branches of medicine.

Matriculation (paid but once) \$5; lectures, \$50; demonstrator, \$10; hospital \$3; graduation, \$20.

STUDENTS: Matriculates, 32; graduates, 16; per cent. of graduates to matriculates, 50. Graduates in Illinois, 2.

ST. LOUIS COLLEGE OF HOMEOPATHIC PHYSICIANS AND SURGEONS, ST. LOUIS.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1869.—Suspended after session of 1870-71.—See Homeopathic Medical College of Missouri. Graduates in Illinois, 4.

ST. LOUIS ECLECTIC MEDICAL COLLEGE, ST. LOUIS.

[Diplomas not recognized by the Illinois State Board of Health.] Organized 187-.

HOMEOPATHIC MEDICAL COLLEGE OF ST. LOUIS, ST. LOUIS.

[Diplomas not recognized by the Illinois State Board of Health.]

Organized 1873 .- Extinct.

# AMERICAN MEDICAL COLLEGE, (Eclectic) St. Louis.

[Diplomas recognized conditionally by the Illinois State Board of Health.] Organized 1873.—Faculty embraces eight professors and two adjunct professors.

Course of Instruction: Two regular sessions, each of twenty weeks' duration, nually, both counting in graduation, but none can graduate on two consecutive sessions in the same year. Clinics at hospital and dispensary.—Lectures embrace theory and practice of medicine, chemistry, pharmacy, toxicology, obstetrics, diseases of women and children, principles and practice of surgery, materia medica, therapeutics, anatomy, physiology, ophthamology, otology, microscopy, histology, medical jurisprudence, orthopraxy, diseases of the mind and nervous system, diseases of genito-urinary organs, physical diagnosis, dermatology and venereal diseases.

REQUIREMENTS: For admission, none.—For graduation: (1) good moral character (2) age, twenty-one years or over; (3) three years' study, including the time at lectures and attendance on two full courses of lectures—these to be in different years; one course at least to be in this college; or. (4) two years' reading and three courses of lectures; or, (5) four courses of lectures with intermediate reading; (6) dissections, and attendance at the hospital and college clinics.—Examination for the degree of doctor of medicine will be held at the close of both the winter and spring sessions, but there will be but one public commencement yearly—at the close of the spring session. No diploma will be issued except upon actual attendance and examination. The corporation grants no degrees ad honorarium nor ad eundem.

FEES: Lectures, \$50; graduation, \$25.

STUDENTS: Graduates, 39. Graduates in Illinois, 91.

REMARKS: The Board of Trustees have concluded that after this college year there will be but one annual session; this to be 26 weeks, and that the tuniton per session shall be \$75, graduation fee, \$25; or a scholarship ticket, including graduation, may be purchased for \$150. Graduates from this school must present a written statement, from the dean, that they have studied medicine three years, and have taken two full courses of twenty weeks each, embracing a period of sixteen months, before they are granted certificates by the Illinois State Board of Health.

72

HERING MEDICAL COLLEGE (Homeonathic) St. Louis.

[Diplomas recognized by the Illinois State Board of Health.]
Organized 1880.—See Homeopathic Medical College of Missouri.

NORTHWESTERN MEDICAL COLLEGE OF ST. JOSEPH, ST. JOSEPH.

[Diplomas not recognized by the Illinois State Board of Health.]

Organized 1880.-Faculty embraces seven professors and five lecturers.

COURSE OF INSTRUCTION: One session of nineteen weeks' duration, annually.—Lectures embrace principles and practice of medicine, chemistry, toxicology, diseases of the chest, obstetrics, gynecology, surgery, anatomy, physiology, nervous diseases, materia medica, therapeutics, diseases of children, dental medicine and surgery, minor surgery, medical jurisprudence.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) two full courses, or one course and three years' reputable practice will be sufficient; (4) satisfactory examination; (5) thesis,

FEES; For the entire course, \$35; graduation, \$20.

STUDENTS: Matriculates, 40; graduates, 23; per cent. of graduates to matriculates, 57. Graduates in Illinois, none.

JOPLIN COLLEGE OF PHYSICIANS AND SURGEONS, JOPLIN.

[Diplomas not recognized by the Illinois State Board of Health.]

Organized 1880,—Faculty said to embrace twelve professors and a demonstrator of anatomy.

Course of Instruction: Regular course of nineteen weeks' duration, and a spring course of twelve weeks' duration, annually. Quizzes by the professors daily. Graded course recommended but not required.—Lectures embrace anatomy, minor surgery, physiology, microscopic anatomy, chemistry, materia medica, toxicology, theory and practice of medicine, obstetrics, gynecology, surgery, clinical surgery, diseases of children, otology, ophthalmology, laryngology, electro-therapeutics, cerebral physiology, dental surgery, medical jurisprudence.

REQUIREMENTS: For admission, none.—For graduation: (1) good moral character; (2) twenty-one years of age; (3) such literary qualifications as are deemed necessary for a reasonable standing with the profession and public: (4) three years study; (5) twp full courses of lectures; (6) course of practical anatomy; (7) satisfactory examination in anatomy, physiology, practice of surgery, therapeutics, materia medica, and chemistry. Examinations either written or oral.

FEES: "In order to accommodate all, the fees will be, matriculates, \$5; lectures, \$40; graduation, \$20."

STUDENTS: Graduates, 48; including two ad eundem, and one honorary degree, conferred on residents of fifteen States and Territories, and two foreign countries.

REMARKS: "Like other colleges, this has met with opposition, and what educational institution has not? In this case the opposition has come from non-progressive ignorance, or malicious envy, or a combination of these qualities, as is usually the case where true education is assailed—in part, at least, a spirit that scorns enlightenment and would have the science of medicine revert to the condition it was in before the days of a Harvey or a Jenner. To one and all let it be said that the success of this institution is assured beyond the shadow of a doubt, and we rejoice to say that our facilities are such as will afford ample instruction, while the determination is to send forth to the world educated physicians—not ignorant quacks."—(Extract from Announcement.)

ST. LOUIS COLLEGE OF PHYSICIANS AND SURGEONS, ST. LOUIS.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1881.—Faculty embraces seven professors in general departments, six professors in special departments, two adjunct professors, three lecturers, a demonstrator and an assistant demonstrator of anatomy.

Course of Instruction. A preliminary course of four weeks' duration, a regular course of eighteen weeks' duration, and a spring course of twelve weeks' duration. Three years' graded course recommended, but not required.—Lectures embrace dermatology, diseases of children, medical jurisprudence, histology, ophthalmology, otology, materia medica, toxicology, chemistry, surgery, orthopedic surgery, operative surgery, clinical medicine, hygiene, mental and nervous diseases, anatomy, physiology, obstetrics, diseases of women, practice of medicine.

REQUIREMENTS: For admission, all candidates must be of good moral character and standing. For admission into the first class the applicant must furnish evidence of a good common school education, and in the absence of such evidence he will be examined touching his educational acquirements by a committee of the faculty. One year of "office reading" or more, and a satisfactory examination on the elements of anatomy and chemistry admit into the second class. One year of medical instruction under a reputable practitioner, and one course of lectures in a recognized medical college, with a satisfactory examination upon the branches of study taught in the first and second years' courses of this institution, admit into the graduating class. Druggists in possession of a diploma from an authorized pharmaceutical college, or of a legal license to carry on the business of druggist, will be admitted to the second class. Reputable non-graduate practitioners of medicine, who have acquired legal standing and recognition in their respective States, will be admitted to the graduating class.—For graduation: (I) twenty-one years of age; (2) good moral character; (3) three years' study, comprising one year of office instruction, and attendance upon the regular lecture courses. Students who have not had the benefit of private tuition for the required time, must have attended three courses of lectures, the last of which must be at this college, and must have satisfactorily passed the prescribed examinations.

FEES: Lectures, including matriculation and demonstrator, \$50; graduation, \$25.

STUDENTS: Matriculates, not stated; graduates, 16. Graduates in Illinois, 4.

REMARKS: "Candidates for the ad eundem degree will be admitted to the graduating class one month before the close of the winter se-sion, upon presentation of the diploma of a recognized medical college and furnishing evidence that the applicant has been engaged in the reputable practice of his profession. Examination for this degree will be held by a committee of the faculty and will be in the form of a colloquium upon the practical branches." "The honorary diploma is given only in recognition of pre-eminent merit, and will be conferred solely upon those who have materially contributed to the advancement of medical science. Not more than two honorary diplomas will be granted annually. The conferrent of this degree is the spontaneous act of the board of trustees and faculty, and cannot be obtained by solicitation."

# JOPLIN MEDICAL COLLEGE, JOPLIN,

[Diplomas not recognized by the Illinois State Board of Health.]

Organized 1881.—Faculty embraces seven professors and three lecturers.

Course of Instruction: A regular session of nineteen weeks, and a spring course of twelve weeks' duration, annually. Daily examinations by professors.—Lectures embrace physiology, morbid anatomy, anatomy, obstetrics, gynecology, theory and practice of medicine, surgery, clinical surgery, materia medica, therapeutics, chemistry, toxicology, minor surgery, genito-urinary diseases, diseases of children, medical jurisprudence.

REQUIREMENTS: For admission, none,—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two full courses of lectures; (5) satisfactory examination.—"Candidates should be proficient in at least the common English branches."

FEES: Matriculation, \$5; lectures, \$40; graduation, \$20.

STUDENTS: Matriculates, -; graduates, -. Graduates in Illinois, none,

MEDICAL DEPARTMENT OF THE UNIVERSITY OF KANSAS CITY, KANSAS CITY,

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1881.—Faculty embraces twenty professors, four adjunct professors, and a demonstrator of anatomy.

Course of Instruction: One regular session of twenty-six weeks' duration, annually, "The usual methods of instruction will be followed, embracing clinics, lectures and dissections, together with frequent oral examinations." Clinics at hospital and dispensary. Three years' graded course recommended, but not required.—Lectures embrace principles and practice of surgery, materia medica, pharmacy, therapeutics, general, descriptive and practice of surgery, materia medica, pharmacy, therapeutics, general, descriptive and surgical anatomy, physiology, chemistry, medical jurisprudence, clinical medicine, physical diagnosis, clinical and operative surgery, nervous and mental diseases, ophthalmology, otology, histology, orthopedic surgery, diseases of children, hygiene, diseases of chest, throat and genito-urinary organs, and dermatology.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years' of age; (2) good moral character; (3) "such preliminary education as is clearly requisite for a proper standing with the public and profession"; (4) three years' study; (5) two full courses of lectures; (6) clinical instruction during at least one college course; (7) full course of dissection; (8) full and satisfactory examination on each branch taught.

FEES: Matriculation, \$5; lectures, \$53; demonstrator, \$10; graduation, \$25,

STUDENTS: Matriculates, 25; graduates, 11, including an honorary degree conferred on a matriculate; per cent, of graduates to matriculates, 44.

Graduates in Illinois, none.

#### ST. JOSEPH MEDICAL COLLEGE, ST. JOSEPH.

(Formed by the union of the St. Joseph Hospital Medical College and College of Physicians and Surgeons of St. Joseph.)

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1882.—(Hospital College organized 1876; College of Physicians and Surgeons organized 1878.)—Faculty embraces eleven professors, four lecturers, and a demonstrator of anatomy.

Course of Instruction: One regular course of lectures of nineteen weeks' duration, annually. Clinics at hospital and dispensary. Three years' graded course recommended, but not required.—Lectures embrace chemistry, histology, anatomy, therapeutics and materia medica, principles and praetice of medicine, operative surgery and surgical pathology, medical jurisprudence, genito-urinary diseases, gynecology, mental and nervous diseases, hygiene, dental surgery, diseases of children, surgery, physiology, obstetrics.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two full courses of lectures; (5) dissection "continuously"; (6) hospital clinics; (7) satisfactory examination on all branches taught in this college ("a second examination is held in the course of the summer";) (8) thesis.

FEES: Matriculation, \$5; lectures, \$50; demonstrator, \$10; graduation, \$25,

REMARKS: The second (summer) examination seems to be for "candidates who are well prepared in certain departments, but who do not pass an entirely satisfactory examination in certain other departments, and who may, at the pleasure of the faculty, be conditioned in those departments, not exceeding three in number, in which they have been found to be deficient. Candidates thus conditioned will be permitted to present themselves for a second examination in the departments in which they have failed, at the end of six months after their first examination. If they then pass satisfactory examinations in the departments in which they have been conditioned, they will be recommended to the board of trustees for the degree."

# NEBRASKA.

## OMAHA MEDICAL COLLEGE, OMAHA.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1881. The outgrowth of a preparatory school, established 1880, under the name of the Nebraska School of Medicine.—Faculty embraces fourteen professors and a demonstrator of anatomy.

Course of Instruction: One annual course of twenty-two weeks' duration.—Students not attending regularly, or leaving before the close of the session, are catalogued as partial course students. Three years 'graded course recommended, but not required. Daily examinations by the faculty.—Lectures embrace anatomy, physiology, chemistry, materia medica, clinical surgery, obstetrics, diseases of women, diseases of children, practice of medicine, principles and practice of surgery, therapeutics, mental and nervous diseases, medical jurisprudence, histology, pathology, ophthalmology, otology, laryngology.

REQUIREMENTS: For admission, (a) satisfactory evidence of good moral character; (b) eighteen years of age; (c) "creditable English education,"—For graduation: (l) twenty-one years of age; (2) good moral character; (3) "such preliminary education as is elearly requisite for a proper standing with the public and the profession;" (4) three years' study; (5) two full courses; (6) clinical instruction for one session; (7) practical anatomy, one course; (8) full and satisfactory written and oral examination on each branch taught.

FEES: Matriculation, \$5; demonstrator, \$10; lectures, \$35; graduation, \$25.

STUDENTS: Matriculates, 33, (including six partial course students); graduates, 8; per cent, of graduates to matriculates, 23. Graduates in Illinois, none.

#### NEW HAMPSHIRE.

MEDICAL DEPARTMENT OF DARTMOUTH COLLEGE, (New Hampshire Medical Institute,)
HANOVER.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1797.—Faculty embraces eleven professors, one lecturer, and an instructor in urinary analysis.

Course of Instruction: One regular course of sixteen weeks' duration, one recitation course of twenty-four weeks' duration, annually. "Clinical instruction wil be given to as large an extent as circumstances will admit."—Lectures as follows: The courses in chemistry, surgery and practice consist of sixty-six lectures each; in anatomy and

physiology, ninety-nine lectures; in obstetrics and therapeutics, forty-four lectures each; in gynecology, of twenty-two lectures; shorter courses in medical jurisprudence, mental diseases, ophthalmology, laryngology, pharmacy, urinary analysis.

REQUIRFMENTS: For admission, applicants must be eighteen years of age, and unless already matriculants in medicine or graduates of some reputable college, academy or high school, will be examined as to their fitness for entering upon and appreciating the technical study of medicine. They will be expected to be familiar with the elementary principles of physics, (light, heat, electricity, etc.) on entrance.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) two full courses of lectures; (4) three full years' study; (5) one course of dissection; (6) thesis. Two examinations annually.

FEES: Matriculation, \$5; lectures, \$77; graduation, \$25; recitation term, \$40.

STUDENTS: Graduates, 40. Graduates in Illinois, 21.

#### NEW JERSEY.

# MEDICAL SOCIETY OF NEW JERSEY.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1766.—Authorized to confer the degree, in 1866. The section of the act to reorganize the Medical Society of New Jersey and conferring this power, is as follows: And be it enacted. That the Society shall have the authority to confer the degree of M. D., under such rules and regulations as they may adopt, which degree shall be deemed sufficient evidence of a regularly educated and qualified practitioner of the healing art

Regulations of the society concerning the conferring of the degree of doctor of medicine and honorary membership:

- SEC. 1. Candidates for the degree of medicinæ doctor, may apply to any district society of this State, and shall be admitted to examination under the following rules and regulations,
- 1st. Each district society shall appoint annually, or pro re nata, a committee of not less than five members, who shall conduct the examinations.
- 2d. All examinations shall be in the presence of the society at a regular meeting; and no candidate shall be examined until he has given satisfactory evidence of having reached the age of twenty-one years; is of good moral character; and has pursued his medical studies under the care of some regular practitioner for the term of three years; including two courses of lectures in some medical institution in affiliation with the American Medical Association. If he has not graduated at some academic college, then the society shall be satisfied that his preliminary education has been such as to qualify him for the study and practice of medicine.
- 3d. The examination shall extend to all the branche taught in the medical schools recognized as aforesaid; and the candidate shall then be balloted for by the society; and if he shall receive the approving votes of two-thirds of all the members present, the presiding officer shall give a certificate to that effect to the candidate.
- 4th. This certificate may be presented at the next or any subsequent regular meeting of this society, not extending beyond the period of three years, with a written thesis upon some medical subject; and if upon a ballot they shall be approved by a majority of the members present, the candidate, upon the payment of fifteen dollars, shall be entitled to receive a diploma.
- 5th. The honorary degree of M. D.. may be conferred by the society, by a vote by ballot of three-fourths of the members present; provided, the nomination shall have been made at a preceding meeting and provided the candidate has been a regular practitioner for the period of seven years.
- SEC. 2. Practitioners of medicine of this or any other State may be admitted as honorary members by a vote by ballot of the society, provided that the nominations be made at a previous meeting. The nomination shall be referred to a special committee of three appointed by the president, and the nominee shall not be considered as eligible to election till the committee report. The privilege of honorary membership shall not confer the right to vote.

Eight or ten diplomas have been conferred, the last two being granted at the meeting of the society in 1881.

# NEW YORK.

College of Physicians and Surgeons (Medical Department of Columbia College,) New York City.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1807.—Became the Medical Department of Columbia College in 18—. The original medical department of Columbia College was organized in 1768, suspended during the war of the Revolution, and became extinct in 1810.—Faculty embraces sixteen professors, two adjunct professors, one demonstrator, and two assistant demonstrators of anatomy, and twenty-eight clinical assistants.

76

Course of Instruction: One regular course of twenty-eight weeks' duration annually. Course of Instruction: One regular course of twenty-eight weeks' duration annually. Clinics at hospitals and dispensaries; attendance optional and admission free. Recitations are held daily; attendance, optional; fees required, \$10. Three years' graded course recommended, but not required. The instruction at this college consists of didactic leetures, with demonstrations, clinical teaching, recitations, and practical teaching in subjects involving manipulation.—Lectures embrace (1) anatomy; (2) physiology and hygiene; (3) physics, chemistry and medical jurisprudence; (4) materia medica and therapeutics; (5) obsterries and the diseases of women and children; (6) surgery; (7) pathology and practical medicine; opthalmology, otology, venereal diseases, mental and nervous diseases, laryngoscopy, dermatology. Attendance upon the above courses of lectures is a prerequisite for graduation. is a prerequisite for graduation,

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two full courses; (5) satisfactory examination in seven branches; (8) thesis.—The examinations for the degree of doctor of medicine are in writing, and are held twice a year, viz.; (1) immediately after the close of the lectures of the college year in May; (2) during the second and third weeks of September. According to the merits of his thesis and examinations three results of the latter are possible in the case of a candidate for the degree of M. D.: 1. He is "passed" when his thesis and examinations have been satisfactory in each and all of the seven principal branches of medical teaching. 2. He is "conditioned" when the average merit of his thesis and examinations has been satisfactory, while in one or more branches he has been found deficient. In this case the candidate can proceed to his degree only on the condition that he first pass a re-examination in the deficient branch or branches, not sooner than at the next regular semi-annual examination. 3. He is "rejected" when the average merit of his thesis and examinations has been unsatisfactory; in this case the randidate must be re-examined in all the seven branches, but the writing of a new thesis is rarely required.

Fers. Matriculation \$5: lectures \$140; demonstrator, \$10; graduation \$30.

FEES: Matriculation, \$5; lectures, \$140; demonstrator, \$10; graduation, \$30.

STUDENTS: Matriculates, 547; graduates, 115; per cent. of graduates to matriculates. 21. Graduates in Illinois, 46.

REMARKS: Practical instruction is given in various departments, attendance on which is optional, except practical anatomy. Fees for each course average \$15.

College of Physicians and Surgeons of the Western District of New York. FAIRFIELD.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1812. Extinct 1840. During its existence it afforded instruction to 3,123 students, and graduated 589.

Graduates in Illinois, 9.

GENEVA MEDICAL COLLEGE, GENEVA.

[Diplomas recognized by the Illinois State Board of Health.]

Organized, 1839. Extinct. Graduates in Illinois, 17.

NEW YORK MEDICAL COLLEGE, NEW YORK CITY.

[Diplomas recognized by the Illinois State Board of Health.]

Organized, 185-. Extinct. Graduates in Illinois, 2.

ALBANY MEDICAL COLLEGE, (Medical Department, Union University,) ALBANY.

[Diplomas recognized by the Illinois State Board of Health.]

Organized, 1839, and become connected with Union University in 1873.—Faculty embraces twelve professors, two adjunct professors, and a demonstrator of anatomy.

Course of Instruction: One regular (winter) session of twenty-three weeks' duration, and one reading (spring) session of eight weeks' duration, annually. Written examinations are held monthly; clinics at hospitals and dispensary; three years' graded course recommended, but not required—Lectures embrace anatomy, histology, pathological anatomy, physiology, materia medica and therapeutics, diseases of the throat, chemical philosophy, chemistry, theory and practice of medicine and clinical medicine, medical jurisprudence, hygiene, psychological medicine, diseases of nervous system, fractures and dislocations, principles and practice of surgery, clinical surgery, surgical pathology, operative surgery, dermatology, ophthalmology, otology, obstetrics, diseases of women.

REQUIREMENTS: For admission. (a) graduates from recognized colleges, scientific schools or medical institutions, and (b) students presenting certificates of competency from the censors of the medical society of the county from which they come, will not be required to pass the preliminary examination on joining the school. (c) All others will be required to pass an examination, by a page written at the time, of which the orthography.

grammatical construction and penmanship will be considered, and in arithmetic, grammar, geography and elementary physics.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years study; (4) two full courses of lectures, the last in this school; (5) "satisfactory examination in the several branches of medicine and surgery". Final examinations conducted chiefly in writing, and are intended to be thorough, but just to the student. Regular and punctual attendance is required.

FEES: Matriculation, \$5; lectures, \$100; demonstrator. \$10: graduation, \$30; laboratory, \$10. STUDENTS: Matriculates, 170; graduates, 54; per cent. of graduates to matriculates, 34. Graduates in Illinois, 34.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF THE CITY OF NEW YORK, NEW YORK, (University Medical College.)

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1841.—Faculty embraces fourteen professors and one adjunct professor, and a demonstrator of anatomy, five clinical lecturers, seven laboratory instructors, twenty-two-clinical assistants.

Course of Instruction: A preliminary winter session of two weeks' duration, a regular winter session of twenty-one weeks' duration, and a spring session, almost exclusively clinical, of ten weeks' duration, annually. The instruction consists of didactic and clinical lectures, daily facu'ty examinations, and practical demonstration of subjects by manipulation.—Lectures embrace physiology, histology, otology, pathology, practice of medicine, materia medica, therapeutics, diseases of the nervous system, surgery, clinical surgery, obstetrics, diseases of women and children, surgical pathology, surgical anatomy, medical jurisprudence, diseases of the mind, physiological chemistry, ophthalmology, orthopedic surgery, chemistry, medical botany.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) "two winter sessions of lectures;" (4) three years' study; (5) one course of practical anatomy; (6) one course of chemical laboratory instruction; (7) satisfactory written examinations on surgery, chemistry, practice of medicine, materia medica, anatomy, physiology, and obstetrics.—Rejected candidates will not be permitted to apply for a re-examination for one year. Honorary degrees are not granted. Two commencements take place annually, at either of which the candidates who have complied with the above requirements may graduate. The first is at the close of the winter; the second at the close of the spring session.

FEES: Matriculation. \$5; lectures, \$140; demonstrator, \$10; graduation, \$30; private instruction in practical branches, averaging \$12 per course.

STUDENTS: Matriculates, 575; graduates, 213; per cent. of graduates to matriculates, 37. Graduates in Illinois, 65.

# MEDICAL DEPARTMENT OF THE UNIVERSITY OF BUFFALO, BUFFALO, [Diplomas recognized by the Illinois State Board of Health,]

Organized 1846.—Faculty embraces nine professors, four lecturers, and a demonstrator of anatomy. One regular term of twenty-one weeks' duration.

Course of Instruction: Clinical teaching (at the hospitals and dispensary) occupies an important and prominent position. Systematic quizzes by the professors four or five times a week.—Lectures embrace principles and practice of medicine, clinical medicine, principles and practice of surgery, clinical surgery, physiology, microscopy, operative surgery, materia medica, hygiene, anatomy, obstetrics, gynecology, chemistry, toxicology, mental diseases, ophthalmology, otology, dematology, syphilis, histology. Personal instruction in practical branches, for which a fee, averaging \$10, is charged.

REQUIREMENTS: For admission, "a certificate from the student's preceptor of his moral character, and that he is duly entered and properly qualified to study medicine, should be presented on matriculating. The responsibility of sufficient preliminary education rests, of necessity, with the private instructor."—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study; (4) dissection during one course; (5) two full courses of lectures; (6) satisfactory examination in the several departments; (7) thesis.

FEES: Matriculation, \$5; lectures, \$100; demonstrator, \$5; graduation, \$25.

STUDENTS: Matriculates, 172; graduates, 65; per cent. of graduates to matriculates, 38. Graduates in Illinois, 24.

SYRACUSE ECLECTIC MEDICAL COLLEGE, SYRACUSE.

[Diplomas recognized by the Illinois State Board of Health.]

Organized, 185-. Extinct. Graduates in Illinois, 2.

# ROCHESTER ECLECTIC MEDICAL COLLEGE, ROCHESTER.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized, 1851.—Lectures delive ed three or four sessions. Extinct.

#### LONG ISLAND COLLEGE HOSPITAL, BROOKLYN.

[Diplomas recognized by the Illinois State Board of Health.]

Organized, 1860.—Faculty embraces ten professors, one adjunct professor, eleven lecturers, a demonstrator of anatomy, and twelve clinical assistants.

Course of Instruction: During the reading term fifteen lecturers (mostly professors and lecturers during the regular term.) give instruction. One regular term of twenty weeks' duration, and one reading and recitation term of sixteen weeks' duration, annually. Graded course, extending over nine months of two years, is recommended, but not required; sixty per cent. of the entire class have taken this course for the last three years.—Lectures embrace principles and practice of medicine, clinical medicine, chemistry, toxicology, anatomy, medical and surgical diseases of women, operative and clinical surgery, physiology, sanitary science, histology, general pathology, surgery, materia medica, therapeutics, obstetries, diseases of children, ophthalmology, otology, dermatology, laryngology, nervous diseases, practical chemistry, genito-urinary diseases, physical diagnosis, diseases of the kidneys.

REQUIREMENTS: For admission: "The faculty earnestly desire to co-operate with the profession in securing a higher grade of prolliminary education before students enter upon professional studies; but until some uniform grade is agreed upon by the leading colleges of the country, the responsibility of such qualifications must rest with the private instructor. For the purpose of testing the general literary qualifications of the students before graduation, frequent written examinations will be required hereafter throughout the whole course of instruction, and these examinations will enter into the graduation of the student on his final examination."—For graduation: (1) twenty-one years of age; (2) good moral character: (3) three years' study; (4) two full courses of lectures, not completed in the same twelvemonth; (5) practical anatomy, to the extent of having dissected each region of the body; (6) one course of practical chemistry and urine analysis: (7) one course in practical histology and pathology; (8) pass satisfactory examinations, both oral and written, in chemistry, histology, anatomy, physiology, materiamedica, therapeutics, pathology, gynecology, obstetrics, surgery, and practice of medicine. But one examination each year.

FEES: Matriculation, \$5; demonstrator, \$5; chemical laboratory, \$5; pathological laboratory, \$5; lectures, \$100; reading term, \$40; graduation, \$25.

STUDENTS: Matriculates, 156; graduates, 61; per cent. of graduates to matriculates, 39. Graduates in Illinois, 34.

REMARKS: Personal clinical instruction is thoroughly carried out at this college—the college being organized for the purpose of uriting a medical school and hospital.

NEW YORK HOMEOPATHIC MEDICAL COLLEGE, NEW YORK CITY.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1860.—Faculty embraces nineteen professors and four assistant professors.

COURSE OF INSTRUCTION: One regular course of twenty-two weeks' duration annually. Three years' graded course recommended, but not required. Daily quizzes by the students' society. Clinics at hospitals and dispensaries,—Lectures embrace anatomy, diseases of genito-urinary organs, materia medica, therapeutics, theory and practice of medicine, physical diagnosis, diseases of the heart and lungs, mental and nervous diseases, clinical ophthalmology and otology, gynecology, obstetrics, medical jurisprudence, physiology, chemistry, toxicology, diseases of children, dermatology, general pathology, electro-therapeutics, electro-surgery.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two full courses of lectures; (5) one course of practical anatomy; (6) satisfactory examination in each department; (7) thesis.

FEES: Matriculation, \$5; lectures, \$125; demonstrator, \$10; graduation, \$30.

STUDENTS: Matriculates, 146; graduates, 36; per cent. of graduates to matriculates, 25. Graduates in Illinois, 15.

BELLEVUE HOSPITAL MEDICAL COLLEGE, NEW YORK CITY.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1861.—Faculty embraces eighteen professors, fifteen assistants to chairs, three lecturers, two demonstrators and two assistant demonstrators of anatomy.

Course of Instructions and two assistant demonstrators of all allowing the course of Instructions. One regular (winter) term of twenty-four weeks' duration and one spring session of twelve weeks' duration; three years' graded course recommended but not required; clinical lectures are given at hospitals and dispensaries; examination quizzes are held by the faculty weekly; these examinations are free and confined to candidates for graduation.—Lectures embrace principles and practice of medicine, clinical medicine, principles and practice of surgery, clinical surgery, operative surgery, obstetries, diseases of women and children, clinical midwifery, materia medica, therapeutics, physiology, physiological anatomy, general, descriptive and surgical anatomy, chemistry, toxicology, nervous diseases, ophthalmology, otiology, eutaneous and genitourinary diseases, medical jurisprudence, pathology, diseases of the throat. Private courses on practical subjects are given by the faculty and instructors; average fee, \$20.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) proper testimonials of character; (3) three years' study; (4) two full courses of lectures;

(5) satisfactory examination in each of the seven departments of instruction; viz., practice of medicine, surgery, obstetrics, materia medica and therapeutics, physiology, anatomy, and chemistry. The examinations upon practice of medicine and surgery include diseases of the nervous system, pathological anatomy, ophthalmology, and diseases of the skin; (6) one course of practical anatomy. No honorary degrees conferred. There are three regular examinations for the degree: one at the close of the winter session, one at close of the spring session, and one during the first week in October. The June and October examinations are exclusively for the benefit of those students who, have attended the courses of lectures required, the last course being at this college, but whose time of study does not expire until the summer or fall. Graduates of other accredited colleges are examined in all the departments, the same as undergraduates, and must fulfil all the requirements demanded of undergraduates. The faculty will not grant must fulfil all the requirements demanded of undergraduates. The faculty will not grant a degree to any graduate of three or more years' standing who does not exhibit to the secretary a certificate of membership in some medical society entitled to representation in the American Medical Association. This rule is invariable.

FEES: Matriculation, \$5; lectures, \$140 demonstrator, \$10; graduation, \$30.

STUDENTS: Matriculates, 379; graduates, 118; per cent. of graduates to matriculates, 31. Graduates in Illinois, 94.

# NEW YORK MEDICAL COLLEGE AND HOSPITAL FOR WOMEN, NEW YORK CITY.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1863.—(Information taken from Report of U. S. Commissioner of Education. 1880).—Faculty embraces eighteen professors and lecturers.

Course of Instruction: One annual course of twenty weeks' duration.

REQUIREMENTS: For graduation: (1) three full courses of lectures; (2) three years' study.

FEES: Matriculation, \$5; lectures, \$70; demonstrator, \$5; graduation, \$10. STUDENTS: Matriculates ('79-'80,) 41; graduates ('80,) 6. Graduates in Illinois, 2.

#### ECLECTIC MEDICAL COLLEGE OF THE CITY OF NEW YORK.

[Diplomas recognized conditionally by the Illinois State Board of Health.]

Organized 1865.—Faculty embraces eleven professors and two lecturers.

Course of Instruction: One course of thirty weeks' duration, annually; clinics at hospitals and dispensary.—Lectures embrace anatomy, descriptive surgery, principles and practice of and minor surgery, theory and practice of medicine, therapeutics, materia medica, clinical ophthalmology, dermatology, laryngology, obstetrics, chemistry, medical literature, forensic medicine, diseases of children, physiology, pathology, medical jurisprudence, toxicology, electro-therapeutics, diseases of women.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age. (2) three years' study under the supervision of a reputable physician; (3) two full terms of instruction; (4) a thesis on some medical subject.

FEES: Matriculation, \$5; lectures, \$50; demonstrator, \$10; graduation, \$30.

STUDENTS: Matriculates, 146; graduates, 50; per cent. of graduates to matriculates, 34. Graduates in Illinois, 2.

# Woman's Medical College of the New York Infirmary, New York City.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1868.—Faculty embraces twelve professors, four lecturers, four instructors, and a demonstrator of anatomy.

Course of Instruction: One session of thirty-one weeks' duration annually. The plan of instruction in this school is arranged to secure a gradation of studies through the three years of the student's course. For this purpose, students must attend three entire sessions. All students will be required to attend a recekly recitation in the studies proper sessions. All students will be required to attend a weekly recitation in the studies proper to their year, these recitations forming an essential part of the course.—Lectures embrace, first year: principally the elementary branches of anatomy, physiology, materia medica, chemistry, and practical work in the anatomical rooms and chemical laboratory; second year: continue these branches, and hygiene, medicine, surgery, obstetrics, therapeutics, histology, gynecology, diseases of children, ophthalmology, otology, dermatology, nervous diseases; third year: instructions in the latter departments will be continued, and the students will engage in practical medical work under the direction of their teachers, and be required to furnish clinical reports of cases so attended.

REQUIREMENTS: For admission, students entering the graded college course, unless they bring a diploma from some recognized literary school, will be required to pass a preliminary examination in the following branches: 1. Orthography, English composition and penmanship, by means of a page written at the time and place of examination. 2. Definitions and synonyms as found in "The Scholar's Companion." 3. Latin, through declensions and conjugations. 4. Arithmetic in denominate numbers, fractions, proportion, percentage, and the roots. 5. Algebra, Davies' Elementary, through simple equations. 6. Geometry, Davies' Legendre, first and second books. 7. Botany, physics and chemistry, as found in "Science Primers," edited by Profs. Huxley, Roscoe, and Balfour Stewart.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) have a good general education; (4) three years in the study of medicine, during which (5) they

must have attended three winter sessions of lectures, and received clinical instruction according to the course laid down by this school; (6) a thesis on some medical subject; (7) satisfactory examinations before the faculty and the board of examiners will also be required. A course of lectures in any recognized school will be accepted as one of the terms required, but the last course before graduation must have been attended at this college. The faculty also reserve the right to refuse examination to a student on the ground of what they deem to be moral or mental unfitness for the profession. An annual course of lectures in any accredited school will be received as equivalent to a course of lectures in this school, but a certificate of reading under a preceptor will not be received as equivalent to a course of lectures.

FEES: Matriculation, \$5; demonstrator, \$10; lectures, \$105; graduation, \$30. Whole cost of three or more courses, \$265.

STUDENTS: Matriculates, 49; graduates, 9; per cent. of graduates to matriculates, 18. Graduates in Illinois, 2.

NEW YORK FREE MEDICAL COLLEGE FOR WOMEN, NEW YORK CITY.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1871.—Probably extinct, as no reply has been received to numerous letters of inquiry. Graduates in Illinois, 3.

College of Medicine of Syracuse University, Syracuse.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1872.—Faculty embraces eleven professors, three lecturers and five instructors.

Course of Instruction: One regular course of lectures of thirty-two weeks' duration, annually. Attendance at college for three years' graded course recommended, but not absolutely required, as students can graduate on two years' course under certain conditions. (See requirements for admission.) Students are divided into three classes, according to their proficiency and time of study. Studies—First year: Anatomy, physiology, chemistry, microscopy, histology, and botany, practical chemistry and histology throughout the year. Second year: Anatomy, physiology, chemistry, materica medica, practice, surgery, pathology and clinics, hygiene, otology, short course of medical chemistry. Third year: Therapeutics, practice, surgery, obstetrics, diseases of children, pathology, gynecology, forensic medicine and ophthalmology, with clinics and dental surgery.

REQUIREMENTS: For admission, evidence of possessing a fair preliminary education or examination in the branches of a common English education. Students who have already pursued the study of medicine to some extent, may be examined and promoted to such advanced standing as their acquirements entitle them to. Candidates for the second year will come prepared for the examination in anatomy on the bones and muscles, and on the shoulder, elbow, two radio-ulnar, wrist, hip, knee and ankle articulations; on nutrition in physiology; on the inorganic part of Attfield's chemistry; on the optical principles of the microscope; on part I of Harris and Power's Manual for the Physiological Laboratory; and on the principles of botany.—For graduation: (I) twenty-one years of age; (2) good character; (3) three years' study, the last of which at least must have been spent in this school; (4) satisfactory examinations.

FEES: Matriculation, \$5; lectures, \$100; chemical laboratory, \$10; graduation, \$25.

STUDENTS: Matriculates, 45; graduates, 11; per cent. of graduates to matriculates, 24; Graduates in Illinois, 5.

REMARKS: "Those who expect to receive the degree of M. D. by a short and easy way, will not come here; or coming, will not remain."—[Extract from Annual Announcement.

UNITED STATES MEDICAL COLLEGE, NEW YORK CITY.

[Diplomas recognized conditionally by the Illinois State Board of Health.]

Organized 1878.—Faculty embraces twelve professors, one lecturer, a demonstrator of anatomy and a prosector.

Course of Instruction: Three years' graded course recommended, but not required. The method of instruction adopted in this college consists of lectures, clinical instruction, experiments in the laboratory, personal teaching, interrogations and recitations.—Lectures embrace anatomy, physiology, general chemistry and materia medica, medical chemistry, toxicology, medical botany, pharmacy, therapeutics, surgical anatomy, pathological anatomy, psychological science, and homeopathic materia medica, hygiene, principles and practice of medicine, obstetrics, diseases of women and children, surgery, magnetic and electro-therapeutics, medical jurisprudence.

· 81

REQUIREMENTS: For admission, none.—For graduation: "This college will be governed by the laws of the State. Any person of good moral character, who has attained the age of twenty-one years, received a good English education, pursued the study of medicine and sciences connected therewith for at least three years after the age of sixteen years, and received instruction from some physician and surgeon fully qualified to practice his profession, until he is qualified to enter a medical college, and also after that age attended two complete courses of lectures delivered in an incorporated medical college, and sustained a satisfactory and honorable examination in every department, is legally entitled to receive the degree of doctor of medicine. He must also present a thesis."

FEES: Matriculation, \$5; lectures, \$75; demonstrator, \$10; graduation, \$30.

STUDENTS: Matriculates, 83; graduates, 36; per cent. of graduates to matriculates, 43. Graduates in Illinois, 2.

COLLEGE OF PHYSICIANS AND SURGEONS OF BUFFALO.

[Diplomas not recognized by the Illinois State Board of Health.] Organized 1879. The institution is probably extinct.

THE REGENTS OF THE UNIVERSITY OF NEW YORK STATE.

(Diplomas conferred by this body have not been presented to the Illinois State Board of Health.)

Law conferring the power of granting diplomas passed in 1872, from which the following is taken;

The regents of the University shall not grant a diploma conferring the degree of doctor of medicine upon any one who has not, for at least three years after the age of sixteen, pursued the study of medical science with some physician or surgeon duly authorized to practice, and also attended two complete courses of all the lectures delivered in an incorporated medical college. The regents of the University in the State of New York are authorized to appoint one or more boards of examiners in medicine, which shall consist of not less than seven regularly licensed physicians and surgeons in the State. This Board shall examine all candidates, referred to them by the chancellor, in anatomy, physiology, materia medica; pathology, histology, clinical medicine, chemistry, surgery, midwifery, and therapeutics.

All persons who are over twenty-one years of age, of good moral character, and can produce to the chancellor satisfactory proof that they have competent knowledge of all the branches of learning taught in the common schools of the State, and of the Latin language, and have diligently studied medicine for not less than three years, can apply to the chancellor for an examination by a board of examiners. The fee for examination shall be \$25. The regents shall grant, to any candidate who has been recommended by five members of the board of examiners, a diploma conferring the degree of Doctor of Medicine from the University of New York. Ten dollars must be paid for this diploma.

#### NORTH CAROLINA.

COLLEGE OF PHYSICIANS AND SURGEONS, WILMINGTON.

Organized, 1871. No course of lectures was ever delivered.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF NORTH CAROLINA, CHAPEL HILL.

Organized, 1796.—This school only gives instruction in medicine, and does not now grant degrees. It granted diplomas in former years, none of which have been presented to the ILLINOIS STATE BOARD OF HEALTH.

## OHIO.

# MEDICAL COLLEGE OF OHIO, CINCINNATI.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1819.—Faculty embraces ten professors, six assistants to chairs, three lecturers, a demonstrator of chemistry, and a demonstrator and an assistant demonstrator of anatomy.

Course of Instruction: A preliminary session of four weeks' duration; a regular session of twenty weeks' duration; a spring term of six weeks' duration, annually. Clinics at hospital and dispensary.—Lectures embrace ophthalmology, otology, anatomy,

<u>-</u>

clinical surgery, materia medica, therapoutics, clinical medicine, theory and practice of medicine, principles and practice of surgery, obstetrics, discuses of children, gynecology, physiology, medical chemistry, clinical laryngology, pathology, dermatology.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) three years' study; (3) two full courses of lectures; (4) satisfactory examination on the seven branches of medicine.—After the session of 1882-83 all candidates will be required to produce evidence of having dissected twice, and of having attended two courses of clinical lectures at hospital.

FEES: Matriculation, \$5; lectures, \$75; demonstrator, \$5; elinical laboratory, (optional), \$5; lospital, \$5; graduation, \$30,

STUDENTS: Matriculates, 341; graduates. 104; per cent. of graduates to matriculates, 30. Graduates in Illinois, 168.

#### WORTHINGTON MEDICAL COLLEGE, WORTHINGTON.

[Diplomas recognized by the Illinois State Board of Health.]

Organized, 1832. Extinct 1845. Graduates in Illinois, 1.

MEDICAL DEPARTMENT OF THE WILLOUGHBY UNIVERSITY, WILLOUGHBY, LAKE COUNTY.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1835.—Extinct. No other information has been received. Graduates in Illinois. I.

COLLEGE OF PHYSICIANS AND SURGEONS, COLUMBUS.

[Diplomas have not been presented to the Illinois State Board of Health.]

No definite information concerning this college has been received.

PHYSIO-MEDICAL COLLEGE (Cincinnati Literary and Scientific Institute,) CINCINNATI.

[Early diplomas recognized by the Illinois State Board of Health.]
Organized 1836.—Graduated classes until 1880, when its founder and sole professor was removed by death.
Graduates in Illinois, 8.

PHYSIO-ECLECTIC MEDICAL COLLEGE, CINCINNATI.

[Diplomas not recognized by the Illinois State Board of Health.]
Organized 1876. Extinct.

CINCINNATI COLLEGE OF MEDICINE AND SURGERY, CINCINNATI.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1840.—Faculty embraces seven professors, three lecturers, demonstrators of chemistry and of anatomy.

Course of Instruction: One regular session of twenty-three weeks' duration. Students may have, if they desire, their course of instruction graded.—Lectures embrace materia medica, principles and practice of medicine, clinical medicine, principles and practice of surgery, orthopedic surgery, obstetries, gynecology, physiology, genitourinary and venereal diseases, chemistry, anatomy, ophthalmology, otology, laryngology, diseases of children, pathology.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) two full courses of lectures; (4) three years, study; (5) thesis; (6) satisfactory examination; (7) practical anatomy for one session; (8) hospital clinics for one session.

REMARKS: "The faculty will publicly revoke the diploma of any graduate of this college who shall at any time engage in the practice of any irregular system of medicine."

FEES: Matriculation, \$5; demonstrator (including material,) \$10; hospital, \$5; lectures, \$35; graduation, \$25.

STUDENTS: Matriculates, not given; graduates, 34. Graduates in Illinois, 60.

#### MEDICAL DEPARTMENT OF THE WESTERN RESERVE UNIVERSITY, CLEVELAND,

(Clereland Medical College.)

#### [Diplomas recognized by the Illinois State Board of Health.]

Organized 1843, re-organized 1831.—Faculty embraces sixteen professors and a demonstrator of anatomy, one regular term of twenty-four weeks' duration, and one reading term of twelve weeks' duration, and a practitioners course of four weeks' duration, annually. Graded course recommended, but not required. The plan of instruction includes lectures, clinics, recitations, quizzes and practical demonstrations—Lectures embrace chemistry, toxicology, anatomy, physiology, histology, materia medica and therapeutics, obstetries and diseases of children, theory and practice of medicine, principles of surgery, clinical surgery, clinical medicine, pathology and diseases of the eye and ear, physical diagnosis, diseases of women, medical jurisprudence, state medicine; orthopedic surgery.

Requirements: For admission, students will be expected to give satisfactory evidence to the registrar of a good ordinary English education.—For graduation: (1) good English education; (2) twenty-one years of age; (3) three years study; (4) two full courses of lectures; (5) thesis.

FEES: Matriculation; \$5; lectures (including hospital,) \$50; graduation, \$30.

STUDENTS: Matriculates, 191; graduates, 83; per cent. of graduates to matriculates, 43. Graduates in Illinois, 43.

#### ECLECTIC MEDICAL INSTITUTE, CINCINNATI.

#### [Diplomas recognized conditionally by the Illinois State Board of Health.]

Organized 1843.—Faculty embraces eight professors and a demonstrator of anatomy.

Course of Instruction: Two courses each of nineteen weeks' duration annually. Three years' graded course recommended but not required.—Lectures embrace obstetrics, diseases of women, materia medica, therapeutics, pathology, practice of medicine, surgery, anatomy, clinical medicine, clinical surgery, physiology, chemistry, anatomy.

REQUIREMENTS: For admission, none.—For graduation: "Students applying for graduation must have read medicine for three years and attended two full courses of lectures in different years, the last of which has been in this institution; or have read two years and attended three courses of lectures; or have attended four courses of lectures without previous reading. Examinations for the degree of Doctor of Medicine will be held at the close of both winter and spring sessions, but there will be but one public commencement yearly—at the close of the spring session, and all diplomas will bear date of the first Tuesday in June. No diplomas will be issued except on actual attendance and examination. The corporation grants no degrees in honorarium or ad eundem."

FEES: Lectures, including matriculation and demonstrator's fee, \$75; graduation, \$25.

STUDENTS: Matriculates, (both courses), 316; graduates, (both courses), 113; per cent. of graduates to matriculates, 36. Graduates in Illinois, 257.

REMARKS: Graduates from this school must present a written statement, from the Dean, that they have studied medicine three years, and have taken two full courses of twenty weeks each, extending over a period of sixteen months, before they are granted certificates by the ILLINOIS STATE BOARD OF HEALTH.

#### STARLING MEDICAL COLLEGE, COLUMBUS,

#### [Diplomas recognized by the Illinois State Board of Health.]

Organized 1847.—Faculty embraces ten professors, five lecturers, and a demonstrator of anatomy.

Course of Instruction: One annual session of twenty-three weeks' duration. Prompt attendance on the beginning of the session will be required. Graded course of three years recommended but not required.—Lectures embrace anatomy, physiology, surgery, theory and practice of medicine, obstetrics, diseases of women, surg-cal diseases of women, insanity, diseases of children, materia medica, therapeutics, ophthalmology, otology, histology, pathology, toxicology, chemistry, medical jurisprudence.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age, (2) three years' study, (3) two full courses, (4) successful examination, (5) thesis.

FEES: Matriculation, \$5; demonstrator, \$5; lectures, \$40; graduation, \$25.

STUDENTS: Matriculates, 116; graduates, 52; per cent. of graduates to matriculates, 45. Graduates in Illinois, 30.

#### HOMEOPATHIC HOSPITAL COLLEGE, CLEVELAND.

#### [Diplomas recognized by the Illinois State Board of Health.]

Organized 1850, as the Western Homeopathic Medical College.—Faculty embraces eight professors and five lecturers.

Course of Instruction: One annual session of twenty-two weeks' duration. Three years' graded course recommended but not required. Frequent examinations are held by the professors. Clinics at hospital and dispensaries.—Lectures embrace obstetrics, surgery, theory and practice of medicine, ophthalmology, otology, surgical and medical diseases of women, anatomy, materia medica, physiology, medical jurisprudence, microscopy. Special courses in physical diagnosis, obstetrics, minor surgery, chemistry and microscopy.

REQUIREMENTS: For admission, a satisfactory examination in English scholarship, including orthography, English grammar, penmanship, arithmetic, and United States history, and furnish the examining committee acceptable testimonials as to character. It is not intended to make this a critical examination; but what is required and insisted upon is, that every student shall possess a fair English education. Graduates from literary, scientific, and high schools will be exempt from this examination by presenting their diplomas or certificates attesting graduation. For graduation: (I) twenty-one years of age; (2) two full courses of lectures; (3) three years' study; (4) good English scholarship; (5) well sustained written examinations.

FEES: Matriculation (paid but once), \$5; lectures, \$40; demonstrator, \$5; graduation, \$30. STUDENTS: Matriculates, 130; graduates, 52; per cent. of graduates to matriculates, 40. Graduates in Illinois, 9.

#### MIAMI MEDICAL COLLEGE, CINCINNATI.

#### [Diplomas recognized by the Illinois State Board of Health.]

Organized 1852.—Faculty embraces twelve professors, six lecturers. a demonstrator of chemistry, a demonstrator and assistant demonstrator of anatomy, and a pharmacist.

Course of Instruction: A preliminary term of three weeks' duration, a regular term of twenty weeks' duration, and a spring course of — duration, annually; three years' graded course recommended, but not required.—Lectures embrace ophthalmology and otology, principles of surgery, clinical and operative surgery, gynecology, anatomy, physiology, histology, pathology, laryngology, mental diseases, chemistry, toxicology, genito-urinary and venereal diseases, institutes of medicine, practice of medicine, clinical medicine, obstetrics, therapeutics, materia medica, diseases of women, diseases of children.

Requirements: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two full courses of lectures; one course of (5) practical anatomy. (6) of practical chemistry, and (7) of clinics at the hospital: (8) full and satisfactory examination on each branch taught in the college.

FEES: Matriculation, \$5; demonstrator, \$5; practical chemistry, \$7; practical physiology and histology, \$7; lectures, \$75: graduation, \$25.

STUDENTS: Matriculates, 12%; graduates, 41; per cent. of graduates to students, 37. Graduates in Illinois, 25.

#### Physio-Medical Institute, Cincinnati.

[Diplomas recognized conditionally by the Illinois State Board of Health.]

Organized, 1859.—Faculty embraces seven professors.

Course of Instruction: One course of lectures of nineteen and one-half weeks' duration, annually. "Graduates' reviews," "written exercises in practice," clinics at hospital, and quizzes given throughout the course.—Lectures embrace science and practice of medicine, clinical medicine, medical and operative surgery, ophthalmology, gynecology, diseases of children, therapeutics. materia medica, pharmacy, obstetrics, chemistry, toxicology, anatomy, and physiology.

toxicology, anatomy, and physiology.

Requirements: For admission. "students must be twenty-one years of age, have pursued a previous course of reading under a competent practitioner, and furnish satisfactory evidence of sobriety and moral character."—For graduation: "Graduates are required to have pursued a three years' course of study, in which are included two terms of college lectures; graduates must take two terms of private dissections, attend the hospital clinics both terms, be punctual on all the college lectures, and attend all the graduates' reviews. Finally, they must pass a written examination on all the departments of instruc ion. The written exercises in practice, the reviews, and the written examinations must all be satisfactory in order to merit a diploma."

FEES: Matriculation (paid once only), \$5: demonstrator, \$5; hospital, \$5; lectures, \$50; graduation, \$25.

REMARKS: A list of students and graduates is not given.—"Beginning with the session of 1883-84, one year from the current session, applicants for admission will be required to have a high school diploma, or to pass a preliminary examination in English studies, and also an examination in their previous medical studies."

#### MEDICAL DEPARTMENT OF THE UNIVERSITY OF WOOSTER, CLEVELAND.

#### [Diplomas recognized by the Illinois State Board of Health.]

Organized 1864, as the *Charity Hospital Medical College*. Transferred to its present connection in 1870.—Faculty embraces twelve professors, two lecturers, and two demonstrators of anatomy.

COURSE OF INSTRUCTION: "A careful study of the problems of medical education and an intelligent review of the intricate questions connected with the demand for profesan intelligent review of the intricate questions connected with the demand for professional services in this country constrain the trustees and faculty to believe that they will best subserve the interests of those who look to them for professional instruction and at the same time aid in elevating the standard of medical education, by making the following changes: Instead of one session a year, there hereafter will be two sessions per annum—one, to be known as the winter session, commencing the first Wednesday in September and continuing five months; the other, called the summer session, beginning the first We'nesday in March and lasting four months [lengthened to five months since publication of the announcement]. Students who have compiled with the legal requirements can graduate at the end of either session. No thesis will be required of candidates for graduation. Examinations will be written." Clinics in hospital and dispensary. Graded course, covering four sessions in two years' recommended but not required.—Lectures embrace obstetrics, medical and surgical diseases of women, clinical gynecology, principles and practice of surgery, clinical surgery, operative surgery, ophthalmology, tology, diseases of children, principles and practice of medicine, diseases of the chest, physical diagnosis, mental and nervous diseases, materia medica, therapeutics, anatomy, chemistry, toxicology, physiology, dermatology.

REQUIREMENTS: For admission, (a) good English education: (b) good moral character.

REQUIREMENTS: For admission. (a) good English education; (b) good moral character.

—For graduation: (l) twenty-one years of age; (2) three years' study; (3) at least two "dissections" in practical anatomy; (4) two full courses of lectures, (5) satisfactory examination on seven chairs; (6) certificate of character.

Extract from a letter written by the vice dean: "While stating, in our announcement, that we graduate at the end of either session, it is not made as clear as it should be that

we have not, and never will, graduate a student upon two successive sessions in the same 12 months, unless he has already attended one full course in some other recognized school.

FEES: Matriculation (good for both courses,) \$5; hospital, \$5; demonstrator, \$5; lectures, \$40; graduation, \$30.

STUDENTS: Matriculates, 33; graduates, 14; per cent. of graduates to matriculates, 42. Graduates in Illinois (including Charity Hospital College graduates,) 12.

#### PULTE MEDICAL COLLEGE, (Homeopathic), CINCINNATI.

#### [Diplomas recognized by the Illinois State Board of Health.]

Organized 1872.—Faculty embraces ten professors, six lecturers, a demonstrator and an assistant demonstrator of anatomy.

Course of Instruction: One annual course of lectures of twenty-one weeks' duration; three years' graded course recommended but not required; clinics at hospital and dispensary; quizzes by students' societies.—Lectures embrace anatomy, physiology, histology; microscopy, pathology, physical diagnosis, medical jurisprudence, chemistry, pharmacology, toxicology, diseases of the nervous system, diseases of women, diseases of the eye and ear, obstetrics, surgery, materia medica, theory and practice of medicine, dermatology, diseases of infants and children, and therapeutics.

REQUIREMENTS: For admission, none.—For graduation: (I) twenty-one years of age; (2) good moral character; (3) two full courses of lectures; (4) three years' study; (5) thorough examination on all subjects taught in the school; (6) dissection of two "parts."

FEES: Matriculation (paid but once), \$5; lectures, \$50; hospital, \$5; demonstrator, \$10; graduation, \$30.

STUDENTS: Matriculates, 79; graduates, 34; per cent. of graduates to matriculates, 43. Graduates in Illinois, 11.

#### AMERICAN HEALTH COLLEGE, CINCINNATI.

#### [Diplomas not recognized by the Illinois State Board of Health.]

Organized 1874-'76.—Faculty embraces one person, who teaches 'the great vitapathic system which he originated and copyrighted,"

The following is extracted from the author's "little red book:"

"The author furnishes books, printed lessons, formulas, receipts, specifies, and special modes of vital treatment for all diseases, with the sure method of diagnosis, and all lessons belonging to the vitapathic system, with diploma and full right to practice.

"To physicians of all schools and all well qualified persons who can learn the new system

at home. Males, for \$100. Females, for \$75.

"Male students who need verbal lessons and full college course, with all the above, \$150. Female students (the same,) \$100.

"N. B.—Students can get general medical instruction wherever most convenient, but best at our branches in the different cities of the Union, preparatory to applying here for vitapathy and its higher graduation, with the grand diploma of the American Health College, the highest institution in the world.

"Regular courses of vitapathie lectures will commence the first of October.

"College open for instruction and graduation at all times. Terms eash.

"No diploma, or books, or lessons, or rights sold separate. All must go together to complete the system to fully paid up students. The American Health College is not intended to supersede other medical or health colleges, or other medical instruction, some of which may be good as far as it goes in the right direction, and as such is preparatory to the higher vitapathic instruction. But the American Health College is organized and established to teach physicians, and advanced students of all schools, the higher and better vitapathic system, and to instruct and graduate a higher grade of health doctors, who shall understand the whole physical and spiritual dual man, and understand the full nature of his physical and spiritual diseases, and know how to cure them."

#### COLUMBUS MEDICAL COLLEGE COLUMBUS, OHIO.

[Diplomas recognized (?) by the Illinois State Board of Health.]

Organized 1875.—Faculty embraces twelve professors, two adjuncts to chairs, one lecturer and a demonstrator of anatomy, one regular course of twenty-four weeks' duration annually.

Course of Instruction: Instruction consists of didactic and clinical lectures, with daily examinations in each department.—Lectures embrace surgery, clinical surgery, more surgery, obstetrics, theory and practice of medicine, clinical medicine, chemistry, materia medica, therapeutics, toxicology, anatomy, gynecology, physiology, diseases of children, physical diagnosis, venereal diseases, medical jurisprudence, ophthalmology.

REQUIREMENTS: For admission, none.—For graduation: (1) three years' study; (2) two full courses; (3) one course of practical anatomy; (4) twenty-one years of age; (5) proper testimonials of character, satisfactory examination in anatomy, physiology, materia medica and therapeutics, obstetrics, chemistry, gynecology, surgery and practice of medicine.

FEES: Matriculation, \$5; lectures, \$30; demonstrator, \$5; graduation, \$25.

STUDENTS: Matriculates, 131; graduates, 59; per cent. of graduates to matriculates, 45. Graduates in Illinois, 1.

#### AMERICAN MEDICAL COLLEGE, CINCINNATI.

[Diplomas recognized by the Illinois State Board of Health.] Extinct. Graduates in Illinois, 14.

#### AMERICAN ECLECTIC MEDICAL COLLEGE, CINCINNATI.

[Diplomas not recognized by the Illinois State Board of Health.]

Extinct. Fraudulent institution, and had no existence except for the sale of diplomas.

#### OREGON.

MEDICAL DEPARTMENT OF THE WILLAMETTE UNIVERSITY, PORTLAND.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1866.—Faculty embraces eleven professors and one lecturer.

Course of Instruction:—One course of twenty weeks' duration annually: daily class examinations by the faculty; three years' graded course recommended but not required; clinies at hospitals; women admitted on the same conditions as men.—Lectures embrace, general and descriptive anatomy, physiology, chemistry, materia medica, dissections, medical jurisprudence, hygiene, theory and practice of medicine, practice of surgery, obstetrics, gynecology, therapeutics, diseases of children, genito-urinary diseases, psychological medicine.

REQUIREMENTS:—For admission, (a) eighteen years of age; (b) good moral character; (c) unless already a matriculate of the university, or a graduate of some respectable college, academy, or high school, every candidate shall be examined as to his previous education and his fitness for entering upon and appreciating the technical study of medicine.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) two full courses of lectures; (4) three years' study; (5) one course of practical anatomy; (6) thesis; (7) satisfactory examination as to professional attainments,

FEES: Matriculation (paid but once), \$5; demonstrator, \$10; lectures, \$120; graduation, \$30. Students: Matriculates, 27; graduates, 9; per cent. of graduates to matriculates, 33. Graduates in Illinois, 1.

#### PENNSYLVANIA.

DEPARTMENT OF MEDICINE OF THE UNIVERSITY OF PENNSYLVANIA. PHILADELPHIA.

87

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1765. —Faculty embraces eleven professors and twenty-three demonstrators and assistant demonstrators.

Course of Instruction: A preliminary course of three weeks' duration, a regular course of twenty-four weeks' duration and a spring course of twelve weeks' duration. A course of twenty-four weeks' duration and a spring course of twelve weeks' duration. A post-graduate course is also delivered during the spring and summer. Course graded, extending over three years. Four years' graded course recommended, but not required. Examinations at the end of each year.—Lectures embrace anatomy, obstetrics, diseases of women and children, theory and practice of medicine, clinical medicine, surgery, clinical surgery, clinical gynecology, pathology, materia medica, therapeutics, pharmacy, chemistry, physiology, histology, ophthalmology, cotology, dermatology, mental and nervous diseases, laryngology, physical diagnosis, orthopedie surgery, and venereal diseases.

REQUIREMENTS: For admission, (a) collegiate degree, (b) certificate of having passed matriculation examination of a recognized college, (c) certificate, covering the required subjects, from a recognized normal or high school or of a duly organized county medical society having instituted a preliminary examination, (d) preliminary examination embracing; first, to write a brief essay, not exceeding a page of foolscap, which will serve as a test of his qualifications in orthography and grammar; second, to undergo an examination in the elementary principles of physics, on the subjects considered in Part L of Fownes' Chemistry.—For graduation: (l) twenty-one years of age, (2) good moral character, (3) three years' study, (4) three full courses of lectures, (5) passed required examinations, (6) thesis. Students who have attended one course in a regular medical school will be admitted as students of the second course in the University of Pennsylvania, after having passed a satisfactory examination in general chemistry and materia medica and pharmacy. Students who have attended two courses in a regular medical school will be naving passed a satisfactory examination in general chemistry and materia medica and pharmacy. Students who have attended two courses in a regular medical school will be admitted as students of the third course in this institution, after having satisfactorily passed an examination in general and medical chemistry, materia medica and pharmacy, anatomy and physiology. Graduates of other regular medical schools in good standing will be admitted as students of the third course without an examination. Graduates of colleges of pharmacy and dental colleges in good standing are admitted to the second course without an examination.

Matriculation, \$5; graduation, \$50; lectures, including laboratory and dis-FEES: Mat section, \$150.

STUDENTS: Matriculates, 348; special students, 15; graduates (1881), 120; per cent. of graduates of 1881 to matriculates of the following session (1881-82), 34. Graduates in Illinois, 68.

REMARKS: During the first and second years, much of the student's time is occupied with practical work in the various laboratories of chemistry, pharmacy, osteology, histology and pathological histology, and in dissection; but throughout the second and third sessions he is required to attend the general medical and surgical clinics at the University and Philadelphia hospitals, while special clinical facilities are provided for the third year. In this year, each student receives bedside instruction in clinical medicine and surgery, in physical diagnosis, and in gynecology. Opportunities are afforded for the practical study of diseases of the eye, ear, throat and skin, and for acquiring proficiency in the use of the various instruments employed in their treatment. For this purpose the third year class is divided into sections of convenient size, each of which receives direct personal instruction in the various practical subjects above-mentioned. No honorary degrees conferred. No honorary degrees conferred.

#### JEFFERSON MEDICAL COLLEGE, PHILADELPHIA.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1826.—Faculty embraces nine professors and ten demonstrators.

Course of Instruction: A preliminary course of three weeks' duration, a regular course of twenty-four weeks' duration, and a spring course of eight weeks' duration. Attendance upon the spring course of lectures continues to be large, and the faculty recommend all who have it in their power, to use the facilities thus offered. Daily clinics at hospitals and dispensary.—Lectures embrace obstetrics and diseases of women and children, practice of medicine, clinical medicine, general descriptive and surgical anatomy, medical chemistry, toxicology, materia medica, general therapeutics, institutes of medicine, medical jurisprudence, principles of surgery, clinical surgery, practice of surgery, histology, pathology, pharmacy, ophthalmology, otology, gynecology, laryngology, electro-therapeutics, microscopy, dermatology, genito-urinary diseases, physical diagnosis, practical and laboratory instruction in obstetrics, medicine, chemistry, materia medica and therapeutics, physiology, histology, operative and minor surgery, bandaging, pathological anatomy and anatomy. pathological anatomy and anatomy

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) two full courses of lectures; (4) three years' study; (5) thesis. Students of dental colleges, where a five months' winter session is held, and where full courses are given on an atomy, materia medica, physiology and chemistry, may become candidates, after attendance on two courses at such colleges, and one full course at the Jefferson Medical College, with another on surgery, practice of medicine, and obstetrics.

Students of colleges of pharmacy, where full courses are given on materia medica and chemistry, may become candidates, after attendance on two courses at such colleges and one full course at the Jefferson Medical College, with another on anatomy, surgery, practice of medicine, physiology and obstetries,

FEES; Matriculation (paid but once) \$5; lectures, \$140; demonstrator (of anatomy) \$10; all other practical courses free; graduation, \$30.

STUDENTS: Matriculates, 630; graduates, 247; per cent. of graduates to matriculates. 39. Graduates in Illinois, 172.

#### HAHNEMANN MEDICAL COLLEGE (Homeopathic,) PHILADELPHIA.

#### [Diplomas recognized by the Illinois State Board of Health.]

Organized 1848.—Faculty embraces nine professors, six lecturers, and four demonstrattors.

Course of Instruction: One regular course of lectures of twenty-one weeks' duration and a spring course annually. Three years' graded course recommended, but not required, Chinics at hospitals and dispensary. Recitations, quizzes, demonstrations, experiments and other practical exercises will be called into requisition as aids in the work of imparting instruction.—Lectures embrace anatomy, physics, chemistry, toxicology, obstetrics, puerperal diseases, and diseases of infants, institutes, materia medica, gynecology, physiology, sanitary science, pathology, practice of medicine, operative surgery, clinical surgery, principles of surgery, clinical medicine, surgical anatomy, physical diagnosis, microscopy, histology, pathology, ophthalmology, otology, botany, pharmacy, insanity, venereal diseases.

REQUIREMENTS: For admission: certificate signed by preceptor as evidence of qualifications for the study of medicine.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) three years' study; (4) two full courses of lectures; (5) at least one course of practical anatomy and surgery; (6) thesis. A student who has attended one or more courses in a medical college in which homeopathy is not taught, must attend one full session of instruction in this institution, and, in addition to the general average required for graduation, he must obtain a two-thirds average in the following departments: Homeopathic institutes and materia medica, practice of medicine and clinical medicine.

FEES: Matriculation, \$5; lectures, \$100; practical surgery, \$10; demonstrator, \$10; practical obstetrics and chemistry (optional), \$10 each; graduation, \$30.

STUDENTS: Matriculates, 148; graduates, 57; per cent. of graduates to students, 40. Graduates in Illinois, 24.

#### Woman's Medical College of Pennsylvania, Philadelphia.

#### [Diplomas recognized by the Illinois State Board of Health.]

Organized 1850.—F culty embraces ten professors, four lecturers and five demonstrators and instructors.

Course of Instruction: A regular course of twenty-two weeks' duration and a spring course of ten weeks' duration annually. Three and four years' graded course recommended but not required. Weekly examinations given by regularly appointed instructors throughout the winter course.—Lectures embrace chemistry and toxicology, anatomy, clinical anatomy, physiology, hygiene, medical jurisprudence, materia medica and general therapeutics, principles and practice of medicine, principles and practice of surgery, obstetrics, gynecology, diseases of children, laryngology, rhinoscopy, histology, microscopy, pathology, pharmacy, dental physiology and pathology, nervous diseases. Practical work in laboratories noted in the requirements for graduation.

Practical work in laboratories noted in the requirements for graduation.

Requirements; For admission, none.—For graduation: (1) twenty-one years of age; (2) three years' study; (3) two full courses of lectures; (4) two courses in practical anatomy, having made at least one creditable dissection of each of the usual divisions of the cadaver; (5) one course in the chemical and one in the pharmaceutical laboratory; (6) one course of lectures on pathology, and (7) one on histology, including the practical work of the spring in the use of the microscope; (8) satisfactory evidence of having attended at least two courses of clinical lectures in the departments of general medicine, surgery, obstetries and gynecology; (9) thesis; (10) mental and moral fitness for the profession.

FEES: Matriculation (paid but once.) \$5; lectures, \$105; demonstrator, \$10; graduation, \$30; clinical laboratory, \$10; pathological laboratory, \$10; pharmaceutical laboratory, \$5; physiological laboratory, \$5.

STUDENTS: Matriculates, 111; graduates, 19; per cent. of graduates to matriculates, 18. Graduates in Illinois, 10.

#### TENNESSEE.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF NASHVILLE AND VANDERBILT UNIVERSITY.

[Diplomas recognized by the Illinois State Board of Health.]

Organized: (University of Nashville, 1850; Vanderbilt University, 1874, present arrangement dates from 187-.)—Faculty embraces eight professors, one adjunct professor, six assistants to chairs, and a demonstrator of anatomy.

Course of Instruction: "A graduated scheme of study, extending through three years, has been arranged for the accommodation of such students as wish to pursue a more prolonged course. This, though strongly recommended, is entirely optionaal with the student." A preliminary session of four weeks' duration, and a regular session of nineteen weeks' duration are delivered annually. Daily examinations are held by professors. Clinics at hospital.—Lectures embrace anatomy, physiology, psychology, surgery, materia medica, therapeutics, chemistry, obstetrics, theory and practice of medicine, clinical medicine, state medicine, diseases of women, diseases of children, diseases of the ear and eye.

REQUIREMENTS: For admission, none.—For graduation, (1) twenty-one years of age; (2) good moral character; (3) three years study; (4) two full courses of lectures; (5) dissection during one session. "The candidate is elected by ballot, and upon receiving three negative votes, will be rejected but will be entitled to another examination by appearing before a full faculty, after all other applicants have been examined. No premature examination will be granted except by consent of the entire faculty."

Α

FEES: Matriculation, \$5; demonstrator, \$10; leetures, \$75; graduation, \$100.

STUDENTS: Matriculates, 327; graduates, 191; per cent. of graduates to matriculates, 58. Graduates in Illinois, 25.

91

REMARKS: Two honorary degrees were conferred at the last commencement.

MEMPHIS MEDICAL COLLEGE, (Medical Department, Cumberland University,) Memphis.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1854.—Suspended during the war of the Rebellion. Re-organized 1872. Courses of lectures were delivered until 187-. Extinct.

Graduates in Illinois, 2.

Nashville Medical College (Medical Department of the University of Tennessee), Nashville.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1875.—Faculty embraces thirteen professors, two demonstrators and an assistant demonstrator of anatomy.

Course of Instruction: One course of lectures of twenty-three weeks' duration annually. Examinations by the faculty daily. Clinics at hospital and dispensary.—Lectures embrace theory and practice of medicine, clinical medicine, chemistry, state or preventive medicine, insanity, mental hygiene, surgery, clinical surgery, obstetrics, clinical midwifery, medical and surgical diseases of women, diseases of children, general, descriptive and surgical anatomy, materia medica, therapeutics, physiology, medical jurisprudence, medical and surgical diseases of the eye, ear and throat, dental surgery.

REQUIREMENTS: For admission, none.—For graduation: (1) twenty-one years of age; (2) good moral character; (3) two full courses of lectures; (4) dissections during attendance in this school; (5) satisfactory examination by the faculty.

FEES: Matriculation (paid but once.) \$5; demonstrator, \$10; lectures, \$75; graduation, \$10. STUDENTS: Matriculates, 144; graduates, 69; per cent. of graduates to matriculates, 48. Graduates in Illinois, 14.

MEHARRY MEDICAL DEPARTMENT OF CENTRAL TENNESSEE COLLEGE, NASHVILLE.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1876. Devoted to the education of colored students, male and temale.—Faculty embraces seven professors and a demonstrator of anatomy.

Course of Instruction: One annual session of nineteen weeks' duration. Three years' graded course recommended, but not required.—Lectures embrace: "During the first year's attendance here, students will be required to recite daily in anatomy, physiology, chemistry and materia medica, and have practical work in dissecting, and work two hours per day in the chemical laboratory. They will also receive instructions in elementary botany. At the close of the session, they are required to pass a satisfactory written examination in the above-mentioned branches. The studies for the second year consist of surgery, gynecology, obstetries, surgical anatomy, theory and practice of medicine, histology, imicroscopy and two hours' work per week in medical chemistry, and daily recitations and attendance on the lectures will be required. Written monthly examinations are required during the whole course." Lectures are also delivered on medical jurisprudence and diseases of women.

REQUIREMENTS: For admission, "Applicants must be at least eighteen years of age, of good moral character, and pass examinations in arithmetic, geography, grammar, reading, writing and spelling. Graduates of other recognized colleges and normal schools will, on presenting their diplomas, be admitted without examination."—For graduation: (1) twenty-one years of age; (2) three years study; (3) two full courses of lectures; (4) must pass a satisfactory written examination in all of the branches laid down in this course, including the outlines of Bible history and doctrine; (5) present an acceptable original thesis on some medical subject.

FEES; Tuition, \$30; graduation, \$10; materials for practical anatomy and chemistry at cost.

STUDENTS: Matriculates, 29; graduates, 8; per cent. of graduates to matriculates, 28. Graduates in Illinois, none.

MEMPHIS HOSPITAL MEDICAL COLLEGE AND MEDICAL DEPARTMENT SOUTHWESTERN BAPTIST UNIVERSITY, MEMPHIS.

[Diplomas have not been presented to the Illinois State Board of Health.]

Organized 1880.—Faculty embraces ten professors and a demonstrator of anatomy.

Course of Instruction: A preliminary course of two weeks' duration, a regular course of twenty weeks' duration, and a spring (recitation) course of ten weeks' duration, annually, Daily examinations and quizzes by the professors. Clinics at hospital and dispensary.—Lectures embrace materia medicand therapeutics, surgery—elinical and operative, and principles and practice of gynecology, anatomy—descriptive and surgical, ophthalmology, practice of medicine, clinical medicine, otology, obstetries, diseases of the throat, physiology, diseases of the chest, chemistry, toxicology, diseases of the nervous system, diseases of children.

REQUIREMENTS: For admission, none.—For graduation: (I) twenty-one years of age, (2) good moral character, (3) two full courses of lectures, (4) dissection during one session, (5) thesis, (6) satisfactory examination in all branches taught. "No examination for graduation will be granted in advance of the time fixed for examining the entire class, without the unanimous consent of the faculty."

FEES: Matriculation, \$5; lectures, \$50; demonstrator, \$10; graduation, \$30.

STUDENTS: Matriculates, 89; graduates, 30; per cent. of graduates to matriculates, 30. Graduates in Illinois, none.

#### TEXAS.

TEXAS MEDICAL COLLEGE AND HOSPITAL, GALVESTON.

[Diplomas have not been presented to the Illinois State Board of Health.]
Organized 1864. Re-organized 1873. Formerly known as Galveston Medical College and Hospital. Probably extinct.

#### UTAH TERRITORY.

MEDICAL INSTITUTION, AT MORGAN CITY.

[Diplomas have not been presented to the Illinois State Board of Health.]

Extinct. Dr. H. J. Richards, of Salt Lake City, in answer to a letter of inquiry from this office, writes: (1882.)—"I understand that institution has passed quietly away, owing to the passing away of its founder and professor. His taking off was due to an attack of our local and enterprising press, which did not find out we had a college till the thing had been running about three years. While there was no evidence of intentional fraud, it was a burlesque."

#### VERMONT.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF VERMONT AND STATE AGRICULTURAL COLLEGE.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1823; continued to 1837; suspended seventeen years; reopened 1854.—Faculty embraces fourteen professors, six instructors and a demonstrator of anatomy.

Course of Instruction: A preliminary term of eighteen weeks' duration, and a regular term of seventeen weeks' duration, annually.—Consists of a complete course on the seven principal branches and a short and practical course on the special branches, Clinics at hospital and dispensary. Three years' graded course recommended but not

required.—Lectures embrace, general and special anatomy, obstetrics, diseases of women, materia medica, general pathology, principles and practice of surgery, chemistry, toxicology, theory and practice of medicinc, microscopic anatomy, dermatology, diseases of children, ophthalmology, otology, thoracic diseases, diseases of the throat and nose, mental and nervous diseases, medical jurisprudence.

REQUIREMENTS: For admission, none.—For graduation. (1) twenty-one years of age; (2) three years study; (3) two full courses in different years; (4) thesis; (5) good moral character; (6) satisfactory examination. "Graduates of other regular colleges, who desire a degree from this institution, must pass a satisfactory examination in the branches of medicine, surgery and obstetrics; and if they be graduates of more than three years' standing, they must exhibit a certificate of membership in some medical society entitled to representation in the American Medical Association."

FEES: Matriculation, \$5; lectures, \$70; graduation, \$25.

STUDENTS: Matriculates, 190; graduates, 85; per cent. of graduates to matriculates, 45. Graduates in Illinois, 16.

#### VERMONT MEDICAL COLLEGE, WOODSTOCK.

Organized 1818. Suspended instruction from 1837 to 1841. Extinct since 1854. During its existence it graduated 350 students,

Graduates in Illinois, 27.

#### VIRGINIA.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF VIRGINIA, NEAR CHARLOTTESVILLE, ALBERMARLE COUNTY.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1825. First class graduated July, 1828. No graduating class in 1862.—Faculty embraces four professors and a demonstrator of anatomy.

Course of Instruction: One annual course of thirty-four weeks' duration; daily examinations by the professors; optional courses in the chemical laboratory are given, fee charged, \$25 each. Course is graded extending over two years.—Lectures embrace, besides comparative anatomy, obstetrics and medical jurisprudence, the following scheme: The arrangement of the lectures is such that the student acquires a competent knowledge of anatomy, physiology and chemistry before he enters upon the study of the principles and practice of medicine and surgery, which can only be studied properly in the light shed upon them by the former. The instructions in materia medica and pharmacy are also given in due relation to the progress of the student in chemistry.

REQUIREMENTS: For admission, none.—For graduation, "The degree of doctor of medicine is conferred upon such students as prove their fitness for the same by rigid and searching examinations. It has ever been the policy of the institution to make its honors testimonials of merit, and not certificates of attendance upon a prescribed course of instruction. According to this policy the diploma is often conferred upon first course students, if found worthy of it."

FEES: Matriculation and library, \$30; tuition, \$100; demonstrator, \$10; graduatian, \$15. STUDENTS: Matriculates, 34; graduates, 13; per cent. of graduates to matriculates, 38. Graduates in Illinois, 6.

THE MEDICAL SCHOOL OF THE VALLEY OF VIRGINIA (Winchester Medical College, Winchester.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1838. Now extinct. No other information has been received.

MEDICAL COLLEGE OF VIRGINIA, RICHMOND.

[Diplomas recognized by the Illinois State Board of Health.]

Organized 1854. Probably closed for several years during the war of the Robellion.—Faculty embraces eight professors, six adjunct professors, and a demonstrator of anatomy.

Course of Instruction: One annual course of twenty-four weeks' duration, daily examinations, quizzes by each professor or assistant. Clinics at hospital and dispensary. "The paramount purpose is thoroughness of instruction, scientific and practical. Felicitous illustration contributes to this leading purpose, and at the same time renders a course of lectures on medicine attractive; it is therefore employed judiciously. A student's progress in a study is usually proportioned to his pleasure in its pursuit."—Lectures embrace practice of medicine, obstetrics, diseases of the puerperal state, diseases of women and children, physiology, pathology, surgery, chemistry, pharmacy, general and special anatomy, materia medica, therapeutics.

REQUIREMENTS: For admission, "An examination if considered necessary." (United States Commissioner's Report.)—For graduation: not stated in announcement.

FEES: Matriculation, \$5; lectures, \$120; graduation, \$30. (United States Commissioner's Report.)

STUDENTS: Graduates, 13. Matriculates not stated. Graduates in Illinois, 4.

#### MISCELLANEOUS.

In addition to the above, the following schools for medical instruction, but not conferring degrees, are noted:

College for Medical Practitioners, St. Louis.

Organized 1882. The objects of this college are to afford medical practitioners, graduates and non-graduates, the opportunity of reviewing their collegiate studies and of receiving additional practical instruction in the several specialties of medicine and surgery. Three sessions, each of five weeks' duration, annually.

A diploma of associate membership is conferred under the following conditions:

1st. They must have attended a full course of lectures and the clinics of all the departments of this college.

2nd. Must be a graduate of some recognized and reputable medical school.

3rd. Must apply in their own handwriting for examination.

4th. Must have passed a satisfactory examination in all the branches taught in this college.

5th. And must present to the college a prepared physiological or pathological specimen (wet or dry), or a cast or drawing, with the name, address and the alma mater of the applicant attached. The fee for this diploma is \$25.

Persons who are not graduates of any medical college may attend the lectures in this college, and may receive a certificate of attendance, provided that they present to the college a prepared pathological or physiological specimen (wet or dry) or a drawing.

PORTLAND SCHOOL FOR MEDICAL INSTRUCTION, PORTLAND, MAINE.

Organized 1855.—Two terms of sixteen weeks' each, annually.

Toledo School for Medical Instruction, Toledo, Ohio.

Organized 1879.—One twenty weeks' term, annually.

NEW YORK POST-GRADUATE MEDICAL SCHOOL, NEW YORK CITY.

Organized 1882.—Three seven weeks' terms, annually.

NEW YORK POLI-CLINIC, NEW YORK CITY.

Organized 1882.-Five six weeks' terms, annually.

WINONA MEDICAL SCHOOL, WINONA, MINN.

Extinct.

#### MISCELLANEOUS-Not Recognized.

EDINBURG UNIVERSITY, CHICAGO, ST. LOUIS AND OTHER PLACES.

Fraudulent. No existence. Diplomas are still being issued from St. Louis and other points in Missouri. The institution was exposed in the third annual report of the Illinois State Board of Health.

THE NEW ENGLAND UNIVERSITY OF ARTS AND SCIENCES, BOSTON AND MANCHESTER.

This institution is fraudulent and has no existence, except to sell diplomas.

LIVINGSTON UNIVERSITY OF HADDONFIELD, NEW JERSEY.

Buchanan institution. Fraudulent and now extinct.

PENN UNIVERSITY, PHILADELPHIA,

Diplomas not recognized. Extinct.

HYGEO-THERAPEUTIC COLLEGE, BERGEN HEIGHTS, NEW JERSEY.

Diplomas not recognized. Extinct.

# REVOKED CERTIFICATES.

The following list comprises those only whose State Certificates have been definitively revoked by the Illinous State Board or Health. In a number of other cases the certificate was revoked for causes, but subsequently re-issued after the applicant had compiled with the requirements of the Board, by completing the curriculum of study in a reputable medical college, or by improving his professional status in other ways.

## RULINGS AND DECISIONS

AND

# MODE OF PROCEDURE

UNDER THE

MEDICAL PRACTICE ACT.

#### MEDICAL PRACTICE ACT.

An Act to Regulate the Practice of Medicine in the State of Illinois. Approved May 29, 1877. In force July 1, 1877.

Admissions to practice medicine: Section 1. Be it enacted by the People of the State of Illinois, represented in the General Assembly, That every person practicing medicine, in any of its departments, shall possess the qualifications required by this act. If a graduate in medicine he shall present his diploma to the State Board of * * * for verification as to its genuineness. If the diploma is found genuine, and if the person named therein be the person claiming and presenting the same, the State Board Health * * * shall issue its certificate to that effect signed shall issue its certificate to that effect, signed by all of the members thereof, and such diploma and certificate shall be conclusive as to the right of the lawful holder of the same to practice medicine in this State. If not a graduate the person practicing medicine in this State shall present himself before said BOARD, and submit himself to such examinations as the said Board shall require; and, if the examination be satisfactory to the examiners, the said Board shall issue its certificate in accordance with the facts, and the lawful holder of such certificate shall be entitled to all the rights and privileges herein mentioned.

Sec. 2. [This section is omitted as void, by reason of the passage, at the same session, of the act establishing a State Board of Health, which see following. The section refers to the mode of providing boards of examiners in the absence of such State Board. The omissions indicated by asterisks in section 1, and in the remaining sections, also have reference to this provision for other boards.]

Organization, duties and power of State Board: Sec. 3. The State Board of Health * * * shall organize within three months after the passage of this act; they shall procure a seal, and shall receive through their Secretary applications for certificates and examinations; the president * * * shall have authority to administer oaths, and the Board to take testimony in all matters relating to their duties; they shall issue certificates to all who furnish satisfactory proof of having received diplomas or licenses from legally chartered medical institutions in good standing; they shall prepare two forms of certificates, one for persons in possession of diplomas or licenses, the other for candidates examined by the Board; they shall furnish to the county clerks of the several counties a list of all persons receiving certificates. In selecting places to hold their meetings they shall, as far as is reasonable, accommodate applicants residing in different sections of the State, and due notice shall be published of all their meetings. Certificates shall be signed by all the members of the Board granting them. * * *

Verification of diplomas; fee and penalty: Sec. 4. Said State dard of Health * * * shall examine diplomas as to their Board of Health genuineness, and if the diploma shall be found genuine as represented, the Secretary of the State Board of Health * * * shall receive a fee of one dollar from such graduate or licentiate, and no further charge shall be made to the applicants; but if it be found to be fraudulent, or not lawfully owned by the possessor, the Board shall be entitled to charge and collect twenty dollars of the applicant presenting such diploma. The verification of the diploma shall consist in the affidavit of the holder and applicant that he is the lawful possessor of the same, and that he is the person therein named. Such affidavit may be taken before any person authorized to administer oaths, and the same shall be attested under the hand and official seal of such officer, if he have a seal. Graduates may present their diplomas and affidavits as provided in this act, by letter or by proxy, and the STATE BOARD OF HEALTH * * * shall issue its certificate the same as though the owner of the diploma was present.

Examination of non-graduates: Sec. 5. All examinations of persons not graduates or licentiates, shall be made directly by the Board, and the certificates given by the Board shall authorize the possessor to practice medicine and surgery in the State of Illinois.

Certificates must be recorded: Sec. 6. Every person holding a certificate from the State Board of Health * * * shall have it recorded in the office of the clerk of the county in which he resides, and the record shall be indorsed thereon. Any person removing to another county to practice, shall procure an endorsement to that effect on the certificate from the county clerk, and shall record the certificate, in like manner, in the county to which he removes, and the holder of the certificate shall pay to the county clerk the usual fees for making the record.

RECORD BOOK TO BE KEPT BY COUNTY CLERK: Sec. 7. The county clerk shall keep, in a book provided for the purpose, a complete list of the certificates recorded by him, with the date of the issue.

* * * If the certificate be based on a diploma or license, he shall record the name of the medical institution conferring it, and the date when conferred. The register of the county clerk shall be open to public inspection during business hours.

FEE FOR EXAMINING NON-GRADUATES: Sec. 8. Candidates for examination shall pay a fee of five dollars, in advance, which shall be returned to them if a certificate be refused. The fees received by the Board shall be paid into the treasury. * * *

CHARACTER OF EXAMINATION: Sec. 9. Examinations may be in whole or in part in writing, and shall be of an elementary and practical character, but sufficiently strict to test the qualifications of the candidate as a practitioner.

Certificates may be refused or revoked: Sec. 10. The State Board of Health * * * may refuse certificates to individuals guilty of unprofessional or dishonorable conduct, and they may revoke certificates for like causes. In all cases of refusal or revocation, the applicant may appeal to the body appointing the Board.

Definition of "Practicing Medicine": Sec. 11. Any person shall be regarded as practicing medicine within the meaning of this act, who shall profess publicly to be a physician, and to prescribe for the sick, or who shall append to his name the letters of "M. D." But nothing in this act shall be construed to prohibit students from prescribing under the supervision of perceptors, or to prohibit gratuitous services in cases of emergency. And this act shall not apply to commissioned surgeons in the United States army and navy.

LICENSE TO ITINERANT VENDERS: Sec. 12. Any itinerant vender of any drug, nostrum, ointment or appliance of any kind, intended for the treatment of disease or injury, or who shall, by writing or printing, or any other method, publicly profess to cure or treat diseases, injury or deformity by any drug, nostrum, manipulation or other expedient, shall pay a license of one hundred dollars a month, to be collected in the usual way.

Penalties for non-compliance with this act: Sec. 13. Any person practicing medicine or surgery in this State without complying with the provisions of this act, shall be punished by a fine of not less than fifty dollars nor more than five hundred dollars, or by imprisonment in the county jail for a period of not less than thirty days, nor more than three hundred and sixty-five days, or by both such fine and imprisonment, for each and every offense; and any person filing, or attempting to file, as his own, the diploma or certificate of another, or a forged affidavit of identification, shall be guilty of a felony, and upon conviction, shall be subject to such fine and imprisonment as are made and provided by the statutes of this State for the crime of forgery, but the penalties shall not be enforced till on and after the thirty-first day of December, eighteen hundred and seventy-seven: Provided, that the provisions of this act shall not apply to those that have been practicing medicine ten years within this State.

#### STATE BOARD OF HEALTH ACT.

An Act to Create and Establish a State Board of Health in the State of Illinois. Approved May 25, 1877; in force July 1, 1877.

Appointment of members; term of office; vacancies: Section 1. Be it enacted by the People of the State of Illinois, represented in the General Assembly, That the Governor, with the advice and consent of the Senate, shall appoint seven persons, who shall constitute the Board of Health. The persons so appointed shall hold their offices seven for years: Provided, that the terms of office of the seven first appointed shall be so arranged that the term of one shall expire on the thirtieth day of December of each year, and the vacancies so created, as well as all vacancies occurring otherwise, shall be filled by the Governor, with the advice and consent of the Senate: And provided, also, that appointments made when the Senate is not in session may be confirmed at its next ensuing session.

Powers and authority of the board: Sec. 2. The State Board of Health shall have the general supervision of the interests of the health and life of the citizens of the State. They shall have charge of all matters pertaining to quarantine; and shall have authority to make such rules and regulations, and such sanitary investigations, as they may from time to time deem necessary, for the preservation or improvement of public health; and it shall be the duty of all police officers, sheriffs, constables, and all other officers and employés of the State, to enforce such rules and regulations, so far as the efficiency and success of the Board may depend upon their official co-operation.

REGISTRATION OF BIRTHS AND DEATHS: Sec. 3. The BOARD OF HEALTH shall have supervision of the State system of registration of births and deaths as hereinafter provided; they shall make up such forms and recommend such legislation as shall be deemed necessary for the thorough registration of vital and mortuary statistics throughout the State. The Secretary of the Board shall be the superintendent of such registration. The clerical duties and the safe-keeping of the bureau of vital statistics thus created shall be provided by the Secretary of State.

Physicians and accoucheurs to register and report: Sec. 4. It shall be the duty of all physicians and accoucheurs in this State to register their names and postoffice address with the county clerk of the county where they reside; and said physicians and accoucheurs shall be required, under penalty of ten dollars, to be recovered in any court of competent jurisdiction in the State, at suit of the county clerk, to report to the county clerk, within thirty days from

date of their occurrence, all births and deaths which may come under their supervision, with a certificate of the cause of death, and such correlative facts as the Board may require, in the blank forms furnished as hereinafter provided.

REPORT OF BIRTH OR DEATH IN ABSENCE OF PHYSICIAN OR ACCOUCHEUR: Sec. 5. Where any birth or death shall take place, no physician or accoucheur being in attendance, the same shall be reported to the county clerk within thirty days from date of [its] occurrence, with the supposed cause of death, by the parent, or if none, by the nearest of kin, not a minor, or if none, by the resident householder where the death shall occur, under penalty as provided in the preceding section of this act.

CORONERS TO REPORT DEATHS: Sec. 6. The coroners of the several counties shall be required to report to the county clerk all cases of death which may come under their supervision, with the cause and mode of death, etc., as per forms furnished, under penalty as provided in section four (4) of this act.

DISPOSITION OF PENALTIES: Sec. 7. All amounts recovered under the penalties herein provided shall be appropriated to a special fund for the carrying out of the object of this law.

County clerks to keep registers and records: Sec. 8. The county clerks of the several counties in the State shall be required to keep separate books for the registration of the names and post-office address of physicians and accoucheurs, for births, for marriages, and for deaths; said books shall always be open to inspection without fee; and said county clerks shall be required to render a full and complete report of all births, marriages and deaths to the Secretary of the Board of Health, annually, and at such other times as the Board may direct.

Board to prepare forms for reports: Sec. 9. It shall be the duty of the Board of Health to prepare such forms for the record of births, marriages and deaths as they may deem proper; the said forms to be furnished by the Secretary of said Board to the county clerks of the several counties, whose duty it shall be to furnish them to such persons as are herein required to make reports.

MEETINGS OF THE BOARD: Sec. 10. The first meeting of the BOARD shall be within fifteen days after their appointment, and thereafter in January and June of each year, and at such other times as the BOARD shall deem expedient. The meeting in January of each year shall be in Springfield. A majority shall constitute a quorum. They shall choose one of their number to be President, and they may adopt rules and by-laws for their government, subject to the provisions of this act.

Officers and compensation: Sec. 11. They shall elect a Secretary, who shall perform the duties prescribed by the Board, and by this act he shall receive a salary which shall be fixed by the Board; he shall also receive his traveling and other expenses incurred in the performance of his official duties. The other members of the Board shall receive no compensation for their services, but their traveling and other expenses, while employed on business of the Board, shall be paid. The President of the Board shall quarterly

.

certify the amount due the Secretary, and on presentation of his certificate, the Auditor of State shall draw his warrant on the Treasurer for the amount.

Annual report: Sec. 12. It shall be the duty of the Board of Health to make an annual report, through their Secretary or otherwise, in writing, to the Governor of this State, on or before the first day of January of each year, and such report shall include so much of the proceedings of the Board, and such information concerning vital statistics; such knowledge respecting diseases, and such instruction on the subject of hygiene, as may be thought useful by the Board for dissemination among the people, with such suggestions as to legislative action as they may deem necessary.

APPROPRIATION: Sec. 13. The sum of five thousand dollars (\$5,000) or so much thereof as may be necessary, is hereby appropriated to pay the salary of the Secretary, meet the contingent expenses of the office of the Secretary, and the expenses of the Board, and all costs for printing, which, together, shall not exceed the sum hereby appropriated; said expenses shall be certified and paid in the same manner as the salary of the Secretary.

Office room: Sec. 14. The Secretary of State shall provide rooms suitable for the meetings of the Board, and office room for the Secretary.

## CONCERNING PRACTITIONERS AND MODE OF PROCEDURE UNDER THE MEDICAL PRACTICE ACT.

Under the Act to regulate the Practice of Medicine in the State of Illinois, all persons practicing medicine in any of its departments, in this State, are divided into two classes:—First, practitioners who had been practicing medicine ten or more year-within this State, prior to July 1, 1877. Second, those who has been practicing medicine in this State for a period of time lesd than ten years, prior to July 1, 1877.

This second class is divisible into two sections:—First, those who can furnish satisfactory proof of having received diplomas as graduates in medicine or licenses from legally-chartered medical institutions in good standing. Second, those who are practicing medicine, in any of its departments, who have neither a diploma or license, and who are required by law to undergo examination by the State Board for its certificate entitling them to practice medicine and surgery in the State of Illinois.

Concerning the proviso by which physicians are exempted from the penalties of the Act, the Attorney General, J. K. Edsall, in an opinion dated November 9, 1877, says: "The proviso in question is in these words: 'Provided, that the provisions of the Act shall not apply to those who have been practicing medicine ten years within the State.' I have no question that the effect of this proviso is to exempt all persons who fall within its terms, from the penalties imposed by the Act in question. But, considering the entire scope of the Act, I am of the opinion that the duty is incumbent upon your Board to ascertain, as far as practicable, the names of all those who are entitled to the benefits of that proviso; and that it is the duty of those who have thus practiced medicine ten years within the State to furnish you, on request, evidence of the fact by-affidavit, or otherwise. Your Board may, with propriety, issue in return some proper certificate, which will show their right to practice under that proviso of the law."

It is the duty, therefore, as well as to the interest of all who claim exemption from the penalties of the Act, in consequence of the fact of their having practiced medicine in this State for ten years previous to July, 1, 1877, and who have not procured certificates, to make affidavit concerning their period of practice, and file the same with the Board, thus establishing their status legally.

Section four of the State Board of Health Act requires that all physicians and midwives, without exception, practicing in this State, shall register their names and post office addresses with the county clerk of the county where they reside. This registration is additional to, and independent of, the record of the certificate issued by the Board, and is obligatory in each county into which the physician's or midwife's practice extends.

Appended is all needful information as to the course of procedure to be observed in applying for a State certificate and complying with the law.

1. Applications for certificates, etc.: Applications for certificates or for blank affidavits, should be made to the Secretary at Springfield. The county clerks are also furnished with blank affidavits, or may obtain the same on application to the Secretary.

A special form of affidavit has been prepared for those who have lost their diplomas by fire or otherwise, and may be had on appli-

cation as above

Diplomas or licenses for verification, and affidavits properly filled out and acknowledged, together with the necessary letters of recommendation and fees for certificates, should be sent to the Secretary.

mendation and fees for certificates, should be sent to the Secretary. For convenience, diplomas may be presented to any member of the Board for verification. In such case the affidavit should be endorsed—"Diploma verified," with the signature of the member, before being forwarded to the Secretary.

- 2. DIPLOMA OR LICENSE TO BE PRESENTED FOR VERIFICATION: In regard to practitioners of medicine who have been practicing in this State less than ten years, the law requires that those who are graduates in medicine, or who have licenses from legally-chartered medical institutions in good standing, must actually present for verification, to the State Board, their diplomas or licenses; and, in addition, such other satisfactory proofs as may be necessary. Graduates may present their diplomas or licenses and affidavits by letter or proxy.
- 3. Affidavits required: Affidavit must be made that the person presenting the diploma, or license, is the lawful possessor of the same. The affidavit should state date and place of graduation, and name of medical college; length of practice in this State, as well as present place of residence.
- 4. FEE FOR CERTIFICATES: The fee for a certificate of graduation is fixed by law at one dollar.
- 5. Examination of non-graduates: It is required by law that all persons practicing medicine less than ten years in any of its departments, who are not graduates in medicine or licentiates, shall be examined directly by the Board, which is authorized to issue certificates to those passing the examination.
- 6. APPLICATION FOR EXAMINATION: The candidate for examination must fill out a blank form, which may be obtained on application to the Secretary. This must be sent to the office of the BOARD, and, if approved, the candidate will be notified when and where to appear for examination.

7. FEE FOR EXAMINATION: Candidates for examination are required to pay a fee of five dollars, in advance—to be returned if the certificate be refused.

- 8. Character of examination: Examinations may be made, in whole or in part, in writing or orally; and shall be of an elementary and practical character, but sufficiently strict to test the qualifications of the candidate as a practitioner.
- 9. Examinations to be made in propria persona: Candidates for examination must present themselves in person before the Board. No examination papers can be sent out to individuals; and no examination can be limited to any one or two special topics, or branches of study or practice. The examinations will be conducted by the entire Board, and upon all branches usually taught in medical schools.
- 10. Schools of practice in examination: Questions relating to special methods or forms of practice or therapeutics will be referred for examination to the various individual members of the Board, as may be indicated.
- 11. Examination in a foreign language: Those desiring to be examined in any other but the English language may, in the discretion of the Board, be examined through an interpreter, furnished at their own expense and approved by the Board.
- 12. Non-graduates must have studied three years: Candidates for examination must present evidence that they have studied medicine at least three years.
- 13. EVIDENCE OF MORAL AND PROFESSIONAL STANDING: All applicants for certificates, whether holding diplomas or not, are required to furnish satisfactory evidence of good moral and professional standing; such evidence (letters of recommendation,) to be filed in the office of the Board as part of the applicant's professional record.
- 14. Certificates to be recorded, in the office of the county clerk; Physicians are required to have recorded, in the office of the county clerk, the certificate which may be received from the State Board of Health; and in case of removal to another county in the State, to have the certificate recorded in that county also.
- 15. Physicians to register in each county: In case a physician practices in any other county than that in which he lives—he having recorded his certificate in his own county—it is not required that he have his certificate recorded in such other county or counties. He must, however, register his name in the county or counties in which his practice extends, and make his returns of births and deaths occurring in those counties to the respective county clerks. In cases of professional consultation only, with resident physicians, such registration is not required.
- 16. Non-resident physicians practicing in this state, amenable to the law: Physicians, residents of adjoining States, who practice in this State in counties adjoining the one in which they reside, are required to take out certificates of practice, as required of residents of this State. They must record the same in the office of the county clerk of the county or counties in which their practice extends; make returns of births and deaths in those counties to the

county clerks, and in every respect conform to all the requirements of the law incumbent upon residents of this State.

- 17. Certificates to exempt graduates: Certificates of graduation will be issued, upon payment of the usual fee, to graduates who have practiced medicine ten or more years in this State, without their being required to send diploma to the Board for verification, upon their making an affidavit to that effect, at the same time giving name of college, place and date of graduation. It is not obligatory upon this class of practitioners to take out a certificate, but experience has shown the utility of such a step, in legal questions arising in practice, as well as in many matters involving the professional status of the practitioner.
- 13. Certificates to exempt non-graduates: Certificates will, when desired, be issued to non-graduates of ten or more years' practice in this State, on affidavit of such practice, supported by evidence of good standing in a medical society, or the recommendation of reputable professional or other men, who have known them during their term of practice.

Such certificates differ from those granted to graduates, and are

issued in the discretion of the Board.

- 19. What constitutes "Ten Years' practice:" It is not required that the ten years of practice in this State shall be consecutive years; but the sum total of practice in this State must amount to ten years before July 1, 1877. No allowance is made for the time spent in practice in any other State, or in service in the army or navy.
- 20. Change of location: It is important that when a change of location is made, it be promptly reported to the Board. Unless this is done, the Official Register will necessarily be incorrect.
- 21. Professional acts illegal prior to record of certificate: No one belonging to the second class, as defined in the beginning of this section, has a right to practice until the certificate of the Board is placed upon record in the county in which the individual lives. All professional acts, prior to this being done are illegal and render the delinquent liable to prosecution.
- 22. What constitutes "practicing medicine" under the statute: The eleventh section of the act to regulate the practice of medicine in the State of Illinois, approved May 59, 1877, contains the following: Any person shall be regarded as practicing medicine within the meaning of this act who shall append to his name the letters of "M. D."—[Laws of 1877, page 156, section 11.]

Independently of the statutory definition, the terms import and embrace the pursuit and vocation of one who holds himself out to the public as possessing the requisite skill to treat disease, and accordingly prescribes for or treats patients as a physician. [Opinion]

of Attorney General Edsall, July 23, 1880.

109

23. Gratuitous practice does not exempt from the law: If a person "practices medicine," as defined by the statute, without complying with the law, it is wholly immaterial whether he charges for his services or not. He is guilty of a violation of the law, and liable to prosecution. This, however, does not apply to gratuitous services rendered in a case of emergency by a non-qualified person.

On this point Attorney General McCartney has furnished the

following opinion:

STATE OF ILLINOIS, ATTORNEY GENERAL'S OFFICE, SPRINGFIELD, October 6th, 1881.

John H. Rauch, M. D.; Secretary State Board of Health:

Dear Sir: I have the honor to acknowledge your favor of the 5th inst., asking whether or not, in prosecutions for the violation of the act to regulate the practice of medicine in the State of Illinois. It is necessary to show that the person accused, charged a fee, in order to sustain a conviction. I respectfully submit the following reply.

Section 13, of the act referred to, declares the penalty which shall attach to "any person practicing medicine or surgery in the State without complying with the provisions of the act," with the proviso that it shall not apply to those in practice ten years, etc. No other exception is made, and no reference is there made to charging or not charging fees. If a person "practices medicine" without complying with the provisions of the act, he is liable to the negativ. to the penalty.

#### WHAT, THEN, IS PRACTICING MEDICINE?

Is charging a fee a necessary part of "practicing medicine?" Taking the words in their usual and ordinary signification we would say one is engaged in practicing medicine who announces to the public that he will prescribe for the diseased who may apply to him for relief, and who makes the treatment of such his chief occupation or business. If he did that he would be "practicing medicine," and whether the services were gratuitous, or whether exorbitant rates were charged, would be wholly immaterial in determining that question.

But the statute comes to our aid, and in section 11 says "any person shall be as practicing medicine, within the meaning of this act, who shall profess publicly to be a physician, and to prescribe for the sick," * * * but nothing in the act shall be construed to prohibit students prescribing under the supervision of preceptors, or "to prohibit gra-

tuitous services in cases of emergency.

The object of the act, as indicated throughout all its parts, is to prevent

#### THE PRACTICE OF MEDICINE BY UNQUALIFIED PERSONS,

and to protect the public from the evils that might attend the practice of medicine by those unskilled in the profession. I must hold that charging a fee is not a necessary element to constitute a violation of the act.

Of course, a person who should, in a case of emergency, tender gratuitous services would not be liable to the penalty. It is not intended by the law that a person not licensed shall stand by and see his fellow suffer sudden affliction awaiting the arrival of a licensed physician or surgeon, or become liable to the penalty of the law if he furnish relief. By doing such an act he would not become a physician or "one engaged in the practice of medicine."

The law applies to those who make a business of practicing medicine, and it is wholly

#### IMMATERIAL WHETHER FEES ARE CHARGED OR NOT.

A different view may have arisen from the examination of old English precedents, which made the charging a material factor; but such were based upon a statute which was passed for the benefit of the practitioner, and not, like our law, for the benefit and protection of the people.

Very truly yours, JAMES MCCARTNEY,

Attorney General.

110

#### PROSECUTIONS UNDER THE MEDICAL PRACTICE ACT.

In order to correct a still widely-spread impression, that it is the duty of the State Board of Health to prosecute for violations and infractions of the Medical Practice Act, the following extract from a letter of Attorney General Edsall, dated July 23, 1880. is republished, together with other necessary information concerning prosecutions under the Act:

- 1. Prosecutions to be conducted by the state's attorney: The act of May 29, 1874, known as the Medical Practice Act, provides that, "any person practicing medicine or surgery in this State without complying with the provisions of this act shall be punished by a fine of not less than \$50 nor more than \$500, or by imprisonment in the county jailfor a period of not less than thirty days nor more than three hundred and sixty-five days, or both such fine and imprisonment, for each and every offense." (Laws of 1877, page 144, section 13.) The fine and imprisonment therein provided for can only be enforced by indictment in the Circuit Court, or information filed by the State's Attorney in the County Court, in like manner as other violators of the criminal laws are required to be prosecuted. It is the duty of the State's Attorneys of the several counties to conduct such prosecutions.—[J. K. Edsall, Attorney General.
- 2. FOUNDATION FOR THE PROSECUTION MAY BE LAID BY ANY ONE: Any person who has a knowledge of the facts may make complaint before the Grand Jury, or furnish to the State's Attorney the necessary facts upon which he can file information in the County Court
  - 3. FORM OF COMPLAINT TO BE MADE*:

STATE OF ILLINOIS, (

.....County.

the form of the statute in such cases made and provided.

4. PRELIMINARY EXAMINATION MAY BE HAD BEFORE A JUSTICE OF THE PEACE: If it is desired to place a person charged with violating the Medical Practice Act under recognizance to appear at the proper court to answer any indictment that may be found against him for such offense, complaint may be made before a Justice of the Peace, upon which preliminary examination can be had; and in case probable cause is shown, such party may be required to enter into recognizance, with sufficient sureties, to appear at the next term of the court having jurisdiction of the offense, to answer such indictment, the same as in other criminal cases. as in other criminal cases.

^{*} Copies of this form of Complaint and Information may be obtained by addressing the Secretary, at Springfield.

#### 5. Construction of the ten-year exemption clause:

Whereas, In several instances, recently, where suits have been brought against persons for the violation of the "Act to Regulate the Practice of Medicine," advantage has been taken of the ten-year clause by those who do not strictly come within its provisions; therefore, be it

Resolved. That it is decided by this BOARD that the ten-year exemption clause, as a qualification, means that the person who avails himself of the said exemption must have actually been engaged in the practice of medicine as a means of gaining a livelihood, and must have publicly announced himself to be a physician for a period of ten or more years before July 1, 1877; further

Resolved, That persons who have only occasionally prescribed during that time are not by this Board considered as entitled to the benefits of the exemption.

Adopted, September, 1881.

#### REVOCATION OF CERTIFICATES.

Section 10 of the Medical Practice Act recites that "the State Board of Health may refuse certificates to individuals guilty of unprofessional or dishonorable conduct, and they may revoke certificates for like causes."

Concerning its duties and responsibilities under this section, the Hon. E. S. Williams, in a decision rendered at the October, 1878, term of the Circuit Court of Cook County (Nathan J. Aiken vs. State Board of Health,) says the Board is constituted, among other things, to have charge of medical practice and medical practitioners in this State, and it is its right and duty to have surveillance of the professional conduct of physicians by the language of the act of incorporation. Any persons guilty of unprofessional conduct may be by it refused certificates, and any persons having certificates who were guilty of unprofessional conduct may have their certificates revoked by the Board. The object of the incorporation of the Board is, among other things, to secure a higher professional standard in the medical profession. It is to exclude empirics and empiricism from the profession. The duties of the BOARD are various, and the interests intrusted to its keeping affect all classes of the community, and affect them in the most vital points. The character of its duties is in part set forth in the second section of the act creating the Board. "The STATE BOARD OF HEALTH shall have the general supervision of the interests of the health and life of the citizens of the State. They shall have charge of all matters pertaining to quarantine, and shall have authority to make such rules and regulations, and such sanitary investigations as they may from time to time deem necessary for the preservation or improvement of public health," and all police officers, sheriffs and other employés of the State are required to enforce its rules and regulations so far as the efficiency of the Board may depend on their co-operation. Such a Board must, from the necessity of the case, be vested with a large discretion. And, in the legitimate exercise of its discretion, it ought not to be, and cannot be, properly controlled by judicial tribunals. duties of the Board, with reference to the sanitary condition of the people, bring it into such relations to the medical profession as to fit it to determine the necessary qualifications of its members, and to judge of the propriety or impropriety of their professional deportment. The law has devolved this and similar duties upon the BOARD, and it has created no other corporation in the State for a like purpose, nor has it given to any State officer supervision over 113

the Board in the discharge of its appropriate duties and the exercise of its legitimate discretions. A physician may be guilty of unprofessional and dishonorable conduct, and not of criminal conduct. It would have been a work of supererogation in the lawmakers to have vested the Board of Health with the supervision of the unprofessional conduct of the medical practitioner, if unprofessional conduct and criminal conduct were synonymous. As a citizen, the physician is, with every other citizen, answerable to the criminal laws, and as an alleged criminal is liable to be arraigned before our Courts. It is only as a physiciann that he is liable to have his professional conduct inquired into and brought before the State Board of Health. The term "unprofessional" is therefore far wider than criminal. Many acts would be unprofessional that were not criminal; some acts that were criminal might not be esteemed unprofessional. What is professional conduct can only be determined by bringing the act to the professional criterion, and who so well qualified to judge of the proper professional criterion for the medical profession as a Board constituted as the bill shows this Board to be, of seven gentlemen, five of whom are physicians, and a Board created for sanitary purposes, and accustomed to sanitary investigation? The "unprofessional" conduct which authorizes the Board to exclude a physician from the profession does not, therefore, mean, necessarily, criminal or immoral acts, but such conduct as is inconsistent with the honorable practice of the profession; and in judging of such conduct, the Board OF HEALTH has a wide discretion, and in its exercise courts ought not to interfere with it.

It may be added that, in the test case above cited and which was carried up, on appeal from Judge Williams' decision, the Courts have refused to interfere with the Board's exercise of that discretion.

#### WHAT CONSTITUTES UNPROFESSIONAL OR DISHONORABLE CONDUCT:

The State Board shall define: The Legislature has constituted this Board, and has said that it shall be vested with the power to determine what is unprofessional and what is dishonorable conduct in a physician * *.

Is it unprofessional in a physician, by falsely advertising as to his skill, to impose upon the weakness, the credulity, the ignorance of the people? Is it unprofessional to publish that he is a specialist in all chronic diseases; to pretend to a universal knowledge of all diseases? Is it professional to thus profess what every intelligent man knows is impossible? Is it professional to solicit correspondence? Is fraud professional, or fraudulent pretenses?

Whether these things are or are not unprofessional, is left by law to the STATE BOARD to decide; and there ought to be but little, if any, doubt as to what they would decide. Aikin vs. State Board of Health. Argument on the Appeal.

1. By Advertisement or Publication:

Resolved. That in response to the following written enquiry made to the Board by R. W. McAfee, general agent of the Western Society for the Suppression of Vice, "Is it professional for a physician to advertise or promiseuously to distribute or circulate marriage guides," secret monitors, pamphlets or circulars, describing or illustrating, by, means of pictures, venereal diseases; or to advertise directly or indirectly, or even impliedly, nostrums or medicines for preventing conception or for procuring abortion? the Board decides that each and all of the above described acts are grossly unprofessional sional.

Adopted February 19, 1880,

2. By Fraudulent or Deceptive Transaction:

Resolved, That any fraudulent or deceptive professional transaction shall be deemed, in the sense of this BOARD, unprofessional and dishonorable conduct.

Resorted. That any medical man who practices medicine under two names, or any other name than his true name, shall be considered guilty of unprofessional and dishonorable conduct.

Resolved, That any advertisement, hand bill or means of attracting public attention or securing patronage, which shall be deceptive or convey to the public any false or fraudulent information, shall be considered unprofessional and dishonorable.

Adopted February 19, 1880.

3 By Practicing under Assumed Name:

Whereas, Several parties throughout this State are practicing specialties under assumed names, and by a variety of dishonest and dishonorable means are imposing upon and defrauding both the people of this State, and every upright practitioner of medicine; therefore,

Resolved. That it is the duty of this BOARD to at once proceed to investigate such cases and to deal with them according to law.

Adopted February 19, 1880.

#### CHARGES BELONG TO THE RECORDS OF THE BOARD:

Resolved. That after action has been taken revoking a certificate for cause, the BOARD cannot return the charges that have been made against the holder of said certificate. Adopted January, 1880.

#### NOTICE TO BE SERVED UPON INFORMATION:

Resolved. That in cases where information comes to the notice of the STATE BOARD OF HEALTH that persons holding certificates from said BOARD are advertising in an upprofessional manner, or are in any way guilty of unprofessional or dishonorable conduct, it shall be the duty of the Secretary to notity such persons at once to appear before the BOARD and show cause why their certificates should not be revoked.

Adopted September, 1881.

#### DECISIONS AFFECTING MEDICAL COLLEGES.

#### TWO GRADUATING COURSES IN ONE YEAR:

Resolved. That on and after July 1, 1878, the Board will not consider any medical school in good standing which holds two graduating courses in one year.

Resolved, That on and after July 1, 1878, the BOARD will not recognize the diplomas of any medical school which does not require of its candidates for graduation the actual attendance upon at least two full courses of lectures, with an interval of six months or more.—Adopted, November 15, 1877.

#### GOOD STANDING WITHIN THE MEANING OF THE STATUTE:

Whether or not a "legally chartered medical institution" is in "good standing" within meaning of those terms as used in section 3 of the "Act to regulate the practice of medicine in the State of Illinois." in force July 1, 1877, so as to entitle graduates possessing diplomas or licenses from such medical institutions to certificates from your BOARD, authorizing them to practice medicine in this State, is a question of fact to be determined by your BOARD, at least in the first instance.

The words "in good standing" should be understood in the sense which would ordinarily be ascribed to them by those familiar with institutions where the science of medicine is taught. Any medical institution whose course of study prior to graduation is equal to that generally regarded by the medical profession as sufficient to entitle a student to graduate and receive a diploma as Doctor of Medicine, should be treated as in "good standing."

The most rigid and thorough course of study is not contemplated by these words, but that average standard which obtains among the medical schools of this country would seem to meet the requirements of the statute.

If a medical college or institution makes its course of study so brief as to fall materially below the average standard. I have no doubt that your BOARD has the power, and that it is your duty, to refuse certificates to its graduates, authorizing them to practice medicine in this State,

As to what length of time is generally considered requisite to be devoted to a course of medical study to entitle a student to a diploma, that is a question of fact, to be determined by your BOARD from the best information at your command:—Opinion of Attorney General Edsalt, October 9, 1879.

No EQUIVALENT FOR ACTUAL ATTENDANCE: In conclusion, the BOARD reaffirms its resolutions of November 15, 1877, and furthermore declares that no prior practice, or proof of qualifications, will be accepted by it as an equivalent for actual attendance upon the two full courses of lectures, or any part thereof. The BOARD is well aware that this, like all general rules, may work seeming hardships in a few special cases: but it believes the good it will effect for the medical profession and for the public well-being, and for the advance of medical science and education demands that the medical colleges shall maintain with the utmost stringency their requirements for graduation, and that these shall include not less than actual, faithful, and regular attendance on the two full courses of lectures. The more of preliminary and concurrent reading and practice, in hospital or under the eye of an experienced physician, the better. There is no danger that the young physician's studies will be too thorough or extensive.—Hahnemann College Case, June 13, 1879.

#### MEDICAL ETHICS:

Resolved. That the Board recommends to all the medical schools in this State that they make the necessary arrangements to deliver to their yearly classes a series of two or more lectures on medical ethics, setting forth the duties of the physician toward the public, and also toward the members of his own profession.—Adopted, February 5, 1880.

#### PROFESSIONAL RELATIONS:

Resolved. That the Secretary of the BOARD be, and hereby is, instructed to request the medical schools of the State to give one or more lectures each year on the relation of the profession to the public and to each other, believing the same to be in the interest of the people and of medical men.—Adopted September. 1881,

#### "STUDENTS" DEFINED:

Resolved, That the word "student" which occurs in section 11 of the law, 1877, regulating the practice of medicine, is construed by this BOARD to mean a person actually engaged in the study of medicine in the office, and under the instruction, of a physician.

Resolved, That students so engaged in the study of medicine are not permitted under said law, to prescribe for or treat patients without the daily and direct advice and supervision of their preceptors.—Adopted, April 29, 1881.

#### CONCERNING MIDWIVES.

Midwives are required by law—

- 1. To register their names and post-office addresses in the offices of the county clerks in the counties where they reside.
- 2. To obtain certificates from the State Board of Health entitling them to practice their art: *Provided*, That they have not practiced the same for a period of at least ten years prior to July 1, 1877.

Certificates entitling to practice are obtainable in the same manner as those for the practice of medicine and surgery, *i. e.*, either by the presentation of "a diploma or license from a legally-chartered medical institution in good standing," with the necessary affidavit, letters of recommendation and fee of one dollar; or by undergoing an examination by the Board in the usual branches.

#### EXAMINATIONS:

Resolved, That any medical practitioner of the State Board of Health may examine midwives relative to their competency, and if found to be competent and qualified persons to practice midwifery, they shall receive the midwife's certificate of examination of this Board, upon the recommendation of such examiner.—Adopted, January 16, 1879.

Resolved. That it is the duty of all midwives, and of all women practicing midwifery in this State, who are not authorized to practice under the Medical Practice Act, to report without delay to one of the following named members of the Board, for examination: H. Wardner, M. D., Anna*; J. H. Rauch, M. D., Chicago; R. Ludlam, M. D., Chicago; W. M. Chambers, M. D., Charleston*; A. L. Clark, M. D., Elgin.—Adopted, June 14, 1879.

#### SCHOOLS OF MIDWIFERY:

Whereas, Parties in this State have frequently taken out charters, under the State law, for the establishment of schools of midwifery, the recognition of which schools by the Board becomes a question; and

Whereas, In many cases such parties have been without the necessary qualifications; therefore,

Resolved, That, while not desiring to discourage any reputable efforts to increase the knowledge and ability of those practicing obstetrics in this State, the Board finds it impossible, at this time, to recognize the certificates or diplomas of such institutions as a substitute for examinations by the Board, or as a sufficient basis upon which to grant a State certificate entitling the holder to practice midwifery.—Adopted, June 30, 1881.

^{*}The successors of Drs. Wardner and Chambers, resigned, are Dr. W. A. Haskell, of Alton, and Dr. John McLean, of Pullman.

## REPORT OF THE PROCEEDINGS

AT THE

# CHICAGO CONFERENCE ON SMALL-POX.

JUNE 29-30, 1881.

#### REPORT OF THE PROCEEDINGS.

AT THE

# CHICAGO CONFERENCE ON SMALL-POX.

### JUNE 29-30, 1881

In response to the appended circular-letter of invitation, a conference of delegates from State and municipal boards of health with members of the National Board of Health, was held in the city of Chicago, June 29-30, 1881, to consider and adopt measures for united action by health authorities, in preventing the introduction of small-pox into the United States, and its spread from one State into another:

> ILLINOIS STATE BOARD OF HEALTH, SPRINGFIELD, June 13, 1881.

You (or a representative of your Board) are respectfully invited to attend a conference of State and local boards of health, on June 29th, at the Grand Pacific hotel in Chicago. The question of concert of action between local and State boards of health and the National Board of Health, will be considered, and a plan submitted to prevent the introduction of small-pox into this country, and to prevent the spread of the same.

It is unnecessary to say how much we are all interested in this subject.

The prevalence of small-pox at this time is a disgrace, and unless more energetic measures are taken, it will continue to increase so long as immigration is pouring into this country as at present. Very respectfully yours, John H. Rauch, M. D., Secretary.

### The following delegates were present:

H. B. Baker, M. D., Secretary, Michigan State Board of Health. NEWTON BATEMAN, LL. D., Member, Illinois State Board of Health.

A. H. BRIGGS, M. D., Health Officer, Buffalo, N. Y.
A. L. CLARK, M. D., Member, Illinois State Board of Health.
E. J. DAVIS, M. D., Member, Minnesota State Board of Health.
OSCAR C. DEWOLF, M. D., Health Commissioner, Chicago.
R. J. FARQUAHARSON, M. D., Secretary, Iowa State Board of Health.

JOHN M. GREGORY, LL. D., President, Illinois State Board of Health.

C. N. Hewitt, M. D., Secretary, Minnesota State Board of Health. E. Lloyd Howard, M. D., President, Maryland State Board of Health.

Hosmer A. Johnson, M. D., Northwestern Member, National Board of Health.

R. Ludlam, M. D., Member, Illinois State Board of Health. John McLean, M. D., Member, Illinois State Board of Health. JOHN H. RAUCH, M. D., Secretary, Illinois State Board of Health. J. T. Reeve, M. D., Secretary, Wisconsin State Board of Health. Stephen Smith, M. D., Representative of New York State Board of Health; Member, National Board of Health. James A. Steuart, M. D., Health Officer, Baltimore, Md.

H. B. Strong, M. D., Member, Wisconsin State Board of Health. O. W. Wight, M. D., Health Commissioner, Milwaukee, Wis.

Dr. John M. Gregory, of Illinois, was elected Chairman, and Dr.

H. B. Baker, of Michigan, Secretary of the Conference.

After being called to order by the Chairman, the meeting was addressed by Dr. Rauch, of Illinois, who read the call for the Conference and stated that invitations had been forwarded to the State Boards of Health of all the Western and Southwestern States; tomany of those of the Eastern States; to the municipal health authorities of the large cities, and the health officers of the Atlantic

Letters strongly favoring the objects of the Conference, had been received from many who were unable to be present, including Dr. W. H. Clark, Secretary, Tennessee State Board of Health; Dr. S. H. Durgin, Boston, Mass., Board of Health; the Hon. Charles W. Francis, Health Commissioner, St. Louis, Mo.; Dr. Elisha Harris, Secretary, New York State Board of Health; Dr. A. J. Miles, Health Officer, Cincinnati, Ohio; Dr. W. Snively, Health Officer, Pittsburg, Pa.; and Dr. Pinkney Thompson, President, Kentucky State Board of Health.

The secretary read a communication from the State Board of Health of New York, setting forth that small-pox was widely spread through the chief ports of Europe, and that the prevalence of varioloid tended to show that vaccination, during several years past, had been less effectual than it should have been. The Board recommended a system of thorough inspection and vaccination at all the European ports of departure; an increase of efficiency in the American quarantine system; and a more thorough co-operation of the State and National boards of health, for the prompt suppression of small-pox wherever it might appear.

The Board relied greatly upon re-inspection after landing, and the organization of complete lines of resistance to the exotic contagion; and promised everything in their power which would tend to the

attainment of the object in view.

Dr. Briggs, of Buffalo, said that a thorough system of inspection had been put into operation in that city. All the cases of smallpox in Buffalo this year had either been brought in by immigrants, mostly Polish, or had been contracted from them. He had learned that, despite this inspection and the removal of cases to their hospital from among immigrants going farther west, the disease had again broken out among them after they had left the city.

Dr. DeWolf said that hundreds of immigrants came into Chicago every day. Whenever practicable, trains were met thirty miles out by the officers of the health department, and an inspection was

made, so far as the conditions would admit. Of sixty-two cases now in the small-pox hospital, he said, fifty of the sufferers could not speak English. Patients arrived in Chicago from New York and Baltimore who had reached the eighth, ninth or tenth day of eruption. In one case, a woman, who came by the way of Baltimore, died in four hours after reaching the city. The trouble was that the disease was not sufficiently developed at the port of entry to enable the inspector there always to detect it.

Dr. DeWolf thought that the only remedy was for the authorities of the different European ports to insist on every intending passenger producing a certificate of recent vaccination. Any steamer bringing passengers without such certificate should be placed in

quarantine.

Dr. Hewitt, of Minnesota, said that within the past year there had been eight outbreaks of small-pox in that State; but in every case the disease had been confined to its local center. He thought the chief reason for this was that vaccination had become much more general than in former times. The speaker did not feel at all clear about the practicability of inter-State quarantine, and doubted the power of the National Government to enforce it. The question of maritime quarantine was an entirely distinct one, and should be kept separate from the other. Dr. Hewitt believed that by vaccination and revaccination the people at home could be protected, and an imported case would then be simply a pathological curiosity. He thought something could be done in the way of maritime quarantine; did not believe in the possibility of an inter-State quarantine. The trouble was that small-pox did not have the politeness to break out just in time for the health inspector at any particular point to detect it.

Dr. Farquaharson, of Iowa, said that small-pox had been introduced into that State in twenty or thirty instances, during the previous spring. In many of these cases, particularly in the northeastern part of the State, the disease was directly traced to recently-arrived immigrants. There were also cases imported from Southern Illinois and St. Louis. Isolation had been pursued with success in

these cases.

Dr. Wight, of Milwaukee, said he had no knowledge of the importation of small-pox by immigrants into Milwaukee during the past three years. There had been cases of small-pox in the city, with regard to which the plan of isolation had been adopted, the buildings quarantined, and infected property destroyed. Wisconsin had a very stringent law with regard to the movements of persons known to be afflicted with contagious diseases. The speaker wanted the Conference to discuss scarlatina and diphtheria, as well as small-pox. He thought the best preventive of epidemic small-pox was to enforce vaccination in every community. The matter of concealment of cases could be reached in every city by a law similar to that of Wisconsin.

Dr. Reeve, of Wisconsin, said there had been four or five cases introduced into Wisconsin by immigrants.

Dr. Steuart, of Baltimore, agreed with Dr. Wight. Baltimore had a compulsory vaccination law, enforced by a heavy fine against the parents of unvaccinated children. When small-pox occurred,

either the patient was removed to the small-pox hospital, or the house was quarantined and decorated with a yellow flag. This year there were only three cases among immigrants. In the speaker's opinion, the palladium of safety from small-pox was vaccination and revaccination. When communities were thus protected they need care very little about what small-pox might be brought in by immigrants. Disease thus brought in would have no meat on which to feed, and would soon die out.

Dr. DeWolf said that what was wanted was protection for immigrants, as well as for our own citizens. Immigrants form a large yearly addition to our population, and they must be rendered safe from carrying and disseminating contagion, or local measures will

be unsatisfactory to a great extent.

Dr. Stevens, of Indiana, thought the discussion had taken a wide range, and that some form of resolution, or other tangible expression of opinion, should be presented to bring the question properly

before the meeting.

Dr. Briggs thought some measure should be adopted to meet the existing emergency, while the Department of State was getting ready to begin to do something. It would take too much valuable time to await the adjustment of questions of international comity

involved.

Dr. Howard, of Maryland, told of one case smuggled through Baltimore, which did not develop until the patient reached Chicago. Out of 20,000 immigrants arriving in Baltimore, there were only three cases of small-pox. The passage from Bremen to Baltimore occupied sixteen to eighteen days, and if the immigrants contracted the disease, or were exposed to infection in Germany, it seemed to him the symptoms would have been manifested before reaching port—the period of incubation never exceeding fourteen days. He wanted to hear from the representatives of New York and the Eastern and Canadian ports, and called attention to the fact that Philadelphia, with its limited arrivals of immigrants, officially recorded over 1,000 deaths from small-pox in the last year.

The speaker defended the inspection system in vogue at Baltimore, and wanted all immigrants to be vaccinated in Europe just before sailing. It was impossible to successfully handle them on

arrival, if this precaution were neglected.

Dr. Baker reported that only two or three cases of small-pox had been detected at Port Huron, Mich., although over 10,000 immigrants passed through that place each month. Vaccination was duly attended to in Michigan, and there were few cases in the State.

Dr. Stephen Smith spoke on behalf of New York and of the National Board of Health. He said that in 1878 and 1879 there was no small-pox in the United States, but that with the increase of immigration the disease had manifested itself to a considerable extent. He had no doubt that small-pox had been brought from Europe, and considered the system of quarantine on vessels in New York harbor to be utterly inadequate. Large numbers of persons, principally children, came in unvaccinated. Many of the immigrants thus unprotected were Poles, who entertained violent prejudices against vaccination. The speaker said there were not more

123

than fifteen to twenty deaths per week in New York from smallpox, and a thorough system of vaccination was carried out there by a trained corps of physicians. A "scare" had been gotten up by the health authorities of New York, which had led to immense numbers of citizens submitting themselves to vaccination or revaccination.

Dr. Smith held that steamship lines should be compelled to bring no persons who could not show evidence of vaccination or a proper certificate of protection. This could only be arranged by agreement with foreign Governments, and there were many difficulties in the way. An imperative rule requiring the vaccination of each immigrant on arrival, might work, but it would be impossible to detain the parties for observation. A whole ship-load could be vaccinated in an hour at New York, and re-inspections might be made at inte-

rior points, provided the necessary power could be obtained.
Dr. H. A. Johnson, of Chicago, had no statistics on the subject but believed there was no doubt that small-pox was brought in by immigrants. The foreign population of Chicago, as ofother cities, showed much aversion to vaccination. The matter of legislation was a difficult one, and the creation of a healthy public sentiment should be sought. While it might not be practicable to enforce the vaccination of immigrants at Liverpool or Bremen, the Government could certainly place proper limitations upon the landing of persons not protected.

Dr. Steuart said the rivalry between ports of entry was so great that a strict quarantine enforced in one city and not in another would drive immigration away from the port where the regulation was

honestly carried out. He offered the following:

Resolved. That it is the sense of this Sanitary Conference held in Chicago June 29, 1881, that notification should be sent to the various steamship lines, that unless certificates of vaccination be furnished with each immigrant arriving at the ports of the United States, the vessels carrying such immigrants would be quarantined for a sufficient time to insure the development of all undeveloped cases of small-pox, as well as the discovery, if possible, of concealed existing cases which have developed during the voyage.

The resolution was referred to a committee, consisting of one member from each organization represented, which committee was also instructed to prepare a set of resolutions to be submitted to the Conference for discussion and adoption.

Resolutions, calling upon the National Board of Health to secure the cooperation of foreign governments, were referred to the same

committee, which subsequently submitted the following

#### REPORT.

The constantly recurring outbreaks of small-pox in various parts of the United States during the past few months, and the widespread and fatal prevalence of that disease in many localities, demand the most serious consideration of the health authorities of this country. In our opinion this Conference should use its utmost power to unite all the health authorities of the United States in a well-organized plan, not only of stamping out smallpox where it at present exists, but of preventing its further introduction into the United States and its spread from one State into another. For two or three years prior to 1879 small-pox was

almost unknown in the United States, certainly scarcely a death was reported. The result of a long-continued immunity from this disease is great laxity in regard to vaccination. Large numbers of children born during such periods are allowed to remain unvaccinated in every community. Hence, when small-pox appears after such intervals of immunity from the disease, it spreads with far greater virulence than when vaccination is enforced by the fear which the presence of small-pox creates. In 1879 there were a few deaths by that disease in New York (25) and in San Antonio, Texas, (125), but the country at large enjoyed a remarkable immunity from that affliction. The cases in 1879, in New York, occurred among unprotected foreigners, and those in San Antonio were unprotected New Mexicans. But during 1879 small-pox began to be more than usually prevalent in European seaports and in Canada. Much uneasiness was felt by many of the most vigilant sanitary officers in different parts of the country lest the infection should be brought to this country, especially from the neighboring Province of Canada, particularly at Montreal. In several instances local outbreaks of the disease occurred along the Canada frontier, owing to the importation of the infection through immigrants. Towards the close of the year 1879 there were evidences of a wider distribution of small-pox than could be accounted for by importation from Canada. It appeared in New York, Philadelphia, Chicago, the District of Columbia, and other cities. During the year 1880 these outbreaks became more general and were most marked in the Western and Northwestern States, while in the larger Eastern cities it prevailed with a constantly increasing tendency to become epidemic. The present year, 1881, opened with a wide distribution of the disease, and frequent local epidemics of great severity.

The following table, though not complete, furnishes sufficient information to indicate the gradual rise of the epidemic and the present distribution of the disease. It gives the number of deaths from small-pox reported in 1879, 1880 and 1881, up to the week

ending June 11:

CITIES.	1	Number of Deaths.			
	1879.	1880.	23 weeks in 1881.	Total.

From reliable sources it is known that small-pox prevails to an unusual extent in many of the large cities of the North and West, and that virulent and fatal epidemics of this disease are of frequent occurrence in small towns and in small communities of many States.

If, now, we inquire into the causes of this diffusion of small-pox throughout the country, we shall find that immigration is at least an important factor. First, it must be remembered that small-pox became epidemic or certainly unusually prevalent in foreign seaport towns and in Canada in 1878, 1879, and 1880, and is at present the prevailing epidemic disease in these towns. From the following figures it appears that the tide of immigration to this country from Europe began to rise in 1879, and in 1880 reached proportions hitherto unprecedented in the history of immigration to this country. And still the tide is rising, as appears from the following late reports of the Chief of the Bureau Statistics at Washington, viz: for nine months ended March 31, 1880, 214,596; for the same period in 1881, 357,396. The total increase in the number of immigrants during the last nine months is 142,800. From still later reports we learn that the arrival of immigrants at the principal ports of the United States is yet on the increase. Indeed, it is no unusual occurrence to witness the arrival of from 6,000 to 8,000 immigrants at the port of New York in a single day.

Second.—It must be noticed that the immigrants are largely from Germany, England, Wales, Ireland, Scotland, and the Dominion of Canada, countries in which small-pox has been, and still is, unusually prevalent. The number of immigrants arrived during the eleven months ended May 31, 1881, was as follows: From Germany 175, 306; Dominion of Canada, 110,611; England and Wales, 57,861; Ireland, 61,796; Scotland, 12,628; China, 7,443; and from all other countries, 138,649. Total 564,294.

Third.—The number of cases of small-pox arriving on immigrant ships at the ports of the United States is unusually large, as reported by the health officers of the several ports of arrival. With rare exceptions the sick immigrant is not effectually isolated from the steerage passengers. The hospital quarters are amidships, with no adequate means of seclusion nor independent ventilation. As a consequence 1,000 to 1,500 persons are more or less directly exposed to the contagion and infection; nor is vaccination of the passengers practiced or even attempted at sea, so that when the ship reaches

its destination it may have on board many persons who are thoroughly inoculated with the contagion, though as yet apparently perfectly well.

Fourth.—Another important fact is the rapidity of ocean transit. which must be taken into consideration in estimating the influences of immigration on the importation and dissemination of small-pox. While the incubation period of small-pox is fourteen days, eight or twelve days is the average period of the voyage of the immigrant vessel arriving at New York, where the greater number of immigrants land. Now, it is a well ascertained fact that the emigrants reach the ports of embarkation commonly several days before the sailing of the ship. During this interval the emigrant families take quarters in the low lodging houses about the docks and wharves in which small-pox is now very prevalent. The result is that the unprotected emigrants become infected, and if they immediately embark they may not only reach the port of destination before the incubation period has passed, but may pass the quarantine in apparently perfect health. And, what is still more important, if such infected immigrants immediately on landing take passage on board the immigrant trains, as vast numbers do, they may reach the most distant settlements before the disease finally develops. It is quite plain that under these circumstances no amount of vigilance in merely searching for the sick can prevent the introduction and wide dissemination of small-pox in this country. And this conclusion has tenfold force when applied to the introduction of small-pox from the Dominion of Canada by means of immigrants.

Fifth—It is a noticeable fact that large numbers of immigrants are found, on inspection, to be unvaccinated. This might be inferred from the fact that such a large proportion of the total number are children. Of the 457,257 immigrants arriving in the year 1880, 87,154, or about one-fifth, were under 15 years of age. It is found also that an intense prejudice exists against vaccination on the part of several nationalities. In several instances compulsory measures have been resorted to at the port of New York to compel the vaccination of unprotected persons who have been exposed to the infection. These immigrants have been known to wash their vaccination wounds immediately after the operation, and in some instances they have been detected having another person, as the

mother of a child, suck the wound to remove the virus.

The measures at present adopted and relied on to prevent the introduction and spread of small-pox in the United States by immigrants, are evidently inadequate to meet existing conditions. Our health officials are pursuing the methods of prevention in vogue before the era of steam, ocean and land travel. Thus far at the port of arrival the health officer takes cognizance only of vessels having well marked small-pox cases on board, either in transit or on arrival. In this case the vessel is subjected to cleansing and disinfection, and the passengers are vaccinated and allowed to depart, no further care being taken to insure successful disinfection of baggage, nor of the vaccination of the unprotected. The immigrant trains proceed to their destination, scattering their occupants along the way without further sanitary care or inspection. Wherever the immigrant stops he seeks the low lodging-house, and there the

disease that he has carried in his system from the port of embarkation may first develop itself, and establish a focus of infection which may, and often has of late, involved a whole town in disaster. The first knowledge the local health authorities have of the arrival of the pestilence, is its apparently sudden outbreak. It is evident, not only from our past experience, but from the nature of the case, as developed in the preceding recital of facts, that the methods we are now pursuing will not prevent the introduction of small-pox into the United States, nor control, in any proper sense, its spread. There is every indication that the amount of immigration will not be disminished, and that small-pox will become more and more prevalent abroad. To meet this emergency, it is the duty of this Conference to determine upon a practicable plan of concentrated operations adequate to accomplish the purpose in question. In this view, the following scheme is proposed for consideration:

It is evident we can no longer rely simply on quarantine rule, which secures vaccination only of those on board vessels having had small-pox cases during the voyage. The future rule must be that all immigrants shall give satisfactory evidence of being protected against small-pox before being allowed to land. There are two

methods of accomplishing this object:

(1.) The restrictions of quarantine may be so applied as to make it obligatory upon steamship owners to cause a medical inspection of all emigrants when they embark, and vaccination of all persons found unprotected. If this plan were carried out in good faith scarcely an immigrant could reach our ports who would develop small-pox. He could only carry the infection in his baggage. But, if proper sanitary care of the baggage was required, that also could be relieved of infection on the voyage. It is doubtful, however, if these measures could be fully carried into effect without Congressional legislation, and it should be a part of the action of this Conference to secure the insertion of such provisions into the bill pending before Congress regulating immigration as will accomplish the results mentioned.

(2.) The second method is the establishment of medical inspections of all steerage passengers at the ports of arrival in the United States, with power to vaccinate all persons found unprotected. This method can be put into operation at once, by adding to the rules regulating quarantine one requiring the inspection and vaccination of all immigrants found unprotected. In localities or ports where local boards make the rules governing quarantine, this rule could be at once adopted. Where State legislation is necessary to make the rule, which cannot be attained, the National Board of Health could make the rule and render it effective. Or the National Board of Health could make the rule for the several great immigration ports, and the local officers could enforce it. From the following table it appears that the number of immigrant ports is very few, and can be readily brought under a system of efficient inspection:

			_
Customs districts at which arrived.	Total immigrants for year ending June 30, 1880.		
	Males.	Females	Total.
Alaska. Baltimore. Boston Buffalo. Charleston Chieago Ouyahoga, Ohio. Detroit Duluth Galveston. Gloneester, Mass. Port Huron. Key West. Marblehead, Mass Miehigan Milwaukee Minnesota. Passamaquoddy Pearl River, Miss Palenter, Miss Palenter, Miss Palenter, Miss Palenter, Miss Palenter, Miss Portland and Falmouth, Me Providence. San Franciseo. Saint Mark's, Fla. Superior, Mies	95 10, 071 19, 797 484 3 2500 38 2, 565 698 60, 610 645 11 1, 163 172 6 1, 744 165, 303 691 691 691 691 691 691 691 691 691 691	7, 323 15, 265 533 1 1838 16 2, 356 351 16 33, 765 5 33 16 562 102 102 102 102 102 102 102 102 102 10	107 17, 394 34, 062 1, 017 4 388 54 4, 921 868 7 322 94, 375 096 8 221 27 1, 725 264 90 2, 663 263, 726 91 98 2, 886 2, 886 21, 727 53 20 1, 153 20 1, 457
Total.	287, 623	169, 634	457, 257

Through six ports, it appears that the class of immigrants requiring inspection pass into the United States, viz.: New York, Boston, Philadelphia, Baltimore, Detroit, Huron, and San Francisco. To these, perhaps, should be added Passamaquoddy Bay, Maine, and Minnesota. It is evident that a system of inspection and vaccination, such as here proposed, at the first arrival, must be attended with as little detention as possible. Detention of three days for observation of the results of vaccination, would result in the constant collection of from 20,000 to 30,000 persons in the quarantine of New York. Not only would such detention be unadvisable, owing to the hardship which it would create, but as a sanitary measure those vast hordes should be dispersed as rapidly as possible, and aided, rather than hindered, in their efforts to reach their future homes.

To meet the exigency, which requires future inspection of those vaccinated to verify the results, local inspection stations might be established at proper points along the great thoroughfares which the immigrant trains travel, where but a momentary detention would be required to re-inspect the vaccinated, and when necessary to revaccinate. This inspection would be facilitated it a system of ticketing was followed, which might be arranged as follows: Let the port inspector give to every person found to be protected, a white card, having on it his name, age, nationality, date of inspection, and destination; to every person requiring vaccination let him give a red card, indorsed like the other, but giving date of vaccina-

tion. The immigrants would see that henceforward they must exhibit those cards when called upon. On inspection at a station those having white cards would be no further noticed, while those having red cards would be inspected as to vaccination. The number of inspection ports would not be large, as the routes of immigrant travel are well established. Buffalo, Pittsburgh, Wheeling, Cincinnati, Cleveland, Chicago, St. Louis, Kansas City, and St. Paul, occur as centers through which most of this travel might be intercepted.

(3.) Within the State where the immigrants disperse for settlement there should be organized by the State Board of Health a system of surveillance which would keep them under observation until they reached their final destination. Such a system need not be complicated nor expensive, for the same tickets would be the means of preserving the identity of the individual. State boards of health have also an important duty to perform in securing vaccination. Through their official position they can exert a powerful influence upon the people by advice, and can organize many methods of bringing every community to feel a due sense of its obligation to adopt this measure of prevention.

(4) Finally, the local health authorities could maintain, as far as necessary, a certain watchfulness over the immigrant family, in or-

der to discover the first evidence of suspicious sickness.

But a more important duty rests upon the local boards, viz, persistent efforts to secure vaccination of every unprotected person within their jurisdiction. At this time, when there is great popular alarm in regard to small-pox, local boards should use their utmost efforts to make vaccination and revaccination (the only real safeguard against small-pox) universal. Vaccination should not only be offered but urged persistently upon those who neglect it, and restrictive measures, as expulsion from the public schools, should be enforced against those who refuse.

#### THE RESOLUTIONS.

Resolved, 1. That small-pox is very prevalent in European ports at which emigrants embark for the United States, and, owing to the customary delay of the emigrants at these ports, unprotected persons are liable to, and frequently do, become infected with that disease.

- 2. That vast numbers of emigrants are unprotected against small-pox infection, and contract the disease just before embarking for the voyage.
- 3. That ocean transit is now so rapid that a person becoming infected with the small-pox poison may, and often does, reach the ports of the United States, and even, by rapid railroad travel, may locate in Western towns before the disease becomes apparent in the individual.
- 4. That outbreaks of small-pox in many parts of the United States, and the liability to a wide and constant dissemination of the contagious and infectious material of that disease, by means of the immense number of unprotected immigrants who daily land at our ports and immediately proceed to inland districts by railroad, demands the most energetic measures of health authorities to control the spread of this pestilence, and to exterminate it wherever it makes its appearance in any community.
- 5. That to accomplish this desirable object there should be concert of action among the several sanitary organizations of the country, viz., National, State, and municipal, and each in its own sphere should use its utmost power to stamp out this disease.
- 6. That, with a view to give practical effect to the objects of this Conference, we recommend—
- (A.) That Congress incorporate into the law regulating immigration, a provision requiring protection from small-pox by successful vaccination of all immigrants.
- (B.) That the National Board of Health be requested to consider (in accordance with an act to prevent the introduction of contagious or infectious diseases into the United States, approved June 2, 1879.) the propriety of making, promulgating and enforcing rules requiring the inspection, at the port of departure, of immigrants into

-11

this country, and the vaccinnation and revaccination of every immigrant who, upon such inspection, is found unprotected from small-pox. Or, failing in any case, or for any cause, to secure such vaccination or revaccination, to prevent such unprotected persons as may have come from or through any infected district, from taking passage on any ship destined for this country during the period of the incubation of the disease until such time shall have clapsed as shall make it certain that they are not carrying the germs of small-pox in their own persons.

(C.) That notification be sent to the various steamship companies bringing immigrants to the United States, that, unless satisfactory evidence of recent vaccination be furnished (by certificate or otherwise) in the case of each immigrant arriving at any port of the United States, such vessels should be quarantined for a sufficient time to secure the development of all undeveloped cases of small-pox, as well as for the discovery, if possible, of concealed existing cases which have developed during the voyage. small-pox, as

(D.) That local health authorities should, as far as practicable, cause a thorough inspection of immigrants at all distributing points, and the detention at such points of all suffering from small-pox, and also the vaccination by the local authorities, if needed, of all immigrants who arrive at their destination.

(E.) That to meet present emergencies the National Board of Health, by virtue of its power to prevent the introduction of contagious and infectious diseases into the United States, and their spread from one State into another, take such measures as will secure the inspection of every immigrant before landing at the ports of the United States, and of the vaccination of all persons not protected.

(F.) That a committee, consisting of one from each State and local board repre-ented, be appointed, whose duty it shall be to take such measures as may be found necessary to accomplish the objects of these resolutions.

All of which is respectfully submitted.

C. N. Hewitt, Secretary, State Board of Health, Minnesota.

H. P. Strong, Secretary, State Board of Health, Wisconsin.

Henry B. Baker, Secretary, State Board of Health, Michigan.

O. W. Wight, Health Commissioner, Milwaukee, Wis. OSCAR C. DEWOLF, Health Commissioner, Chicago, Ill.

E. LLOYD HOWARD, President, State Board of Health, Maryland. R. J. Farquaharson, Secretary, State Board of Health, Iowa.

A. H. Briggs, Health Officer, Buffalo, N. Y. Thad. M. Stevens, Secretary, State Board of Health, Indiana.

James A. Steuart, Health Officer, Baltimore, Md. Stephen Smith, representing State Board of Health, New York.

Hosmer A. Johnson, National Board of Health.

John H. Rauch, Secretary, State Board of Health, Illinois, Chairman.

The report as read was accepted by the Conference, and, on

motion, was adopted.

Dr. Hewitt explained that in his speech of the previous day he had not meant to convey the idea that inter-State quarantine was absolutely impracticable; but still held that it could not be enforced by State or local organizations and would require National legisla-

On motion, the members of the committee above named were appointed as the committee called for by the last clause (F) of the sixth resolution.

The Conference then adjourned sine die.

Concurrent action to the foregoing was had by the State Boards of Health of New York, Michigan, Iowa and Illinois-the resolutions of the Illinois State Board of Health being given in extenso on page xxii of this volume.

### PROCEEDINGS

OF THE

### SANITARY COUNCIL

OF THE

MISSISSIPPI VALLEY.

#### MINUTES OF A CALLED MEETING

OF THE

# SANITARY COUNCIL OF THE MISSISSIPPI VALLEY,

NOVEMBER 21, 1879.

Pursuant to a call of the Executive Committee, the Sanitary Council of the Mississippi Valley met in the Senate Chamber of the Capitol at Nashville, Tenn., at 10:30 a.m., November 21, 1879.

On being called to order by the President, representatives from thirteen sanitary organizations were found to be present, as follows:

Alabama-Jerome Cochran, M. D.

Illinois-John H. Rauch, M. D., Secretary of the Council.

Kentucky-Pinckney Thompson, M. D.; R. C. Thomas, M. D.

Louisiana-D. C. HOLLIDAY, M. D.

Michigan-R. C. Kedzie, M. D.

Minnesota-C. N. HEWITT, M. D.

Mississippi-Wirt Johnston, M. D.

Tennessee-J. D. Plunket, M. D., President of the Council; E. M. Wight, M. D.

Wisconsin-E. L. GRIFFIN, M. D.

Little Rock, Ark.-D. H. DUNGAN, M. D.

Louisville, Ky.-E. R. MONTGOMERY, M. D.

Memphis, Tenn.-G. B. THORNTON, M. D.

National Board of Health-R. W. MITCHELL, M. D.

The committee appointed to formulate work for the next meeting of the Council, made the following report:

The committee appointed by the Sanitary Council of the Mississippi Valley, to formulate work for the annual meeting of the Council would recommend the appointment of the following committees, to report at that meeting:

Committee on Local Sanitation, including House-to-House Inspection.—What changes in modes or means of sanitation are suggested by the experiences of the past season?

Committee on Quarantine.—What changes in either inland or maritime quarantines are required, in the light of the experience of the past season? Modes of transfers of passengers, baggage and freight during quarantine.

Committee on the Lessons of the Epidemic of Yellow Fever in Memphis in 1879.

Committee on Subjects for General Discussion.—Conference with representatives of the railroads and steamboats, respecting transportation of passengers and freight during the existence of yellow-fever in sporadic form and during the enforcement of quarantine; the time when and place where inspection shall be required.

All of which is respectfully submitted.

R. C. KEDZIE, D. C. HOLLIDAY, JOHN H. RAUCH. On motion, the report was adopted.

Dr. C. N. Hewitt, Secretary of the State Board of Health of Minnesota, thought some action should be taken in reference to diphtheria and small-pox. The Minnesota State Board of Health had quarantined such diseases. The Council should take cognizance of these things, as well as of the subject of home sanitation. Dr. Pinckney Thompson, President of the State Board of Health of

Dr. Pinckney Thompson, President of the State Board of Health of Kentucky, said the Council could do this better than any other body, through municipal organizations. This co-operation would give con-

fidence to the public.

Dr. Hewitt was requested to draw up a resolution to embrace his ideas.

Dr. R. C. Thomas, of Bowling Green, of the Kentucky State Board of Health, offered the following resolution:

Whereas. The manner in which yellow fever is imported from one place to another is not yet satisfactorily understood; therefore,

Resolved. That we fully endorse the action of the Tennessee State Board of Health, in enforcing "Rule No. 6."

Dr. E. R. Montgomery, of Louisville, endorsed the resolution. Dr. Jerome Cochran, Inspector of the National Board of Health,

thought "Rule No. 6" was not demanded by the circumstances.

Dr. Pinckney Thompson, while not expressing an opinion as to whether the infection could be carried in cotton, was opposed to the Council shouldering such a responsibility, as such action would be premature. He suggested that the President of the Council (Dr. Plunket) be requested to place the facts concerning the rule before the Council at the next meeting.

Dr. Griffin, President of the Wisconsin State Board of Health, said he was not familiar with the circumstances. He asked for information.

President Plunket sketched briefly the history of the famous "Order No. 6," including the legal contest which ensued.

The resolution was withdrawn by the author, as he believed it to be premature.

Dr. C. N. Hewitt, of Minnesota, offered the following resolution:

Resolved. That the chairman appoint a committee of — members, to present at the next meeting of the Council a plan for the more perfect co-operation by State boards of health in inter-State sanitary work; and also for mutual aid in the investigation of the causes and prevention of disease.

President Plunket appointed the following committees, as provided for in the proceedings of the previous session:

Committee on Local Sanitation—Drs. J. H. Rauch, George Homan

and E. L. Griffin.

Committee on Quarantine—Drs. D. C. Holliday and R. W. Mitchell.

Committee on the Lessons of the Epidemic of Yellow Fever in 1879.—

Drs. G. B. Thornton, D. H. Dungan and Wirt Johnston.

Committee to Formulate Subjects for General Discussion—Drs. R. C.

Kedzie, S. M. Bemiss and E. M. Wight.

Committee to Arrange a Plan for Co-operation between all State Boards of Health in the Union—Drs. C. N. Hewitt, Pinckney Thompson, E. L. Griffin, T. A. Atchison, Samuel Choppin, C. A. Rice.

The Council then adjourned, subject to the call of the Executive

Committee.

JOHN H. RAUCH, M. D., Secretary.

#### MINUTES OF THE SECOND ANNUAL MEETING

OF THE

# SANITARY COUNCIL OF THE MISSISSIPPI VALLEY,

APRIL 21, 1880.

At the second annual meeting of the Sanitary Council of the Mississippi Valley, held in the Lindell Hotel, St. Louis, April 21, 1879, delegates were present from the Kentucky, Tennessee, Wisconsin and Illinois State Boards of Health, from the St. Louis Health Department, and from the National Board of Health.

The President, J. D. Plunket, M. D., of Tennessee, called the meeting to order, and, on motion, the reading of the minutes of the

previous meeting was dispensed with.

The Executive Committee, and the Committee on Coöperation of State Boards of Health, submitted brief reports, indicating progress in their respective work, and by request were given further time for

the completion of their labors.

33

The Secretary presented communications from the Secretary of the Michigan State Board of Health; from the President of the Merchant's Exchange of St. Louis, and from the Secretary of the St. Louis Agricultural and Mechanical Association—these last tendering courtesies to the Council—all of which were appropriately referred.

Dr. Lindsley, of Tennessee, offered the following preamble and resolutions, which were laid upon the table for future consideration:

Whereas, There is now pending before the Congress of the United States a bill to enlarge the powers of the National Board of Health; therefore, be it

Resolved, That, in the opinion of this Council, an efficient National Board of Health is a prime necessity, both as a co-ordinating and a controlling power, and the passage of said bill, in its essential features, is earnestly recommended.

Resolved, That, in order to harmonize all the friends of sanitary progress, it will be well to modify the first section of said bill, so as to require the concurrence of the State or local board of health before any city is declared to be a dangerously infected point.

On motion, the Council adjourned to accept the hospitalities extended, which occupied the afternoon. During the visit to the St. Louis quarantine the members were called to order on the harbor boat, which was conveying them, and the resolution of Dr. Lindsley was taken up and discussed, but without arriving at any decision,

EVENING SESSION.—The meeting was called to order by the President at 7:30 p. m. Mr. Bintliff, a member of the Wisconsin State Board of Health, was present, in addition to the other delegates. Alex. H. Smith, Esq., President of the St. Louis Merchants' Exchange, D. C. Rowland, Esq., President of the St. Louis Cotton Exchange, Drs. Pollack, Spinzig, Atkinson, and Higgins, and Health Commissioner Francis, of St. Louis, were present as visitors.

The Secretary handed in his report, in which he stated he had, in behalf of the Council, written and mailed 1,621 letters; received 510 telegrams, and sent 480; received 90 packages and sent 400.

The Treasurer made his report, which was turned over to the Auditing Committee, W. R. Lyman, of New Orleans, chairman.

The health of the city of St. Louis was discussed at length by Drs. Lindsley, of Tennessee, Johnson and Rauch, of Illinois, Thompson, of Kentucky, and Commissioner Francis, after which Council proceeded to elect officers for the ensuing year, with the following result:

President—R. C. Kedzie, M. D., Lansing, Mich. Vice President—Pinckney Thompson, M. D., Henderson, Ky.

On motion of Dr. Thompson, the Secretary was instructed to convey to Dr. Kedzie the sympathy of the Council in his recent bereavement.

As a substitute for Dr. Lindsley's resolutions, concerning the National Board of Health, presented at the morning session, the following was offered and unanimously adopted:

Resolved. That the bill now before Congress to increase the efficiency of the National board of health, and to provide the funds necessary to enable it to aid pecuniarily State and local Boards of Health, is, in all its essential features, wise and judicious.

• Resolved. That the Senators and Representatives in Congress, from the States represented in this COUNCIL, are respectfully requested to support, in all important particulars, this measure. The SANITARY COUNCIL OF THE MISSISSIPPI VALLEY is composed of representatives of the following health organizations:

The National Board of Health.

The Michigan State Board of Health.

The Minnesota State Board of Health.

The Wisconsin State Board of Health.

The Illinois State Board of Health.

The Kentucky State Board of Health.

The Tennessee State Board of Health.

The Mississippi State Board of Health.

The Louisiana State Board of Health.

The Little Rock Board of Health.

The Memphis Board of Health.

The St. Louis Board of Health.

The Evansville Board of Health.

The Milwaukee Board of Health.

The Milwankee Doald of Health

The Cincinnati Board of Health.

The Chicago Board of Health.

The Nashville Board of Health.

The New Orleans Auxiliary Sanitary Association.

Votes of thanks for courtesies extended to the Council, were tendered to the St. Louis Agricultural and Mechanical Association, to

the Merchants' Exchange of St. Louis, and to the St. Louis Board of Health; also to the American and Southern Express Companies.

The place of the next annual meeting was referred to the Executive Committee to act upon at its leisure.

On motion of Dr. Pinckney Thompson, the following members were appointed a committee to inspect the river towns from Cairo southward: Drs. Rauch and Homan and Mr. Edward Fenner.

On motion the second annual meeting was declared adjourned sine die.

John H. Rauch, M. D.,

Secretary.

#### MINUTES OF A CALLED MEETING

OF THE

# Sanitary Council of the Mississippi Valley.

DECEMBER, 1880.

THE SANITARY COUNCIL OF THE MISSISSIPPI VALLEY met, pursuant to a call of the Executive Committee, at Grunewald Hall, in the city of New Orleans, on the ninth of December, 1880.

The meeting was called to order at 9.30 a. m., by the President, Dr. R. C. Kedzie, of Michigan, seven State Boards of Health, the National Board of Health, the New Orleans Auxiliary Sanitary and Medical and Surgical Associations and the St. Louis Board of Health being represented by the following delegates:

R. C. KEDZIE, M. D., Michigan State Board of Health.

J. T. REEVE, M. D., Wisconsin State Board of Health.

D. W. HAND, M. D., Minnesota State Board of Health.

W. D. MIDDLETON, M. D., Iowa State Board of Health.

W. S. Robertson, M. D., Towa State Board of Health.

J. D. PLUNKET, M. D., Tennessee State Board of Health.

PINCKNEY THOMPSON, M. D., Kentucky State Board of Health.

E. F. McCormick, M. D., Kentucky State Board of Health.

J. W. Holland, M. D., Kentucky State Board of Health.

JOHN J. SPEED, M. D., Kentucky State Board of Health. W. M. CHAMBERS, M. D., Illinois State Board of Health.

JOHN M. GREGORY, LL. D., Illinois State Board of Health.

JOHN H. RAUCH, M. D., Illinois State Board of Health.

R. W. MITCHELL, M. D., National Board of Health.

Jos. Spiegelhalter, M. D., St. Louis Board of Health.

C. B. White, M. D., New Orleans Auxiliary Sanitary Association.

D. C. Holliday, M. D., New Orleans Medical and Surgical Association.

The opening address was delivered by the President, Dr. R. C. Kedzie, of Lansing, Mich., upon the important question before the three health bodies in session in New Orleans, namely, "Shall the National Board of Health be entrusted with the exclusive control of quarantine in the Mississippi Valley; or shall the interested States have control of it?"

139

President Kedzie spoke as follows:

Members of the Sanitary Council of the Mississippi Valley:

In accordance with article five of our constitution, I have called you together in special meeting of the Sanitary Council, to consider any question and to transact any business which may legitimately come before you.

The Sanitary Council is not yet two years old, yet brief as is its existence, it may not be unprofitable to recall what it has done.

The Sanitary Council was organized by representatives of the State Boards of Health in the Mississippi Valley, who had been invited by the State Board of Health of Tennessee to meet in Memphis on the 30th of April, 1879, "for the purpose of counseling together and arranging a definite plan of co-operation should events render it necessary to establish quarantine." The initiative step was thus taken by the State Board of Health of Tennessee, which has the honor of leading the way in this commendable effort to stay the inroads of pestilence.

The call simply contemplated action in the contingency that quarantine became necessary. But when the leading sanitarians of the Valley assembled at Memphis the discussions assumed a much wider range than the matter of quarantine. Questions of sanitation assumed an importance equal to that of quarantine, and the discussions which arose, and the plans which were then adopted, were among the results not least in importance of that meeting. It may be objected that, notwithstanding the meeting of sanitarians and the formation of the Sanitary Council, the yellow fever again visited and desolated Memphis. Too true! Memphians seemed smitten with an insane confidence that the fever would not strike their city two years in succession, and the instant and complete removal of all the active causes and adjuvants of the fever was fatally delayed. But if the Sanitary Council did not save Memphis from the yellow fever in 1879, it saved the river belt from the irresponsible shot-gun policy, and saved the Valley from the commercial paralysis of an intlexible quarantine. In addition to this the Sanitary Council stimulated local sanitation and pointed out the direction in which quarantine, when made necessary, should impose the least restraints upon travel and traffic compatible with public safety.

The problems which came before the Sanitary Council at its formation are still unsolved; the possible dangers which created this Council still hang over the vast Valley. The questions of public health relating to the Mississippi Valley rise to national importance, for it embraces a region of imperial extent and holds a commerce vast beyond human comprehension. The settling of these questions touches not alone the millions who now inhabit this Valley, but reaches forward to the future and casts its shadows of bane or

blessing upon the countless millions yet to be.

The sanitary problems which dominate this Valley cannot be settled by reference to the narrow limits of a State. Disease and pestilence know nothing of the arbitrary chalk marks which we call geographical lines. Deaf to all eloquence about State's rights, the only right they recognize is the right of men to sicken and die, or to get well if they can.

The attempt to adjust the sanitary and commercial problems of this great Valley by the co-operation of States—jarring and discordant upon the very issues at stake, with the inevitable clash between self-interest on the one hand and the possible peril of distant peoples on the other—with the natural jealousy of rival cities and competing trade, and the mistrust which it is so easy to create and so hard to destroy—the attempt is crushed with defeat from the very outset.

Each State may, indeed, consider itself amply competent to decide these questions for itself, or reject with proud disdain any outside interference or even suggestion. But commercially and sanitarily the States of this Valley must stand or fall together. We are one body, not only politically but socially held together by the interlinking ties of pecuniary interests and the bonds of a common safety. Nature and history have alike decreed that we shall be one people. If a State could push her commerce in defiance of the sanitary welfare of sister States, the dark spectre of the shot-gun quarantine and lawless vigilance committee rises in the background, an apparition before which even the pushing spirit of commerce must quail.

If any one suggests that this dark picture is a figment of the imagination, I appeal to those who know this Valley best if such a picture might not become a frightful reality whenever the pestilence and commerce claim joint occupancy of the Mississippi? Confidence is the basis of commerce. It is an old saying that "confidence is a plant of slow growth," but slow as is its growth, it may wither in an hour if the essential conditions of confidence are withdrawn.

While every State is concerned in the proper settlement of these questions, no part of the country is more interested in the proper adjustment of these relations than Louisiana, and no city has more at stake than New Orleans. At the North, the line of export fluctuates between a Southern and Eastern outlet. If the Mississippi is obstructed the Lake region looks to the St. Lawrence and the Hudson, and the Hudson to the Potomac. But the sudden deflecting of these lines of travel and trade involves friction, and friction means loss. Yet the loss by the permanent deflection of the lines of trade would be a hundred-fold greater for New Orleans than for Chicago. It is a matter of importance for Chicago to have the interests of health and trade harmoniously adjusted; for New Orleans it is a vital necessity. We may, therefore, safely look for the cordial co-operation of the citizens of the Crescent City in any project which looks to a permanent and satisfactory solution of the problems of public health as related to commerce.

No effort to patch up matters so complex and conflicting, by the separate, or even the joint action of the States immediately involved, promises permanent relief. No arrangement will have stability or withstand the pressure of public excitement, which does

not insure general confidence.

To insure such confidence, in the first place, the parties who direct and control in these affairs must be, not only truthful and impartial, but free from all temptation to concealment, evasion or injustice. In other words, they must be, in the literal sense of the word, disinterested—without pecuniary, social or other motives to bias their decisions. Not that men are incapable of withstanding

such influences, for there are thousands of honorable men who will act justly and uprightly in the face of the most powerful temptations. But where a motive to sway one's judgment can be seen, in the cowardice of a public panic the existence of such a motive will in itself create suspicion, and suspicion must be allayed if we would preserve the public tranquility. No matter how unfounded is the suspicion, the suspicion is fatal.

the suspicion, the suspicion is fatal.

It is said "capital is timid," but it is bravery itself compared with the cowardly instincts of life. The scoffer of old announced a fundamental fact in human existence when he exclaimed, "Skin for skin, yea, all a man hath will be give for his life." I know I am not now holding up the noble side of human character, but it is this very ignoble phase of humanity with which we have to deal in a popular panic. The history of this Valley two years ago forbids the

use of honeyed phrases in discussing this subject.

In the second place the organization which shall have control of these two-fold interests of public health and commerce, must have

authority co-extensive with the district threatened. It must overleap municipal and State barriers, because the interests involved and the dangers treated are not circumscribed by such limits.

In the third place, it must have authority which shall be undisputed, because to be useful it must be promptly exercised in the presence of threatened danger. In such cases delay is defeat.

In the fourth place, it must have the money and the means to promptly and efficiently carry out any steps necessary to guard the public health, and to guard the interests of commerce as related to

public health.

All these considerations point to the National authority as the one power capable of affording us the protection and relief we need. The work is National in importance and should be carried out by the National arm. Either the present National Board of Health, with enlarged powers and increased facilities, or some other National organization which shall still more completely meet this want, is our only hope of permanent relief.

When such an organization is placed in charge of, and held responsible for, the safety of the great Valley, then may the Sanitary Council of the Mississippi Valley exclaim with one of old, "Now

lettest thou thy servant depart in peace.'

But until the National authority assumes its proper position, and exercises its proper control over these great interests of this Valley, the Sanitary Council has a mission to fulfill.

In concluding Dr. Kedzie, announced the following questions for

discussion:

1. What authority shall have charge of, and be held responsible for, the public health of, the Mississippi Valley so far as compromised by commerce and trade?

2. Shall quarantine aim to keep infectious and epidemic diseases entirely out of the Mississippi river, or to limit their spread after

they have entered?

At the conclusion of the President's address, Dr. Pinckney Thompson offered the following resolutions as expressing the sentiments of the Council. Their adoption was seconded by Dr. J. W. Holland, and on the question being put they were unanimously carried.

Whereas. Experience has shown that measures of quarantine, under the sole direction of local and State boards of health, have not succeeded in protecting this valley from invasions of yellow fever; and

Whereas. Our people habitually view with distrust all announcements and sanitary acts of local boards, when those arts and announcements are of a character to affect the commercial interests of the locality directly concerned; therefore, be it

Resolved. That in our opinion the General Government alone, acting through its constituted sanitary agents, should have the direction and control of National and maritime quarantine.

The following communications were received by the Secretary, and read:

OFFICE OF THE AUXILIARY SANITARY ASSOCIATION.
NEW ORLEANS, December 4th, 1880.

John H. Rauch, M. D., Secretary, Sanitary Council of the Mississippi Valley:

SIR: I have the honor to transmit herewith a copy of a resolution, unanimously adopted at a regular meeting of the Executive Committee of this Association, held this day, to-wit:

Be it resolved, that the rooms of this Association be placed at the disposal of the officers and members of the Sanitary Council of the Mississippi Valley during their stay in this city, for the purpose of holding their convention.

I have the honor to be, very respectfully, your obedient servant.

John C. Henderson, Secretary.

Board of Health, State of Louisiana. New Orleans, December 7, 1880.

Dr. John H. Rauch, Secretary, Sanitary Council of the Mississippi Valley:

DEAR SIR: It appears that, through some inadvertence, no invitation has been sent to your body to be represented at the Quarantine Convention, which will assemble in the Chamber of the House of Representatives at 5 p. m. to-day.

With a suitable apology for this unintentional oversight. I am requested by the President and several members of this Board to ask the members of the Council now in the city to choose a delegation to the Quarantine Convention, and to invite all to be present and witness the proceedings. Respectfully, your obedient servant,

S. S. HERRICK, Secretary.

The Council then adjourned without transacting any further business until Friday, at 9 o'clock a.m.

Grunewald Hall, December 10th, 1880.

THE SANITARY COUNCIL met Friday morning at 9 o'clock, pursuant to adjournment, Dr. R. C. Kedzie, presiding, and the delegates of the previous day being present.

The following letter from Mr. J. C. Clarke, of the Jackson rail-

road, was read:

NEW ORLEANS, November 30, 1880.

Dr. J. H. Rauch:
My dear Doctor: When the Public Health and Mississippi Valley Sanitary Association meet in New Orleans, I want you to try to have a committee of seven persons appointed by the chair, one each from Louisiana, Mississippi, Tennessee, Kentucky, Illinois, Texas, and Alabama, who shall prepare a schedule embracing such articles as can be safely transported from any point where a contagious and infectious disease may exist, to and from any points where such disease does not exist, without risk of such articles conveying any disease. Then when quarantines exist at any point such schedule shall be used at all points, so as to have uniform quarantine regulations at all places and points.

By this course it will enable transportation companies to fully co-operate with health authorities to arrest and prevent the spread of such diseases along the public highways of water and inland communications.

It should be understood that all articles not embraced in the schedule are prohibited during the prevalence of such diseases, or

the existence of quarantine regulations.

I hope we shall have something tangible done at this meeting.

Yours truly,

J. C. CLARKE.

The letter was received, and the appointment of the committee ordered, as follows:

DR. JOHN H. RAUCH, of Illinois.

DR. D. C. HOLLIDAY, Louisiana.

DR. J. W. HARLAN, Kentucky.

DR. WIRT JOHNSTON, Mississippi.

Dr. D. H. Dungan, Arkansas,

Hon. Noah Johns, Texas.

DR. GEORGE HOMAN, Missouri.

Hon, John Johnson, Tennessee.

The following resolution, introduced by Dr. Rauch, was adopted:

Whereas. There is, unfortunately, a want of confidence with regard to the prompt furnishing of information by the health authorities of New Orleans with reference to infectious and contagious diseases; therefore, be it

Resolved. That, in the opinion of this COUNCIL, it would undoubtedly tend to the restoration of confidence if the State Board of Health of Louisiana would request the National Board of Health to place an inspector at the Mississippi Quarantine Station, and one in New Orleans, who shall have access to the records of the Board of Health, and be furnished every facility for obtaining reliable information with regard to all cases deemed suspicious, and especially with regard to yellow fever.

On motion, adjourned to the annual meeting.

John H. Rauch, M. D., Secretary.

#### MINUTES OF THE THIRD ANNUAL MEETING

OF THE

# SANITARY COUNCIL OF THE MISSISSIPPI VALLEY.

APRIL 21-22, 1881.

Pursuant to Article V of the Constitution, the annual meeting of the Sanitary Council of the Mississippi Valley was convened on the third Wednesday in April, 1881, at Evansville, Ind.

The Council was called to order at 11 o'clock a.m., by the President. On the calling of the roll by the Secretary, the following representatives were found to be present:

Arkansas-Drs. D, H. Dungan and J. R. Colburn, of the State Board of Health.

Florida—Dr. W. F. Fordham, of the Pensacola Board of Health, and Hon. J. M. Tarbell, Mayor, and President of the Board of Health of Pensacola.

Illinois—Dr. John H. Rauch, of the State Board of Health, Secretary of the Council; Drs. W. M. Chambers, State Board of Health; J. M. Niglas. Health Officer, Peoria, and G. W. Foote, Health Officer, Galesburg.

Indiana—Drs. Thad. M. Stevens, of the State Health Commission, H. G. Jones, M. Mulhausen, A. M. Owen, and other members of the Board of Health, Evansville.

Iowa-Dr. D. B. Hillis, President, Keokuk Board of Health,

Kentucky-Drs. Pinckney Thompson and J. J. Speed, of the State Board of Health. Louisiana-Drs. Gustav Devron and L. F. Salomon, of the New Orleans Auxillary Sanitary Association.

Michigan—Dr. R. C. Kedzie, of the State Board of Health, President of the Council. Mississippi—Dr. T. G. Birchett, Mayor, and President of the Board of Health of Vicksburg.

Ohio-Dr. A. J. Miles, Health Officer, Cincinnati.

Tennessee—Drs. J. D. Plunket, of the State Board of Health, and W. B. Winn, of the Memphis Auxillary Sanitary Association.

There were also present Drs. R. W. Mitchell, resident member National Board of Health, Memphis; Frank W. Reilly, Superintendent River-Inspection Service, and Walter Wyman, United States Marine-Hospital Service.

In all there were representatives from eleven States, and eighteen

health organizations, National, State and local.

A quorum being declared present, the minutes of the last two

meetings were read and approved.

On motion of Dr. Pinckney Thompson, of Kentucky, the regular order of business was suspended, in order to enable the Secretary to read his annual report. The Secretary stated that a portion of his report had been accidentally left behind in his office; it had been telegraphed for, and would be received in season to permit of his submitting the report at the next morning's session.

145

Dr. Salomon, of Louisiana, asked and received permission to avail himself of the opportunity presented by a suspension of the regular order of business, to submit for the consideration of the Council some resolutions adopted by the Louisiana State Board of Health on the 16th of April. They are as follows:

Resolved, That the National Board of Health be required to station an inspector at Port Eads for the purpose of observation and inquiry, who shall have the privilege of inspecting, in company with the quarantine officer, all vessels arriving at the station, and who, in the event of a difference of opinion between himself and the quarantine officer as to the actual sanitary condition of such vessels, and as to the treatment which they require, shall send to the President of the State Board a copy of the report made to the National Board.

Resolved. That an agent of the National Board be stationed at New Orleans, who shall have access to the daily reports of death received by this Board, and sickness, where reports of sickness are made; and that whenever said agent, or the health authorities of the State, receive information of the alleged existence of one or more cases of disease of a doubtful or suspicious character, as to its being infectious, the State Board agrees to send one of its own officers, who, together with the agent of the National Board, shall investigate the case, each party reporting the result of their investigation to their respective Boards. spective Boards.

Resolved. That this Board hereby agrees to appoint experts, who, together with experts appointed by the National Board and local medical societies, shall examine all doubtful or suspicious cases of yellow fever which may occur—a decision agreed to by a majority of said experts to be final.

Dr. Salomon said that the last resolution was made at the suggestion of the New Orleans Medical and Surgical Association, which wished to avoid any trouble with the National Board of Health, and as that body had expressed its approval of the selection, it was right to suppose that there would in future be more harmony between the two organizations.

On motion of Dr. Plunket, of Tennessee, the resolutions were re-

ferred to the Executive Committee.

The regular order of business being resumed, on motion of Dr, Pinckney Thompson, the Secretary read the names of applicants for membership which had been reported favorably, and the following gentlemen were then duly elected as corresponding members;

J. C. Black, M. D., and H. A. Moseley, of Tennessee.

J. F. Welman, R. F. Moore, M. T. Runnels, J. O, Mann, W. R. Seabright, J. E. Berer and G. W. Gatch, of Indiana.

O. B. EARLY, of Kentucky, and

J. C. O'CONNOR, of the U. S. Marine-Hospital Service.

The President, on behalf of the executive committee, submitted the following topics for discussion and action by the Council:

First—Representatives of the National Board of Health to reside at Quarantine Station on the Mississippi river; also, a representative of the National Board of Health to reside in New Orleans with privilege of access to records of the State Board of Health and to attend their meetings.

Second-Arrangement of work of inspectors for railroads and steamboats; inspection at the mouth of the river and ordering infected vessels to Ship Island

Third—Means of informing all the Boards of Health in the Valley of danger or apprehension of danger from yellow fever or other infectious diseases at any point.

Fourth-To secure concert and harmony of action if yellow fever or other infectious diseases threaten to spread at any point.

To these should be added the consideration as to what goods can be safely transported from one city to another during epidemics.

Dr. Thompson moved that, in order to bring the topics before the meeting as promptly as possible, a committee of three be appointed on each.

Dr. Mitchell, of Tennessee, moved to amend by having the first three topics, inasmuch as they were so closely related to one

another, referred to a committee consisting of one representative from each State.

The amendment being accepted, and the motion adopted, the President appointed the following committees:

On the first three topics—J. D. Plunket, of Tennessee; D. H. Dungan, of Arkansas; J. J. Speed, Kentucky; G. W. Foote, Illinois; D. B. Hillis, Iowa; H. G. Jones, Indiana; A. J. Miles, Ohio; J. M. Tarbell, Florida; R. C. Kedzie, Michigan; T. G. Birchett, Missisppi, and L. F. Salomon, Louisiana.

On the fourth topic—Gustav Devron, of Louisiana; W. F. Fordham, of Florida, and W. B. Winn, of Tennessee.

The President announced that the subject of a quarantine classification of freight was already in the hands of a committee, appointed in New Orleans at the December meeting.

On motion, the Council adjourned until 2:30 p. m.

At the hour appointed the Council was called to order, and the session opened with prayer by the Rev. Dr. A. B. Miller, of Evansville.

On the call for reports from committees the Secretary reported regarding the committee on classification of articles, appointed at the New Orleans special session held December 3, 1880, that as there were only two members of the committee present, he did not consider it proper to make a report. He might state, however, that the committee would recommend the exclusion of all closed box-cars, barges, and boat hulls. They further added that but two classes of articles should be considered, those that can be safely transported and those that cannot be, and possibly another class that the local authorities can decide upon. He closed by suggesting that, in the absence of a formal report by the committee, the subject should be discussed by the COUNCIL. Dr. D. H. Dungan, of Arkansas, made a report and read a very lengthy list of articles that could not, in his opinion, be moved with safety.

Dr. Thompson moved that the matter be referred back to the committee to have a schedule printed in two classes, those articles to go, and those not to go, and have it presented in printed form

to the Council at the morning session.

He regarded the question as one of great importance and worthy of the most careful consideration.

Dr. Mitchell agreed with Dr. Thompson. He said it was a very grave thing to stop the transportation of nearly all kinds of merchandise without good cause, and he wanted the matter thoroughly understood before such steps were taken. Thought that the list of dangerous articles could be very much reduced. Firmly believed that many articles removed through the open air from an infected atmosphere to one that is not infected were rendered innocuous by the aerial disinfection; had arrived at this conclusion through long observation. Thought that in this matter some discretionary power should be reserved to local health authorities.

Dr. Mitchell introduced Capt. James O'Neal, Superintendent of the St. Louis and New Orleans Anchor Line, and suggested that the Council invite him to give his experience in transporting goods. 147

during the yellow-fever epidemic. The suggestion being, on motion agreed to, Capt. C'Neal said that the only thing he had ever apprehended danger from was the bilge-water in the hulls of boats. During thirty years' experience he had never had any trouble from carrying merchandise north. He thought the gentlemen of the Council should consider well before they took such steps as would stop commerce entirely—a state of affairs which he could not possibly see the necessity of. The only articles he would object to, were he a member of the committee in charge of the matter, were jute, rags, and excelsior in bales and similar articles. It would be advisable to stop the transportation of these from infected districts.

Dr. Thompson asked if he thought bananas, oranges, and other tropical fruit were transported at a risk; to which it was replied that there was no risk, provided the place in which they were

packed was not infected.

The Secretary, in further explanation of his views, stated that the point of destination was an important factor in the matter; for example, articles could be safely shipped from New Orieans to Chicago but if they were put off at Cairo they would be very apt to prove

disease-breeding.

Dr. Salomon, as one of the committee who prepared the printed schedule adopted by the Medical and Surgical Association of New Orleans, stated that the schedule was only gotten up to be presented for consideration and perhaps adoption. He, and the Auxiliary Sanitary Association, which had also approved the schedule, would be willing to accede to any alterations which the Council might suggest.

In the absence of so many members of the original committee, and the matter being one demanding immediate action, on motion of Dr. Thompson, the original committee was discharged from further consideration of the subject, and a new committee was ap-

pointed, as follows:

John H. Rauch, of Illinois; D. H. Dungan, of Arkansas; Pinckney Thompson, of Kentucky; D. B. Hillis, of Iowa; A. J. Miles, of Ohio; W. F. Fordham, of Florida; L. F. Salomon, of Louisiana; and R. W. Mitchell, of Tennessee. The committee was instructed to have its report printed, so that it could be submitted to the Council at the morning session.

The Council then adjourned till half-past 7 o'clock p. m.

AT 7:30 p. m., the Council met in Evans' Hall, pursuant to adjournment from the afternoon session. A large audience was assembled to listen to certain popular addresses on sanitary matters in general, and to the graceful and hospitable welcome of the city and State to the Sanitary Council.

The President, on calling the Council to order, announced that the charge of the business of the evening would be delegated to his Honor, Mayor Bridwell, whom he had the pleasure of intro-

ducting to the Council.

Mayor Bridwell then delivered the following address of welcome in behalf of the city of Evansville:

Gentlemen of the Sanitary Council:

We are assembled this evening in this public hall to extend to you a warm and generous welcome to the city of Evansville. This pleasing duty has been in part assigned to me. The cause you represent, and the business which brings you from your far-distant homes needs no commendation. It is of the highest importance and gravest concern to all our people, and is worthy of the greatest praise.

We welcome you with grateful hearts. The selection of our city for the meeting of your council is a compliment for which we ten-

der you our hearty thanks.

We trust that in your deliberations you will be able to achieve great results, which eventually may unite and combine the intelligence, the energy and the wealth of the great Mississippi Valley in a common warfare against the dreaded march of disease, pestilence and death.

The bitter experience of the recent past is fresh in our memory; we cannot afford to forget the lesson which it teaches. Our homes

must be prepared for the coming storm.

The fearful scourge which but recently in the sunny South, laid its blighting hand upon thousands of happy homes, scattering death and misery on every hand, may come again. We must prepare for the dreaded foe. On such a mission you have come to us. We are proud to have you here. We trust that you will feel the welcome that is in our hearts for you, and that when you return to your homes you will feel that your time and labors have not been in vain.

A common danger makes us all friends. When the call of distress is heard we should be ready to help as we would be helped. Our city has felt keenly for her stricken neighbors, knowing full well that in time of trouble, ready hands and courageous hearts

would doubly repay.

Our hearts and our homes are open to all of you. Our city is throbbing with life and industry, trade and commerce. Sometimes we think she is the queen of the Ohio. Her schools, her churches, her public and private buildings, her great industries are her credentials, and she invites you, gentlemen, to inspect them.

Our people, I assure you, join me in the warmest greeting for

you and the cause you so nobly represent.

Trusting, gentlemen, that your deliberations may result in great good, and that we may learn to know each other better, and that you will bear away with you pleasant memories of our city and people, on behalf of all our citizens, I again bid you thrice welcome to Evansville.

At the conclusion, Mayor Bridwell introduced Hon. As a Iglehart, who, on behalf of Governor Porter—who was unable to be present—

delivered the address of welcome on the part of the State.

Mr. President and Gentlemen of the Sanitary Council of the Mississippi Valley:

It affords me pleasure, as the representative of my beloved State to tender to you a cordial greeting. The great valley from which your humanitarian organization takes its name, with its genial climate, its grand and beautiful rivers, its hills and fertile valleys,

its populous cities, its commerce and manufactures, and above all, the luxuriant products of its fertile soil, may well be entitled the garden spot of the world. But the law of the universe, physical, intellectual and moral is the law of compensation. And so, hidden in the balmy breezes, which seem to give joy and comfort to the inhabitants and fertility to the soil, is the subtle poison which produces sickness itself.

These subtle poisons are, as it were, garnered into the storehouses of the unkept and neglected streets, alleys and sewers of our populous cities, and when they there have germinated, they bring forth their fruits in the form of epidemics, which turn the active commerce of the cities into funeral processions, and carry panic, sickness, sorrow and death into every house and to every heart, until the nation mourns for the sorrow and death of its people in these stricken cities and towns. It is because you come in council to endeavor to devise such means as wisdom and prudence may suggest to prevent or mitigate these epidemics, that I bid you welcome. This welcome is the more hearty on my part because I understand that your labors are not confined to the subject of epidemics, but extend to general sanitation, and in this view it is ardently to be desired that some suggestion, some hint, some utterance, during your deliberations among us, may sound a note of warning to the sanitary officers and the authorities of every city, town and hamlet in our State that will cause them at once to take active sanitary measures, whereby the inhabitants of their respective towns and cities may be relieved from insidious poisons emitted from the open mouths of sewers, and other sources of noxious and health-destroying vapors. For, while in this more northerly climate we seldom have epidemics, yet we have the forms of slow but certain death from typhoid and typho-malarial fevers, caused largely by these noxious vapors which are culpably permitted to continue from one year's end to another, in our cities and towns.

Our arch-enemy, death, lurks in secret places, disguised until, like the enemy in ambush, it throws off its mask, and, massing its forces, swoops down on some of our cities and causes panic, sickness, sorrow and death. You are our council of safety—a council of the wisest and best men of the medical profession, associated with intelligent and philanthropic citizens of other pursuits, conscientiously consulting as to the best means of meeting and conquering or foiling this common enemy, and thereby serving your race; a conception worthy of a profession whose self-sacrificing devotion to the cause of humanity and benevolence has been proverbial. May your endeavors be not only successful, but far-reaching as the conception of your work is broad and benevolent.

In Rome, the one who saved the life of a citizen was counted a hero, as well as a benefactor, and was treated with the most distinguished favor. He was crowned with laurel, drawn in a chariot, allowed a triumphal march into the city, and was honored with a public feast. As saviors of the lives of our people, we hail you. We open the gates of our city and of our State to your en-

trance, and will make a feast in your honor.

We salute you and bid you welcome.

President Kedzie next introduced to the audience Dr. J. D. Plunket, of Nashville, Tenn., the first President of the Council.

Dr. Plunket's address is as follows:

Mr. President, Ladies and Gentlemen, and the distinguished Representa-

tives of Evansville and Indiana:

The warm words of welcome to Evansville and to Indiana, as extended to us in your behalf by his honor, the Mayor, and Judge Iglehart, find appreciative responses in the hearts of each member of the Sanitary Council present; and the words of approbation of the work already performed by the association, and of encouragement to press forward in this self-sacrificing and sublime work to still greater achievements—which in the future, as in the past, must redound in every instance to the good of the individuals of such community, because to the weal of the public—have nowhere a more grateful abiding place than with the sanitarian, because they constitute his rewards, and, I might add, in the large

majority of instances, his only reward.

The chief object of this association is to prevent the spread of epidemics. Certainly nothing ought to interest a people more, and especially a growing and prosperous city like your own. To make the labors of the Council effective, there are certain preliminary steps to be taken, and in proportion as they are wisely taken relatively will greater good accrue to the inhabitants of the State or town so acting. First, there is the proper organization of a health department. What of your own board of health? Is it one in fact, clothed with ample powers (executive and administrative), ample means and appliances with which to enable it to do you good, one and all, high and low, by placing a close watch upon the quality of the air you breathe, the water you drink, and the food you eat?

If not, your foundations are rotten, and before the world, but what is far worse, before your own people you are perpetrating a delusion which may eventuate, how soon no one can say, in draping your city in mourning and filling your homes with sorrow. Then see to it that your local health department is a model, constituted after the most improved plan and administered upon the latest received principles of sanitary science. It is here that you may expect the largest returns from the least amount invested. Therefore let no stinted, contracted policy prevail here. With health, who can say what the future of Evansville may not be? Let her show to the world, from month to month and from year to year, a minimum death rate, and immigration and capital will flow with increasing currents within your limits; but let it be otherwise, and the very stacks of chimneys which now constitute your chief characteristic, will in their disuse and silence stand out as so many speaking monuments of man's folly and cupidity.

As a great State, it is with peculiar feelings of gratification that I, in the name of the Sanitary Council of the Mississippi Valley do now congratulate you and extend the right hand of fellowship to you, in having, as I am informed, within the past few days, enacted a law establishing a State Board of Health for Indiana. As a progressive and wise step this will stand in history only second to that of your admission as a commonwealth into the Federal Union. For, under the enlightened administration of such a board, you may confidentially expect, in proportion as you encourage and uphold its

hands in its peculiar work, to advance from good to better in the scale of humanity, until, as a people, you shall have attained the full stature of the ideal man possessed of a sound mind in a sound body. Therefore, I wish you God speed in this work, municipal and State; and again return thanks for the cordial hospitalities extended us.

At the conclusion of his address, Dr. Plunket presented to the audience Dr. R. C. Kedzie, of Lansing, Michigan, as the presiding officer of the Council. Dr. Kedzie spoke as follows:

Members of the Sanitary Council of the Mississippi Valley, Ladies and Gentlemen of Evansville:

Two years ago the sanitarians of the Mississippi Valley were invited to meet in Memphis to take counsel together on certain questions deeply concerning the public health of the States of the Valley. The year preceding had witnessed widespread disaster, suspension of business, and interruption of travel, because the pestilence, in one wild wave, had swept the Valley from Louisiana to Southern Ohio. The loss in business has been computed at \$75,000,000. But what arithmetic shall estimate in pecuniary terms the horror and agony of 1878? What sum of money shall ever be placed as the

equivalent of that visitation of sickness and death?

When the representatives of the health organizations of the Valley met at Memphis to organize the Sanitary Council of the Mississippi Valley, there was in every heart a stern determination that such scenes should never again occur in this Valley if human wisdom and energy could prevent them—that never again should a steamer like the Emily B. Souder or John D. Porter carry lamentation, mourning and woe from one end of the Valley to the other—that the safety of our people should be secured at whatever cost—that in any possible conflict between public health and commerce, the benefit of any doubt should always be given to the public health, while commerce must bide its time; but that, when the people of the Valley were made secure against the pestilence in every form, the rights of business and trade should be fully recognized and

protected.

The deliberations and consultations at Memphis developed the conviction, entertained with singular tenacity by every one present, that a health organization, to successfully solve these questions of public health as related to commerce, must not be limited by State lines, but must have jurisdiction commensurate with the area of danger, and must embrace the whole field, which may be either the starting point of yellow fever (and any pestilence) or the wide region into which it may spread. If the action of State authority, limited by State lines, were adequate for this work, then a plural-State organization was uncalled for, and the Sanitary Council of the Mississippi Valley had no claim to be, but was an impertinence and intrusion into affairs of men from the outset. But the sanitary history of the Valley in years gone by—the lessons of 1878, in the broken business and shattered health of her people—nay, the thousands upon thousands of fresh-heaped graves, uttered a solemn warning not to lean upon the broken reed of State control. When each State acts for itself and by itself in sanitary matters, concert of action with other States becomes impossible. But as in the

152

movements of a great army in an engagement, so in the battle for public safety, concerted and harmonious action is essential to victory. In disconcerted action upon any common subject by neighboring States, bickerings and suspicions will arise; each State will surmise that the authorities of the other State will consider the certain advantage of the business prosperity of its own citizens rather than any possible dangers which may threaten the health of a distant community beyond its borders. In all such contests, so far as the public confidence is concerned, the fear is as fatal as the fact. Recriminations ending in reprisals, is the brief history of every such inter-State contest. To avert this, some authority which, by overleaping State lines, shall harmonize State action, becomes the demand alike of public safety and of commercial enterprise.

At the very time of organizing the Sanitary Council at Memphis, the Hon. Casey Young, of Tennessee, was urging the passage of his bill conferring enlarged powers and increased means upon the National Board of Health to enable it to meet such emergencies as the yellow-fever epidemic of 1878. To show the desire of the sanitarians representing the principal States of the Valley that these questions of National importance should be taken out of the hands of individual States and relegated to National authority, I quote the following resolutions unanimously adopted at the first meeting of the Sanitary Council. Among the distinguished sanitarians who voted for these resolutions was Dr. Samuel Choppin, president of the State Board of Health of Louisiana:

Resolved, That the Sanitary Council of the Mississippi Valley heartily indorses the bill now pending before Congress "to increase the efficiency of the National Board of Health and to prevent the introduction into, or spread within, the United States of contagious and infectious diseases," and would respectfully recommend its speedy passage by Congress, so as to clothe the Board with executive as will as advisory powers.

Resolved. That this Council is in hearty sympathy with the National Board of Health in its object of securing the restraint of pestilential epidemics in the whole country, and pledges itself to a hearty co-operation with the National Board of Health in this noble work.

Resolved. That a copy of these resolutions be sent to the State delegations in Congress of each of the States represented in this Sanitary Council respectfully requesting their assistance in securing legislation which shall protect our people from foreign pestilence and domestic danger.

The Sanitary Council drew up a set of rules to govern travel and transportation by steamboats and by railroads and other public carriers, suggestions about the management of quarantine, and an address to the cities, towns and municipalities of the Valley on general sanitation, and then adjourned. Soon after, Congress passed the Casey Young bill in a modified form, giving the National Board of Health enlarged powers for dealing with pestilential epidemics, and a reasonable sum of money to defray the necessary expense. The States of the Valley welcomed this assistance from the General Government, and felt that in a matter of National importance, and affecting so many States, the friendly intervention of the General Government was fitting and right, and that the Government was only discharging a duty in so doing. So general was the feeling that this work belonged to the General Government that at the annual meeting of the Sanitary Council in 1880, at St. Louis, but few of the members were in attendance. The public confidence had been so restored by the wise action of the National Board and the harmonious action of the State and municipal boards of health, that

though there was a dreaded outbreak of yellow fever, there was no panic, and the interruption of travel and trade was very small. Sanitarians congratulated themselves that they had found a solution of the vexed problems relating to the public health of the Valley. But, by an inscrutable Providence, Dr. Choppin was removed by death; and by an equally inscrutable Providence, his successor in office, instead of working cordially with the National Board of Health to secure the highest well-being of the whole valley, has expended his energies in thwarting the efforts of the National Board, and obstructing every sanitary movement which he did not originate or govern. Soon charges were made against the health authorities of Louisiana, and at last the State Board of Health of that State came to an open rupture with the National Board of Health.

Then came a demand from the necessary number of States for a special meeting of the Sanitary Council in New Orleans, in December, 1880. The Council met, and after discussion and careful consideration of the whole subject, passed unanimously the following

preamble and resolution:

Whereas, Experience has shown that measures of quarantine under the sole direction of local and State boards of health have not succeeded in protecting this Valley from invasions of yellow fever; and

Whereas, Our people habitually view with distrust all announcements and sanitary acts of local boards where those acts and announcements are of a character to affect the commercial interests of the locality directly concerned; Therefore,

Resolved, That in our opinion the General Government alone, acting through its sanitary agents, should have the direction and control of national and maritime quarantine.

The COUNCIL also addressed a communication to the State Board of Health of Louisiana, requesting that Board to invite a representative of the National Board of Health to attend all meetings of the Louisiana State Board of Health, and to have free access to all its sources of information concerning the sanitary condition of New Orleans and its vicinity during the season of danger from yellow fever, and another representative to be stationed at the Mississippi river quarantine station during the same period, and with similar

privileges.

When this reasonable request was presented to the Louisiana State Board of Health our petition was refused, its presentation pronounced to be an insult to the Board, and the statement was made that the people of the Valley had entire confidence in the State Board of Health of Louisiana, as was shown by the fact that no quarantine had been declared against that State for two years past. The tranquility of the Valley in the presence of danger was decisive proof of public confidence; but this feeling of confidence never rested upon the present State Board of Health of Louisiana. The broad ground of public confidence was the National Board of Health, acting in concert with the other boards of health in the Valley, so far as the general sanitary matters of the Valley were concerned, and in the Auxiliary Sanitary Association with reference to New Orleans. This latter association is worthy of more than a passing notice. It modestly calls itself an "auxiliary"—not a principal. Without patronage or revenues, with nothing but the clear head and generous heart to do good, it has done more with less means than any voluntary sanitary organization in the history of the world. In a city which has been the sanitary opprobrium of

the continent, confronted by problems in sanitary engineering of the most difficult character, without means except the voluntary contributions of those whom it could enlist in sanitation, it has astonished the Nation by the results it has already accomplished, and it bids fair to make New Orleans one of the healthiest cities on this continent. No wonder people have confidence in such an association, and trust its word and its work without question. But for the State Board of Health of Louisiana to lay claim to the confidence which the people repose in the Auxiliary Sanitary Association, is to shoot wide of the mark. The people of New Orleans themselves seem to have little confidence in their State Board of Health, as I shall demonstrate before I close—still less do the States of the Valley.

During the meetings of the American Public Health Association, in New Orleans last December, a quarantine convention met in New Orleans, under the auspices of the Louisiana State Board of Health. In this convention a committee from the New Orleans

Chamber of Commerce presented the following report:

Presented to the Quarantine Convention at its Session in New Orleans, La., December 9, 1880, by the Committee representing the Chamber of Commerce of the City of New Orleans:

Mr. President—Your committee appointed at the regular meeting, held on the sixth inst., charged with the duty of representing this chamber at the Quarantine Convention, called at the instance of the State Board of Health of Louisiana for the seventh of December, beg leave to submit the determinations they have arrived at after due deliberation.

The importance of a wise solution of the questions which will be submitted for the consideration of the quarantine convention, as affecting the commercial and business interests of this city, induces your committee to submit their views to your honorable body for

its authorization.

The duties of this committee are to lay before the Chamber of Commerce the best policy or plan to be pursued to protect our commerce against remorseless quarantine, while we at the same time give to surrounding communities assurance that we are ready to make every effort and sacrifice necessary for their protection

against infectious or portable diseases:

1. We believe it to be the duty of this body to proclaim honestly and openly that it looks upon the interests of commerce as subsidiary to those of public health. It is, therefore, the expressed sense of the committee that such quarantine restrictions as may be approved by disinterested and thoroughly competent sanitary bodies should be faithfully acknowledged and carried into effect by this chamber. We further state in this connection that while the fears of surrounding communities in regard to the danger of disease from intercourse with New Orleans are very often not justified by existing facts, we ought, in justice to them, to ascribe these fears to the best sentiments of humanity—a desire to protect their people and families against sickness and death.

We recommend that this body express a decided opinion that a candid and unreserved intercommunication of facts connected with infectious diseases, should be maintained between all official

boards of health throughout the country.

155 Α

3. We recommend that this body shall express itself decidedly in favor of the continuance of all approved sanitary measures which have the double object of affording protection against the spread of disease and at the same time of protecting commerce in its regular and legitimate channels. In this connection your committee begs leave to state that it does not assume to decide what these measures ought to be; but it has ample information that the system of inspection inaugurated by the National Board of Health, approved by the Academy of Science, the American Public Health Association and the Sanitary Council of the Mississippi Valley has inspired more confidence in surrounding States than any measure heretofore devised.

4. Your committee is satisfied that no measures such as these

can be successfully carried into effect by any local board of health.

5. We are also apprehensive, from information obtained, that the large and increasing population of the Mississippi Valley will not consent to relegate these duties to a board of health located in New Orleans or Louisiana.

Your committee further states its belief that, in the event of the repeal of the law establishing the National Board of Health, the Sanitary Council of the Mississippi Valley will be forced by the public sentiment of the West to assume the functions of the National Board, and their regulations and restrictions might be the more harsh and injurious because of the great numbers and diver-

sified interests and opinions of its members.

7. If in the event of the abolishment of the National Board of Health the Sanitary Council of the Mississippi Valley or the board of health of any adjoining State should demand the establishment of a system of inspection as the condition upon which commercial relations were to depend, it is to be apprehended that they would add stipulations: First, that they should appoint the inspectors;

second, that New Orleans should pay all expenses.

8. In view of these facts, your committee unanimously agree in the belief that the National Board of Health is an advantage to New Orleans, and, in truth, a necessity for the protection of both health and commerce, until the time comes when the people of the Southern and Western States have arrived at such a state of education in sanitary science and such a degree of accord in matters of health that some better system for municipal protection can be agreed upon.

9. In the consideration of matters pertaining to life and health, your committee waive all political considerations. It has occurred to them, however, that the objection to the exercise of authority by the General Government in relation to quarantine regulations on the Mississippi River is inconsistent with the theory that this great highway is an inland sea, under the jurisdiction and subject to the care of the National Government.

All of which is respectfully submitted.

DAVID JACKSON, Chairman. EDWARD FENNER. E. C. GIRARDEY. A. Thomson.

Members of the Louisiana State Board of Health in the Quarantine Convention endeavored to stifle this expression of the Chamber of Commerce, by representing that this report was adopted at a very small meeting of the Chamber, and did not represent the sentiments and convictions of a majority of the Chamber. In order to remove all uncertainty upon this important subject, the Chamber of Commerce on the 23d of February, 1881, unanimously adopted the following resolutions:

Resolved. That this body, as a result of added experience and upon mature delibera-tion hereby indorse and re-affirm the report of the representatives of this Chamber in the Quarantine Convention held in this city on December 9, 1880, heretofore adopted by this

Quarantine Convention held in this city on December 9, 1880, heretofore adopted by this Chamber, at its monthly meeting, December 7, 1880, and agree unanimously in the following conclusions of the said report:

"That the National Board of Health is an advantage to New Orleans, and in truth a necessity, for the protection of both health and commerce, until the time comes when the people of the Southern and Western States have arrived at such a state of education in sanitary science, and such a degree of accord in matters of health that some better system for mutual protection can be agreed upon."

Resolved, That in testimony of their approval, members of this Chamber are respectfully requested to attach their signatures to a copy of these resolutions, and that such merchants, men of business and property-holders in New Orleans, as approve their purport are also requested to indorse the same.

port are also requested to indorse the same.

There would seem to be no ground for misapprehension concerning the views of the Chamber of Commerce, for the report is signed by the officers and eighty-six members of the Chamber of Commerce,

and by fifty-seven commercial firms doing business in New Orleans.

The Auxiliary Sanitary Association of New Orleans, on the 26th of February, adopted a resolution urging the State Board of Health of Louisiana to reconsider its action in refusing the request of the Sanitary Council with reference to inviting representatives of the National Board of Health to attend the meetings of the Louisiana State Board of Health, and to have free access to all its sources of information concerning the sanitary condition of New Orleans and vicinity during the season of danger from yellow fever, &c.; but that Board did not reconsider their action, and only referred the resolution to counsel for legal advice.

The president of the National Board of Health sent the following letter to the president of the Louisiana State Board of Health:

Washington, February 10, 1881.

Dr. Joseph Jones, President, State Board of Health of Louisiana:

Sir-I am directed by the executive committee of the National Board of Health to address a communication to you relative to the resumption by this Board of the system of sanitary inspection at New Orleans of railroads and river craft, which was put in operation last summer at the request of the State Boards of Health of several of the Mississippi Valley States, including that of the State of Louisiana, as represented by yourself.

The Board is willing to renew these inspections for the coming season, but before assuming the responsibility involved in such action it desires to know whether it will have adequate facilities for obtaining the information necessary to enable its inspectors to furnish positive and trustworthy certificates. To this end I am instructed to inquire whether the State Board of Health will accede

to the following propositions:

That an inspector of the National Board be stationed at the Mississippi quarantine for purposes of observation and inquiry, who shall have the privilege of inspecting, in company with the quarantine officer, all vessels arriving at the station, and who, in the 157 Á

event of a difference of opinion between himself and the quarantine officer as to the sanitary condition of such vessels, and as to the treatment which they require, shall send to the president of the State Board a copy of his report made to the National Board.

That an agent of the National Board, to be stationed in New Orleans, shall have access to the daily reports of deaths received by the State Board, and of sickness when reports of sickness are ma e; and that whenever the agent of this Board or the health authorities of the State receive information of the alleged existence of one or more cases of disease of a doubtful or suspicious character, as to its being infectious, the State Board agrees to send one of its officers, who, together with the agent of the National Board, shall investigate the case, the two parties reporting the result to their respective Boards.

An early answer to these inquiries is respectfully requested, J. L. CABELL,

President of the National Board of Health.

This modest and reasonable request of the National Board of Health, which did not infringe upon any right or privilege of the State Board, cast no reflections upon the dignity of that body, nor offered a slight to any member of that body, and made no demand for any participation in the powers and authority of that Board, but simply asked for opportunity to obtain the information in times of danger which would command the confidence of our people and prevent alarm and panic, was not granted by the State Board, but was referred to counsel for legal advice, thus staving off action for a month at least, and probably burying the whole subject in some pigeon-hole of the Attorney-General's office. If any Board in our land may be said to hunger and thirst after legal advice, it is the State Board of Health of Louisiana. Seeing the sore straits into which the State Board of Health was brought from its want of information and general ignorance of its own powers and duties, the Auxiliary Sanitary Association brought these legal questions to the attention of seven of the best lawyers in New Orleans, asking their opinion whether the State Board would violate any law or in any way exceed its authority by granting the request of the National Board of Health. The reply of all the lawyers was clear and decisive, that the Board would not violate any law or exceed its authority by granting the request of the National Board. But this legal opinion was too prompt, too decisive, and contained too much common sense for the purposes of the State Board.

The business men of New Orleans, perceiving how the commerce

and trade of their city were menaced by the obstinacy of their State Board, petitioned the Board to reconsider its action and to acquiesce

in what had been asked by this Sanitary Council.

The following resolutions, passed by the Board of Directors of the New Orleans Cotton Exchange, were published:

New Orleans, April 12, 1881. At a meeting of the Board of Directors of the New Orleans Cotton Exchange, held on April 6, 1881, the following preamble and resolution, adopted by the New Orleans Auxiliary Sanitary Association on the 26th of February, 1831, were approved and endorsed on behalf of the New Orleans Cotton Exchange:

Whereas. The Sanitary Council of the Mississippi Valley, composed of the members of the boards of health and of the sanitary officers of the States and municipalities adjacent to and in closest relations with New Orleans, has requested the Louisiana State Board of Health to invite a representative of the National Board of Health to attend all the meetings of the said Louisiana State Board of Health, and to have free access to all its sources of information concerning the sanitary condition of New Orleans and its vicinity during the season of danger from yellow fever, and another representative to be stationed at the Mississippi quarantine station during the same period and with similar privileges; and

WHEREAS, It is evident that only by compliance with this request can unreasonable apprehensions of danger be anticipated, and premature and unnecessary restrictions upon commercial and personal intercourse with New Orleans be prevented; and

WHEREAS, Large allowances should be made by New Orleans for the easily excited fears of those communities whose protection against yellow tever is supposed to depend to a considerable extent upon early and accurate information concerning its appearance and progress in this city and neighborhood, and that every rational concession should be made to secure their confidence and good will; therefore,

Resolved, That the Louisiana State Board of Health be urgently requested to reconsider its late action in regard to this question, and to acquiesce in what has been asked by the Sanitary Council of the Mississippi Valley.

The Secretary was ordered to transmit copies thereof, with said endorsement, to the State Board of Health, to the Sanitary Council OF THE MISSISSIPPI VALLEY, to the National Board of Health, and to the New Orleans Auxiliary Sanitary Association.

HENRY C. HESTER, Secretary.

Seven hundred and eighty-five commercial firms and business men, besides the officers and agents of the principal steamboat lines, signed the petition. But this united prayer of the business men of that great city was not granted.

In the language of parliament, could any "vote of want of confidence" be more emphatic than that by which the State Board of Health has been defeated—where the press of the entire city, the Chamber of Commerce, the Cotton Exchange, the principal business firms, the legal and medical fraternities, the owners and officers of the great lines of travel and transportation, and last, but not least, the sanitary organizations of their own metropolis have thus united in an emphatic and unanimous expression of want of confidence in their State Board of Health. If the people of New Orleans will tolerate such a dog-in-the-manger policy in their State Board of Health, with them must rest the consequences. That Board may successfully defy the public sentiment of Louisiana, but outside

of that State it will be powerless.

I have made this brief historical sketch of sanitary matters in the Valley in order that we may grasp the sanitary problems which require solution at this time, and especially that we may know the position the health authorities of Louisiana will occupy respecting the questions of public health which dominate this Valley. Holding the mouth of the Mississippi river and many hundred miles of the stream, we all recognize the importance of the geographical position of Louisiana. The nature of its soil, alluvial in character and capable of generating malarial influences of great virulence; its subtropical climate; and the fact that the chief exposure to incursions of foreign pestilence into the Valley is found in Louisiana, make the sanitary condition of that State of first importance to the other States of the Valley, and full, exact, reliable and early information on these subjects essential to the tranquillity of the Valley in times of danger, and to save travel and commerce from needless and vexatious restrictions, if not complete disruption in times of excitement.

Neither the National Board of Health nor the Sanitary Council has sought to change, modify, or interfere in any way with the public health administration of Louisiana. All we have asked are the facilities and opportunities for full, exact and reliable information by parties whom the people of the Valley can trust, and early information on these subjects sent to the proper health officers and organizations. We have made no onslaught, open or covert, upon the rights and privileges of that State. We have only asked that we may have trustworthy and prompt information upon subjects where Louisiana may threaten us by her acts or neglects. We have asked as a favor what we might have demanded as a right, but the State Board of Health of Louisiana has persistently and contemptuously refused our prayer, though in so doing it has resisted the public sentiment of an intelligent public. That Board shows a disposition to dictate terms to other States that line the Mississippi, and by reason of her geographical position to control the sanitary administration of the Valley. In attempting to carry out any such programme, that Board will encounter serious obsta-The Boards of Health in the other States of the Valley are as intelligent on questions of public health, and as zealous in guarding the safety of the people, as the Louisiana Board. If the brunt of this strife fell upon the Louisiana Board we could view this struggle with perfect equanimity. But in this encounter other and innocent parties will have to bear the blows. Commercial intercourse between New Orleans and the States of the Valley is a matter for New Orleans to determine for herself; but with trade or without trade, we demand, first of all, the safety of our people from foreign pestilence. We have been deceived in times past, but will be trifled with no longer; for the future we demand a sentinel at the point of danger whom we can trust, or the highways of commerce will be closed at the first breath of danger.

But if representatives of the National Board of Health are supplied, both at New Orleans and the quarantine station, with all facilities and opportunities for early and complete information on all matters relating to contagious or infectious diseases prevailing in the vicinity, so that the National Board, by cipher or otherwise, may give timely warning to the health boards of the Valley, so that they may feel reasonably assured against any sudden and unexpected incursion of such diseases, then it seems to me that such boards of health, both State and municipal, may without impropriety give assurances to the commercial interests of the Valley that quarantine will not be declared until it is reasonably certain that such infectious or contagious diseases are really present and threatening the public health of the Valley. It seems to me that under such circumstances they might give assurances to this extent without betraying the solemn trusts given into their hands—

to guard the lives and health of the people.

But if this information is to be denied us, if we are to obtain the facts for our guidance only by the sufferance of a Board outside of our organization, and out of sympathy with the determination which stirs the hearts of this people—to keep the yellow fever out of the entire Valley from the Lakes to the Gulf, from the Rockies to the Alleghanies—it still remains your duty to devise such means and obtain such harmony of action among your boards of health

as will secure this blessed result, though one State may stand aloof, or even place itself as an obstruction across your path, and though the commercial interests of the valley may be innocent sufferers from a course of action thus forced upon you. The sanitary maxim of heathen Rome was salus populi suprema lex, (the safety of the people is the highest law) and in this age of Christian civilization we can accept no lower standard. By saving this Valley from the ravages of foreign pestilence, and by permitting the material growth of the commerce and the development of the resources of this Valley, we are building up one of the richest and most powerful empires upon which the sun ever shone. Such will be its history if State pride and mean jealousy shall be prevented from opening the Valley to the destroyer.

Dr. Kedzie, at the close of his address, introduced Dr. J. J. Speed, of Louisville, Ky., who read the following paper on

The Duties and Responsibilities of Medical Men and of the State to Health Organizations.

THE common instinct of humanity puts itself into language, and says that self-protection is the first law of nature. All men recognize it, accept it, act upon it. Protection against what? You answer, against the bad passions of your fellow-men; against the madness of animal life; against conflagrations; against floods; and you so legislate as to give man lawful power to protect himself against bad men and unruly animals, and even to blow up houses for fear of greater conflagration. But these are not man's worst enemies. We ask you to protect him against disease; can it be done? Yes, sir; this is exactly the province of sanitary science.

It has been ascertained by medical men—not by a single doctor here and there, but by the profession all over the world—that certain diseases are preventable; that they ought not to exist; that

under proper regulations they shall not exist.

These causes having been ascertained, the proper measures applied forbid the operation of the cause, and, of course, the existence of the disease. Now the search after these causes, and the shutting off of prevalent disease, is the especial province of all boards of health.

What is a board of health?

Where does it spring from? and

What is its object?

I propose to answer these questions, and in so doing, bring before you some of the features of this great sanitary movement, and suggest such considerations as may be of importance to gentlemen whose business it is to legislate for the best interests of the people

whose representatives they are.

The first board of health is English in its origin, and London is the scene of its operations. A few men in that great city, imbued with the spirit of humanity, brooded over her mortality tables—felt that the death-rate was too large and ought to be diminished—and then, in the spirit of scientists, reasoned out the proposition that much of this fatality was due to what they called man's surroundings.

161Α

The names of Dr. Farr, Dr. Guy, Dr. Southwood Smith and Edwin Chadwick will go down to after-times linked indissolubly with the earliest efforts to lessen the death-rate and prolong the life of They were not dreamers, not wild enthusiasts, but practical

men, pursuing great aims with scientific methods.

Their investigations traced London's great mortality to unhygienic modes of life, habits of living which touched food and clothing and heat and moisture and cold; habits of living which involved the houses, the grounds, the streets, the alleys, the water, the want of cleanliness, the want of ventilation. They determined to alter all this, and give to the people such healthful surroundings as their philosophy taught them ought to prevent disease and prolong life. Here are causes of diseases; let's remove them. How? Gather up facts enough to prove that these surroundings, these environments, do actually generate disease, and take the facts to Parliament. Parliament saw the tremendous import of the facts, granted the power asked for, and sanitarians went to work. Thus was inaugurated State medicine; the powerful arm of the Government stretched out with the view of preventing disease. The rapid growth of the movement was such that in a little while the whole of Great Britain was embraced in the scope of the health committees. The moment the light began to break in upon the people, that moment the people demanded help from the Government which they supported, and the Government responded to the demand, as Parliaments and Congresses and Legislatures always will do when the popular heart is once stirred upon questions of vital interest to humanity. Humanity is the nation, and the nation that would be prosperous and great, must see that humanisy is at its best. Patriotism is grand, but philanthropy is grander. The love of an Englishman for England, a German for the Fatherland, a Frenchman for France, an American for America, is very beautiful and very patriotic; but the philanthropy of the sanitarian, which embraces man for the sake of humanity, is a deeper and a broader sentiment-it touches the race. However localized and personal may have been the earlier steps in sanitation, it is very far-reaching and pervasive in its teachings to-day. spirit of Chadwick has pervaded the civilizations of the world.

Abundant evidence has been given of the practical benefits grow-

ing out of this hygienic movement in Great Britain.

The health officers of many districts have summarized the mortality in given populations, showing the death-rate per thousand for every ten years from 1840 to '50, from '50 to '60, and from '60 to '70. In North Witchford, in 1850, the death-rate was 27 to the thousand; in 1860 it was 21 and in 1870 it was 20. In Wilts, in 1850, it was 28 per thousand, and in 1870 it was 20. In Whis, in 1850, it was 28 per thousand, and in 1870 it was only 20. In Essex, in 1850, it was 24, and in 1870 it was 18. In Warwick, in 1850, it was 27; in 1870 it was 21. In Devon, in 1850, it was 26; in 1870, 21. Burwick, in 1850, 27; in 1870 it was 23; and so of very many counties. Now the saving of seven or eight lives in a thousand does not sound like a very great accomplishment, but in ten thousand it makes seventy or eighty per ten thousand, and in a hundred thousand it rises to 700 or 800 lives saved to a small city; and when we reach such populations as London and New York, it mounts up into the thousands—enough thousands to found another

city. Is this nothing? Then the common estimate of the value of a life is from \$800 to \$1,000. Take your city of ten thousand inhabitants, and your extra death-rate of 8 in the thousand, and your money loss is \$8,000 a year; in a city of one hundred thousand the loss is \$80,000. Is that nothing? Does it not involve your material prosperity? When the death-rate is 28 in one city or district, and only 20 in another, where do you propose to settle? Where do you send your children for their life-contest with fortune? It is a question of tremendous importance to the future city and the future State, and addresses itself to the consideration of statesmen, if statesmen have at heart the best interests of the people who lift

them to their high places.

Do they doubt—does anybody doubt the practical value of protective measures? Nobody, I presume, who reads. Anson's great sea voyage left over 50 per cent. dead of scurvy, dropped overboard as food for fishes. Capt. Cook, in his three years' voyage, under a diet of vegetables and fruit, lost not a single case; and thus the great curse of army and navy life was wiped out, and is to-day almost unknown. Hygiene did it. What do we know of prison fever? It was once the scourge of European prisons. Helpless criminals suffered death when the law said only confinement. John Howard saw the great inhumanity, and, in the spirit of a genuine philanthropy, he cleansed the wards, ventilated the prisons, fed the prisoners, drained the grounds, and to-day the especial curse is almost unknown. Hygiene did it.

The great destroyer of the last century was small-pox. Jenner, with his speck of vaccine, stayed its ravages, and now in no vaccinated city or district in the world do you find the loathsome pestilence. Does anybody doubt that vaccine is a preventative measure?

If self-protection is the first law of nature, unquestionably here you get self-protection. You neglect it at your peril; your life may be blighted by your failure, and while you may in your ignorance and stupidity scout the teachings of sanitary science, the sanitarian in his ministeries to your pustuled body, stands by your sick-bed a welcome health agent, fearless and self-poised in the consciousness of absolute protection.

And then, if you wish to scout hygienic teaching, and flaunt your infidelity in the face of sanitary law, you may remember that other disease which saps the manhood and vitiates the life of two generations. Obey the law and be sound; violate it, and go branded and

disabled through life.

If Parliaments, and Congresses, and State Legislatures do not recognize these truths, it is because they don't observe, and stolidly refuse to accept the statements of those who do. But common sense, braced by the spirit of self-protection, will triumph in the end; has triumphed already over much prejudice and profound

ignorance of the laws of health.

It is said that revolutions never go backward. The Englishman who can read finds that the death-rate of London in the 18th century was 50 to the thousand; in the 19th century it was reduced to 24. He finds, further, that this is the outcrop of hygienic law. He enlists in the ranks and pushes forward the revolution under the banner inscribed Health to the People.

The great principle ennunciated by the early hygienists of England, that man's lease of life was influenced for good or evil by his surroundings, struck the thoughtful laity as well as the scientific mind, and is revolutionizing the world. The minute and persistent espionage of Chadwick, and Farr, and Southwood Smith, over the modes of living and habits of life, has added 10 years to the average life of the British people. It was a revelation to humanity in its physical aspect. Civilized society all over the world has been watching its movements for nearly half a century, and while infidelity here and there throws itself across the path of its progress, its march is still onward, and fact after fact is cropping out in proof of the truth and tremendous importance of that human revelation to man.

I repeat what I have said elsewhere, that what the Decalogue is to the moral nature, sanitary law is to the physical nature. It sets the man at his highest, and guards him against the evils incident to life; and the evil and the good are bound together in what Chadwick calls his surroundings. No important move in philosophy or science can long agitate the people of England and France and Germany without being analyzed by the active American mind. The voice of English sanitarians found an echo in Massachusetts, and State by State the movement has been westward, till now we have health reports from cities and States, from Boston to San Francisco, and from Michigan to Louisiana; and even from the clefts of the Rocky Mountains the young city of Denver sends us greeting.

The aim of all these Health Boards, stretching from the Atlantic to the Pacific, is two-fold; first, to prevent disease, and by the prevention of frequently recurring morbid actions, to secure a higher

standard of personal and national health.

The end aimed at we believe to be attainable; typhoid fever, intermittent fever, yellow fever, cholera, dysentery, all the strictly contagious diseases, are preventable diseases. That is, under a rigid enforcement of health laws, as understood by the sanitarian to-day, this long list of maladies shall not be repeated. Just so certainly as scurvy and small-pox and ship-fever have been proven preventable, so also will many other ailments be controlled and banished from the mortality tables. It is toward this end, with these convictions, that all the States are tending in these late years.

To the success of so great an undertaking the State Boards look for help from the profession at large. It is not the work of a few for a season. It is the work of the many for life. It is not to be the result of sentiment nor chance, but of earnest, minute, persistent work. When some one attributed the accomplishment of a great undertaking to accident, Rufus Choate replied: "No, not accident; not that. You had as well scatter the Greek alphabet and expect to gather the Iliad or Odyssey." Accident is not recognized in a world governed by law. Science and Christianity—say law. The few leaves which these Boards are enabled to scatter may go a little way towards the healing of the nations, but the great accomplishment must grow out of joint and persistent labor—labor of doctors and people. A single lamp in a great city would be gazed at in wonder by shaded eyes. In the light of ten thousand the people walk in safety. One lamp is not enough. If we believe there is safety in greater light, let's add to the light. Kentucky has twenty-five hundred doctors. Some of them have seats in the

Legislature, I am glad to say. Most of them are registered in the archives of some long-established medical school, and have been proud to carry home all the honors that schools could give. With glad hearts you promised fidelity to your great trust. Where is your light? What have you done with your plighted honor?

Have you read the story of the Colleen Bawn—the beautiful girl whose footsteps wandered, and whose nature failed in the hour of life's emergency? You remember how, in her deep humiliation, she sought the father whose love she had outraged, and the home, all desolate, despoiled, dark,—the home she had dishonored; and how she stood pitiful and speechless in the presence of his crushed ambition, his cherished hopes. You remember with what indignant tone, mingled with unforgotten love, he demanded of her: "I gave you life; what have you done with it? I gave you social position; what have you done with it? I gave you my good name—highest gift I had—my good name; what have you done with it?" Standing to-day as the representative of all these schools, I demand an answer to the old father's questions. We gave you education; what have you done with it? We gave you professional standing; what have you done with it? We gave you our good name; what have you done with it? To your own doctorhood; to the society in which you live; to the college which gave you its

honors, you owe an emphatic answer.

If you have any message worth human nature's hearing, in God's name let it be uttered in a manner that all men can understand. Sanitarians have such a message—a message not only to the medical profession, but to the statesman as well; and that message is, See to it that the people of the Commonwealth over which you exercise guardianship shall have better health and a longer life. It is not simply a medical question, but has risen rapidly to the dignity of a governmental question also. The statesman who keeps abreast with the spirit of his age must accept the doctrine that the State owes nothing to the public health; he must recognize the fact that public health is public wealth; he must broaden out his comprehension to the fact that the phrase Commonwealth embraces more than the property, the taxes; more than the highways; more than the militia musters, and the annual elections. It embraces also the health-the health of men, women, and children. Nations may struggle for supremacy in material resources, in intellectual achievements, and in governmental policies, and may attain the end of their ambition; but no people can maintain supreme power when they once suffer a physical degeneration; for the old adage "mens sana in corpore sano," is as true of nations as of individuals.

Having arrested the attention of all the parliaments of Europe, why should we resist the teachings and repudiate the lessons of older and quite as enlightened peoples as ourselves? We are quite ready in State and National legislatures to protect the cattle of our fields and pastures from foreign contagion. Are the cattle upon a thousand hills of more value than the man who owns both the cattle and the hills? It behooves the statesman of to-day to look squarely in the face his grave responsibilities, and see if there may not be more things in this earth than have been dreamed of in his

philosophy.

He must learn that though in its infancy, the work done by sanitary science is a prophecy of tremendous power in its coming manhood. That manhood may not be reached in the lifetime of the present generation. The growth of movements having such proportions as this is always slow. The printing press was not perfected at a single thought-birth. The steam engine came to us by slow stages, though now it drives us with the speed of the wind. The telegraphic system lingered by the way, and halted at various points; but it flashes its messages all round the globe to-day. Anesthesia as a *practice* was the slow growth of thought-power set in motion by a school-boy's accident, and the leading sanitarian in America claims that this movement in its destiny will be as farreaching and as permanent as any of these high material interests. It is all easy sailing to-day; no pestilence threatens us; we wrap ourselves in a security which we imagine is eternal. But let yellow fever strike the Crescent City and follow the great artery of your steamboat commerce; let Asiatic cholera, starting from European or Asiatic shores, sweep across the seas and, striking the Atlantic or Pacific coast, and following the great lines of travel, penetrate every city and village and hamlet of this continent, smiting men and women and children; then in the agony of your despair you will cry for help to the men who appeal to you to-day. Forewarned, forearmed. If not armed the enemy triumphs, and your hearthstone is despoiled and you are desolate; your idols are broken, and your life is a life of despair.

As a student of hygiene, I have a right to address emphatic speech to those who hold so much of our happiness in their hands. No acceptable system of public hygiene can come from individual effort. The field is too large—the cost is too great. Protection to the citizen by the State against disease is as clearly a duty as protection to his property against seizure. The introduction of morbid influences by conditions over which the citizen has no control may be promptly prevented by the power in the State house. It is only by thorough and minute investigation into the causes of disease that their ravages can be stayed. This investigation is largely aided, and this prevention secured, by the authority and the purse of the State. If any representative of any State should learn that a band of sharp-shooters were lying in ambush, ready to take the life of his people, had already taken life, and were so stationed as not to be dislodged by individual means, with what readiness would be invoke the aid of the State to dislodge, rout, and destroy the marauders. Now, more than one of you witness many archers ambushed in all your counties, standing ready, in spring and summer, and fall and winter, to strike a blow at your constituents and your family. Protection to wife and children is quite as important as protection to cattle and birds and hunting-dogs. When serious sickness comes, you call it Providence. It is a Providence against which sanitary science guards you. We call it a violation of His recognized laws; and you, as legislators, recognize the value of obedience to law.

Punish us if we do not obey.

I repeat, then, to legislators what I have said to doctors. If we have any message to any part of this universe worth the hearing, in God's name and the name of humanity, let us utter it in such

language and with such emphasis that the world can understand—not in whispered words, but words which sound like pistol-shots.

It is well for them and for us to remember that there are other laws not in the statute books of States, but in the great statute book of nature; laws which are not of our making; laws which were impressed upon material things before we began to legislate for material interests. This idea of law is interwoven with the whole texture of sanitary science. Hygienists are not concerned with chances. We believe that this world in all its interests is interpenetrated with and governed by law. We endeavor to ascertain these laws—laws of life—and apply them to man's health. It is only by obedience to them that he obtains his highest well being; and, by reason of his own best development, contributes most to the common weal.

This law is autocratic.

Conscious of the beneficence, we say the common weal demands many things. It demands compulsory vaccination; compulsory drainage, public and private. It demands hygienic architecture; it demands compulsory removal of nuisances, public and private. Absolute liberty is simply antagonism to society—antagonism to civilization. There is no such thing possible as liberty without law. The imperial egotism of I and mine must give place to us and ours. Autocracy in man is not compatible with the general common weal. Savagery may, but civilization does not, recognize the I will of personal liberty; but by the supremacy of legislative enactment, says we will. One is a liberty which runs into license, and developes selfishness. The other is liberty regulated by law, and exercises general beneficence. This, I say, people and legislators must remember and recognize, as sanitarians recognize the existence of laws long antedating any legislation or personal assumption of ours—laws stamped by the Supreme Power upon nature. Men of science tell us to obey these laws and be safe; disobey and suffer. Obedience is better than liberty.

Liberty to inflict disease upon your neighbor should not be recognized in civilized society; it is unwarranted license, and we ask the law to brand it as unlawful. You may not turn loose a mad bull or a glandered horse for fear of a possible damage; but a more deadly enemy to man stalks unchallenged through our densest pop-

ulations. This the law should forbid.

It is estimated that England has 120,000 cases annually of preventable disease; that is, disease which, under sanitary precautions, would not occur. Suppose that the United States with her fifty millions of people could, by observance of hygienic law, forbid the existence of 120,000 cases of disease; would you regard this as noth-

ing? A rigid enforcement of hygiene will do it.

This is not the unwarranted enthusiasm of a dream. It is legitimate expectancy based upon observed facts in a narrow sphere. Whatever has been accomplished in a single case, may, by the same means, be accomplished on a wider scale. Whatever influence may have redeemed a single district, may, under the same guidance, redeem and set in order adjoining districts. Those who have kept pace with the history of this movement are authorized in saying that its possibilities are almost limitless, and will ultimately wipe out the great mass of morbid agencies, and leave the death rate to

167

be reckoned only by old age. It is toward this end that American sanitarians are moving—very far this side of it, certainly, but still

In many lines of life my own State has occupied a proud position in the family of States. Her statesmen, her soldiers, her pulpit orators, her medical men, have stood in the front ranks, and often been leaders in public attention. Shall she, in this greatest health movement of the age, fall from her high place and follow as a tenthrate power in the wake of States which were forests when she was mature and a beacon light? Are not her sons side by side with the sons of other States, willing to work for humanity? Is not the essential value of any true work of infinitely more importance than the renown or the gold which may grow out of it? Is not the consciousness of a life saved, the true glory of man?

But the sanitary movement does not stop when it has drained your grounds and sewered your privy vaults. It proposes to look into the structure of your houses, public and private; claims that architecture is within its province, and demands that your dwellings, your churches, your theaters, your public schools, your hospitals, your court-houses, and your prisons shall be subject to sanitary rules. They are all a part of civilized life, and civilized life is the subject-matter to which sanitation addresses itself.

The sanitary engineering of Col. Waring is shown in his great work at Memphis, placing the stricken city in a condition which precludes the possibility of such disaster as overwhelmed her in '78. So also may sanitary architecture be shown by the skill with which air and sunlight are provided for in your churches, and theaters, and schools, and prisons. The Black Hole of Calcutta is an extreme case, a little on this side of which, in hygienic adaptations, stand some of the structures which are meant for the care of human beings.

These are the closing years of the 19th century. In all the lines of thought the world is full of light. Science and philosophy have

placed all material interests at their highest.

Our resources are exhaustless; our possibilities are without limit; and yet, in the very heart of the continent, in the midst of a proud and brave people, the stranger chances upon an imposing structure designed for the accommodation of five hundred people, crowded to suffocation by eight hundred to a thousand; a structure planted upon a dead-level—a low level—a level without drainage, without sunlight, without ventilation; unsewered cess-pools recking with human excreta, standing unwashed between the sick room and the dining hall; sending up by day and by night its pestilential vapors to the well, and fatal effluvia to the sick; stagnant waters, mixed with the garbage from a dense population, adding their quota to an already vitiated atmosphere, which goes in and out, and in again, to the lungs and blood of men and women already stifled by an air which would poison the sickliest city on the Ganges—with what bewilderment would the stranger contemplate such a fact as this.

Sanitation, I say, must look to architecture; for in the midst of

Sanitation, I say, must look to architecture; for in the midst of pestilential vapors it is not the criminal alone who suffers. Your luxurious parlors may not have a chair for the forger, the thief, or the manslayer; you may exclude him by your social law; but how

168

exclude from the cushioned chair at your fireside; how exclude from the elegant tapestry of your bed-room; how exclude from the soft couch of your little ones the pauperized and polluted air which a square like this sends up to the heavens about your chosen homes?

Men in authority must listen to the voice of science. If they do not recognize her ordinary tones, this sanitary movement may evoke storm, winds, and thunder tones. Give us pure water; give us pure air; give us sunlight, cries the convict army. Philanthropy and science and common honesty echo the cry, and demand air and water and light as God's gift to man, even though that man be criminal.

Not medical this, you say. Outside of your province, think you? In the name of pain and suffering, and a stricken humanity, what is your province? And what conception have you of the practice of medicine? Is it simply to give sweet powders, and purgatives, and paregoric, emmenagogues, fever drops, and blue mass; and shall the Legislature merely levy taxes and build bridges and count the people? Very much of this unquestionably, but very much other than this also. Looking at it from the stand-point of to-day's science, is it not our province so to place and surround man that powders and drops and medicinal things shall not be necessary; so that all drug forces shall be outside of our province, and that practical medicine shall resolve itself into practical hygiene? Is not this the net purport and upshot of medical science?

The end at which we aim as medical men, in a spirit of true philanthropy, is freedom from disease, and a longer life. march of science is steadily onward, and in the line of its progress stands this twin idea of health and life prolonged. The dream of the alchemist has faded. He sought for a material drug in the shape of mineral or leaf or flower which should arrest decay and hold the life in perpetual activity. Death has defied the alchemist, closed his laboratory, and gathered him to his fathers.

The fabled spring of perpetual youth, so eagerly sought by Ponce De Leon, still hides its source in the Lotus-land, and there it will hide forever. The only hope left for man for a little longer postponement of that physical destiny we call death is in the development of sanitary science. We have crossed the threshold of its gorgeous temple, and have wandered a little through its inner chambers. We have seen enough to satisfy us that, through the ministry of its earnest priesthood, man will be lifted to a higher plane, walk with a firmer tread, and gaze with a clearer eye up to future possibilities.

Systems of medicine and virtues of drugs will come into being, and flourish and decay, and yet the essential principles of sanitary science will survive in vigor, because those principles are eternal as

the mountains.

Mr. H. S. Bennett, of Evansville, announced that he had been instructed by the committee on entertainment to inform the visiting physicians that carriages would be at the St. George Hotel at 8 o'clock, on the following morning, for the purpose of taking a drive around the city.

The Council then adjourned until 10 o'clock Thursday morning,

April 22.

April 22, 10 o'clock a.m. Present, as before. On the call for reports of committees, Dr. J. D. Plunket, of Tennessee, chairman of the Committee on Quarantine and Inspection Matters on the Lower Mississippi, submitted the following:

Report of a Committee of the Sanitary Council of the Mississippi Valley on certain Topics of the Project of Business submitted for the Action of the Council by the President, R. C. Kedzie, M. D., of Lansing, Michigan.

Mr. President:—Your committee, to which was referred sundry subjects for discussion and formulation, and which subjects are hereinafter recited, begs leave to report that it has had the various propositions under consideration, and now offers for the action of the Council the following resolutions, as embodying the views of the committee:

First. Representatives of the National Board to reside at quarantine station on the Mississippi river. Also, a representative to reside at New Orleans, with the privilege of access to the records of the Louisiana State Board of Health, and to attend its meetings.

Resolved, That the Sanitary Council of the Mississippi Valley reaffirms the action had at its December, 1880, meeting in New Orleans; demands that the Louisiana State Board of Health invite the appointment and maintenance by the National Board of Health, of inspectors at New Orleans, at Eadsport, and at the Mississippi quarantine station; and announces that in the event of any failure on the part of the said State Board of Health of Louisiana to act in good faith toward said inspectors, then the boards of health represented in this Council will be compelled to take into their own hands the protection of the health of their own people.

Second. Arrangement of the work of the inspectors of railroads and steamboats, the inspection at the mouth of the river, and ordering infected vessels to Ship Island.

Resolved, That the inspection service of river and rail transportation by the National Board of Health is hereby indorsed, and its re-establishment for the ensuing season is urged, with the compact on behalf of the representatives of this Council that the certificates and bills of health issued by said inspection service shall be accepted as prima facie evidence of the sanitary status of vessels and trains presenting the same.

Resolved, That this Council, being firmly convinced that the safety of New Orleans, as well as of the Valley, lies in the rigid exclusion of infected ships from the Lower Mississippi, strenuously urges upon the State Board of Health of Louisiana the modification of section 6 of its "rules and regulations for the government of quarantine officers and stations," etc., so as to read:

Sec. 6. All vessels from ports in which yellow fever is prevailing, or from ports where other contagious or infectious diseases are reported to exist, shall be inspected at Eadsport, and if any such be found to be infected or to furnish reasonable ground for suspicion of infection, such vessel shall not be allowed to pass Eadsport northwise, except upon presentation of a certificate from the inspec-

tor of the National Board of Health at the Ship Island quarantine station, setting forth that the vessel has been subjected to proper treatment and is free from liability of conveying contagion.

Resolved, That, in the judgment of this COUNCIL, the quarantine of vessels and freight should consist of purification of the vessel and its contents, which should then be returned to commerce as speedily as practicable, and that any arbitrary detention beyond the time necessary for such purification is not only unnecessary, but positively increases the danger of propagating and spreading infection.

Third. The means of informing the Boards of Health in the Valley of apprehended danger.

Resolved, That this Council condemns all methods of suppression and secrecy with reference to information of contagious or infectious diseases, and therefore discountenances the use of cypher telegrams; but in the event of danger from such diseases at any point in the Mississippi Valley, it is the duty of the executive officer of any health organization of such place to fully and promptly advise the proper authorities at all threatened points.

In addition to the foregoing, your committee respectfully submits that it is now a well-settled opinion of sanitary authorities that quarantine for yellow fever, especially in latitudes subject to the epidemic prevalence of that disease, should never be located on the main-land. The peculiar manner of extension of that pestilence over contiguous territory renders an insular position of hospitals in which the sick are treated, and of buildings to which infected cargoes are removed, absolutely essential to secure perfect safety to surrounding communities. States and municipalities which have organized their quarantine establishments by removing them from the main-land to uninhabited islands have had the happiest results. It was to secure this great and practicable reform in the management of the Mississippi quarantine that certain propositions were made to the State Board of Health of Louisiana.

Although in the quarantine system of the Lower Mississippi it is so manifest as to scarcely require argument, yet it is due the Council that we should briefly discuss the following propositions:

- 1. The present quarantine establishment is wholly unfit for the reception of yellow-fever patients, for the detention of persons exposed to yellow fever, or for the care of infected cargoes.
- A. For the care of yellow-fever patients we hold that the hospital must be located on an island in order to give the greatest security against the spread of yellow fever. It is no sufficient argument to allege that yellow fever has never yet spread from the hospital at the Mississippi quarantine. The proofs of the allegation are by no means convincing, as there are many circumstances vitiating that conclusion. But even if it were true, the movements of the population on the Lower Mississippi are rapidly changing the neighborhood of the quarantine. One of these settlements is within a few hundred yards of the station. A large population of negroes is accumulating on the banks of the Lower Mississippi, whose habits of living render the reception and propagation of yellow fever a matter of the greatest certainty.

B. The detention of the well, who have been exposed to yellow fever, at the Mississippi quarantine should no longer be allowed. It is located on the banks of the Mississippi, is but a few feet above the level of the Gulf of Mexico, and is protected from the overflow of the river by levees. According to the report of Dr. Joseph Jones, the inhabitants of this region are annually liable to visitations of the malignant malarial and hemorrhagic fevers of the alluvial regions in tropical, semi-tropical and temperate countries, and these fevers are becoming more and more virulent annually, owing to the rapid increase of the acreage of rice-culture. The fear of being confined in the buildings on the quarantine grounds, owing to the danger of contracting malarial fever, is often expressed by seamen familiar with the history of those subjected to detention.

C. The same objection to the lightering of infected eargoes and their storage in warehouses applies as to the care of yellow-fever patients on the main-land. Such transfer of cargoes and their subsequent disinfection must be undertaken at island warehouses if we would secure the greatest possible immunity from the spread of in-

fection.

2. A quarantine establishment is now provided at Ship Island, having a convenient location on an uninhabited island, and fully furnished with every necessary convenience and appliance for the treatment of yellow-fever patients, for the care and comfort of persons exposed to infection, for the disinfection and storage of infected cargoes, and for the immediate

and thorough cleansing and purification of ships.

Unsuitable as the Mississippi quarantine is for the protection of the Valley against the importation of yellow-fever infection, there has been no method of supplementing its defects until the Ship Island quarantine was established by the General Government. This quarantine fully meets all of the requirements which science and skill demand to render complete the Gulf coast defenses against the introduction of yellow fever. From the publications of the National Board of Health we learn the following facts in regard to this quarantine:

Ship Island was selected for a government quarantine because: 1st. "it belonged to the United States Government." 2d. It was uninhabited. 3d. Its conformation permitted the location of the several departments so as to secure complete isolation of each from the other. 4th. It afforded safe anchorage. 5th. It was convenient to the largest extent of quarantine coast, viz: from Pensacola to the mouth of the Mississippi. 6th. The objects sought to be accomplished by this quarantine were simply co-operative with the local quarantine of the adjacent coast.

It does not supersede existing local quarantine except so far as it provides all the desiderata of the quarantines of that region, in an insular location where vessels infected with yellow fever, with their passengers, crews, and cargoes, can be safely, promptly, and adequately cared for with the least possible danger of spreading the disease.

This establishment is now fully equipped with every necessary appliance to give proper care and treatment to the sick of yellow fever; to isolate, with every needful comfort, those detained for observation;

adequate warehouses for the storage of infected cargoes; and every necessary means for the thorough purification of ships.

- 3. It is alleged against this quarantine: (a) That it does not prevent the passage of infected vessels into the harbors of the coast; (b) That it is too distant from important points, as the mouth of the Mississippi; (c) That, if recognized and made part of the quarantine system of the Gulf coast, it would seriously obstruct commerce.
- a. The Ship Island quarantine is not a station for the interception of passing vessels, but is designed solely to care for infected ships. The duty of intercepting vessels properly belongs to the local quarantines, and if vigilantly performed by them no infected ship, baggage, or cargo would hereafter ever reach the main-land of that coast.
- b. The distance of Ship Island from the mouths of the Mississippi is no valid argument against sending infected ships to that quarantine, in view of the absence of all suitable provisions for treating them at the Mississippi quarantine, and of the imminent danger which follows their passage up the river to that station. We must insist that a ship infected with yellow fever is contraband of quarantine, and must be completely relieved of its disability before it is allowed again to enter the ports of the Gulf. Half-way measures of purification should no longer be tolerated.
- c. The statement that, if infected vessels bound to New Orleans must first go to Ship Island for cleansing and disinfection, the commerce of that city would be injured, cannot be sustained by any facts. It appears from the report of Dr. Joseph Jones, President of the State Board of Health of Louisiana, that 1,2/1 vessels passed the Mississippi station in 1880; of these, but 151 were detained for purification, disinfection and fumigation, and of these latter but one proved to be an infected vessel. It follows that, if the quarantine officer had sent all infected vessels arriving at the Mississippi station during the year 1880 to Ship Island, but one vessel out of 1,271 would have had that destination. It is absurd, therefore, to presume that if the health authorities of the State of Louisiana were to regard the Ship Island quarantine as the proper destination for infected vessels bound for New Orleans, the foreign commerce of that city would be impaired. On the contrary, facts prove that the passage of that one vessel to the wharves of New Orleans proved a source of imminent danger to all of its inland traffic.

In conclusion, your committee desires to express the firm conviction that the Ship Island quarantine meets a want of the local quarantines of that part of the Gulf coast which cannot be superseded by any amount of vigilance, nor by any stringency of rules of such quarantines.

We believe, therefore, that this Council should adopt, and as far as possible secure, the enforcement of, the proposition that an officer should be stationed at Port Eads, who shall be required to send all vessels infected with yellow fever to the Ship Island quarantine.

In the same connection, we would add that it is important that all of the local quarantines, from Mobile to the mouth of the Missississippi, be requested to send vessels infected with yellow fever to that quarantine.

In order to secure the protection which the Council seeks, it is evident from the attitude of some of the officers of the local quarantines of that section of the coast that co-operation in this plan can be secured only by the intervention of some central authority which can harmonize conflicting opinions and interests. This authority is found in the President of the United States, and it is the opinion of your committee, formed after mature deliberation, that, under the circumstances, adequate protection against the importation of yellow fever into the Mississippi Valley during the approaching season cannot be assured except by an appeal to the President to exercise jurisdiction over the quarantines of the coast. To this end your committee submits for the consideration of the Council the following resolutions:

Resolved, 1. That there is good reason to believe that the infection which causes yellow fever has been exterminated from the soil of the United States by the extreme cold of the past winter, and that any future outbreak of that pestilence in this country must be due to a fresh importation from foreign countries of the infected matter which causes the disease.

- 2. That it is, therefore, of the greatest importance to the business interests of the country, and to the health and happiness of the people, especially of those living in districts liable to be visited by this scourge, that every avenue through which it may reach our shores be effectually guarded.
- 3. That, as yellow fever can reach this country from foreign ports only through our own seaports, the maintenance of quarantine establishments on the South Atlantic and Gulf coasts, so organized and administered as to be most effective against the introduction of yellow fever and least obstructive to commerce and travel, is an imperative necessity.
- 4. That, as representatives of the public health interests of the States of the Mississippi Valley, we especially recognize the importance of a more thorough and effective organization and administion of the quarantines of the Gulf coast, and particularly of that at the mouth of the Mississippi river, the great water-way of commerce and travel for the people of the Valley.
- 5. That the experience of the past teaches that the quarantines of that coast, and especially that on the Lower Mississippi, cannot be relied on to prevent the introduction of yellow fever into the Valley of the Mississippi, and that therefore immediate measures should be taken to so improve their management that all the resources of science and of human skill shall be applied to prevent another invasion of yellow fever through that channel.
- 6. That, considering the vast social, commercial and industrial interests involved in the prevention of the introduction of yellow fever at the mouth of the Mississippi river this season, the management of that quarantine is a matter of grave National concern, and should lead to such action of the General Government as will give the greatest effectiveness to its administration.
- 7. That, with a view to accomplish the objects set forth in the preceding resolutions most speedily and directly, the President of the United States be, and he is hereby, respectfully, but earnestly,

5,

requested to ascertain at the earliest practicable moment whether any, and if so, what, additional rules and regulations are required to render the quarantines of the Gulf coast, and especially that at the mouth of the Mississippi river, effective in preventing the introduction of yellow fever into the United States; and if additional rules and regulations are required that they be immediately made and duly enforced during the approaching quarantine season.

8. That a committee, consisting of one member from each State represented in this association, be appointed, of which the President shall be the Chairman and the Secretary shall be the Secretary, to lay these resolutions before the President of the United States and to urge immediate action thereon.

All of which is respectfully submitted.

T. G. Birchett, of Mississippi. Gustave Devron, of Louisiana. D. H. Dungan, of Arkansas. G. W. Foote, of Illinois. D. B. Hillis, of Iowa. H. G. Jones, of Indiana. R. C. Kedzie, of Michigan. A. J. Miles, of Ohio. J. Speed, of Kentucky.

J. M. Tarbell, of Florida. J. D. Plunket, of Tennessee, *Chairman*.

The report as read was accepted, and the resolutions were unanimously adopted by the Council. In obedience to the eighth resolution, the following members were appointed a committee to lay the report and the resolutions before the President of the United States, and to urge immediate action thereon:

F. R. MICHEL, of Alabama.

A. L. Breysacher, of Arkansas.

S. C. Cobb, of Florida. J. H. Rauch, of Illinois,

Secretary of the Committee.

Thad. W. Stevens, of Indiana. W. S. Robertson, of Iowa. Pinckney Thompson, of Kentucky. C. B. White, of Louisiana. R. C. Kedzie, of Michigan. D. W. Hand, of Minnesota. Wirt Johnston, of Mississippi. J. Spiegelhalter, of Missouri. A. J. Miles, of Ohio. J. D. Plunket, of Tennessee.

D. S. SWEARINGEN, of Texas. O. W. Wight, of Wisconsin.

J. J. Speed, of Kentucky, (President of the Council) Chairman. 175

Dr. Pinckney Thompson, by unanimous consent, read a communication from Henry C. Haarstick, esq, superintendent of the Mississippi Valley Transportation Company, setting forth that when a boat had, or was even suspected of having, yellow fever aboard, it was found impossible to land or obtain entrance to marine hospitals. He wished some action taken on the matter. Seamen, under which term river boatmen of all classes were included, were obliged to pay hospital dues, with the understanding that when sick or disabled the Government would furnish them proper medical and surgical attention, nursing, etc. During the past three years a man with a broken leg or suffering from diarrhea or any other non-contagious disease, would be refused admission to a marine-hospital, or to the benefits for which he was taxed, if there was any suspicion of yellow fever on the river. Dr. Thompson thought the grievance well founded and hoped some expression of opinion would be had by the Council.

Dr. Mitchell admitted the justice of the complaint, but objected to the charge that the River-Inspection Service of the National Board of Health was in any wise responsible for it, as the tenor of Mr. Haarstick's letter would seem to imply. The real difficulty lay in the disinclination of local authorities to run any chances of infection during the yellow-fever season. They naturally looked with suspicion and alarm on every case of sickness landed from the river in their midst at such times. He was inclined to think that some arrangement might be made whereby the River-Inspection Service could care for such patients, the charges to be defrayed by the Marine-Hospital Service. The River-Inspection stations were fully equipped, and with a proper understanding he believed the

difficulty could be obviated.

Dr. Thompson said some means should undoubtedly be devised to take care of these men when sick or disabled at points where the local boards of health or local authorities refused to receive them. He offered the following resolution:

Resolved. That the National Board of Health and the Marine-Hospital Service be requested to take such conjoint action in the premises as will protect the health, rights and interests of the men engaged in the navigation of the Missisppi and its tributaries, a class of men who are an indispensable factor in the growth and prosperity of the Valley.

Adopted.

Dr. Gustave Devron, of Louisiana, Chairman of the Committee on Methods of securing Harmony and Concert of Action by State and Municipal Boards of Health in the Mississippi Valley, reported the following preamble and resolution:

WHEREAS. Experience has shown that no uniformity or concert of action can be secured by the arbitrary regulations of municipal or State boards of health in arresting the spread of yellow fever; therefore, be it—

Resolved. That it is the sense of this Council that the adoption by State and municipal health organizations of this Valley of the rules and regulations of the National Board of Health as published, furnishes a practical basis for harmonious action if yellow fever or other infectious or contagious disease prevail at any point tending to spread.

GUSTAVE DEVRON.

GUSTAVE DEVRON.

Chairman, on behalf of the Committee.

The report was accepted and the preamble and resolution were unanimously adopted. ha red

Dr. Devron stated that he had received a telegram from the Auxiliary Sanitary Association of New Orleans, which he would like A 176 .

to lay before the Council. Permission having been accorded he read the following:

New Orleans, April 20, 1881.

Dr. Gustavus Devron, care Sanitary Council:

The following is the official copy of the resolutions adopted by the State Board, (the vote standing five to two, Booth and Marks dissenting), offered by the Board in order to allay apprehension in the public mind in the city and surrounding country.

To secure a correct report of the first case or cases of yellow fever which may occur in this city, or within the jurisdiction of the State Board of Health,

Be it resolved. That an agent of the National Board, to be stationed in New Orleans, shall have access to the daily reports of deaths received by the State Board, and of sickness when reports of sickness are made; and that whenever the agent of this Board, or the health authorities of the State receive information of the alleged existence of one or more cases of disease of a doubtful or suspicious character as to its being infectious, the State Board agrees to send one of its officers who, together with the agent of the National Board, shall investigate the case, the two parties presenting the result of their investigations to their respective Boards.

Be it further resolved, That, in case the two parties disagree, a third physician acceptable to the two parties shall be selected by them as umpire. A majority report shall be final, and reported as such to the National Board in cipher. The inspector so appointed should have a thorough knowledge of all diseases of the Lower Mississippi Valley, especially yellow fever, and should personally be acceptable to the Board, in order to secure friendly relations and useful co-operation; and it shal the duty of said local inspector of the National Board of Health to be present at all the meetings of the State Board.

Be it further resolved. That the President of this Board be requested to transmit a copy of these resolutions to the President of the National Board and the President of the Sanitary Council of the Mississippi Valley.

Regarding quarantine inspection, it was adopted that this Board is of opinion that it is without power to nominate or appoint any Mississippi quarantine station inspector whatever, and refers the matter of such nomination and appointment to His Excellency, the Governor.

John C. Henderson,

Secretary of the New Orleans Auxiliary Sanitary Association.

Dr. Devron explained at some length the attitude of the Louisiana State Board of Health, and after further discussion the communication was laid upon the table, to permit the Council to proceed to the election of officers for the ensuing year.

This resulted in the election of Dr. J. J. Speed, of Louisville, Ky., for President, and Dr. Wirt Johnston, of Jackson, Miss., for Vice President.

On motion, the Board adjourned until 2 o'clock P. M.

At the afternoon session, after the Council was called to order, the Secretary read the following communication from the Hon. S. C. Cobb, of Pensacola, Fla.:

Honorable Members of the Mississippi Valley Sanitary Council:

Gentlemen: Regretting that I cannot be with you in person on so momentous an occasion, involving such extensive interests, it seems proper to suggest, as our experience opens the way, what safeguards we ought to place along the path where blighted prospects, ruined hopes and household sorrows untold, strew the way with their skeletons, pointing the finger of warning for those who follow to the source of their woes. Not alone man's stupidity or cupidity can be called to account. From the propensity to ride hobbies, from the

almost insane theories attaching to local privileges, we have been called to suffer great calamities and wide-spread disaster, and have been powerless to rescue where a privilege to prevent would have been humane, and primarily very cheap. We cannot call upon any local community to bear the whole burden—that would require large amounts of money and constant care—to provide against dangers that come from the yellow-fever sources. Therefore, it is imperative that the National government take full and complete charge of all maritime quarantines, and by their own officers, at their own quarantine stations, maintain that vigilance that they are called upon to exercise against any foreign enemy.

The consideration of expense cannot enter into the matter, for the Nation now receives from our diminishing commercial marine a surplus of not less than one million of dollars, levied on such proerty, without any return being made to it either in direct or indirect

benefits.

If United States tonnage ventures to seek business from foreign ports, a special tax of thirty cents per ton is levied in addition to the usual custom-house fees and hospital dues. Let the Nation only expend the revenue it receives from this extraordinary tax, and not one case of fever can enter our country. We need to agitate, and must agitate this matter until the National government insures the safety and immunity from epidemic diseases of not only the local ports of the respective States, but all the great highways of inter-State commerce as well.

Agitate, gentlemen; continue to agitate until the voice of an intelligent public opinion shall compel our Congress to treat this matter, of such vital importance, with the consideration it demands.

Yours truly,

S. C. COBB.

The communication as read was accepted, and ordered spread upon the minutes.

The Secretary read the report of the committee on the Quarantine Classification of Freight, at the conclusion of which the President remarked that the subject was one of the most important, in its practical bearings, that had come before the Council, and that a full and free expression of opinion was desirable. Dr. R. W. Mitchell would like to hear Capt. O'Neal's views as one directly interested. That gentleman said he was perfectly satisfied with the report and the exclusion of the articles mentioned therein, and he considered if it was rigidly carried out, reasonable protection would be assured, Upon a further call from the President for dissent, criticism or amendment, Dr. Plunket, of Tenn., said that he considered there was no room for any whatever, and he moved to adopt it as read.

The report thereupon was unanimously adopted, and the Secretary was instructed to secure its printing in proper form and distribution to the various transportation companies and health authorities in the

Valley, which was done in the following form:

-14

## QUARANTINE CLASSIFICATION OF FREIGHT.

SANITARY COUNCIL OF THE MISSISSIPPI VALLEY, OFFICE OF THE SECRETARY, April 21, 1:81.

At the session of the Sanitary Council of the Mississippi Valley, held this day in the city of Evansville, Ind., the Secretary of the Council was instructed to have printed, for the information of transportation companies, the classification of articles of merchandise

for quarantine purposes as adopted by the Council.

The preparation of this classification was undertaken at the request of the river and rail transportation companies, with a view to securing protection alike to shippers and the companies during the existence of a yellow-fever epidemic, by having an authoritative declaration of articles of freight considered dangerous as contagion-carriers, and which declaration may furnish the basis of juniform rules for health boards and quarantine authorities.

As a result of its deliberations, the Council unanimously adopted

the following—

MEMORANDUM FOR A CLASSIFICATION OF ARTICLES OF MERCHANDIZE FOR QUARANTINE PURPOSES.

In the following suggestions for a classification of articles of merchandise for quarantine purposes during the existence of epidemic yellow fever, it is assumed that this disease is "due to a specific particulate cause which is capable of growth and reproduction," and which is transportable, not only by adhesion to surfaces, but in the air from an infected locality.

"It is also prudent to assume that the growth and reproduction of this cause [i. e., the yellow-fever poison] is connected with the presence of filth in the sanitary sense of that word, including decaying organic matters and defective ventilation."—Circular No. 5.

National Board of Health, July 12, 1879.

It follows from the first assumption, that closed vehicles, compartments or receptacles, and articles or masses of material capable of retaining air motionless in meshes, folds, webs or interstices, are dangerous as contagion-carriers in proportion as their character, use or structure prevents or retards aeration; and from the second assumption, in proportion as such articles or materials furnish organic matter liable to decay. Hence, an empty box-car or the unventilated hold of a vessel in ballast may be the means of introducing the poison by transporting infected atmosphere, while goods from the same locality might be innocuous if thoroughly exposed to the open air during transit.

Two practical deductions from the foregoing premises are:

First. Box or close freight cars should not be allowed to leave an infected locality until after special treatment. Such treatment should embrace:

(a). The thorough cleansing and washing of the interior of the car by means of a hose or in some similar drenching manner.

(b). Its immediate disinfection (while still wet) by burning sulphur-eighteen ounces to each 1,000 cubic feet of space—all openings to be closed as perfectly as possible for at least six hours.

(c). Its removal within ten hours after beginning the sulphur combustion, and before being opened, to a point at least five miles from the infected locality, at which point it should be opened and thoroughly ventilated by a fire in each end for the space of six hours, or by the forced injection of pure air by means of a fan blast and flexible hose.*

It would be better, however, to absolutely prohibit the removal of a box-car from an infected locality, except in the case of through shipments beyond the region where yellow fever may become epi-

demic.

For the same reasons, the transportation from an infected locality, of goods of any description, in the closed hold or unventilated cargo-box of a steamboat, barge, or other water-craft, should be prohibited; and no boat, barge, or other water-craft should be permitted to depart from an infected port without ample and efficient

ventilation of all compartments during the voyage or trip.

Second. Articles not believed capable in themselves of conveying contagion, may be made dangerous by the character of their packing. A chemically clean article, if packed with sawdust, straw, cork-paper, or similar material in an infected atmosphere, may be the means of infecting the individual who opens the package. Not only this, but there is reason to believe that contagion has been carried from an infected locality in boxes, barrels, and similar receptacles, simply by means of the contained air. Original packages of goods which have been stored in an infected locality are dangerous in proportion as their packings or envelopes allow access of the infected air to the contents. Thus, bottled liquids in wicker baskets or hampers; canned goods in crates or slat boxes; earthenware, crockery, etc., in loose-jointed barrels, casks or open crates; textile fabrics in bagging or sacking, etc., would be dangerous, when the same goods in tight wooden boxes, barrels or casks, or in metal cans or cases, would not be dangerous, or only remotely so.

#### SCHEDULE OF ARTICLES DECLARED CONTRABAND OF QUARANTINE.

With the foregoing explanation the following list of articles is submitted, with the recommendation of the Sanitary Council of the Mississippi Valley, that they be declared contraband of quarantine, in the belief that they are dangerous as contagion-carriers, and their removal from a place infected with yellow-fever to any other point where yellow-fever may become epidemic, should be prohibited. This recommendation does not, however, extend to freight packed in close receptacles or vehicles for through shipment to points outside the epidemic region of yellow fever.

Articles of every description packed in wool, cotton, hemp, flax, jute, straw, sawdust or similar material.

^{*}This seems to be the only available method of securing a complete change of air in the ends of box cars as at present constructed. If they were provided with doors in the ends, opening from root to floor, they could be readily ventilated without fire. Horizontal shutters, one foot deep and extending across the car from side to side—one opening down to the floor, one up to the roof, and one midway between—would probably answer every purpose. If ventilated by heat, the stoves should be placed as near the ends as safety from fire will permit; it is the few feet of dead air in these localities which is dangerous, and which requires to be displaced.

Bellows.

Bran.

Broom corn.

Boats, barges and other water-craft, unless clean and well ventilated.

Boxes, empty.

Churns.

Cocoa matting or other fabrics of cocoa.

Cotton, loose. Cotton fabries.

Cotton seed and waste of any kind.

Excelsior. Feathers.

Felting. Fertilizers.

Flax or flax fabrics.

Fodder.

Fruits, fresh or dried. Furniture, upholstered.

Game, dressed.

Grain.

Grass mats.

Hair and hair fabrics.

Hay.

Hemp and hemp fabrics.

Hides. Hops.

Horns, hoofs and other animal remains.

Jute in any form.

Kraut. Leather.

Mail matter, (unless subjected to disinfection.)

Manure, marl and earth.

Matting, cotton, hemp, straw or wool.

Mattresses.
Meats, fresh.

Merchandise of any description so packed as to retain air from an infected locality.

Moss.

Oil cake.

Paper.

Personal baggage, (unless subjected to disinfection).

Poultry, dressed.

Rags.

Railroad cars, upholstered, box or close freight.

Ramie plant and roots, packed.

Roofing, felt. Saddles, stuffed.

Seeds of all kinds.

Shorts.

Skins of all kinds.

Soap stock. Tarpaulins.

Tents and fixtures.
Trunks.
Valises.
Vegetables, loose or packed.
Vehicles, upholstered.
Wadding.
Wagons, (children's) upholstered.
Wool and wool fabrics.
Yarns, cotton or wool.

Official:

J. H. RAUCH, M. D. Secretary of the Council.

The following resolutions were offered and unanimously adopted by the Council:

## By Dr. J. H. Rauch:

Resolved, That the representatives from Memphis, Vicksburg, and New Orleans be invited to state to the COUNCIL what has been done during the past year in their respective cities in the way of sanitary work; and in the case of Memphis, to what extent the recommendations of the National Board of Health for the sanitary regeneration of that city have been carried out.

The verbal statement concerning Memphis not being considered satisfactory by the Council, a supplemental resolution was adopted, to-wit:

## By Dr. Pinckney Thompson:

Resolved, That the Secretary be instructed to address a letter to the President of the Taxing District and the President of the Board of Health of Memphis asking for a statement in detail of the sanitary work actually performed since the close of the epidemic in 1879, and the extent to which the recommendations of the committee of the National Board of Health, in regard to the sanitary condition of Memphis, have been carried out—the Secretary to furnish the correspondence to the press for publication.

## By Dr. J. J. Speed:

Resolved, That the Sanitary Council of the Mississippi Valley indorses and approves the action of the Boards of Health of the States of Mississippi and Tennessee, and of the cities of Vicksburg and Memphis, in the recent enactment of health ordinances and regulations for the ensuing year.

## By Dr. T. G. Birchett:

Resolved. That the address of the retiring President, Dr. R. C. Kedzie, be adopted as fully expressing the views of this COUNCIL concerning the attitude of the Louisiana State Board of Health toward the health interests of the Valley; and the Secretary be furnished with a copy of said address for immediate publication.

## By Dr. Plunket:

Resolved. That the Secretary of the SANITARY COUNCIL be, and he is hereby, instructed to furnish the reports of the committees which have been adopted to the Secretary of the National Board of Health with a request that said reports be published in the Bulletin of said Board, for the prompt information of the various health organizations of the country.

## By Dr. H. G. Jones:

Resolved, That the health organizations, State and municipal, represented in the SANITARY COUNCIL OF THE MISSISSIPPI VALLEY be, and are hereby, requested to use their influence with the members of Congress of their respective districts to secure adequate appropriations of money for the use of the National Board of Health, to the end that said Board may carry out the measures it has already inaugurated for the protection of the public health and the consequent advancement of the material prosperity of this region.

## By Dr. A. J. Miles:

Resolved. That the Secretary of the COUNCIL be, and he is hereby, directed to have printed for the information of transportation companies the classification of articles of merchandise for quarantine purposes, as adopted by the COUNCIL this day.

## By Dr. L. F. Salomon:

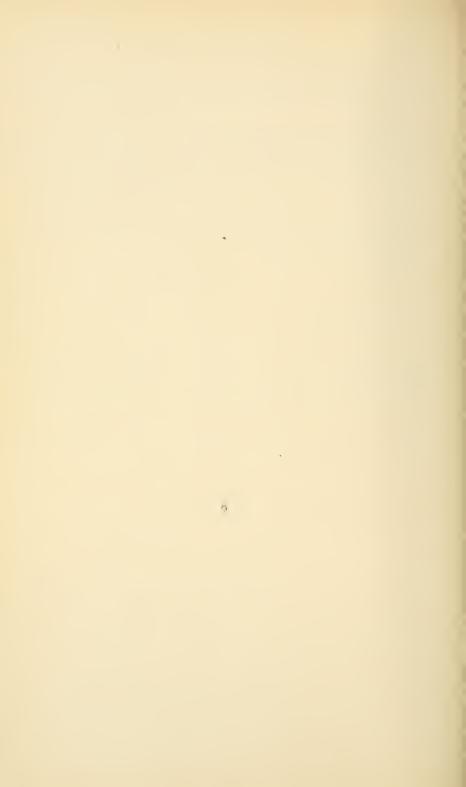

Resolved, That the thanks of the Sanitary Council of the Mississippi Valley are due and are hereby tendered to the several railroad lines for transportation furnished; to the Western Union Telegraph Company for the free use of its lines; to the press for full and unusually accurate reports of proceedings; to the local committee of the citizens of Evansville for their numerous courtesies, untiring attention and cordial reception, and last, but not least, to the ladies of Evansville who provided the complimentary banquet for the enjoyment of their visitors.

Resolved, That our visit to Evansville will be held in remembrance as one of the most pleasant and enjoyable episodes of our lives.

After tendering a vote of thanks to the late presiding officer, Dr. Kedzie, the Council adjourned its third annual meeting *sine die*.

John H. Rauch, M. D., Secretary.

# METEOROLOGICAL TABLES.

#### METEOROLOGICAL.

The appended meteorological tables have been kindly furnished, at the request of the Secretary, by Brevet Major-General W. B.

Hazen, Chief Signal Officer of the Army.

They comprise statements of (1) mean barometer, reduced to sea level; (2) mean temperature; (3) mean relative humidity; (4) the precipitation, in inches and hundredths; (5) the prevailing direction of winds; and (6) the total wind movement in miles. These have been compiled from the observations made at the stations in Chicago, Springfield and Cairo, Ill., St. Louis, Mo., Dubuque and Keokuk, Iowa, Indianapolis, Ind., and Louisville, Ky., from the date of establishment of each station, respectively, down to the close of December, 1881. These eight stations, it will be seen, sufficiently cover the whole area of Illinois to enable a tolerably accurate estimate to be made of the meteorological conditions of any given section of the State.

In a problem of such complexity as the relations between disease variation and variation of meteorological elements, no contribution is to be overlooked; and the student in this branch of etiology has, in the tables here furnished, a mass of data which may be turned

to good account in the future.

It is to be hoped that the Board may soon be in a position to make available the proffer of the Signal Service Bureau, to furnish a portion of the necessary equipment for a large number of meteorological stations throughout the State.

#### ADDENDA.

- A fasciculus of this report, embracing the section "Medical Colleges," pp. 37-96, was sent out, as soon as printed to the Deans and Secretaries of all the institutions listed in the Directorry, with the following notification printed thereon: "Additions and corrections for the Directorry should be addressed to the Secretary, State Board of Health, Springfield, Ill."
- Only the following have been received up to the time of going to press; others, if furnished, will be used in the preparation of a new edition of the DIRECTORY for the next annual report.
- MISSOURI MEDICAL COLLEGE, St. Louis, Mo., page 69, to the "Requirements for Graduation" should be added—attendance on 'wo full terms of lectures.
- Physio-Medical Institute Cincinnati, Ohio, page 84—hygiene, otology, pathology, medical jurisprudence, should be added to the list of subjects of lectures in the "Course of Instruction," and the term should read twenty weeks, instead of "nineteen and one-half weeks."

#### ERRATA.

- P. 50, Medical Department, University of Denver, Col.—for "per cent. of graduates to students, 63," read 33
- P. 56, Illinois State Board of Health-for "number of candidates licensed, 196," read 202.
- P. 95, Summary—for "Total number of graduates at commencements since 1882," read in 1872.
- Ibid-for "Total number of colleges whose diplomas have been presented to this Board and are recognized conditionally, 18," read 10.
- *Ibid*—for "Total number of matriculates, session of 1881-2 (estimated in 17 cases,) 13,094," read 13,049.
